# ANNUAL REPORT OF THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

OFFICE OF THE COMMISSIONERS .  
OF THE DISTRICT OF COLUMBIA,  
*Washington, December 2, 1895.*

## The PRESIDENT:

The Commissioners of the District of Columbia submit herewith their report of their official doings for the fiscal year ended June 30, 1895.

The details of the transactions of the government of the District are mainly set forth in the accompanying statements of the officials immediately in charge of the several departments of said government, but the Commissioners have taken occasion to preface those exhibits with special reports and comments on matters of general local interest, and with recommendations for legislation designed to improve the administration of the affairs committed to their charge.

## APPROPRIATIONS AND REVENUES.

The appropriations for the year payable out of the general revenues were \$6,614,275.72. The amount of general revenues received during the year and of other resources applicable to the payment of such appropriations was \$7,043,366.71; \$4,003,540.01 of that sum was derived from general taxes on private property, fees for licenses and privileges, and receipts from all sources other than the United States and the water department, but included a credit balance on account of prior years of \$684,485.39. The remaining \$3,039,826.70 represents the proportionate sum legally chargeable to the United States on account of said appropriations.

The expenses of the water department, which are wholly payable out of the revenues derived from water rents and taxes, amounted to \$424,882.28. The revenues of said department, including repayments and a balance at the beginning of the fiscal year of \$212,769.03, were \$555,811.99.

## DEBT.

The bonded and other interest-bearing debts of the District of Columbia are under charge of the Treasurer of the United States, but the Commissioners include in their annual estimates an estimate for the interest and sinking fund on these debts and for the salaries and contingent expenses of the sinking-fund office.

# 4 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

The bonded debt on June 30, 1895, was as follows:

| Description of bonds.   | Date of maturity. | Rate. | When due.             | Amount.          |
|---|-------------------|-------|-----------------------|------------------|
| <i>Per ct.</i>  |                   |       |                       |                  |
| Of the District of Columbia:  |                   |       |                       |                  |
| Water stock .....   | Oct. 1, 1901      | 7     | Jan. 1 and July 1.... | \$329, 000. 00   |
| Do .....  | July 1, 1903      | 7     | .....do .....         | 14, 000. 00      |
| Fifty-year funding .....  | Aug. 1, 1924      | 3. 65 | Feb. 1 and Aug. 1.... | 14, 189, 600. 00 |
| Twenty-year funding .....   | July 1, 1899      | 5     | Jan. 1 and July 1.... | 778, 000. 00     |
| Ten-year funding .....  | July 1, 1901      | 3. 5  | .....do .....         | 1, 890, 900. 00  |
| Of the late corporation of Washington:  |                   |       |                       |                  |
| Three-year (Emery) .....  | July 30, 1873     | 7. 3  | Interest ceased ..... | 100. 00          |
| Thirty-year funding .....   | Nov. 1, 1902      | 6     | May 1 and Nov. 1....  | 571, 100. 00     |
|   |                   |       |                       | 17, 772, 700. 00 |
| Stocks and bonds outstanding on which interest has ceased, there being funds for the payment of the principal and interest deposited in the United States Treasury: |                   |       |                       |                  |
| Corporation of Washington ten-year bonds .....  |                   |       |                       | \$150. 00        |
| Corporation of Washington 5 per cent general stock .....  |                   |       |                       | 1, 340. 01       |
| Corporation of Washington 6 per cent general stock .....  |                   |       |                       | 780. 17          |
| District of Columbia permanent improvement 6 per cent bonds .....   |                   |       |                       | 3, 890. 00       |
| Corporation of Washington twenty-year funding 6 per cent bonds .....  |                   |       |                       | 1, 850. 00       |
|   |                   |       |                       | 7, 920. 18       |
|   |                   |       |                       | 17, 780, 620. 18 |

## THE NONBONDED INTEREST-BEARING DEBT.

On June 30, 1894, the District owed the United States on account of advances for increasing the water supply, under the act approved July 15, 1882 (U. S. Stat. L., vol. 22, p. 168), \$684,214.83, which was payable in sixteen equal annual installments, with interest at 3 per cent per annum, out of any surplus of water rents. This obligation was thus in a process of easy extinction in a manner consistent with the uses to which the advances had been put, when, by an act of August 7, 1894 (U. S. Stat. L., vol. 28, p. 262), that method of liquidating the debt was modified by the following proviso: "*Provided*, That not exceeding three hundred thousand dollars of the surplus general revenues of the District of Columbia remaining on the first day of July, eighteen hundred and ninety-four, shall be transferred to the water fund to be applied in payment of the principal of the debt incurred for increasing the water supply as provided in the act of July fifteenth, eighteen hundred and eighty-two," and subsequently by a proviso in the District appropriation act of March 2, 1895 (ib., p. 764), transferring a like amount from the surplus general revenues remaining on the 1st of July, 1895, for the same purpose.

This account, therefore, may be stated as follows:

|  |                |
|--|----------------|
| Balance due July 1, 1894 .....   | \$684, 214. 83 |
| Increase by new advances for work, interest and sinking fund, and judgments of United States Court of Claims ..... | 54, 298. 15    |
|  | 738, 512. 98   |
| Less transfer of surplus of general revenues .....   | \$600, 000. 00 |
| Less payment of interest and sinking fund .....  | 40, 408. 98    |
|  | 640, 408. 98   |
| Balance due July 1, 1895 .....   | 98, 104. 00    |

## WATER MAIN DEBTS.

On July 1, 1895, the District of Columbia owed the United States \$248,566.65 on account of advances for the expense of laying the 48-inch water main and the Fourteenth street water main and connections.

## EXTINCTION OF ROCK CREEK PARK DEBT.

During the year the fourth and last installment of the District's proportion appropriated for the purchase of property for Rock Creek Park, under the act of Congress of September 27, 1890 (U. S. Stat. L., vol. 26, p. 492), was repaid to the United States with the interest due on the entire \$600,000, with which the District was charged. The interest amounted to \$27,000.

## FLOATING DEBT.

Under the organic law of the present District government, which prohibits the making of any expenditure or incurring of any obligation unless pursuant to authority previously granted by Congress, the floating indebtedness is substantially limited to judgments of the courts rendered after the passage of the appropriation laws and small amounts needful to give effect to requirements of law. In addition to these the District was under obligations at the close of the fiscal year to receive in payment of general and special taxes \$11,084.17 of drawback certificates issued for rebates on special assessments, etc., under acts of June 18, 1878 (U. S. Stat. L., vol. 20, p. 166); June 27, 1879 (vol. 21, p. 36); July 5, 1884 (vol. 23, p. 132); February 12, 1889 (vol. 25, p. 659), and June 2, 1890 (vol. 26, p. 125).

*Assessed value of taxable real estate and personal property in the District of Columbia on July 1, 1895.*

|   |                |  | 10, 971. 737    |

## RATE OF GENERAL TAX.

The rate of general tax for the year was fixed, pursuant to law, at \$1.50 on each \$100 for all taxable personal property and for all real property, except that used solely for agricultural purposes, the rate of which was \$1 per \$100 of assessed valuation.

## GENERAL ASSESSMENT OF REAL PROPERTY.

Under the provisions of the act of Congress "to provide an immediate revision and an equalization of real estate values in the District of Columbia," etc., approved August 14, 1894, James A. Bates, S. T. G. Morsell, and J. Harrison Johnson were, on the 16th day of August, 1894, appointed members of the permanent board of assessors. This board entered at once upon its work, and it is confidently believed that the result will be a satisfactory valuation for assessment purposes of the real properties of the District.

The amount of work to be done by this board in making the assessment of real property in the District of Columbia on which it is now engaged is so extensive that it will be impracticable for them to complete the assessment of the entire District in time for the collection of taxes based thereon within the period now prescribed by law. It is believed that by extraordinary exertion on the part of the assistant assessors the assessment for the city of Washington may be completed by the first Monday in April, 1896, instead of the first Monday in January, as now required; but so far as can now be foreseen the assessment of the portion of the District outside of said city can not be finished until long after that time. The Commissioners will, therefore, be under the necessity of requesting Congress to extend the time for completing the assessment in Washington until the first Monday in April, 1896, and in that portion outside of Washington until the first Monday in September, 1896, and make the collection of the tax for the latter section payable in one installment during the month of May, 1897. They have prepared a joint resolution to effect that result, and will submit it to Congress early in the coming session.

#### DEFECTS IN THE TAX-SALE SYSTEM.

By a decision of the supreme court of the District of Columbia in the case of *John H. Brewer v. the District of Columbia et. al.*, equity No. 9513, decided November 1, 1866 (Fifth Mackey's Reports, p. 274 et seq.), the District has been deprived of a large amount of money derivable from taxes. The substance of this decision is that a deed of property made in pursuance of a sale for arrears of taxes for any certain year, passes the property involved to the purchaser, discharged of the liens of all taxes remaining due and unpaid at the time of the sale, so far as the District is concerned. Many persons take advantage of this ruling and omit to pay their taxes, thus imposing undue burdens upon those who pay their taxes promptly. A bill, H. R. 3293, designed to remedy this defect was introduced in the House of Representatives. The Commissioners will, during the present session, again submit a bill embodying their views on this subject.

An essential fault in the existing law relating to tax sales is the peremptory requirement that at the expiration of two years from the date of the sale of a piece of real estate for overdue taxes the Commissioners must, on demand of the owners of the tax-sale certificate, issue a deed for the property. As the deed carries with it a clear title against any claim of the District for taxes due prior to its issue it is a convenient agency for the evasion of the payment of back taxes. The bill prepared by the Commissioners proposes to correct the statute by providing that no tax deed shall be issued until all taxes appearing on the tax books against the property embraced in the deed, with the penalties, interest, and costs, including the taxes for any years for which the District shall have purchased the property at tax sale, shall have been paid.

#### REASSESSMENT OF INVALIDATED TAXES.

The Commissioners again invite attention to the importance of legislation giving them authority to reassess general and special taxes which have been rendered uncollectible by judicial rulings upon grounds of technical error in the assessments or in some of the preliminary steps in connection therewith. The amount of revenue lost to the District

from such rulings is so great as to threaten serious embarrassment to the municipal interests involved, and the evil will not only continue but will indefinitely expand unless the necessary legislation be interposed. Bills for the purpose of conferring this power upon the Commissioners have been submitted to Congress with urgent recommendations for their enactment, but none of them have become law. A draft of a bill designed to remedy this deficiency in the law will soon be submitted to Congress.

#### MUNICIPAL BUILDING AND COURT-HOUSE.

In June, 1895, the officers of the District government, theretofore quartered in the building upon First street NW., were removed to the larger building upon Louisiana avenue between Four-and-a-half and Sixth streets NW. The new rented quarters are far more convenient to the public and more desirable for municipal purposes than any heretofore occupied; but it was found impossible to accommodate in them the surveyor, the attorney, the inspectors of fuel, flour, lumber, etc., or the large accumulation of old records pertaining to the present and to former administrations.

After having secured the most available rented building which could be had, the Commissioners found that some departments were provided with only limited accommodations. The rooms assigned to the police department, and to some others, are overcrowded; and great inconvenience is still suffered by taxpayers, who assemble in the office of the collector of taxes in large numbers at and near the close of every month. The Commissioners, therefore, most earnestly renew their recommendation for an appropriation to begin the erection of a building for municipal uses.

In view of the fact that the courts of the District are illy accommodated in the old city hall building, they are of opinion that a new building, having two separate parts, should be erected on Judiciary Square, upon and adjacent to the site of the city hall, for the uses of the courts and of the municipality.

The Commissioners are informed that the cost of the city hall buildings in certain of the leading cities of the United States was as follows:

|                     |               |
|---------------------|---------------|
| Providence .....    | \$1, 066, 988 |
| Cincinnati .....    | 1, 400, 000   |
| Buffalo .....       | 1, 450, 000   |
| Chicago .....       | 1, 716, 000   |
| Baltimore .....     | 3, 000, 000   |
| San Francisco ..... | 5, 000, 000   |
| Philadelphia .....  | 14, 000, 000  |

The building for the combined uses of the courts and of the municipality which executes the will of the Congress of the United States as to District affairs should be in keeping with the dignity of the capital; and its proper construction would involve a cost of about \$2,500,000.

The Commissioners earnestly recommend an appropriation of \$100,000 for the beginning of the construction of such a building.

#### FIRE DEPARTMENT.

The fire department has, during the past fiscal year, fully maintained the high record of efficiency which has characterized its work.

The Commissioners renew their recommendation for an increase of 15 per cent in the pay of this force. This merited increase in the pay of these efficient public servants would simply make their compensation approximate the amounts paid for like services in other cities.

## PUBLIC SCHOOLS.

The annual report of the superintendent shows that the public schools are in a satisfactory condition. Their growth is commensurate with or greater than that of the population of the city, while their efficiency increases correspondingly. The Commissioners ask for a continuation of the generous action of Congress in a full appreciation of the needs of the schools for the sake of the city itself and in consideration of the desirableness of maintaining in the capital city a system of education that shall be a model of efficiency and related economy. The record before us shows that in round numbers 45,000 pupils attended the schools, about 3,000 of whom were enrolled in the night schools. Of these 45,000 persons more than 3,000 were enrolled in the high schools, including those in the night high school.

The Commissioners are pleased, first, with the value of the schools themselves, and second, with the estimate that the citizens of the District place on education and with the apparent gratification they manifest in the results secured by these schools, demanding, as they do, so large a portion of the revenues of the District for their maintenance. But the Commissioners desire to call your attention, and that of Congress, to the economy with which the affairs of the schools of the District are administered. Although text-books and other articles necessary for use in gaining an education are furnished to all pupils below the high schools, and although the schools provide diverse courses of instruction, including sequential lines of physical, manual, and business training suited to the wishes of varied opinions on the part of parents and guardians, the annual per capita cost of instruction is below that of most of the large cities of the United States maintaining efficient and satisfactory systems of education.

## CIVIL SERVICE IN THE DISTRICT.

Inasmuch as the affairs of the District of Columbia should be conducted upon the principles and in the manner applicable to other large business interests, and especially in view of the fact that its government is nonpartisan in character, reasons which enforce the civil-service system for the Federal Government apply in a higher degree to this municipality.

During the past fiscal year the Commissioners began a system of competitive examinations for clerical, professional, and police duties, the results of which have been of such a satisfactory character that they have been confirmed in their belief in the efficiency of that system.

But having no funds at their command for the expenses attendant upon the many kinds of examinations which are required, the Commissioners believe that the District should be fully included within the purview of the general law, and they purpose to urge the necessary legislation therefor at the approaching session of Congress.

## STREET CLEANING.

The operations of the department of sprinkling, sweeping, and cleaning streets, avenues, alleys, and suburban streets are stated in detail in the accompanying report of the superintendent of that service.

During the fiscal year 1895 the area cleaned amounted to 289,553,181 square yards, an increase of over 41,000,000 square yards over the area cleaned in the fiscal year 1894. The contract price is  $24\frac{1}{4}$  cents per 1,000 square yards.

Owing to the limited amount of the appropriation for the past year, about 1,000,000 square yards could be cleaned only once a week, all of which should have been cleaned more frequently. The Commissioners have, therefore, estimated for an additional appropriation for this service of about \$20,000 for the year 1897; and for \$10,000 for the removal of snow and ice, under the provisions of the act approved March 2, 1895.

The existing contract for the street cleaning by sweeping machines will expire June 30, 1897.

#### THE SUPERINTENDENT OF CHARITIES.

The Commissioners transmit herewith the interesting and comprehensive report of the superintendent of charities for the year, which is a valuable contribution to the official exhibits and discussions of the important subject of which it treats.

#### METROPOLITAN POLICE.

There has been a gratifying increase in the appearance and efficiency of the force during the past year, and, as stated by the major and superintendent, "it is common report that the District police force presents a neater uniform inspection than any other in the country."

The following new paragraphs were added to the manual, which, together with the adoption of strict civil service rules in appointments and promotions, have assisted materially in reaching the present high standard:

The lieutenant of each precinct will keep a daily record of the efficiency of each sergeant and private in his precinct, based upon daily reports from the sergeants and his own observations, and once a week he will make a consolidated report of this record to the major and superintendent. This record will show each sergeant or private to be "efficient," "highly efficient," or "inefficient," as the case may be.

Promotions to the second class will only be made from those who have been rated as "highly efficient" for at least one year.

The major and superintendent will make a consolidated monthly report of the efficiency of the force to the Commissioners, and will recommend for removal such members of the force as have been found continuously "inefficient."

In making up the record for efficiency, carelessness in dress, demeanor, and appearance while on duty, and neglect to observe the requirements of the Manual will be taken into consideration.

Drinking intoxicants in barrooms or other public places, while on or off duty, will be sufficient cause for removal from the force.

There has been a marked decrease in the offenses of intoxication and "hoodling," due partly to the amendments to the manual and largely to increased vigilance on the part of the superintendent and his officers. Next to the health department, this department comes nearer to the people than any other, and is second to none in its importance. Protection to life and property are its chief duties, but it has many other important duties, all of which are performed with credit to the force and satisfaction to the public. The intelligent and exhaustive report of the major and superintendent gives a clear account of the operations of his department, accompanied by important recommendations which have the earnest approval of the Commissioners.

The Commissioners again call attention to the fact that the increase in the force has not kept pace with the increase in the population and the almost daily increase in the duties which devolve upon it. Buffalo, with a population but little in excess of that of Washington, has a larger force by more than one hundred, while Chicago, Philadelphia, and other large cities have a much greater force in proportion to population and area. The necessity for the increase asked for by the major and superintendent is urgent and imperative.

## HEALTH DEPARTMENT.

The report of the health officer is an important and comprehensive document. It is a clear and concise statement of the operations of his department, accompanied by valuable statistics, and contains important recommendations, upon which the Commissioners urge favorable action by Congress.

There has been a gratifying improvement in the general health conditions, with few exceptions, and a continued decline in the death rate, which was the lowest in twenty years for both white and colored population. The number of deaths from all causes was 5,565, a decrease of 474 from the previous year and a decline in the death rate from 22.73 to 20.57. The decrease in the death rate per 1,000 from 1876 to 1895 was from 40.78 to 28.18 for colored and from 19.54 to 16.97 for white population. In noting the great decline in the death rate among the colored population, Dr. Woodward says:

It is a matter of regret, however, that it remains so high and is so potent a factor in maintaining a high general death rate for the District.

This is the most important and significant fact revealed by this valuable report, and should be pondered well by all who desire to aid in lowering the death rate in this District. The low mortality rate among the white population, comparing favorably as it does with that of the most favored cities in the world, only serves to emphasize the other more alarming fact that notwithstanding the reduction in the death rate among the colored population since 1876 of 12.60 per 1,000, it is still 11.21 per 1,000, or 66 per cent in excess of that for the white population, which accounts for the high general death rate for the District. Moreover, it is almost of equal significance that the average age of all colored decedents during the preceding fifteen years was 22 years and 7 months, while the average of all white decedents during the same period was 33 years and 7 months.

The deaths from zymotic diseases number 1,036, of which 455 were colored. Less than one-third of the total population, it thus appears, furnished nearly one-half the victims of this class of diseases. Washington, with its broad, well-paved streets and superior natural advantages, ought to be the healthiest large city in the world, and to show the lowest rate of mortality. That it falls short of its proper place in these respects is established conclusively by comparison with several large cities of Europe; nor can this fact be disproved by its lower death rate than that of New York, Boston, and some other large American cities, which to their discredit show a much higher mortality record than many European cities. The Eighth Report of the Commissioner of Labor and Albert Shaw's "Municipal Government in Continental Europe" show reductions in the death rate of large cities as follows:

London, from 24.4 in 1870 to 20.5 in 1890.  
 Edinburgh, from 26.26 in 1874 to 17.51 in 1890.  
 Copenhagen, from 24 in 1884 to 18.7 in 1894.  
 Stockholm, from 24.6 in 1884 to 18.3 in 1894.  
 Paris, 20 in 1894.  
 Holland, from 25 in 1870 to 19.1 in 1893.  
 Amsterdam, from 24 in 1884 to 18.3 in 1894.  
 The Hague, from 19.1 in 1893 to 16.9 in 1894.  
 Brussels, from 25 in 1876 to 18.1 in 1894.  
 Hamburg, from 30 in 1865 to 20 in 1894.  
 Rome, from 30 in 1876 to 19.4 in 1894.  
 Antwerp, 19 in 1894.

The value of these statistics can not be overestimated. They show what has been accomplished, not in one, but in a dozen cities larger and more densely populated than Washington, and under more unfavorable conditions than exist here, by an intelligent application of proper sanitary methods. They prove beyond controversy that our death rate is too high, and that it can be reduced to 17 per 1,000.

This means that, on the basis of our present population, we are sacrificing at least 1,000 lives per annum by neglecting the means so successfully used in saving life in other cities. Can we afford to continue this sacrifice any longer than absolutely necessary? With our superior natural advantages we ought to be able to accomplish what has been done under such great disadvantages in Amsterdam and The Hague. Mr. Shaw, in speaking of this, says:

With a harsh and capricious climate, and with great difficulties in the way of thorough drainage and a satisfactory supply of water, it is nothing short of a brilliant triumph of sanitary science and enlightened municipal administration that Holland is able to accommodate half a million additional inhabitants every decade without further aggravating any of the evil consequences of overcrowding, but, on the contrary, with steady improvement in the average healthfulness and social well-being.

The tables furnished by the health office not only show the ugly fact that our death rate is much higher than that of the large cities mentioned, but they show, also, in a striking manner why, and point to the remedy.

A death rate among the colored race, numbering almost one-third of the population, of 66 per cent in excess of the death rate of the entire white population of nearly 200,000, and a relatively less duration of life of 33 per cent, if not strange, is none the less alarming, and calls for heroic treatment. From this class come most of our servants, who have free access to almost every house in the District and thus the opportunity to scatter the seeds of contagion everywhere. This fact was strikingly illustrated by the recent smallpox epidemic and emphasizes the appeal to Congress to grant the needed legislation and to the courts to assist the Commissioners in enforcing rigidly all laws and regulations framed to preserve the public health. So-called private or individual rights should give way to the rights of the public, and autocratic power, if necessary, vested in the Commissioners in all matters concerning the health of the community. All good citizens will cheerfully yield prompt acquiescence to all measures adopted for the preservation of the public health, and all others should be compelled to do so.

Under the head of "disposal of refuse" Dr. Woodward points out some of the most prolific causes of our large death rate and the remedy therefor:

The most important items in the maintenance of the health of the community are pure air, pure water, soil free from pollution, and a pure food supply. The purity and cleanliness of these depend largely upon the prompt and proper removal of all kinds of refuse matter, including excrement, garbage, ashes, and general refuse.

*Excrement.*—This is now accomplished by means of box privies or water-closets. The former method is in many instances rendered necessary by the absence of any sewer available for the premises on which the privy exists.

It is not necessary to explain the importance of sewers or to give a detailed statement of the localities where they are needed. It may be broadly stated that they are needed in every part of the District, and especially in our rapidly growing suburbs, as Brightwood, Tennallytown, Takoma Park, Brookland, and others. It is greatly to be hoped that some general system of sewers will be constructed and in operation before an epidemic of cholera or a further increase in our already too high typhoid fever death rate occurs to emphasize the need of such a measure.

These recommendations of the health officer, important and urgent as they are, can not be carried out, except to a limited extent, until a system of intercepting sewers and sewage disposal and protection against floods be constructed in accordance with the plans recommended by the board of sanitary engineers in their report to Congress upon the sewerage of the District of Columbia in July, 1890. (Ex. Doc. No. 445, Fifty-first Congress, first session.)

Partial appropriations have been made to begin this work, but provision for its completion should be made at the earliest practicable moment. This is the foundation of any comprehensive sewer system, and delay in executing the entire work will perpetuate, if not increase, existing evils which figure as potent factors in our high death rate. It was the very work contemplated by this plan for improving the health of Washington which was done at great expense in Berlin, and which with a filtered water supply, was largely the cause of the remarkable reduction in the death rate of that city.

Dr. George M. Kober, who, by request of the Commissioners and the health officer, has since September 19 been investigating typhoid fever in this District, has just submitted his report. He says:

A most conservative estimate demonstrates that the number of cases of typhoid fever for the four months ending October 31 was scarcely less than 795.

His report in full, containing important conclusions and recommendations, is appended to the report of the health officer.

Upon the importance of

#### SEWER CONSTRUCTION.

Dr. Woodward says:

Sewers will not, however, serve their purpose unless the owners of abutting property can be made to connect such property with them, and to replace box privies with proper water-closets.

A law should be speedily enacted to accomplish this purpose. Since sewers are constructed chiefly at public expense the Government should require that their use be not neglected by the individual to the detriment of the community.

Until the recommendations in the preceding paragraph are carried into effect, it is well to clearly recognize the existence throughout the District of an indefinite number of privies, constantly polluting the atmosphere, and, in many instances, the soil and the well water. Since these must necessarily exist, for some time at least, they should be regulated by proper laws to replace or to supplement those now in force. The present law is defective in that it does not require that the privy shall be placed upon an impervious foundation, and so that it can be thoroughly inspected. A box half buried in the ground may leak around the bottom, and such leak pass undiscovered almost indefinitely. Another defect in the present law is the omission of any requirement for a permit for the erection of a privy. The result is that, owing to the small force of inspectors allowed to this department, many defective privies exist for a long time without being discovered and inspected.

The present system of cleaning privies is radically bad, making it to the interest of the householders, from an economical standpoint, to have them cleaned as seldom as possible. The result is that in many cases they are allowed to overflow and become foul and filthy, and that the contents of the chamber utensils are secretly deposited in the nearest public sewer or in the imperfectly flushed sewer in the yard.

The system is analogous to a system of garbage disposal requiring the householders to remove and dispose of garbage at their own expense, and is about as bad. It need be no more expensive to the average householder, and would be far better, from a sanitary point of view, to levy a tax on privies, the income to be applied to the maintenance of a public scavenger service.

By such a system every privy in the District of Columbia would be numbered and its location known. It would be cleaned and at the same time inspected at regular intervals by Government employees, any defects being quickly discovered and corrected. Owners of rented property could, if they desired, collect the privy tax from tenants by adding it to the rent, as is now usually done in the case of water rent.

If anything further should be needed to illustrate the necessity, by immediate action by Congress, of providing the means to protect the public health, we have it in the statement of the health officer that—

The entire number of nuisances inspected during the year was 21,423, an increase of 1,193 over the year previous. The principal ones were as follows: Privies full, filthy, leaky, unlawfully located, etc., 10,909, an increase of 6,102; filthy yards, 2,240, a decrease of 1,093; defective sewers, public and private, 933, a decrease of 464; defective surface drainage, 550, a decrease of 1,000; filthy and unwholesome stables, 223, a decrease of 33, and hogpens, 26, a decrease of 53. Alleys were reported as filthy in 424 instances, an increase of 203 over last year.

If "the destruction of the poor is their poverty," it is also, in these matters, the destruction of the rich. It is the poor that are forced into damp, overcrowded, unwholesome tenements, without sewerage or water, and are with insufficient light and ventilation, but it is generally the cupidity of the rich that forces them into such unhealthy quarters. It is usually the wealthy landlord or his agent who takes advantage of the defects in the law and refuses to obey it, to the imminent danger of the life of the poor tenant and the whole community.

The city of Berlin found it necessary to prohibit the erection of houses on unsewered lots, and to provide by law that at least one-third of the lot area shall be left vacant for light and ventilation, and similar laws have been adopted in all of the large cities mentioned as one of the means for reducing the mortality rate.

The Commissioners several months ago adopted a similar regulation, which has met with great opposition from speculative builders, particularly the owners of corner lots. It is, however, rigidly enforced.

Overcrowding is an evil so prolific of disease that it should be prevented at any cost. Expropriation is an expensive but often the only remedy for neglect to enforce proper sanitary conditions at the outset. It has cost European cities millions of dollars to remedy early mistakes in this respect, and we should profit by their experience. Formerly there was no law in the District against the erection of alley houses, and the avarice of a certain class of speculators resulted in the erection of a large number of badly constructed and unsanitary tenements in narrow alleys. These alleys are now principal sources of disease and crime, and we are paying the penalty, and a large one it is, for neglect to prevent this fungus growth. Congress some years ago wisely prohibited the erection of dwellings on alleys less than 30 feet in width. This law has checked the evil, but has not eradicated it. The records of the health office and the police court show how costly these pest spots are to maintain. Provisions should be made for discontinuing their use as dwellings.

The building regulations are being revised by the building inspector, assisted by a competent committee of architects and experienced builders, who have generously given their valuable time for the purpose without compensation. The best features of the regulations in force in all of the principal cities of the world will be adopted, so that no badly constructed or unsanitary buildings can be erected after the new regulations go into force.

Among our most pressing needs, the absence of which is a continual reproach upon the District, as Dr. Woodward aptly says, "not for the care of the sick so much as the protection of the well, rich as well as poor," is an—

#### ISOLATION HOSPITAL.

"Repeated unsuccessful efforts were made to secure a suitable site  
"until June, 1894, when lots 6, 7, 22, and 23, block 3, Wright and Doles  
"subdivision, were purchased for the purpose, the entire cost being

"\$9,074.50. These lots contained 30,000 square feet, and were situated between Bismark and Princeton streets, Seventh street and Sherman avenue.

"This site was rendered unavailable by the following clause in the last appropriation act:

"That hereafter no other building for use as a public or private hospital for contagious diseases shall be erected in the District of Columbia within 300 feet of any building owned by a private individual or any other party than the one erecting the building."

"The site already purchased could not be used on account of this law. There was no money available for the purchase of a new site. The distance of the hospital from adjacent buildings as fixed by law, 300 feet, is unnecessarily great, but if an appropriation be granted large enough to secure the necessary site in a location not too remote from the city, the amount of ground required will add greatly to the beauty of the institution and the comfort of the inmates. It will require, however, a tract containing not less than 15 acres, and unless ground can be secured exactly adapted to the purpose, a greater area.

"This, with the hospital buildings and equipment, will necessitate an appropriation of about \$100,000. If the distance from the adjacent buildings be fixed as 40 feet, which is ample, a site containing about 4 acres will be sufficient, and the cost will be proportionately reduced."

The Commissioners are of the opinion that the site selected is an ideal one and might advantageously be used for the purpose intended. It possesses the great advantages of considerable elevation, good drainage, accessibility by two rapid-transit street car lines, as well as being within easy driving distance from the center of population. In fact, it combines in an unusual degree all of the requisites for such a hospital. To this end they recommend the purchase of all the residue of the land in the square, except lots abutting on Seventh street and Sherman avenue, which can then be separated from the hospital grounds by alleys, and a modification of the 300-feet-limit provision in the last appropriation act, or an appropriation of \$100,000 to purchase a site elsewhere.

#### COLLECTION AND DISPOSAL OF GARBAGE AND DEAD ANIMALS.

Under the authority contained in the last appropriation act for the District, the Commissioners have canceled, by consent of the contractor, the then existing contract and entered into a new contract with Joshua N. Warfield, of Maryland, to collect and incinerate all garbage in accordance with the conditions of said act for the sum of fifty-seven thousand dollars (\$57,000) per annum.

They have also made certain regulations, prescribing necessary rules for householders in making garbage accessible, etc., to which they have annexed suitable penalties for violation of the same. A copy of said contract and said regulations is contained in the health officer's report hereto appended.

After a careful investigation of the different methods of garbage disposal by the health officer and the Commissioners, incineration was found to be the only perfectly sanitary method in use in this country, and the only one adapted to our present conditions.

It was found that neither the Pennsylvania Railroad Company nor the Baltimore and Ohio Railroad Company would haul garbage out of the city, and transportation by river, owing to ice in winter and large excursion travel in summer, when garbage is most offensive, has proven uncertain and unsatisfactory. Moreover, should Washington be visited

by an epidemic of cholera or other dangerous disease, we would not be permitted to deposit garbage in Virginia or Maryland, and would therefore be without any method of disposing of our garbage at a time when most needed for the protection of the public health. Two crematories of most approved types will be erected. One—the Brown furnace, located on the site of the old reduction plant at the foot of South Capitol street—is nearly ready for operation, and a furnace of the Smith type will be erected in the northwest section of the city.

The Commissioners believe they have selected the best system of disposal, and are pleased to note that the reports of recent investigations by the health authorities of Chicago and other cities confirm them in that view. The contract is the most stringent in its requirements and adequate system of fines for enforcing the same of any of which they have any knowledge, and the Commissioners believe we shall soon have a model garbage service.

#### WHOLESALE MARKET SQUARE.

The suit of the District against the Washington Market Company for possession of the square between Tenth and Twelfth, Little B and B streets NW., containing 89,485 square feet, long pending in the courts, was finally decided in favor of the District. The Commissioners took possession of the same on April 1, 1895.

At the urgent request of the farmers who have used the square for a hay and cattle market many years, the Commissioners have fitted it for use as a farmers' wholesale produce market as well as the limited means at their disposal would permit. It is contemplated to make additional improvements as rapidly as the revenues from the market or appropriations for the purpose will allow.

#### EXCISE BOARD.

The important and delicate duties of the excise board have been performed with intelligence and due regard to the public interests. The knowledge as to the locations of barrooms and their surroundings gained by this board in the discharge of their duties as assessors peculiarly fit them to act as an excise board. The Commissioners commend the efforts of the board to prevent the sale of adulterated and poisonous liquors and to reduce the number of barrooms, and invite attention to their report hereto appended, containing valuable information and recommendations which are also approved.

#### HARBOR MASTER.

There was used of the \$5,000 appropriated for cleaning the river of ice last winter, when an ice gorge was imminent, the sum of \$3,482.69, leaving an unexpended balance of \$1,517.31.

This necessary expenditure calls forcible attention to the urgent necessity for a new harbor boat large enough to serve as an ice boat and fire boat, as well as for policing the harbor. Such a boat is considered indispensable to the proper preservation of life and property in all harbors. At present we are limited to the use of a small tugboat, which, in addition to being old, is almost wholly unsuited to the duty required of it. The Commissioners have included in their estimates \$50,000 for a new boat.

## STREET AND ALLEY IMPROVEMENTS.

Nearly 54,000 square yards of sheet or block asphalt were laid on roadways, principally in Washington. The area of asphalt at the beginning of the fiscal year, including some remaining coal-tar pavements, was about 2,500,000 yards. About 20,000 square yards of vitrified block or asphalt block were laid on alleys.

The prices for standard sheet asphalt, due to active competition, were the smallest yet obtained, being \$1.53 and \$1.68 per square yard on 4-inch and 6-inch concrete, respectively, exclusive of grading. The prices for asphalt block were \$1.78 and \$2.25 per square yard, on gravel and concrete, respectively. The contract prices for 1896 are \$1.94 and \$2.19 for sheet asphalt, and \$1.84 and \$2.25 for asphalt block, per square yard. From each of these prices 5 cents should be deducted for comparison with previous years' prices, since wages of inspectors proportionate to that amount are, by the last specifications, charged against the contract cost. About 8,000 square yards of sheet asphalt were laid upon cobble, old stone, or macadam base. It is contemplated to make more extended use of existing cobble and old stone pavements by covering them with asphalt.

The street mileage on July 1, 1895, of smooth pavements was 116.4; of standard granite block or vitrified brick, 29.6; macadam, 16, and cobble or old stone, 14.4.

On alleys the mileage of smooth pavements was 23.4, and of granite block or cobble, 31.5.

The mileage of unimproved streets in Washington was 78.2. Owners of property on many of these streets are urgently demanding pavements, or at least grading and regulating. The annual appropriations for street improvements for the last four years, inclusive of 1896, averages \$192,000; the average for the preceding four years was \$600,000. Now that the laying of water mains and sewers in Washington is well advanced, and since a late law secures the making of service connections with premises when the street is about to be paved, there is additional reason for more rapidly extending the paving than has been done in the past few years.

Nearly 29,000 square yards of concrete walk were laid during the year, or more than the whole amount for the five years preceding. The mileage has increased in a little greater proportion than the area on account of the later policy of leaving nearly continuous tree spaces on residential streets. The contract price for this pavement was \$1.44 per square yard; the contract price for 1896 is \$1.33 per square yard. About 18,000 square yards have been laid since July 1, 1895.

About 20,000 square yards of brick sidewalk were laid, at an average cost of 70 cents per square yard, and generally upon new or partly improved streets. The assessment and permit law of 1894, under which sidewalks are laid and alley improvements made, and at half cost to owners of abutting property, has generally proved satisfactory.

The repair of pavements—roadway, alley, and brick sidewalks—is an extensive work, although effort is made to curtail cuts in pavements to secure excellence of work in first construction.

## STREET TREES AND DISTRICT PARKS.

The trees along the curbs number about 75,000. These were partly cared for, the appropriation having been too limited for full service. Six hundred and forty new trees were planted and 580 dead or obstructing trees removed.

Special care is taken in selecting, spacing, planting, and protecting the trees. The impervious pavements are becoming so extensive that they retard the growth of the trees. It is considered desirable to give ample tree spaces, cultivate them around young trees, and improve the spaces between trees. These betterments were made as far as practicable with available funds.

Operations of this service are under the advice of a commission of three experienced arboriculturists, who serve voluntarily and without compensation, and to whom the public are much indebted for their aid in establishing and preserving the street trees. No other single feature adds more to the beauty, comfort, and even healthfulness of Washington.

The District has thirty-six small parks, a very few of which have been partly improved. It is desired to replan and improve the District Park north of the Center Market, for doing which an amount is included in the estimates for 1897.

#### WATER SERVICE.

Nearly 25 miles of water mains were laid, exclusive of replaced mains along street railway conduits and of connections to fire hydrants and premises. More than one-half of the mains were laid in Washington.

A 5,000,000-gallon high-duty pumping engine, with two boilers, was furnished and partly erected at the U street pumping station, under contract, by the Nordberg Manufacturing Company, of Milwaukee. The erection of the engine has since been completed, the engine and boilers tested, accepted, and put in service.

New plans and specifications for the high-service reservoir at Fort Reno were drawn. The masonry construction of the reservoir has been commenced since the end of the fiscal year, and is now nearing completion.

Additional land was purchased at the U-Street station for storage ground and future extensions. Plans were drawn and arrangements made for the erection of a new stone, brick, and metal pump house on the site of the old frame building without interrupting the pumping. The new pump house is under construction.

Forty-seven public wells were abandoned and filled, leaving 171 in use on June 30, 1895. Two deep wells were driven, one of which is on the Brightwood road at Brightwood and the other at Sixth and G streets SW. Both of the wells were driven to a depth of about 150 feet with 6-inch wrought-iron pipe, except through rock. A supply of water of good quality was obtained in each well. The existing public wells are located where they would be of service were the water above suspicion, and, in that case, would undoubtedly be a great benefit and comfort to people who can not afford to pay water rent or to buy ice. If polluted, shallow wells could be replaced by deep-driven ones, properly fitted and furnishing good water, much benefit would be conferred. The two experimental driven wells, together with experience from similar wells elsewhere in the District, indicate that good water can generally be had at a reasonable depth and cost. The estimates for the year 1897 include an item of \$10,000 for driven wells.

Referring to the ordinary shallow wells, the report of the engineer in charge of the water department properly says:

In any metropolitan district such wells are liable to contamination from sewage and surface drainage, and it may be confidently asserted that sooner or later the water in all of them will become unfit for potable purposes. Continued efforts are being made to have the water from the public wells in the District frequently examined

chemically, and upon the concurrent showing of two examinations by different chemists that the water in any well is so contaminated as to be unfit for use, the well has been closed. These wells are frequently located in close proximity to sewers and in places that are otherwise insanitary. Since sewers are rarely absolutely water-tight, all wells near them are surely liable to contamination with sewage at no distant time. As a matter of fact, a large percentage of all the wells so far examined have been found to be polluted, and it is safe to assert that every shallow well in a densely populated metropolitan district is, or soon will be, a menace to the public health.

Twenty-nine water meters were placed on premises during the year making the number of meters in use at the end of the year 202. It was desired to extend the meter service for all consumption of water for commercial purposes, and generally to all large consumers, as the law contemplates. An objection by the consumers to the introduction of meters is the first cost of good, reliable meters of sufficient capacity. Private ownership of meters has proven unsatisfactory for the public interests. To obviate the objection and to select, own, and control the meters, the water department proposed to buy them, only requiring the consumer to pay for erection and maintenance. The Comptroller of the Treasury decided, however, that the consumer should, under the law, provide the meter, as well as place and maintain it. Rigid measures, as far as legal, were then applied, with the result that since June 30, 1895, 175 additional meters have been put in use.

A late decision of the court of appeals making water-main assessments invalid where laid by the Commissioners and not by the water registrar, an office which has been vacant for several years, has resulted in a severe reduction of the expected revenues of the water department, and will thereby curtail intended extensions of the service. The granting of authority in this case to make reassessments appears just and otherwise proper to the property owners who have paid their assessments and may obviate the necessity of an appropriation from the general revenues for the aid of the water department.

The urgent needs of the water service are a greater supply of water and especially greater facilities for bringing water to the city and thus restoring water pressures to what they were in 1890, when the 48-inch main was laid. The area which could and should be served by gravity is bounded by elevations of about 100 feet. But from lack of sufficient pressure there is a continuing expense of pumping for the area above the 85-foot contour. The gravity area is gradually being further contracted from increased draft on the mains and consequent diminution of pressure.

#### STREET LIGHTING AND INSPECTION OF GAS AND METERS.

Proposals were received, after advertisement, for lighting the public lamps by mineral oil and naphtha only. No proposals were received for gas or electric lighting. A contract was made for naphtha lighting at \$17 per lamp per year for burning from forty minutes after sunset to forty minutes before sunrise, or 3,828 hours per year; such lamps were substituted for oil lamps previously used. The naphtha lamps are in alleys and outlying districts, and numbered at the end of the year 868.

Gas lighting was continued, but not under formal contract. The gas companies insisted upon payment of the maximum price, \$20.50 per lamp per year for the minimum period, 3,000 hours, as named in the appropriation item, with an allowance or deduction from such period of one hour per night for times of lighting and extinguishing. The Commissioners offered to make this allowance one-half hour. The offer was declined. The period of full burning of the gas lamps, which actually

obtained for the year, was 2,668 hours, and the number of lamps at the end of the year was 6,138.

The existing service of arc lighting in Washington was likewise continued without formal contract. Eight lamps were added during the year as necessary extensions, making the number in service at the end of the year 338. The average price paid was a little less than 40 cents per lamp per night—the maximum price named in the appropriation act; the time of lighting was reduced in nearly the same ratio below that to which the maximum price applied, viz, from sunset to sunrise, or 4,309 hours per year.

The gas and electric lighting companies failed to submit bids for the fiscal year 1896.

A bid of \$20 per lamp per year was accepted for naphtha lighting. This is an increase of \$3 over the price for 1895, notwithstanding that the new specifications secured an increased number of lamps of at least 132, and a decrease of period of burning from 3,828 hours to 3,600 hours, with an allowance to the latter period of one-half hour per night.

Two thousand seven hundred and thirteen gas meters were inspected and proved during the year. The average candlepower of gas supplied by the Washington Gas Light Company was 19.63 candles; that supplied by the Georgetown Gas Light Company was 16.97 candles. Sulphureted hydrogen was found present on many occasions in the Washington gas. This offensive and deleterious impurity is not included in the list of impurities named for supervision in the act of 1874, regulating gas works.

Excess of ammonia was found in the Georgetown gas eight times, and excess of sulphur twenty-nine times.

The Commissioners renew their recommendation of last year for the enactment of a bill increasing the quality and candle power of gas in the District, and limiting its price to private consumers and in public buildings to \$1 per 1,000 cubic feet.

#### SEWER DEPARTMENT.

A feature of last year's sewer construction was a more extended use of concrete in large sewers. In concrete sewers the invert surface is of vitrified brick, the remainder of the sewer is entirely of concrete. In each case bids were less for the concrete sewer than for the brick sewer.

Besides the work of cleaning and repairing sewers, replacing obstructed sewers, and building relief sewers, and main and branch sewers, the following named larger works were constructed:

The Sixth and Twelfth street trunk sewers southeast were extended to tidewater. The authorized part of the large Easbys Point sewer, whose construction has been under the continuing contract system for two years, was substantially completed. This part extends from the Potomac River at Easbys Point, passing south of the old observatory site and across the White Lot, to Fifteenth street west and Pennsylvania avenue. The sewer receives sewage and drainage from a territory whose northern limit is at Iowa Circle and eastern one at Seventh street west, and diverts to the river the principal part of the sewage which was formerly emptied into the Seventeenth street canal. The Rock Creek intercepting sewer was extended to the Zoological Park from next below Woodley road; construction is now in progress on the part through the park to the outlet of the Piney Branch trunk sewer.

The last District appropriation act made provision for a part of the Rock Creek and B street interceptor of the adopted plan of sewage disposal for Washington. This part will extend from near Q street to G street, where it will temporarily terminate at the Potomac River. The construction of these links along Rock Creek will complete a continuous sewer of large capacity from the Rock Creek Church road to the Potomac River, which will carry the principal part of the sewage now flowing into Rock Creek.

The estimates for 1897 propose the commencement of the Tiber Creek and New Jersey avenue high-level intercepting sewer of the adopted plan of sewage disposal. This sewer will divert sewage from the James Creek Canal.

By the scheme thus outlined the condition of the three large open cesspools in Washington will be much ameliorated; but after all, the present discomfort and nuisance made by putting sewage in these streams would only be transferred to the harbor front, and would furnish but a partial and unsatisfactory remedy, and for only a part of the present bad situation.

The prompt execution of the adopted plan of sewage disposal and protection of the lowlands of Washington against floods, will give a full measure of utility and be a considerable saving of cost below that of construction in installments. At the present rate of progress, the execution of the plan would require fifty years, and some of its parts would not be useful until the completion of the whole.

#### PLAN OF EXTENSION OF HIGHWAYS.

The map of the first section, comprising 38 large scale detail sheets for record, was completed and certified, and delivered to the highway commission, together with three index sheets to the map and an explanatory letter and general maps.

The map for record was returned for certain alterations, which were made. The map was then approved in writing by the highway commission and at once filed and recorded in the office of the surveyor of the District.

Subsequently petition was made to the supreme court of the District, as required by the highway act, for condemnation of permanent rights of way for the public over all widened or new highways and over reservations shown on the recorded map lying within the forty-seven subdivisions of the first section.

This section comprises that part of the District outside of Washington and between Rock Creek and the line of North Capitol street. It includes the greater number of the irregular subdivisions of the county and ones where land and improvement values are the highest.

Much progress has been made in the preparation of the plans for all the other sections; those for the second and third sections are well advanced.

Frederick Law Olmsted, represented by Messrs. Olmsted, Olmsted & Eliot, landscape architects, was engaged, as the law directs, for aid in preparing the plan, and was assigned the part of the third section, lying west of Rock Creek and north of Massachusetts avenue, for preparation of original plans.

#### STREET RAILWAYS.

The Eckington and Soldiers' Home Railroad Company built three branches from G street NW., on routes authorized by the act approved August 23, 1894, and operates two of the branches by horsepower. It

has failed to operate the branch from New Jersey avenue to North Capitol street and New York avenue. The Commissioners invited the attention of the Attorney-General to this failure, April 22, 1895, in view of the fact that whatever action taken in the premises toward maintaining the rights of the public has to be taken through his office.

Similar action was taken by the Commissioners, May 1, 1895, in reference to the abandonment of the Kenyon street branch of the Brightwood Railway Company. The company afterwards resumed operation of the branch.

A car, worked by the electro-magnetic system, has been running under the auspices of the Eckington and Soldiers' Home Company on its North Capitol street track north of New York avenue.

The Eckington company's charter requires that its right to use overhead wires in Washington shall cease July 1, 1895. After some delay, and after instituting objecting measures, the company removed its poles and wires in Washington, except at the eastern end of New York avenue, and has since run horse cars on New York avenue.

The Washington and Georgetown Company, now merged into the Capital Traction Company, commenced the construction of a building to contain the union passenger station required to be built by that company at Thirty-sixth street between M and Prospect streets. Work on the building is still in progress. The extension of the company's tracks from their former terminus in Georgetown to the union station site has been made.

The Columbia company changed its system to cable of the Broadway (New York) kind.

The Metropolitan company completed the installation on its north and south line of an under-ground electric system of propulsion shortly before August 2, 1895, except the part on Florida avenue between Ninth and Seventh streets and on Seventh street extended. A disagreement, now awaiting settlement by the court, occurred between the Metropolitan company and the Capital Traction Company, formerly the Rock Creek company, as to the joint use of the conduits on Florida avenue. The Metropolitan company is now constructing and has nearly completed its conduits and new tracks on the part of its east and west line east of Ninth street west NW.

The roadbeds, tracks, cars, and equipments of the Columbia company and the electric line of the Metropolitan company are first-class; the two systems appear to work satisfactorily. It was required by the permits for construction that the tracks should be laid at approved locations and the rails and conduit structures should not project above the pavement surface, in order to reduce obstruction to travel.

The Washington and Great Falls company finished the building of its road from Georgetown to the District line shortly after last August. The company's charter does not require that its tracks or cars enter the union passenger station, but fixes the route on Prospect street, beginning at the station; therefore, the Commissioners have located a single track for this company east of Thirty-sixth street and close to the curb along the front of the station building. Passengers will have to cross the sidewalk, enter the station through a covered way at the Prospect street level, and descend to the M street level by elevator.

The law requiring reciprocal transfers between street railroads whose lines connect is not complied with where the connecting railroads compete for traffic in the same territory. The additional fare, where one is charged, for the reciprocal transfer is 2 cents.

As authorized by a provision in the District appropriation act of 1894, the Commissioners adopted a list of certain fenders for mechanical

motor cars, and made regulations to enforce the use of the fenders. These regulations are now very generally complied with.

The adopted fenders consist of a front pick-up fender and an automatic wheel guard; the latter hangs near to the pavement and falls to a close and firm contact with it when tripped.

Since the introduction of the fenders eight persons have been saved from at least serious injury by the pick ups, and one person was saved by the wheel guard. A child fell on the track behind the wheel guard and suffered injury, which resulted in death.

#### GRADE CROSSINGS OF STEAM RAILROADS.

The recommendation in the last report is renewed, viz: That a law be enacted compelling steam railroad companies to change their track crossings from grade levels in Washington within two and a half years, and in the county within five years, upon plans subject to the approval of the Commissioners.

So far as known, no action was taken by any of the steam railroads in the District toward changing the elevation of its tracks from that of the street or road crossing.

Notwithstanding precautions of fences, gates, watchmen, or signals, accidents continue to occur, by which persons traveling on the public highways are mangled to death by passing trains. The list of accidents and narrow escapes is appalling.

The stoppage by trains of street traffic is a matter of serious inconvenience and loss to the public.

Very respectfully,

JOHN W. ROSS,

GEO. TRUESDELL,

CHAS. F. POWELL, *Major, Corps of Engineers, U. S. A.,*  
*Commissioners of the District of Columbia.*

## REPORT OF THE AUDITOR.

OFFICE AUDITOR OF THE DISTRICT OF COLUMBIA,  
*Washington, D. C., November 19, 1895.*

GENTLEMEN: I have the honor to submit herewith a report, consisting of exhibits marked A to G, showing in detail the receipts and expenditures of the government of the District of Columbia for the fiscal year which ended June 30, 1895, and the balances remaining at that date to the credit, respectively, of the revenue account, the various trust funds, and the appropriations made by Congress.

A is an exhibit of the revenue account, showing, first, the cash surplus on hand July 1, 1894, together with the receipts from taxes, licenses, and all other distinctively District of Columbia sources of revenue, and one-half of lapsed appropriations credited back to the general fund; secondly, the amount appropriated therefrom to meet the payment of one-half of the expenses of the government; and, thirdly, the balance remaining to the credit of the District at the close of the year.

B is a general statement of appropriations. It shows, first, the total balance of appropriations unexpended and subject to requisition July 1, 1894, the aggregate amount appropriated for the year under various acts of Congress, and repayments to appropriations for the same period; secondly, the amounts advanced therefrom by the Secretary of the Treasury upon requisitions; and, thirdly, the total balances of appropriations subject to requisition in the Treasury of the United States June 30, 1895.

C is a classified statement of expenditures, consisting, first, of payments by the Commissioners in checks drawn upon the Treasurer of the United States, with whom, under the law, all moneys advanced upon requisition are deposited; and secondly, of requisitions approved by the Commissioners in favor, respectively, of the officers of various charitable institutions, and the Treasurer of the United States as ex-officio commissioner of the sinking fund, on account of principal and interest of the bonded debt.

D is a summary of the account which the Commissioners, in their capacity as disbursing officers, keep with the Treasurer of the United States. It shows the deposits made by them of the amounts received from requisitions upon the Secretary of the Treasury on account of the general expenses of the District of Columbia, checks drawn against the same by them, and the balance subject to their check remaining with the Treasurer June 30, 1895.

E is a statement of the water-fund revenue account, showing, first, the balance on hand July 1, 1894, and the collections from rents and water-main taxes during the year; second, the amount appropriated therefrom for the expenses of the service, and, third, the balance on hand June 30, 1895, being the surplus in excess of the amount appropriated.

F is a statement of the water-fund appropriation account, showing, first, the total balance of appropriations unexpended July 1, 1894, to which are added the appropriations made during the year; secondly,

the amount drawn upon requisition; and, thirdly, the total balance of appropriations subject to requisition June 30, 1895.

G is a summarized statement of the various trust funds, showing, first, balances on hand July 1, 1894, and amounts collected and deposited in the Treasury of the United States during the year; secondly, advances made to the Commissioners upon their requisitions; and, thirdly, balances subject to requisition remaining in the Treasury June 30, 1895.

The question as to which is the better mode of collecting taxes, in two installments, as now, or in a single payment, as was formerly the custom, is at present the subject of much discussion. As a means of lessening the liability to error on the part of the taxpayer and of lightening the burdens of the assessor's and the collector's offices, one payment would prove of mutual advantage to the public and the government. On the other hand there are two arguments which suggest themselves against the change. One is the possible hardships it might work in the cases of persons with limited means and small holdings, who would find it difficult to meet their obligations. The other and more serious objection is the embarrassment which would be sensibly felt in business and monetary circles as a consequence of the withdrawal at one time of so large an amount from the ordinary channels of circulation. If, however, it be deemed expedient to adopt the proposed system, the month in which payment may be made is a matter of importance. Some favor May, while others incline to November. Should the former month be chosen, the United States would be called upon to support the District government from the commencement of the fiscal year—a period of ten months—incurring the risk of failure to receive in the May collections a sufficient amount to reimburse its outlay in excess of the one-half it is required by law to contribute. Whereas if the collection be made in November the resources of the District would be definitely ascertained before the fiscal year had half expired, and there would be no danger of violating the organic act in its requirement that the Commissioners, during any fiscal year, shall not make requisition upon the revenues of the United States for a larger amount than they make upon those of the District of Columbia.

I find, in conversation with many of our citizens, that an impression prevails that taxes are collected a year in advance of their disbursement and lie in unproductive idleness from the date of their collection until the passage of the law which authorizes their expenditure; that is to say, that moneys received in November are, so to speak, "locked up in the Treasury" until the succeeding Congress releases them by appropriation. As a matter of fact, our appropriations for a given year are made months before the collections for that year begin, and are based, not upon moneys already in hand, but upon estimates of what we expect to receive. To correct this misapprehension the following statement from the present year's transactions is submitted:

#### RECEIPTS.

|   |              |
|---|--------------|
| Cash balance to credit of the District of Columbia in United States Treasury July 1, 1895, as per Exhibit A, herewith |              |
| Collected in July, 1895   | \$429,090.99 |
| Collected in August, 1895   | 75,392.14    |
| Collected in September, 1895  | 50,963.33    |
| Collected in October, 1895  | 50,309.33    |
|   | 297,693.00   |
| Total collections July 1 to October 31, 1895  |              |
| Add amount due from United States   | 903,448.79   |
|   | 903,448.79   |
| Total revenues, District of Columbia, July 1 to October 31, 1895  | 1,806,897.58 |

## EXPENDITURES.

## Requisitions paid by United States Treasury in—

|  |                 |
|--|-----------------|
| July, 1895 .....   | \$732, 851. 31  |
| August, 1895 .....   | 571, 549. 77    |
| September, 1895 .....  | 382, 048. 07    |
| October, 1895 .....  | 386, 490. 56    |
| <hr/>  |                 |
| Total payments by United States Treasury July 1 to October 31,<br>1895 ..... | 2, 072, 939. 71 |
| Deduct revenues of District of Columbia, as above .....                      | 1, 806, 897. 58 |
| <hr/>  |                 |
| Expenditures in excess of receipts, November 1, 1895 .....                   | 266, 042. 13    |

It is clear from the foregoing statement that on the 1st day of November, 1895, the District treasury was empty and the government in debt to the United States. The collections for the month, therefore, instead of being hoarded until Congress shall appropriate them, will be used to pay this indebtedness and to meet our obligations between November 1, 1895, and the collection of the second installment of taxes in May, 1896. During this interval our expenditures will again exceed our receipts, and the May collections will be needed in part to reimburse the Treasury for its outlay in excess of the one-half payable by the United States.

Our financial condition on the first of the present month was exceptionally favorable in consequence of the fact that we had a large surplus at the opening of the year instead of commencing with a debt, as we did in 1893 and in prior years. But for this fact we should be largely in arrears to the General Government long before the second installment of taxes becomes due in May, 1896.

Under the operation of the act of July 31, 1894, familiarly known as the Dockery law, many accounts of former boards of Commissioners, which, with their unavailable balances, have cumbered the books of the departments for years, have been adjusted and closed. Other accounts of the same character which have been suspended or disallowed upon purely technical grounds, or for some informalities which involve no loss to the Government, but are due to mere differences of opinion between the accounting officers of the District and those of the Treasury as to the applicability of appropriations, are now the subject of conference between the Comptroller of the Treasury and this office, with good prospects of early and satisfactory adjustments. In a few instances of disallowance the differences are irreconcilable, and recourse must be had to Congress for remedial legislation. But inasmuch as the disallowed expenditures were all made in good faith and the Government received in every instance a fair equivalent for its outlay, there would seem to be no reason to expect other than favorable Congressional action in the premises.

The new system of accounting, in its application to the District, has produced some good results in addition to the closing of the accounts hereinbefore mentioned. It is flexible, reducing to a minimum the friction which is more or less incidental to a review of the action of one department by the officers of another, and speeds the adjustment and settlement of our accounts as rapidly as could be desired. In these particulars it is an improvement upon the old method, but in respect of safeguarding against fraud or error the latter is, in my opinion, much to be preferred. Of course, as my observation is confined to District accounts, my criticism is correspondingly limited, for without experience in the general workings of the law I would not presume to challenge its worth and fitness in the wider field of national accounts.

the amount drawn upon requisition; and, thirdly, the total balance of appropriations subject to requisition June 30, 1895.

G is a summarized statement of the various trust funds, showing, first, balances on hand July 1, 1894, and amounts collected and deposited in the Treasury of the United States during the year; secondly, advances made to the Commissioners upon their requisitions; and, thirdly, balances subject to requisition remaining in the Treasury June 30, 1895.

The question as to which is the better mode of collecting taxes, in two installments, as now, or in a single payment, as was formerly the custom, is at present the subject of much discussion. As a means of lessening the liability to error on the part of the taxpayer and of lightening the burdens of the assessor's and the collector's offices, one payment would prove of mutual advantage to the public and the government. | Expenditures in excess of receipts, November 1, 1895 .....                | 266, 042. 13    |

It is clear from the foregoing statement that on the 1st day of November, 1895, the District treasury was empty and the government in debt to the United States. The collections for the month, therefore, instead of being hoarded until Congress shall appropriate them, will be used to pay this indebtedness and to meet our obligations between November 1, 1895, and the collection of the second installment of taxes in May, 1896. During this interval our expenditures will again exceed our receipts, and the May collections will be needed in part to reimburse the Treasury for its outlay in excess of the one-half payable by the United States.

Our financial condition on the first of the present month was exceptionally favorable in consequence of the fact that we had a large surplus at the opening of the year instead of commencing with a debt, as we did in 1893 and in prior years. But for this fact we should be largely in arrears to the General Government long before the second installment of taxes becomes due in May, 1896.

Under the operation of the act of July 31, 1894, familiarly known as the Dockery law, many accounts of former boards of Commissioners, which, with their unavailable balances, have cumbered the books of the departments for years, have been adjusted and closed. Other accounts of the same character which have been suspended or disallowed upon purely technical grounds, or for some informalities which involve no loss to the Government, but are due to mere differences of opinion between the accounting officers of the District and those of the Treasury as to the applicability of appropriations, are now the subject of conference between the Comptroller of the Treasury and this office, with good prospects of early and satisfactory adjustments. In a few instances of disallowance the differences are irreconcilable, and recourse must be had to Congress for remedial legislation. But inasmuch as the disallowed expenditures were all made in good faith and the Government received in every instance a fair equivalent for its outlay, there would seem to be no reason to expect other than favorable Congressional action in the premises.

The new system of accounting, in its application to the District, has produced some good results in addition to the closing of the accounts hereinbefore mentioned. It is flexible, reducing to a minimum the friction which is more or less incidental to a review of the action of one department by the officers of another, and speeds the adjustment and settlement of our accounts as rapidly as could be desired. In these particulars it is an improvement upon the old method, but in respect of safeguarding against fraud or error the latter is, in my opinion, much to be preferred. Of course, as my observation is confined to District accounts, my criticism is correspondingly limited, for without experience in the general workings of the law I would not presume to challenge its worth and fitness in the wider field of national accounts.

In pursuance of the act of February 13, 1895, providing for the payment to contractors under the late board of public works of the difference between the rates stipulated in their contracts and the schedule of prices afterwards adopted and known as "board rates," \$27,500 worth of 3.65 bonds have been sold and the proceeds paid over to claimants or their representatives. The law authorizing these bonds, act of June 20, 1874, limits their amount to \$15,000,000, of which \$14,959,800 have already been issued, leaving on hand but \$40,200. No accurate forecast can be made as to the balance of these claims remaining unadjusted, and while I have been apprehensive that it would exceed the sum of the bonds held in reserve and necessitate further legislation, I am advised by those best informed upon the subject that the resources available will in all probability be sufficient to meet the demands.

The expenditures for witness fees in the police court are rapidly increasing, it being estimated that \$7,000 will be required for the service of the fiscal year 1897. As the proceedings in this court are of a summary nature, upon information and warrant, and not, as in other courts, after careful preliminary inquiry and indictment, there are many cases which prove upon trial to be so frivolous in their character as to awaken in the minds of the court officials a suspicion of collusion between the accused and the witnesses for the sake of the fee involved. The judges of the court have strenuously endeavored to protect the Government, refusing in every instance where fraud was apparent to allow the issue of certificates of attendance; but the abuse continues and grows apace. It is difficult to provide a remedy for the evil, but it may be well to consider the question with reference to a change in the law so as to decrease the allowance from \$1.25 per diem to a nominal sum, or abolish it altogether.

I should consider myself derelict in a sacred duty if I failed to urge the importance of continuing and increasing the appropriations, respectively, for the police and firemen's pension funds. But for the consent of Congress at its last session to supplement the fines and contributions of members by a limited sum from the District treasury, there would have been much want and suffering among the pensioners. As it was, the amount appropriated, together with the receipts from salary assessments, fines, excursions, and all other sources barely sufficed, in the case of the policemen's fund, to pay 60 per centum of the amount due, a widow for example, with an allotment of \$20 per month, receiving only \$12. The beneficiaries of these funds are the disabled and worn-out members of the police and fire departments and the widows and children of those who have died or been killed in the service, and as the amount appropriated is drawn exclusively from the revenues of the District of Columbia, with the undoubted sanction and hearty approval of every class in the community, it is not apparent why opposition should be made to an allowance sufficient to meet the very moderate requirements of the pension list.

In conclusion, it is at once a pleasure and a duty to commend the zeal and efficiency with which my collaborators in the work of the office have met its requirements. I do not believe that an abler or more conscientious corps of employees can be found in any corresponding department of the public service.

With grateful recognition of your constant and kindly support in the administration of the office, I am, very respectfully,

J. T. PETTY,  
*Auditor, District of Columbia.*

THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

# REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA. 27

## A.—Statement of revenues of the District of Columbia and appropriations by the United States for the fiscal year ended June 30, 1895.

## REPORT OF THE ASSESSOR.

OFFICE OF THE ASSESSOR,  
DISTRICT OF COLUMBIA,  
Washington, October 18, 1895.

GENTLEMEN: I have the honor to submit herewith my report for the fiscal year ended June 30, 1895, and, in accordance with the usual custom, a statement of the assessed value of the taxable real estate and personal property in the District of Columbia for the fiscal year ending June 30, 1896.

|   |                    |                     |
|---|--------------------|---------------------|
| Washington City:  |                    |                     |
| Taxable on land.....  | \$90, 942, 586. 00 |                     |
| Taxable on improvements .....   | 74, 457, 233. 00   |                     |
|   |                    | \$165, 399, 819. 00 |
| Washington County:  |                    |                     |
| Taxable on land at \$1.50.....  | 11, 613, 660. 00   |                     |
| Taxable on improvements at \$1.50 .....   | 5, 502, 500. 00    |                     |
|   |                    | 17, 116, 160. 00    |
| Taxable on land at \$1 .....  | 5, 396, 764. 00    |                     |
| Taxable on improvements at \$1.....   | 1, 009, 600. 00    |                     |
|   |                    | 6, 406, 364. 00     |
| Total assessed value of taxable real estate.....  |                    | 188, 922, 343. 00   |
| Personal property:  |                    |                     |
| Washington City.....  | 10, 585, 364. 00   |                     |
| Washington County.....  | 46, 985. 00        |                     |
| Railroads, taxed on gross receipts .....  | 339, 388. 00       |                     |
|   |                    | 10, 971, 737. 00    |
| Total assessed value of taxable real estate and personal property in the District of Columbia on July 1, 1895 ..... |                    | 199, 894, 080. 00   |
| Amount of tax:  |                    |                     |
| Washington City, at \$1.50.....   | 2, 480, 997. 29    |                     |
| Washington County, at \$1.50.....   | 256, 742. 40       |                     |
| Washington County, at \$1.....  | 64, 063. 64        |                     |
| Total real estate tax .....   |                    | 2, 801, 803. 33     |
| \$7,660,856 personal property, at \$1.50.....   | 114, 912. 84       |                     |
| \$2,971,493 capital stock street railways less realty, at \$1.50 .....  | 44, 572. 40        |                     |
| \$285,721 gross receipts street railways, at 4 per cent..   | 11, 428. 84        |                     |
| \$53,667 gross receipts street railways, at 2 per cent ..   | 1, 073. 35         |                     |
| Total tax on personal property.....   |                    | 171, 987. 43        |
| Total tax on real and personal property.....  |                    | 2, 973, 790. 76     |

The decrease in the assessed value of the real estate represented in the foregoing figures as compared with those presented in my report of last year is owing to the revision which was made under the act of August 14, 1894.

## THE TRIENNIAL ASSESSMENT FOR 1896-97.

The act of August 14, 1894, made provision for a board of assistant assessors, whose first duty was to make a revision and equalization of the real estate assessment then in existence and make return of their action on or before the first Monday of January, 1895.

The next most important duty was the triennial assessment, to be returned on or before the first Monday of January, 1896, on which date said board with the assessor will act as a board of equalization and review until the first Monday in June following, thus giving one full year to view and assess the property and five months to receive and consider complaints. An extension of time is found necessary, as will appear from the following letter:

WASHINGTON, D. C., *September 6, 1895.*

DEAR SIR: The law creating the board of assistant assessors requires that the board shall, on or before the first Monday in January, 1896, and every third year thereafter, make and deliver to the assessor of the District of Columbia a return in tabular form of the amount, description, and value of the real property subject to be listed for taxation in the District of Columbia; that said board shall determine from actual view the value of each separate tract or lot of real property in lawful money. To do this properly, and as required by the law, and make the return by the first Monday in January, 1896, will be physically impossible, and the board requests that Congress be asked for an extension of time to June 30, 1896.

The bill making the appropriation to carry out the law passed March 2, 1895. The board began its work March 21, 1895, and has been constantly in the field, except when performing duties as an excise board, making the assessment from actual view. Five weeks of time were occupied by the board assessing new buildings constructed in the District for the year ended June 30, 1895, which must be returned to the assessor by July 1 of each year.

When it is understood that there are 69½ square miles of territory in the District of Columbia, every piece or lot of which must be assessed from actual view, and the further fact that five weeks of the time from March, 1895, to January, 1896, will be taken up in assessing new buildings and the additional duty involved as an excise board, and there being 580 retail and wholesale places under its supervision, it will readily be understood how impossible it will be to make the return, as required, by January, 1896.

The excise board will have to consider in November of this year the question of granting a renewal of license to all of the above places, and this, of necessity, will require much time and careful consideration.

Respectfully,

JAMES A. BATES, *Chairman.*

The ASSESSOR OF THE DISTRICT OF COLUMBIA.

A postponement of the time when this assessment is to be returned means only a delay of six months, and would make the taxes for the fiscal year ending June 30, 1897, due and payable in one installment in the month of May of that year, instead of one-half in November, 1896, and the other half in May, 1897, as now provided.

It has been suggested by gentlemen representing many prominent taxpayers that the payment of taxes in one installment would be objectionable, and have asked if it would be practicable to have the first half of the taxes due and payable in November, 1896, on the basis of our present assessment, and the second half in the following May to be paid on the basis of the new assessment. This plan would be a serious departure from our present system, and a large amount of additional labor would be required from this office. This fact, however, should not be considered when the public convenience is concerned.

I am afraid that it would be an injustice to those parties whose property is now recognized as assessed too high. For instance, a house is now assessed at \$10,000, but our board concludes that this figure is altogether too high and reduce the valuation to \$8,000; and there are numerous cases of a similar character. It would be a manifest injustice to require the owner of this property to pay the first half of his tax on the basis of the high assessment, when the board has decided that the valuation for the whole year shall be on the basis of the reduction.

The unusual financial pressure attending the withdrawal in one month of so much money from circulation as would be necessary by this pay-

ment in one installment, can be remedied by Congress making our banks the depositories of the District funds instead of locking them up in the vaults of the Treasury.

The revision provided for in the second section of the act of 1894 was returned to this office at the required time. The few months allotted to this work gave but slight opportunity to make personal inspection of the properties complained of. The promise was made, however, that existing errors and irregularities would be examined and the proper remedies applied in the new assessment. The law requires this assessment to be returned by the first Monday of next January, and our taxpayers are anxiously awaiting the result, so as to know what will be the standard of valuation on which their taxes will be collected for the ensuing three years. It will be remembered that a former board was compelled to make a similar request, and as a result the act of April 28, 1892, was passed, providing that the time fixed for the return of assessment be extended for that portion of the District outside the cities of Washington and Georgetown, and that the whole tax levied on that portion of the District for the fiscal year 1893 should become due and payable in one installment in the month of May in that year. This plan might probably meet the present emergency, and if so, I think it would be more desirable than extending the time covering the whole District.

#### PERSONAL PROPERTY TAX.

I have so frequently called attention to the personal property tax that it would seem useless to say anything further on the subject, but I am so well satisfied that an equitable enforcement of this law is absolutely impossible that I deem it my duty to make another appeal for its abolishment. In former reports I have claimed that this law was wrong in principle, that it invited perjury, and was calculated to demoralize the standard of public morality. I have presented unassailable facts and figures in support of this position, and have also shown that the small revenue resultant from this tax could easily be made up on a revision of our license laws, which would avoid the necessity of prying into the private affairs of our citizens. I venture this further assertion that if appealed to, our courts would find a close relationship between this and the much abhorred income tax, which was lately abolished by a decision of our highest judicial tribunal. I submit the question without further argument or suggestion, in the hope, however, that the law will be repealed.

#### INCREASE OF WORK AND REORGANIZATION OF SALARIES.

It is perhaps unnecessary to call attention to the rapid increase in the work of this office. For instance, in 1871 the entire tax accounts for the cities of Washington and Georgetown and the county were carried on five tax ledgers, and the annual number of transfers of property at that time amounted to only a few hundred. It now takes nineteen tax ledgers to carry the accounts, and an annual average of 6,000 transfers of property. The number of accounts has increased since 1871 from 13,512 to 29,894 for the present year, being 27,990 real estate and 1,904 personal tax accounts. This large increase in the number of accounts is due to the many subdivisions that have been made, especially in that portion of our District designated the county. The "old farm" that in 1880 took but one entry to carry it on our records and but one bill to render the account, is now a subdivision with hundreds

of lots and different owners. Each additional owner is of course a duplication of the work which is necessary to be done in this office over and above that which was required for the original farm. In 1880 there were only about 6,000 different pieces of property in the county and about 32,000 this year, which means more than five times the amount of work to be done. The increase in the number of property items in the city of course is not so large, but still the number has very largely increased during the same period as that mentioned for the county.

The very slight increase in the clerical force is not at all commensurate with the increase of the work, and the consequence is that the employees find it absolutely necessary to work extra hours. It has been customary to make an appropriation of \$7,000 or \$8,000 in the year provided for the triennial assessment, to be used in the employment of a temporary force, but the character of the work required can not be done satisfactorily without previous experience, and rather than ask for the usual appropriation, I have submitted in my estimates for the year ending June 30, 1897, a reclassification of the salaries, which, if approved, would result in a reorganization of the entire clerical force on a basis commensurate with the qualifications of the respective clerks. It was my intention to recommend an increase in the number of clerks, but on more careful consideration I have concluded that the interests of the office would be better subserved by an adjustment of the salaries, which would be accepted as a partial recognition of the extra work already rendered, and which will be necessarily continued. The office is extremely fortunate in having a number of gentlemen possessing the qualifications of experts, but there is an apparent inconsistency in the fact that for this class of service the salaries should be as low as \$900 and \$1,000 per annum. No clerk capable of performing the duties required of him in this office should receive less than \$1,200 per annum. The duties devolving upon my two assistants require executive ability besides a thorough knowledge of all the details of the office, and it must be conceded that the salary now attached to these positions is not commensurate with the responsibility it carries.

The character of the work required of the license clerk is also worthy of special notice. There are more than thirty different kinds of licenses to be issued annually, averaging about \$375,000 as a revenue for the District. The license clerk also keeps all the records pertaining to insurance matters. The salary for the duties required is entirely too small and should be increased. The clerical force generally is deserving of great credit for the prompt execution of the work, and the cheerfulness with which it is done is deserving of special commendation. Without this interested devotion to their duties it would be impossible to keep up the routine business of this important branch of the District government.

#### ARREARS OF TAXES.

Under the appropriation to continue arrears of taxes, two clerks are kept constantly employed and the arrears as to Washington City are complete to July 1, 1892, and is of incalculable advantage in the matter of rendering bills and tax certificates. When the city is completed, the multitude of accounts in the county will be gone over, and as soon as possible a book prepared for that purpose. All the records prior to 1890 have been systematically arranged on shelves provided in the basement, and the clerks employed on arrears have now ample facilities for the proper execution of the work assigned them.

ment in one installment, can be remedied by Congress making our banks the depositories of the District funds instead of locking them up in the vaults of the Treasury.

The revision provided for in the second section of the act of 1894 was returned to this office at the required time. The few months allotted to this work gave but slight opportunity to make personal inspection of the properties complained of. The promise was made, however, that existing errors and irregularities would be examined and the proper remedies applied in the new assessment. The law requires this assessment to be returned by the first Monday of next January, and our taxpayers are anxiously awaiting the result, so as to know what will be the standard of valuation on which their taxes will be collected for the ensuing three years. It will be remembered that a former board was compelled to make a similar request, and as a result the act of April 28, 1892, was passed, providing that the time fixed for the return of assessment be extended for that portion of the District outside the cities of Washington and Georgetown, and that the whole tax levied on that portion of the District for the fiscal year 1893 should become due and payable in one installment in the month of May in that year. This plan might probably meet the present emergency, and if so, I think it would be more desirable than extending the time covering the whole District.

#### PERSONAL PROPERTY TAX.

I have so frequently called attention to the personal property tax that it would seem useless to say anything further on the subject, but I am so well satisfied that an equitable enforcement of this law is absolutely impossible that I deem it my duty to make another appeal for its abolishment. In former reports I have claimed that this law was wrong in principle, that it invited perjury, and was calculated to demoralize the standard of public morality. I have presented unassailable facts and figures in support of this position, and have also shown that the small revenue resultant from this tax could easily be made up on a revision of our license laws, which would avoid the necessity of prying into the private affairs of our citizens. I venture this further assertion that if appealed to, our courts would find a close relationship between this and the much abhorred income tax, which was lately abolished by a decision of our highest judicial tribunal. I submit the question without further argument or suggestion, in the hope, however, that the law will be repealed.

#### INCREASE OF WORK AND REORGANIZATION OF SALARIES.

It is perhaps unnecessary to call attention to the rapid increase in the work of this office. For instance, in 1871 the entire tax accounts for the cities of Washington and Georgetown and the county were carried in five tax ledgers, and the annual number of transfers of property at that time amounted to only a few hundred. It now takes nineteen tax ledgers to carry the accounts, and an annual average of 6,000 transfers of property. The number of accounts has increased since 1871 from 13,512 to 29,894 for the present year, being 27,990 real estate and 1,904 personal tax accounts. This large increase in the number of accounts is due to the many subdivisions that have been made, especially in that portion of our District designated the county. The "old farm," that in 1880 took but one entry to carry it on our records and but one bill to render the account, is now a subdivision with hundreds

of lots and different owners. Each additional owner is of course a duplication of the work which is necessary to be done in this office over and above that which was required for the original farm. In 1880 there were only about 6,000 different pieces of property in the county and about 32,000 this year, which means more than five times the amount of work to be done. The increase in the number of property items in the city of course is not so large, but still the number has very largely increased during the same period as that mentioned for the county.

The very slight increase in the clerical force is not at all commensurate with the increase of the work, and the consequence is that the employees find it absolutely necessary to work extra hours. It has been customary to make an appropriation of \$7,000 or \$8,000 in the year provided for the triennial assessment, to be used in the employment of a temporary force, but the character of the work required can not be done satisfactorily without previous experience, and rather than ask for the usual appropriation, I have submitted in my estimates for the year ending June 30, 1897, a reclassification of the salaries, which, if approved, would result in a reorganization of the entire clerical force on a basis commensurate with the qualifications of the respective clerks. It was my intention to recommend an increase in the number of clerks, but on more careful consideration I have concluded that the interests of the office would be better subserved by an adjustment of the salaries, which would be accepted as a partial recognition of the extra work already rendered, and which will be necessarily continued. The office is extremely fortunate in having a number of gentlemen possessing the qualifications of experts, but there is an apparent inconsistency in the fact that for this class of service the salaries should be as low as \$900 and \$1,000 per annum. No clerk capable of performing the duties required of him in this office should receive less than \$1,200 per annum. The duties devolving upon my two assistants require executive ability besides a thorough knowledge of all the details of the office, and it must be conceded that the salary now attached to these positions is not commensurate with the responsibility it carries.

The character of the work required of the license clerk is also worthy of special notice. There are more than thirty different kinds of licenses to be issued annually, averaging about \$375,000 as a revenue for the District. The license clerk also keeps all the records pertaining to insurance matters. The salary for the duties required is entirely too small and should be increased. The clerical force generally is deserving of great credit for the prompt execution of the work, and the cheerfulness with which it is done is deserving of special commendation. Without this interested devotion to their duties it would be impossible to keep up the routine business of this important branch of the District government.

#### ARREARS OF TAXES.

Under the appropriation to continue arrears of taxes, two clerks are kept constantly employed and the arrears as to Washington City are complete to July 1, 1892, and is of incalculable advantage in the matter of rendering bills and tax certificates. When the city is completed, the multitude of accounts in the county will be gone over, and as soon as possible a book prepared for that purpose. All the records prior to 1890 have been systematically arranged on shelves provided in the basement, and the clerks employed on arrears have now ample facilities for the proper execution of the work assigned them.

## TAX CERTIFICATES.

During the year ended June 30, 1895, there have been 6,172 tax certificates or certified statements issued from this office. The examination for these certificates requires great care and expert knowledge, and it affords me pleasure to certify to the faithfulness, care, and diligence of the clerks employed on this important duty.

## PLATS OF SUBDIVISIONS.

The act of March 2, 1895, contained an appropriation of \$1,950 to have the plats of subdivisions of the various squares in the city of Washington photolithographed. These plats had been carefully prepared by the draftsman connected with this office from official data in the surveyor's records. They are models of artistic workmanship and are presumed to be absolutely correct in all details. In accordance with the usual custom, an advertisement was inserted in the daily papers asking for sealed proposals to furnish twelve photolithographed sets, each set to be subdivided into not less than four volumes, and all to be printed on Byron Weston's linen ledger paper, bound in full leather, with Philadelphia patent binding and covered with canvas.

Three different bids were submitted, as follows:

|   |          |
|---|----------|
| Sackett & Wilhelm's Lithographing Company ..... | \$6, 750 |
| Capital Lithographing Company .....             | 3, 350   |
| William E. Stockett & Co .....                  | 1, 950   |

Under date of March 16, 1895, an order was issued accepting the proposal last mentioned. The work is now fully completed in four handsome volumes, and reflects great credit upon the contractors (William E. Stockett & Co., of this city) for the admirable manner in which the work has been executed. These books will prove of inestimable value to this office as well as to the other offices of the District to whom copies have been furnished.

The draftsman is now engaged in making plats of that portion of Washington formerly known as Georgetown, commencing with square 1171 and ending with 1301. This will make an additional volume which will soon be completed, and should be photolithographed as soon as possible. The expense for twelve copies of this volume will be about \$500, and I recommend that an appropriation for that amount be asked for.

## CANCELLATION OF TAXES.

I deem it my duty to call attention to my report of last year on the subject of cancellation of taxes, as follows:

For some years past, it has been customary for the Commissioners, on request of the party holding the tax-title deed, to issue orders directing this office to cancel all taxes due and unpaid prior to the date of the sale of the property. These orders are based on decisions of the supreme court of this District in the *Brewer and Pilling* cases, and since those decisions have been rendered, a great many thousand dollars have been lost to the District revenues.

As the full force and effect of the ruling in this matter is becoming better known many are taking advantage of it, and instead of paying their taxes promptly, are letting the various payments go by default, looking forward to the fact that each year as it passes with the taxes unpaid, only adds to the amount to be subsequently canceled, and thereby adding additional burdens of expense upon the prompt taxpayer in order to make up deficiencies caused by these orders of cancellation.

Under the provisions of the act approved March 19, 1890, property which has once been advertised and sold for nonpayment of taxes, can not be again advertised for the same tax, and consequently when a party, other than the District, is the purchaser,

the certificate of sale is for the tax of one year only, although twenty years and more of arrears may have been due and unpaid. After the lapse of two years the holder of the certificate is entitled to a deed, and here, I think, the issue should be made. When the deed is issued, all preexisting liens or titles of every description up to the date of the sale upon which the deed is made are extinguished, so far as the District is concerned, and the beneficiary under the deed is legally entitled to the cancellation of all unpaid taxes prior to the date of the sale under which he holds title. A bill (H. R. 3293) was introduced in the House of Representatives under date of September 21, 1893, which, with some amendments, would correct the evil complained of, and I trust the Commissioners will urge its passage.

#### LICENSES.

During the year ended June 30, 1895, 3,928 licenses were issued, including 605 barroom and 172 wholesale liquor licenses. There have been certified to the collector of taxes, 439 certificates for miscellaneous receipts, including 166 for steam-engineer licenses. The total amount collected was \$375,410.28, credited to the various sources as follows, viz:

#### SCHEDULE A.—Receipts from licenses during the year ended June 30, 1895.

| Sources of revenue.                           | Amount.    | Increase. | Decrease.   |
|---|------------|-----------|-------------|
| Apothecaries.....                             | \$811.92   |           | \$0.08      |
| Auctioneers.....                              | 1,500.03   |           | 41.67       |
| Brokers.....                                  |            |           | 58.34       |
| Banks and bankers.....                        | 333.80     |           | 96.13       |
| Barrooms.....                                 | 254,830.02 |           | 20,565.03   |
| Brewers.....                                  |            |           | 25.00       |
| Billposters.....                              | 20.00      |           | 10.00       |
| Billiard, bagatelle, and other tables.....    | 2,218.67   | \$704.78  |             |
| Cattle brokers.....                           | 423.36     |           | 31.68       |
| Commission merchants.....                     | 1,993.36   |           | 236.70      |
| Dealers in ice merchandise.....               | 174.00     |           | 166.00      |

| Wholesale liquor dealers.....                 | 44,942.20  | 1,958.10  |             |
| Total.....                                    | 375,410.28 | 5,553.50  | 22,352.16   |
| Total decrease, 1894-95.....                  |            |           | \$22,352.16 |
| Total increase, 1894-95.....                  |            |           | 5,553.50    |
| Total decrease.....                           |            |           | 16,798.66   |
| Receipts from licenses, 1893-94.....          |            |           | 392,208.94  |
| Receipts from licenses, 1894-95.....          |            |           | 375,410.28  |
| Total decrease.....                           |            |           | 16,798.66   |

It will be perceived that there is a slight decrease in some of the items of revenue, principally from liquor licenses. This deficiency is more apparent than real, however, as the enormous increase of the previous year was caused by exceptional conditions, viz, the passage of a new excise law, and a duplicate payment which was afterwards refunded. The other items are to be attributed to the prevailing business depression and adverse decisions of the courts in the construction of some of the license laws.

## LICENSE TAXES AS A SOURCE OF REVENUE.

I have had occasion heretofore to invite your attention to the necessity for an immediate revision of the license laws, and the passage of new legislation to make them effective. Some of them are obsolete or nullified by judicial rulings, and should either be reenacted in accordance with modern necessities and conditions, or expunged from the statute books. The officers charged with their enforcement would thus be relieved from the necessity of seeking legal advice.

In this connection I would state, that since my last report, the clauses taxing fish and meats when vended by produce dealers trading at large have been construed by the court as exempting them from the payment of license taxes. This class of dealers, as always, have contributed largely to the revenues of the District, and I deem it particularly unfortunate that venders of certain articles are taxed beyond reason, while others escape entirely. The principal cities of the country generally license them from motives of public policy, but here I regard the amount charged as excessive. It might reasonably be reduced to \$18 instead of \$25 per annum without impairing the revenues materially, and the class subject to license be enlarged.

## PEDDLERS.

The same recommendation is made in reference to peddlers. The receipts from this source have fallen off more than two-thirds in the last few years. The amount of tax is too great, and either invites an evasion of the law, or deters those who would otherwise pay it from transacting business. If the law is altered, the definition of the class constituting peddlers should be clear and explicit. The necessity for new legislation seems to be doubly manifest at this time, as there is a disposition to question the validity of the present law, and claim exemption by reason of the interstate-commerce act, and alleged decisions in some of the States, involving the liability of peddlers to taxation.

## BREWERS.

No license taxes have been collected during the past year either from brewers or their agents. Distillers, and manufacturers of liquors, contribute nothing to the license revenues of the District.

## CLUBS AND THE EXCISE LAWS.

The present excise law was enacted March 3, 1893, and amended May 11, 1894. It has already engaged the attention of the law officers in defining the rights of citizens claiming exemption from taxation. The amendment which was passed with a view of securing the privilege of hotels to dispense liquors, in view of certain rulings, bids fair at an early date to be the subject of contention in the courts. Certain clubs, at the beginning of the last license year, complied with the law and deposited their license fees with the collector of taxes; but subsequently, upon an alleged decision of the police court, in a case with which they claimed their interests were identical, demanded the return of their money. The Commissioners promptly refused, and there the subject rests. It is safe to predict that the matter will be brought to an issue at an early date, as all liquor licenses expire October 31. Should the law taxing clubs dispensing liquors prove defective, it will, in my opinion, prove particularly unfortunate for the interests of the District. There should be something more tangible, apart from sentiment, than the mere filing of articles of incorporation as a condition precedent to,

exemption from taxation in the sale of liquors. At the present time this condition of affairs is being taken advantage of by those whose claims are, as a matter of fact, without the slightest foundation. No liquor law can or ought to be in existence, which discriminates between citizens seeking its protection. Organizations or clubs, as well as individuals, should pay if they engage in the business.

#### MANUFACTURES.

The section of the law exempting makers or manufacturers of distilled or fermented liquors, wines, or cordials has, as time has elapsed, developed a capacity for exemption little dreamed of at the date of its passage. The liquor traffic is legalized by Congress, and law-abiding citizens in that business, while held to a strict account, should receive business protection. Breweries and manufacturers of liquors from nearly a dozen cities in the Union are represented in the District of Columbia. Their goods are shipped, sold, and dispensed here without being taxed. As a matter of equity, I can see no reason why this unjust discrimination should not be removed by proper legislation.

#### MERRY-GO-ROUNDS.

A subject which has been the source of endless vexation to the community and this office during the year, has been the licensing and location of merry-go-rounds or flying horses in certain sections of our city. They (in most instances), attract crowds requiring police surveillance, and constant vigilance in the suppression of disorder. Residents in their vicinity complain bitterly, and they are regarded as such a nuisance that the Commissioners deemed it wise to refuse the proprietors license to conduct their business. Unfortunately, this course has only resulted in a loss of revenue without abating the evil. Each day the proprietors call at this office, tender the money for a license, and are refused, thus securing exemption from prosecution in the police court. The only remedy seems to be with Congress, to either abate them entirely, or banish them beyond the city limits.

#### LICENSE TAXES OF STREET RAILWAY COMPANIES.

No license taxes have been paid by any of the street railway companies using horses as a motive power, during the past year. The validity of the law taxing them having been affirmed by a decision of the Supreme Court of the United States, it was hoped there would be no further delay in the payment of taxes in arrears. I can only direct attention to this fact.

#### INSURANCE.

One hundred and eighty-four insurance companies or their agents have been licensed since my last report, viz: 109 fire, 55 life, 20 casualty accident and live stock companies. This department is overwhelmed at times with communications from, and in reference to, various assessment, fraternal, and so-called benevolent organizations, building and loan associations with an insurance branch, maturity certificate companies, and the originators of a thousand and one schemes to subsist upon the community by offering promises for cash, and inducements of profit which can never be realized. I regret to say there seems to be no law to prevent their coming here. Some of them locate, thrive apace, and when the golden harvest is ripe, fold their tents and disappear. If they remain, it is useless to sue them, for they have nothing, and

their contracts are so shrewdly worded that it is difficult to prove actual fraud. It seems unnecessary to repeat my recommendations of former years. New laws should be passed which would better protect the interests of the citizens of the District. There should be proper supervision, and the law made effective by the imposition of proper penalties for its infraction. Every company soliciting insurance business, or agreeing for a consideration to pay sums of money after the lapse of a certain period of time, should be required to deposit with the District Commissioners not less than \$10,000 in cash or securities, in their discretion, to secure their policy or certificate holders from loss.

#### HACKS, CABS, AND PUBLIC VEHICLES.

Five hundred and forty-seven vehicles were licensed the past year, divided as follows:

|  |     |
|--|-----|
| Numbered hacks, omnibuses, and 2-horse vehicles .....        | 113 |
| Numbered cabs, coupes, carriages, and 1-horse vehicles ..... | 392 |
| Herdic coaches running on regular routes .....               | 42  |
| Total .....  | 547 |

Very respectfully,

MATTHEW TRIMBLE,  
*Assessor, District of Columbia.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

#### APPENDIX A.

#### OFFICE OF THE ASSESSOR, DISTRICT OF COLUMBIA, Washington, September 30, 1895.

GENTLEMEN: In compliance with your request, I have the honor to submit the following estimate of the amount required for the proper support of this office for the fiscal year ending June 30, 1897:

|  |         |         |
|--|---------|---------|
| Assessor .....                                     |         | \$3,500 |
| 3 assistant assessors, at \$3,000 each .....       | \$9,000 |         |
| 1 assistant assessor .....                         | 2,000   |         |
| 1 assistant assessor .....                         | 1,800   |         |
| 1 clerk .....                                      | 1,600   |         |
| 3 clerks, at \$1,400 each .....                    | 4,200   |         |
| 1 license clerk .....                              | 1,400   |         |
| 1 inspector of licenses .....                      | 1,200   |         |
| 1 draftsman .....                                  | 1,400   |         |
| 1 clerk to board of assistant assessors .....      | 1,200   |         |
| 5 clerks, at \$1,200 .....                         | 6,000   |         |
| 2 clerks, at \$1,000 .....                         | 2,000   |         |
| 1 messenger .....                                  | 480     |         |
| 1 messenger for board of assistant assessors ..... | 600     |         |
| To continue arrears of taxes .....                 |         | 32,880  |
| Contingent expenses .....                          | 2,400   |         |
|  | 2,600   |         |
| Total .....  |         | 5,000   |
|  |         | 41,380  |

Very respectfully,

MATTHEW TRIMBLE,  
*Assessor, District of Columbia.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## APPENDIX B.

*Estimated receipts of the District of Columbia for the fiscal year ending June 30, 1897,  
exclusive of the water department.*

|  |   |
|--|---|
| Tax on real estate, \$182,515,979, at \$1.50.....              | \$2,737,739.69                              |
| Tax on real estate, \$6,406,364, at \$1 .....                  | 64,063.64                                   |
|  | <hr/>                                       |
| Tax on personal property, \$10,632,349, at \$1.50.....         | 2,801,803.33 × 80 per cent = \$2,241,442.66 |
| Arrears of real-estate taxes.....                              | 159,485.24 × 90 per cent = 143,536.71       |
| From railroads, tax on gross receipts, \$339,388.....          | 275,000.00                                  |
| Arrears of personal taxes.....                                 | 12,502.19                                   |
| Penalties and interest on taxes .....                          | 10,000.00                                   |
| Advertising property for arrears of taxes.....                 | 70,000.00                                   |
| Licenses.....  | 4,000.00                                    |
| Market rents.....  | 340,000.00                                  |
| Fines from courts.....   | 17,000.00                                   |
| Building-permit fees.....                                      | 35,000.00                                   |
| Rent of wharves and District property.....                     | 6,000.00                                    |
| Sale of fish wharf.....  | 2,000.00                                    |
| Certificates of arrears of taxes .....                         | 300.00                                      |
| Surveyor's fees.....   | 3,000.00                                    |
| Sealer of weights and measures' fees.....                      | 5,000.00                                    |
| Water permits.....   | 3,500.00                                    |
| Fees from recorder of deeds, and register of wills.....        | 1,400.00                                    |
| Dog tags.....  | 5,000.00                                    |
| Pound fees.....  | 15,000.00                                   |
| Hay scales.....  | 600.00                                      |
| Sale of old material.....                                      | 1,000.00                                    |
| Miscellaneous, including fees of inspector of gas meters ..... | 300.00                                      |
| New buildings.....   | 3,500.00                                    |
|  | <hr/>                                       |
| Total estimated receipts .....                                 | 3,225,081.56                                |

*Valuations on which foregoing estimates are based.*

|   | 1 or 2 passengers.                           | Each additional passenger. | 1 or more passengers. | 1 or 2 passengers.                                | Each additional passenger. | 1 or more passengers. |
| By the trip:                                      |  |                            |                       |   |                            |                       |
| 15 squares or less.....                           | \$0.50                                       | \$0.25                     | .....                 | \$0.80  | \$0.40                     | .....                 |
| Each additional 5 squares or parts of squares...  | .10  | .10                        | .....                 | .15   | .15                        | .....                 |
| By the hour:                                      |  |                            |                       |   |                            |                       |
| First hour .....                                  |  |                            | \$1.50                |   |                            | \$1.50                |
| Each additional quarter hour or part thereof..... |  |                            | .25                   |   |                            | .40                   |

When vehicles are not engaged by the hour, trip rates shall be charged.

When charges for consecutive trips exceed rates per hour, charges shall be by the hour.

Fare to points outside the cities of Washington and Georgetown shall be charged by the hour, but vehicles dismissed outside city limits may charge 25 cents additional.

Disputes may be settled at the nearest police station.

A 2-horse vehicle is not compelled to carry less than two passengers except when paid for two.

Children between 5 and 12 years, one-half rates.

Each passenger shall be entitled to have conveyed, without extra charge, one trunk or other traveling box or bag: *Provided*, That there be no more than two trunks or other traveling boxes or bags to be conveyed at any one time for the person or persons hiring the hack. If there be more than two trunks, traveling boxes, or bags, the driver shall be entitled to 25 cents for each one additional to the two. Each passenger shall be entitled also to have conveyed, without charge, such other small packages as can be conveniently carried within the hack, and the driver shall load and unload all baggage without charge.

SEC. 3. Every hack shall have permanently affixed to the interior thereof, in a place readily to be seen by the passenger, the foregoing schedule of rates, and no other, which schedule shall be printed on heavy cards, 8 by 10 inches in size, printed in black ink, with full-face type.

SEC. 4. In case of any disagreement between the driver and the passenger of a hack, the same may be referred by the passenger to the nearest police station, whither the driver shall convey him without discussion or delay, and the decision of the lieutenant of police or other officer in charge of such station shall be conclusive; and in case the passenger is about to leave by railroad, stage, or steamboat, such disagreement shall be summarily decided by the police officer or principal police officer on duty at the station or other place of departure. If decision is in favor of passenger, the driver must carry him from police station to his original destination without additional charge.

SEC. 5. Both the driver and the proprietor or lessee of a hack shall be held responsible for any violation of any of the foregoing provisions of this article: *Provided*, That the penalty therefor shall be paid at once; and for every violation of any of the said provisions the said driver, proprietor, or lessee shall forfeit and pay a penalty of \$5 if the complainant be a resident of the District of Columbia, and \$10 if the complainant be a nonresident, and in addition to this the license of the said hack may, in the discretion of the Commissioners, be revoked.

SEC. 6. If any driver, proprietor, or lessee of a hack shall refuse to convey a passenger at the rates hereinbefore provided, the license of the hack may be revoked by the Commissioners.

## REPORT OF THE EXCISE BOARD.

OFFICE OF EXCISE BOARD, DISTRICT OF COLUMBIA,  
*Washington, December 2, 1895.*

GENTLEMEN: The excise board of the District of Columbia has the honor to submit for your consideration a report of the operations of said board for the license year ending October 31, 1895. During said year, which commenced November 1, 1894, the board granted 605 barroom liquor licenses, comprising hotels, clubs, and the ordinary barrooms, and 172 wholesale liquor licenses, including groceries, bottlers, brewers' agents, confectioners, and strictly wholesale places. The number of barroom applications rejected during said period was 52, and the number of wholesale liquor applications unfavorably acted on was 11.

For the year ending October 31, 1894 (during a portion of which time the board was first charged with the duty of considering applications for liquor licenses), 639 barroom licenses were granted and 57 were rejected. There were 174 applications for wholesale liquor licenses granted and 14 cases rejected. In this connection it may be stated that the board since August 17, 1894, at which time it was created, has not licensed any new barrooms, except such as were located in buildings used for hotel purposes and having not less than 25 rooms for guests. One license was granted to a barroom not in a hotel, but the place had been licensed during the previous year and was licensed only by the use of a license that had been granted to another place which had been closed up.

Originally it was the opinion of the board that Congress had unintentionally augmented the arduous duties of the board of assistant assessors by giving it jurisdiction over excise matters, but experience has proven that the very duty the board is called upon to perform in making an assessment from actual view gives it the very best opportunity of ascertaining many important details as to the character of the place sought to be licensed, its surroundings and the needs, if any, for a continuance of a liquor license. Considerations like these enter into and form the evidence which enables the board to form intelligent judgment outside of police reports and the data furnished by its inspector.

The board respectfully makes mention of the fact that heretofore applicants for liquor licenses were in the habit of failing to comply with the law relative to the filing of their applications accompanied by the required deposits on or before November 1. This innovation was, however, corrected this year by the board, with the satisfying result that only 7 licensees failed to comply with the requirements of the law. The revenue derived from liquor applications amounted to \$273,000, proportioned as follows: Barrooms, \$233,000; wholesale, \$40,000.

In explanation of the foregoing statement the board decided that in order that there should not be any excuse for applicants for liquor licenses being tardy in presenting their applications in time, as also making the necessary deposits, it was determined on that every licensee should be duly notified of the requirements of the liquor law, and the following letter was sent to every dealer in liquors:

OFFICE OF EXCISE BOARD, DISTRICT OF COLUMBIA,  
*Washington, October 1, 1895.*

DEAR SIR: Your attention is invited to the following section of the excise law:

"SEC. 17. That all applicants who have had a license during the preceding year shall apply for a renewal of such license on or before November first of each license year, and shall be permitted to continue business until license shall be granted or refused by the excise board; but in all cases of refusal to grant license such proportion of the license fee as may have become due shall be deducted and retained from the sum deposited therefor as the time from the first day of November to the date of such refusal bears to the entire license year, and no other person shall be permitted to conduct said business until a license is issued therefor."

I am directed to notify you that your application for a renewal of liquor license, with the deposit provided for in the act, must be made with the collector of the District of Columbia on or before 3 o'clock p. m. November 1, 1895. The failure on your part to comply with the law will necessitate a new application, the securing of signatures, and the closing of your place, in the case of a barroom, until action can be taken by the board, and if renewal of application be for a wholesale liquor license no liquors can be sold until a new application is filed and acted on.

By order of the Excise Board of the District of Columbia.

The excise law contains no provision for the punishment of a seller of adulterated liquors, and the board becoming aware that there was need for such an amendment, and to strengthen its position in the matter, had 1,300 samples collected, consisting of the various grades of liquor on sale in the barrooms and wholesale places in the District. These collections have been turned over to the health department for chemical analyses to determine with certainty the character and quality of such articles which are in a large measure a great factor in the community. The desire of the board in this matter is to maintain a high grade of liquors and to protect the purchasers of the same. The law if amended as suggested would be the means of assuring the public that an authoritative control has been put over the quality of liquors for domestic or social uses. It was this view that leads the board to suggest the following proviso to the excise law:

Every person so licensed, or any other person who shall intentionally or otherwise sell or give away, or direct or permit any person or persons in his employ to sell or give away, malt, spirituous, and vinous liquors which shall be adulterated with strychnine, strontia, sugar of lead, or any substance which is poisonous or injurious to health, shall forfeit and pay the sum of \$300, and in case of nonpayment of such fine shall be imprisoned in the jail or workhouse of the District of Columbia for a period of time not exceeding six months, or till the same is paid, and shall forfeit his or her liquor license.

Under a decision of the court, clubs are exempted from the payment of a liquor-license fee. As clubs under the law are entitled to greater privileges than the keeper of a barroom in being allowed to sell to members and their guests on Sunday, and at hours when it is unlawful for the keeper of a saloon to sell liquors, it is suggested that the law be changed so as to make it mandatory on all clubs where liquors are dispensed to take out a license. In this connection it can be said that the board is informed that there are a number of clubs now formed, and the organization of others talked of, whose only purport is that of dispensing liquors, and this without the payment of the required license money. The opinion of the board is that many of the so-called clubs are simply "speak-easies."

In conclusion the board would respectfully invite your attention to its letter dated October 9, 1895, addressed to your honorable body, in which were its recommendations, which, in brief, had in view the changing of the liquor law so as to prevent the adulteration of liquors; to increase the barroom license from \$400 to \$800; to increase the wholesale liquor license from \$250 to \$400; that clubs be required to take out liquor licenses, and to raise the salary of the assistant clerk to the board to \$1,200.

Very respectfully,

J. HARRISON JOHNSON,

*Chairman Excise Board of the District of Columbia.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

On account of miscellaneous items—Continued.

| 1885..... | 10,862.84   | 6,457.40    |            |             |            |
| 1886..... | 10,871.57   | 8,036.40    | Total..... | 884,349.82  | 312,397.74 |
| 1887..... | 6,467.02    | 14,145.00   |            |             |            |

In accordance with an act of Congress approved August 14, 1894, creating a board of assessors, etc., collections on account of realty tax for the year ended June 30, 1895, were received in one instead of two payments as heretofore, and in consequence the receipts for the month of May were the largest in the history of the office. To receive and account for this large sum taxed to the utmost the capacity of the office, but notwithstanding the inadequacy of the force, the work was accomplished without friction and in a correct and satisfactory manner, though in order to do this it was necessary for the entire force of the office to work before and after hours for several successive weeks.

Experience has taught us that it would be an advantage to continue this method of payment, as this practical illustration has fully demonstrated that much of the time required for the duplication of collections can be utilized for other office work, and that errors incident to two payments in one year can be materially reduced. I therefore renew my recommendation that taxes be received in one payment.

The work of the office is steadily and rapidly increasing; not only are collections increasing in amount, but sources from which deposits are received are multiplying by division of old and the addition of new accounts. No increase in the force has been allowed to meet the requirements imposed by the additional work. In July, 1888, an additional clerk was allowed. Since that time the receipts of the office have nearly doubled, and the work of the office has more than doubled, and yet Congress turns a deaf ear to our numerous requests for additional clerks. In all my annual reports attention has been called to this deficiency. I have explained and urged the adoption of my recommendations for an increase of force, and the committees of Congress have appeared to acquiesce in my views as to the needs of the office, but for some reason the additional force has not been granted. I again earnestly recommend that a deputy collector be allowed this office. I consider this of paramount importance. I believe the addition of this officer to our efficient force the first and most important step toward perfecting the proper organization and increasing the efficiency of the office.

It is very discouraging, to say the least, that a recommendation dictated by experience and thorough knowledge of the wants of the office, entirely reasonable and consistent, should receive so little consideration.

I have also asked for an assistant cashier, two additional clerks, and a horse and wagon.

The position of cashier is not only one of great responsibility, but it requires unremitting attention. The duties are very exacting, and during the busy months it is impossible for one man to attend promptly to the requirements of the office. The appointment of an assistant to

share the responsibilities and duties would greatly facilitate the business of the office, and would be of great advantage to the public who demand and should have prompt service. The appointment of two additional clerks is necessary to complete the proper working force of the office and to place it on a business basis so that the public will not be compelled to endure a long and tedious wait in the transaction of business.

In order to promptly make collection of checks received in payment of taxes, etc., in time for deposit in United States Treasury as required by law, it is necessary that we use a horse and wagon. Up to the present time we have been able to secure the use of the horse and buggy used by the license division of the assessor's office during the busy months, but this we find is serious inconvenience to that office, besides, the rapid increase of business renders the continuous use of a horse and wagon necessary not only for the collection of checks, but to attend to other necessary outside business.

It requires no argument to demonstrate the desirability of renewing the appropriation for the collection of overdue personal tax. During the past year we collected \$11,000 on this account on an appropriation of \$1,500. With a larger appropriation we could make a better showing.

The bill prepared in this office which received your approval, after examination by the district attorney, in relation to tax sales, known as H. R. No. 3293, should again be brought to the attention of Congress. I submit herewith a copy of said bill and suggest amendments which I think will meet the objections urged when the bill was last before Congress.

There is no measure affecting the interests of the District of more importance than a comprehensive law for the sale of property for delinquent taxes. As has been repeatedly pointed out, the law under which we sell property is defective. There is hardly a provision of the present law which has not been the subject of litigation, and as a rule at the expense of the District. I am at a loss to understand why a law vulnerable at all points is allowed to remain unrepealed, and that an expense should be annually incurred to enforce it with no certainty of conveying any rights or privileges sought to be conveyed under its provisions.

Much time and thought was given to the preparation of the bill above referred to, and I think its adoption would cure many of the evils of the law now in force, and thus prevent much of the litigation that the District is called upon to defend.

I earnestly beg that you will urge the passage of this bill during the next Congress. Far better for the interests of the District if we had no tax-sale law at all. I can see no benefit to be derived from the present law—only loss, litigation, and vexation. It takes much time and labor to prepare the list for tax sale, and after all is done and the list duly advertised, the sale scarcely realizes sufficient to pay the expense incurred, and as the result of each sale thousands of dollars in taxes honestly due the District are canceled and are thus lost to the revenues.

I hope that the importance of this matter will be fully impressed upon Congress, and that the present unsatisfactory condition of our tax-sale laws will not be allowed to continue.

Very respectfully,

E. G. DAVIS,  
*Collector of Taxes.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## REPORT OF SPECIAL ASSESSMENT CLERK.

OFFICE OF THE COMMISSIONERS,  
DISTRICT OF COLUMBIA,  
Washington, July 15, 1895.

GENTLEMEN: I have the honor to make the following report of the work of this office for the fiscal year ended June 30, 1895:

## DRAWBACK CERTIFICATES.

Issued during the year:

|   |          |
|---|----------|
| Under acts of June 18, 1878, and June 27, 1879.....       | \$249.56 |
| Under act of February 12, 1889, to holders of scrip ..... | 12.66    |
| Under act of June 2, 1890 .....                           | 1,532.02 |
| Total .....   | 1,794.24 |

Amount of drawbacks on hand awaiting satisfactory evidence before issue:

|   |        |
|---|--------|
| Acts of 1878 and 1879 ( <i>see</i> Appendix I)..... | 234.10 |
| Act of 1889 ( <i>see</i> Appendix II).....          | 292.78 |
| Total .....   | 526.88 |

|  |           |
|--|-----------|
| Drawback certificates outstanding June 30, 1894..... | 11,580.31 |
| Issued during the year .....                         | 1,794.24  |

|             |           |
|-------------|-----------|
| Total ..... | 13,374.55 |
|-------------|-----------|

Redeemed during the year:

|  |          |
|--|----------|
| In payment of special assessments..... | \$189.38 |
| In payment of general taxes .....      | 2,101.00 |
|  | 2,290.38 |

|                                |           |
|--------------------------------|-----------|
| Outstanding June 30, 1895..... | 11,084.17 |
|--------------------------------|-----------|

## EIGHT PER CENT CERTIFICATES OF INDEBTEDNESS.

|   |             |
|---|-------------|
| Outstanding June 30, 1894.....                        | \$17,300.00 |
| Redeemed during the year .....                        | 16,600.00   |
| Outstanding June 30, 1895, exclusive of interest..... | 700.00      |

## SPECIAL ASSESSMENTS PLEDGED TO THE REDEMPTION OF THE EIGHT PER CENT CERTIFICATES OF INDEBTEDNESS.

|   |             |
|---|-------------|
| Outstanding June 30, 1894.....  | \$48,876.22 |
| Collected, exclusive of interest ( <i>see</i> Appendix III).....  | \$2,335.48  |
| Canceled by decree of supreme court District of Columbia ( <i>see</i> Appendix IV).....   | 11,866.38   |
| Canceled by order of Commissioners of the District of Columbia as erroneous or against property exempt by law ( <i>see</i> Appendix V)..... | 111.81      |
|   | 14,313.67   |
| Balance outstanding, exclusive of interest.....   | 34,562.55   |

LIEN CERTIFICATES HELD BY THIRD PARTIES.

|   |                |
|---|----------------|
| Amount of outstanding lien certificates issued by the late board of public works and held by third parties, for the redemption of which there are outstanding special assessments, as per report for 1894, exclusive of interest..... | \$7,457.21     |
| Redeemed during year:   |                |
| By collection and surrender in satisfaction of special assessments.....   | \$1,408.46     |
| By drawback certificates under act of June 2, 1890 .....  | 384.39         |
|   | <hr/> 1,792.85 |
| Outstanding June 30, 1895 ( <i>see</i> Appendix VI) .....   | 5,664.36       |

LIEN CERTIFICATES FOR WHICH THERE ARE NO OUTSTANDING ASSESSMENTS, BUT WHICH ARE SUBJECT TO REDEMPTION BY DRAWBACK CERTIFICATES UNDER EXISTING LAW.

|   |              |
|---|--------------|
| Outstanding June 30, 1894 ( <i>see</i> Appendix VII)..... | \$207.74     |
| Outstanding June 30, 1895.....                            | <hr/> 207.74 |

SPECIAL ASSESSMENTS.

Collections of special assessments under acts of Congress relative to compulsory permit work have been made as follows:

|                            |                |
|----------------------------|----------------|
| Act of July 18, 1888.....  | \$23.78        |
| Act of March 2, 1889.....  | 130.17         |
| Act of August 6, 1890..... | 354.50         |
| Act of March 3, 1891.....  | 2,053.26       |
| Act of July 4, 1892.....   | 2,668.04       |
| Act of March 3, 1893.....  | 3,604.52       |
| Total .....                | <hr/> 8,834.27 |

Assessments of this class have been canceled by decrees of the supreme court of the District of Columbia and by orders of the Commissioners of the District of Columbia to the amount of \$26,311.54, exclusive of interest. (For detailed statement *see* Appendix VIII.)

Collections of special assessments for improvements and repairs have been made as follows:

|                                  |                |
|----------------------------------|----------------|
| Under act of March 3, 1891.....  | \$763.51       |
| Under act of July 14, 1892.....  | 888.39         |
| Under act of March 3, 1893 ..... | 655.39         |
| Total .....                      | <hr/> 2,307.29 |

Special assessments made under acts of Congress relative to improvements and repairs have been canceled by decrees of the supreme court of the District of Columbia to the amount of \$4,963.92, exclusive of interest. (For detailed statement *see* Appendix IX.)

Special assessments of this class have been canceled by orders of the Commissioners of the District of Columbia to the amount of \$15.77, exclusive of interest. (For detailed statement *see* Appendix X.)

Collections of special assessments for county roads have been made as follows:

|                                 |              |
|---------------------------------|--------------|
| Under act of March 3, 1891..... | \$8.09       |
| Under act of July 14, 1892..... | 54.46        |
| Under act of March 3, 1893..... | 170.98       |
| Total.....                      | <hr/> 233.53 |

Collections of special assessments for sidewalk on Brightwood avenue, under act of March 3, 1891, have been made to the amount of \$17.30.

## OLD CORPORATION SPECIAL ASSESSMENTS.

For account of special assessments made by the late corporation of Washington collections have been made as follows:

|                       |        |
|-----------------------|--------|
| Lighting streets..... | \$1.59 |
| Pumps.....            | 10.78  |
| Abating nuisance..... | 2.00   |
| Total.....            | 14.37  |

Assessments of this class have been canceled by decrees of the supreme court of the District of Columbia to the amount of \$244.46, exclusive of interest. (For detailed statement *see* Appendix XI.)

Collections have been made for account of assessments for condemnation of land for alleys as follows:

|   |          |
|---|----------|
| Under act of corporation approved November 4, 1842.....   | \$112.75 |
| Assessments of this class canceled by decree of the supreme court of the District of Columbia ( <i>see</i> Appendix XII)..... | 103.61   |

## SPECIAL ASSESSMENTS UNDER ACT OF AUGUST 7, 1894.

Special assessments have been made under act of Congress approved August 7, 1894, relative to assessment and permit work, amounting to \$44,695.33 (*see* Appendix XIII).

Only one assessment made under this act has been canceled, amounting to \$14.29 (*see* Appendix XIV).

Special assessments for sewer connections and water service connections have been made under acts of Congress approved March 14, 1894, and August 7, 1894, amounting to \$3,077.49 (*see* Appendix XV).

Only one assessment of this class has been canceled, amounting to \$36.38 (*see* Appendix XIV).

Collections of special assessments under acts of March 14, 1894, and August 7, 1894, have been made to the amount of \$14,754.30.

## SALES.

At the sale in April, 1895, for general taxes in arrears, sales for non-payment of special assessments were made as follows:

|   |         |
|---|---------|
| Under act of August 6, 1890.....  | \$10.68 |
| Under act of March 3, 1891.....   | 109.39  |
| Under act of July 14, 1892.....   | 1.02    |
| Under act of March 3, 1893.....   | 13.54   |
| Under act of August 7, 1894.....  | 5.95    |
| Improvements and repairs:   |         |
| Act March 3, 1891.....  | .88     |
| Act July 14, 1892.....  | 35.03   |
| Construction of county roads under act of July 14, 1892.....  | 39.85   |
| Interest on above.....  | 216.34  |
|   | 43.17   |
| Old corporation assessments, lighting streets.....  | 259.51  |
| Assessments of board of public works and Commissioners of the District of Columbia, pledged to the redemption of the 8 per cent certificates of indebtedness..... | 2.06    |
| Interest on same.....   | 80.10   |
| Total sales.....  | 159.44  |
|   | 501.11  |

Very respectfully,

J. W. DANIEL,  
Special Assessment Clerk, District of Columbia.  
The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

# REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA. 69

## APPENDIX I.—Statement of drawback certificates awaiting issue under acts approved June 18, 1878, and June 27, 1879.

| No. of certificate. | To whom assessed.           | Square.   | Lot.  | Location.                   | Amount. |
|---------------------|-----------------------------|-----------|-------|-----------------------------|---------|
| 7976                | James Devlin.....           | 368       | Of 12 | Twenty-third street.....    | \$12.84 |
| 8361                | Ella Mason.....             | 180       | 49    | Sixteenth street.....       | 43.19   |
| 8860                | S. B. Perkins.....          | 184       | 20    | do.....                     | 24.90   |
| 9213                | Cecelia Evans.....          | 876       | 5     | South Carolina avenue.....  | 23.98   |
| 9276                | W. G. Parkhurst.....        | 525       | 5     | Fourth street.....          | 2.99    |
| 9555                | C. P. Russell.....          | N. of 515 | 1     | do.....                     | 9.56    |
| 12741               | G. V. and Martha Leech..... | 181       | 118   | Sixteenth street.....       | .31     |
| 12875               | S. C. Baker et al.....      | 403       | 11    | Eighth street.....          | .30     |
| 12907               | do.....                     | 403       | 12    | do.....                     | 1.00    |
| 13924               | Ella Mason.....             | 180       | 49    | Sixteenth street.....       | 4.28    |
| 14090               | James Devlin.....           | 37        | 10    | Twenty-third street.....    | 2.05    |
| 14735               | John Donovan.....           | 183       | 25    | Sixteenth street.....       | 5.11    |
| 14739               | S. B. Perkins.....          | 184       | 20    | do.....                     | 5.63    |
| 14802               | W. G. Parkhurst.....        | 525       | 5     | Fourth street.....          | .36     |
| 14861               | Henry Waters.....           |           |       | Hamilton road.....          | 1.29    |
| 15579               | Catharine M. Johnson.....   | 376       | D     | Ninth street.....           | 2.61    |
| 15934               | Morris Schlosser.....       | 675       | 139   | Myrtle street.....          | 13.20   |
| 16157               | John L. Lucket.....         | 497       | 10    | Sixth street.....           | 1.99    |

**REPORT OF THE ATTORNEY.**

OFFICE OF THE ATTORNEY, DISTRICT OF COLUMBIA,  
*Washington, September 6, 1895.*

GENTLEMEN: I have the honor to submit the following statement of the operations of this office for the fiscal year ending June 30, 1895.

During the year under consideration 520 opinions were given the Commissioners on various subjects. Some of these communications related to proposed legislation before Congress affecting District interests, and others submitted drafts of bills to be laid before that body.

There is but one District case pending in the Supreme Court of the United States, the case of the Washington Gas Light Company, appellant, against the District, referred to in my last report.

At the beginning of the year there were pending upon the trial calendar of the supreme court of the District 58 cases against the District; of this number 18 were disposed of during the year, in favor of the District; appeals were taken in 6, and they are now pending in the court of appeals, the rest were finally decided.

There were 246 proceedings in certiorari against the District to quash assessments for water mains and other special improvements, such as sewers, sidewalks, etc. A decision of the court of appeals during the year (*Burgdorf v. District*), holding that our water-main assessments since 1883 are invalid because not authenticated by the water registrar, emphasizes the necessity for legislation authorizing reassessment in all cases where proceedings for the collection of general and special taxes prove ineffectual. No reasonable objection can be raised to such legislation. It is to be met with in the statutes of many of the States. In the new proceedings the party concerned will have the opportunity to watch the various steps and to be heard in review of the assessment and will be precluded by nothing that took place in the proceeding that proved abortive. The reassessment will be for the purpose merely of enforcing against the property owner a duty which he was likely to evade by reason of some technicality, and as the new proceeding will give him the same opportunity of being heard that is given in other cases and will be conducted on principles which operate generally, he has no reasonable ground of complaint. The only cases in which hardships are likely to be inflicted by such a law are those where a tax is reassessed upon land which has changed hands since the tax should have been collected from it; but under our tax-certificate system, for a mere nominal fee, a purchaser would readily discover the liability and be enabled to provide against it. Such legislation, while it would not validate a tax which was originally void, would at least remove the temptation from property owners to avoid the payment of public dues on technical grounds.

There were four new law suits brought against the District to recover damages for personal injuries and six new equity suits. Of the equity cases the more important were: *Emrich v. The District*, to enjoin prosecutions in the police court for violations of the law in regard to the

occupation of sidewalks; *Burgdorf v. The District*, to enjoin the sale of property for delinquent general taxes; *Frances S. Carmody v. The District*, to enjoin the opening of an alley in square 684; *Amory K. Tingle and wife v. The Commissioners*, to enjoin the filing in the office of the surveyor of the District of a map of section 1 of the plan for a permanent system of highways, and the case of the Eckington and Soldiers' Home Railway Company *v. District*, to enjoin the removal of its poles and electric wires on New York avenue. There were two equity suits brought by the District within the year, one (*District v. Kimmell et al.*) to enforce its lien for general taxes against lots in square 491, under the act of Congress of March 3, 1877, and the other (*District v. William K. Ryan*) to enjoin proceedings in certiorari to quash special assessments for the improvement of Connecticut avenue extended.

Of the law cases against the District now pending and upon the trial calendar of the supreme court of the District of Columbia, 30 are of the class known as "sewer cases"—to recover damages for injuries to property resulting from the floods in Tiber sewer in 1889. Since my last report the case of Edwin N. Gray against the District (the largest of the so called sewer cases), after being tried three times, resulting in verdicts against the District for \$8,600, \$3,500, and \$4,500 respectively, has been finally disposed of by the court of appeals, the judgment below against the District being affirmed. The remaining cases of this class are upon the calendar for trial at the coming October term of the court, and some disposition will probably be then made of them.

The remaining District cases upon the calendar are, with few exceptions, actions to recover damages for personal injuries resulting from defects in the streets, consisting principally of excavations for water mains and of projecting water and gas boxes in the sidewalks. There has been a decrease in the number of damage cases since my last report. This is due largely, I think, to the policy of the engineer department in readjusting water and gas boxes, so as to place them in the parking on parked streets, and near the curbs on other streets. At any rate it is a very creditable showing and indicates increased vigilance on the part of the authorities to prevent accidents from works in its streets.

There were two mandamus cases against the Commissioners during the year, and one application for a writ of prohibition against the police court. The mandamus proceeding (*United States ex rel. Goddard v. Commissioners*) involved the water regulations, and was decided against the District. The Commissioners acquiesced in the decision, and the objectionable regulation was subsequently modified so as to conform to the opinion of the court. The application for prohibition (*United States ex rel. Deffer v. Kimball*), was decided in favor of the District, the court holding that under an ordinance of the city approved in 1862, prohibiting the occupation of any public street or reservation for private business purposes, the police court had jurisdiction to try the relators for obstructing the street by stringing telegraph wires.

This case is specially important to the District in view of the fact that the act of Congress of 1888, forbidding the further extension of overhead wires in the city of Washington, provides no penalty for its violation. The omission in the act of Congress may be supplied by a resort to the city ordinance of 1862.

There are five District cases on the calendar of the court of appeals. The most important of these is the case of the District *v. The Metropolitan Railroad Company*, which by act of Congress approved August 2, 1894, was referred to that court for rehearing on its merits. A tran-

script of the record, together with the original papers and record entries in the case has been duly certified to the court of appeals, as required by said act; and the court has referred the case to James G. Payne, esq., as special commissioner, with directions to state the account between the District and the railroad company, for paving on various streets of the city during the years from 1871 to 1874, and report the amount due the District on or before October 1 next. The case for the District has been presented to the special commissioner.

The next in importance is the case of *Burgdorf v. The District*. This was a bill to enjoin the sale of real property for delinquent general taxes, on the ground that the penalty of two per cent per month was unauthorized after 1868, and because the charge for advertising was illegal. The case was heard by Mr. Justice Cox, of the supreme court of the District, who after very careful consideration decided against the complainant, who took an appeal. The case is of special interest, since a decision adverse to the District would have resulted in the disturbance of tax titles for the past twenty years, and might also have involved the District in litigation.

The case of *Max Lansburg v. The District* was ejectment to recover possession of a strip of land, about 16 by 300 feet, forming part of Columbia road. The defense was that Lansburg had dedicated his land. The verdict being for the defendant, the plaintiff prayed a bill of exceptions, and removed the case to the court of appeals.

In the case of the Eckington and Soldiers' Home Railway Company, Congress having declared that its right to use overhead wires on New York avenue should cease and determine July 1, 1895, the company was notified to remove its poles and wires, which it failed to do, but on June 29, 1895, filed a bill against the Commissioners to enjoin any interference with said poles and wires. The cause has been heard with the result that the court refused an injunction and dismissed the bill. The company took an appeal to the court of appeals, where the case is now pending.

During the year the court of appeals has delivered opinions in four cases of considerable importance to the District. I refer to the cases of *Kerr v. Commissioners*, *Gassenheimer v. The District*, *Washington Market Company v. The District*, and *Goodfellow v. The Commissioners*.

Kerr's case involved the plumbing regulations, made by the Commissioners under act of Congress approved April 23, 1892, authorizing the appointment of an inspector of plumbing. The court held that no power was conferred by Congress upon the Commissioners to create a "plumbing board" and invest it with the general powers and duties prescribed in the plumbing regulations, and that it was the duty of the Commissioners to examine applicants for registration and license as plumbers without referring them to a board of examiners.

In connection with Kerr's case, I desire to add that the supreme court of the District *in re McCann*, held that the penalty of \$200 provided in section 1 in the act of April 23, 1892, relates to the case of plumbers who having done work unsatisfactorily, fail, after ten days' notice, to correct it according to the requirements of the plumbing regulations, and that this penalty excludes the idea of any other or additional penalty. In order to make the plumbing regulations effective, in view of this decision, it will be necessary to obtain from Congress further legislation. I would suggest that the provision referred to in the first section of the act of 1892 be repealed, and that the Commissioners be authorized to annex to their plumbing regulations such reasonable penalties as will secure their enforcement, since, as the law

now stands, it is impossible to convict anyone of violating the regulations, except he be a plumber who has done work not in accordance with the regulations, and who refuses, after notice, to do it over again. The result is the District is virtually unable to protect its pavements, sewers, and water mains from the interference of unauthorized persons.

In Gassenheimer's case the court construed the act of Congress of March 3, 1893, regulating the sale of intoxicating liquors in the District, holding that it was a full and complete regulation of the liquor traffic and was a substitute for all former laws and regulations on the subject, and that prosecutions could be maintained under the sixth section for selling liquor to minors over 16 years of age, notwithstanding an apparent incongruity in the law on the subject.

In the Washington Market Company's case the court refused to recognize any of the pretensions and claims of the company, and held that section 16 of the charter of the company of March 29, 1870, conferred no power upon it to make rules and regulations governing the wholesale market upon the space at the intersection of Ohio and Louisiana avenues with Tenth and Twelfth streets, but that the grant of power was to the municipal corporation of the city of Washington, and its successor, the District of Columbia; that there was no contract between the governor and the late board of public works of the District, as claimed by the market company, which gave it the right to hold and regulate said space free from interference by the District authorities; that the market company was not entitled to possession of this space, and had no valid claim against the District for improvements placed upon it. The decision terminated the Washington Market Company's twenty-three years of wrongful occupation of this space, places it under the control of the Commissioners, and leaves them free to establish a wholesale market there as contemplated by Congress by its act of May 20, 1870.

In the case of Goodfellow, the court construed the act of Congress of August 27, 1888, in regard to the subdivision of land in the District of Columbia, and the general orders made by the Commissioners pursuant to said act; holding that the Commissioners might in their discretion, when rendered necessary by the topography of the land, make reasonable deflections in avenues in their extension to the District boundaries; and after designating the lines of such extension, they had power to refuse admission to record of a plat of a subdivision not in conformity therewith; that mandamus will not lie to compel the Commissioners to receive and admit to record a plat of a subdivision the record of which has been refused because not in conformity with a plan adopted by them for the extension of an avenue to the District boundary, though in all other respects in exact compliance with law, and that the act of 1888 is not repealed by the act of 1893 until the maps provided for by the latter act shall have been finally adopted.

There were 201 lunacy cases since my last report, being a decrease of five as against the previous year. Of these, 190 were tried by jury, and the parties were committed to the asylum on certificates of the Commissioners, eight were committed on orders of the Secretary of the Interior, through the police court, and three were returned from visit.

While there is a slight decrease in the number of these cases, there is yet enough of them to suggest that we are being imposed upon by having the lunatics of other places imported into the District. I would suggest that the Commissioners recommend to Congress such legislation as will tend to prevent this abuse.

Of the equity suits brought against the District during the year the first in importance is that of *Tingle v. The Commissioners*, to enjoin the filing of the map of section 1 of the plan for a permanent system of highways, on the ground that the mere filing of said map was a taking of the property of the complainants for which they are entitled to compensation. This is an attempt at the very threshold to prevent any proceedings under this most salutary law. The case was argued and submitted on the complainant's motion for an injunction, and the court has, since the close of the year, refused the injunction prayed, thus leaving the Commissioners free to file the map. It is manifest that proceedings under this act, which is an extraordinary one, will produce an unusual amount of litigation, necessarily resulting in imposing upon this office a great amount of unusual labor. The ordinary business of the office is already quite sufficient for the force provided by law. The language of the last section of the act, "The Commissioners shall include in their annual reports a full statement of their action under this act, and shall submit annual estimates of the expenditures necessary to be made under this act," is comprehensive enough, I think, to justify the employment of special counsel to assist in executing the law, and I therefore suggest that you recommend to Congress the necessity of an appropriation to enable you to engage such counsel.

But one suit to enforce the lien of the District for general taxes, where it has become the purchaser, has been brought (and that was compromised on a satisfactory basis), no money having been appropriated to pay the costs and expenses of the necessary legal proceedings. I renew my recommendation of last year, that Congress be asked for an appropriation for this purpose, or that the law be changed so as to permit the District to sell such property from time to time at private sales and give deeds therefor. If the passage of the pending tax bill can be secured this difficulty and others would be obviated.

There were 12,582 cases tried in the police court during the year, being a decrease of 945 as against the previous year; the fines received for the same period amounting to \$24,791.70, being a decrease of \$12,032.56. I inclose herewith the report of Mr. James L. Pugh, jr., special assistant attorney for the District, showing in detail the operations of the police court as to District business.

Vigorous prosecution in the police court of persons occupying the sidewalk on the south side of Louisiana avenue between Ninth and Tenth streets has resulted in clearing that sidewalk of the nuisance of benches and booths used for private business purposes which had obstructed the free use of the street for nearly twenty years. Much credit is due to my assistant, Mr. Pugh, for his diligent efforts in securing this result.

I have to renew my suggestion of last year that our law in regard to insurance needs reform. A bill designed to correct defects in existing laws on this subject which you submitted to Congress for enactment failed to become a law. The matter should be again pressed upon the attention of Congress at its coming session.

Congress should also be asked to confer upon the Commissioners' power to make such reasonable police regulations as in their judgment may be necessary for the safety of life and limb, and the protection of property within the District. The Commissioners should also be invested with power to remit fines and penalties, and to pardon for all offenses against the District, wherever in their judgment executive clemency is expedient and proper, and thus relieve the President in

such matters. The law on that subject as it now stands limits the Commissioners to pardon for convictions for violation of the ordinances of the city of Washington, and the levy court and acts of the District assembly. The power should be extended so as to include offenses against the District under acts of Congress.

At your request I have prepared a number of bills relating to municipal affairs for submission to Congress. Some have become laws, among them being, an act to regulate water main assessments; an act to authorize the Commissioners to appoint a deputy coroner; an act to open, widen, and extend alleys; an act to prevent the recording of subdivisions of land in the office of the recorder of deeds; an act to change the name of Georgetown; an act making the surveyor a salaried officer; an act to authorize the appointment of women as public school trustees; an act to regulate the sale of milk, and an act for the removal of snow and ice.

In discharging the laborious duties of my office much credit is due to my assistants for intelligent and faithful services.

Respectfully submitted.

S. T. THOMAS,  
*Attorney, District of Columbia.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

#### REPORT OF THE SPECIAL ASSISTANT ATTORNEY.

OFFICE OF THE ATTORNEY, DISTRICT OF COLUMBIA,  
*Washington, September 4, 1895.*

SIR: I have the honor to transmit a report of the business of the police court for the fiscal year ended June 30, 1895:

|   |       |
|---|-------|
| Aiding and abetting in the violation of the excise law..... | 5     |
| Bathing in the Potomac River.....                           | 1     |
| Cruelty to animals.....                                     | 412   |

| Unlicensed cattle broker .....                | 14     |
| Unlicensed vehicle .....                      | 4      |
| Unlicensed real estate dealer .....           | 31     |
| Unlicensed junk dealer .....                  | 14     |
| Unlicensed theater .....                      | 1      |
| Unlicensed peddler .....                      | 5      |
| Unlicensed restaurant .....                   | 37     |
| Unlicensed hotel .....                        | 10     |
| Unlicensed apothecary .....                   | 9      |
| Unlicensed commission merchant .....          | 1      |
| Unlicensed billiard tables .....              | 4      |
| Violating the police regulations .....        | 1,038  |
| Violating the building regulations .....      | 70     |
| Violating the excise law .....                | 12     |
| Violating the health ordinances .....         | 4      |
| Violating the hack law .....                  | 23     |
| Violating the civil-rights act .....          | 1      |
| Vagrancy .....                                | 2,486  |
| Writing obscene words on buildings .....      | 1      |
| Wasting Potomac water .....                   | 65     |
| Total .....                                   | 12,582 |

You will observe that there is a falling off of cases in the police court, and the fact that the largest percentage of the decrease is to be found in the class known as "drunk and disorderly" shows conclusively the good effects following the rigid enforcement of the present liquor law, and the opportunity for prompt and final trial offered under the system now governing in the police court. Out of this class of cases the more serious generally result, and as the decrease is almost wholly from such cases, it is a matter for sincere congratulations.

The amount of fines and forfeitures taken in by the court for the last fiscal year was \$24,791 70, which is a falling off of \$12,032.56, and is due to the fact that persons have been unable to pay their fines, and were compelled to serve a period in the workhouse, and also the stoppage of the system of taking collateral and allowing persons to forfeit the same in liquor cases. It is my experience that so long as there is not a record of conviction against a liquor dealer upon which to predicate a charge of "second offense," that they do not object to forfeiting collateral for the purpose of enabling them to continue violating the law, as a forfeiture is not a "conviction."

In one case I still hold in abeyance an affidavit of complaint, charging a certain person with selling liquor on Sunday. This was done with a view of securing two offenses against the licensee, for the purpose of more effectually enforcing this law in respect to this particular place. This action on my part will compel him to strictly observe the law in the future, and a failure on his part so to do will work a forfeiture of his license and further prevent him from securing a renewal of the same thereafter. This destroys his business, which, in my opinion, is more effectual than fines or forfeitures.

I have the honor to be, very respectfully,

JAMES L. PUGH, Jr.,  
Special Assistant Attorney.

Hon. S. T. THOMAS,  
Attorney for the District.

## CHARITABLE AND REFORMATORY INSTITUTIONS.

## REPORT OF THE SUPERINTENDENT OF CHARITIES.

OFFICE OF SUPERINTENDENT OF CHARITIES,  
DISTRICT OF COLUMBIA,  
*Washington, D. C., October 31, 1895.*

GENTLEMEN: The reports of charitable and reformatory institutions, boards, and societies herewith submitted indicate, by comparison with previous annual compilations, the progress that has been made in the task of this office to unify, systematize, and improve charitable and correctional management within the District of Columbia, and the care of dependents sent beyond District lines, but still under supervision of Washington authorities through the expenditure of District funds. The publication also embraces reports of benevolent establishments located in or near Washington, which receive, as compensation for services to the public, United States appropriations through other sources than the acts for the support of the government of the District, but which have important relations to the health and welfare of this community entitling them to prominent place in any description of the public operations of Washington institutions. A third class of reports presented this year consists of those of benevolent corporations not in receipt of Congressional appropriations for maintenance, or of District allotments. Some of these now apply for official aid as partial compensation for public services; while others, which make no request for public money, but are sustained entirely by private contributions, yet cheerfully furnish accounts of all their operations as part of "the other charitable work of the District" than that done through appropriations. Cooperation with such work is part of the field of duty of the superintendent of charities as defined by the law constituting the office.

The report of the Washington Asylum has this year been placed first in the order of publication, because, while a strictly public institution, the average number of its inmates is the greatest, and in its various branches it covers the leading features of both charitable and correctional administration, and cares for minors and adults alike, among unfortunates as well as delinquents, in its workhouse, almshouse, and hospital.

Next in order are grouped the hospitals of the city, whether appropriated for in the District bill or in the sundry civil act. Statistics in the respective reports and in the condensed tabulations herewith submitted show that while these institutions render much public service not of a local nature, on account of which some of them are properly paid from Federal funds, they all do work appropriate to the medical charities of a metropolitan community, upon requisition of the local authorities.

Then follow the child-caring institutions and organizations, commencing with the Children's Hospital, which blends the mission of a medical establishment with that of an infant and juvenile asylum. Associated with this group are the reformatories for minors of both sexes and races, the industrial schools, and boards or associations which, without controlling special institutions, are devoted to the rescuing of neglected, needy, or ill-treated children and the placing of them for care or instruction in institutions or in families as public wards.

Homes and refuges for women, asylums for the aged of both sexes—white and colored, temporary homes for veterans and wayfarers, the Home for Incurables, and mission schools complete the list of benevolent establishments of the District reporting to this office.

#### WASHINGTON CHARITIES DESCRIBED.

As delegate for the District at the Twenty-second National Conference of Charities and Corrections, held at New Haven, May 24 to May 30, 1895, I submitted the following condensed statement of the operation of charitable and correctional organizations:

Three characteristics render the charitable and correctional system of the District of Columbia particularly worthy of careful, candid, and instructive observation.

An old community, including the venerable municipality of Georgetown, the progress of the Federal city of Washington, and the Federal District of Columbia embodies, concretes, and illustrates the development of American institutions from their foundation. This growth has not been merely local, but national. It has been promoted by the benevolence and enterprise of all sections of the country, and the methods and ideas of all schools of philanthropy and sociology have found realized expression in the capital of our indivisible Union of many States. So, in the experience and present condition of the political subdivision which is the chief seat of American power, we should not fail to find, nor will we, the most significant lessons in the preservation, the education, and the reformation of those dwellers in our country who are objects of public care or philanthropic solicitude.

The second peculiarity of Washington's charitable and reformatory status, and one closely allied to the more general characteristic above noted, is the partnership between the people of the United States and the residents of the locality, in the support of institutions and reformatory and eleemosynary associations of the District. So far as regards official support or aid, the rule is that half the expenses are borne by the people of the United States at large and half by the taxpayers of the District of Columbia. This division extends to all appropriations made in the District or local government bills, and is annually expressed in this enacting clause:

"That half of the following sums named, respectively, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, and the other half out of the revenues of the District of Columbia."

To this there are, however, certain exceptions, as in the cases of Garfield and Providence hospitals, whose appropriations are not made in the District bill, but through the sundry civil bill, and are wholly at the expense of the United States Treasury, the revenues of the District contributing nothing to them. It is unnecessary to explain in detail now how such exclusively Federal charges have remained in force as survivals of the eras of war and reconstruction, and contracts for the care of disabled soldiers and sailors at one time, and of the emancipated freedmen at another period; or how it is just that the General Government should pay for a large number of temporary dependents who are not residents of the District, but transients from many States, coming to Washington on business with Congress or the United States Departments. The point to be noted here is that the entire United States pays fully one-half of the cost of charitable and correctional work in the District of Columbia, and that every delegate at this convention and every citizen of this Republic has a direct interest in Washington's works of public benevolence, similar to that which each has in like official doings in his own State, county, city, village, or township. Hence, in speaking of the hospitals, homes, asylums, reformatories, and industrial schools reporting to the United States superintendency of charities for the District of Columbia I do not come as one with a message from afar, but as reciting on behalf of your Government the progress made in the perpetual contest against destitution, ignorance, and vice in the central community of our common country, in which all of you are alike at home.

The third distinctive feature of the capital city and District, which I have the honor to represent here officially by virtue of Presidential appointment, on Senatorial

confirmation, as well as by special commission from the authorities of the District of Columbia, is of an ethnological nature, and will surely be of as great interest to you as it is of importance to the subject under discussion. Of 270,514 inhabitants of the District of Columbia, as ascertained by the latest enumeration, one-third—90,000—are colored. The great race problem of the country in our generation thus appropriately receives its best exemplification, and its hopes and difficulties find their most fitting elucidation in the political and social center of our multiform but unified American civilization.

#### ANNUAL OFFICIAL EXPENDITURES.

Approximately, the public money expended annually in the District of Columbia for charities, reformatories, and minor corrections of local origin or relation is half a million dollars, the appropriations for the present fiscal year, including deficiencies and a special emergency relief fund of \$10,000, aggregating \$482,560.

Those provided for the coming fiscal year beginning July 1, 1895, amount to \$519,137.

The increase is natural and normal and in the line of improved methods, accommodations, and appliances for the treatment of infectious diseases, the care of the insane, the enlargement of reformatories, and the support of juvenile dependents in institutional and in private charge.

In the schedule "For charities," that is to say, the regular appropriations of the District of Columbia bill for the relief of the poor, for the Veterans' Temporary Home, for the local hospitals, and for certain reformatories, asylums, and industrial schools, official and aided, as well as for the Municipal Lodging House, the Reform School for Colored Girls, and the board of children's guardians, the last three being of recent establishment, the appropriations for the last eight fiscal years, each ending with the 30th of June in every year mentioned, stand as follows:

|                             |           |
|-----------------------------|-----------|
| Appropriation for 1889..... | \$120,850 |
| Appropriation for 1890..... | 136,900   |
| Appropriation for 1891..... | 163,842   |
| Appropriation for 1892..... | 122,300   |
| Appropriation for 1893..... | 217,975   |
| Appropriation for 1894..... | 217,653   |
| Appropriation for 1895..... | 209,550   |
| Appropriation for 1896..... | 216,250   |
| Total .....                 | 1,405,320 |

The increase from year to year does not represent in all cases augmented allowances for the same objects, but is in part accounted for by transfer from general United States account to the joint account of the United States and District, as, for example, in the appropriation for 1893 the change from the sundry civil act to the District act of \$53,025 for the Freedman's Hospital. Considering, however, the general charitable and correctional total as a round half million, the expenses of the District of Columbia for such purposes are not excessive or out of proportion in ratio as to population with those of other great communities, American or foreign, where similar service is rendered.

#### INSTITUTIONAL GROUPS AND PURPOSES.

Indeed, there are few centers of population relatively better equipped than our capital city, or where fewer pressing wants remain to be supplied. The great Government establishment for the insane at St. Elizabeths affords opportunity for care of the mentally alienated, at a cost to the District of Columbia of about \$100,000 a year, the appropriations for the fiscal years ending 1895 and 1896 being, respectively, \$96,400 and \$102,260. So with the deaf and dumb, who receive instruction at the Columbia Institution, at a District charge of \$20,500, while children of feeble mind are supported at the Pennsylvania Institute and at an establishment in Virginia near Washington. The hospitals and public dispensaries receiving official appropriations are ten in number. The asylums and homes for children, including the two foundling asylums, are eleven. There are four homes for the aged, separate or in combination with other establishments, and three for young women. There are four reform schools and two industrial schools, a municipal lodging house for wayfarers, and a temporary home for Union veterans awaiting settlement of their back pay or claims. A model smallpox hospital is provided for, and during the present summer will replace the makeshift establishment in use for several recent years. The building of a proper isolated hospital for minor infectious diseases has been retarded by neighborhood opposition and a regrettable confusion of law, which, however, will soon be overcome. There are in all thirty-six institutions and benevolent organizations for which Congress makes appropriations by way of entire support or partial aid as compensation for the maintenance of public charges.

It would be very unjust to the people of the District of Columbia to omit mention of the important fact that there are an equal number of benevolent establishments doing vast good which receive no official funds whatever and are maintained entirely by private charity. This list includes such model establishments as the Home for Incurables, the Home for the Aged of the Little Sisters of the Poor, and the Washington City Protestant Orphan Asylum. A bill for a home for inebriates, which narrowly failed of passage at the last session of Congress, will probably be enacted next winter, as will also provision for separate care and preservation of colored girls of wayward tendency, which the Reform School for Girls, as now constituted, does not adequately provide. I think it safe to assert that when these and certain other and minor provisions are made in the near future, Washington, to say the least, will compare favorably with any American city in the extent, variety, efficiency, and economy of public cost of its charitable and correctional institutions and agencies.

Justice also calls for mention of the fact that munificent private donations have contributed even more than public appropriations to the establishment of institutions, and that among those receiving public aid as adjunct to private support the per capita public cost for inmates is far below the average; in fact, lower than in any other American community.

#### THE RACE PROBLEM IN WASHINGTON.

Of organizations maintained entirely at public cost the most recently established that are now in full operation are the board of children's guardians, the Reform School for Colored Girls, and the Municipal Lodging House. The first named will be represented by its agent, who is to tell you of an important feature of its work in addressing you on the subject, "Colored children in the South." The doings of this agency, as of nearly all others to which I allude, are set forth in detail in the report on charitable and reformatory institutions of the District of Columbia for 1894. In this connection it is appropriate to advert to the third of the leading characteristics of Washington's charitable and correctional task, as described at the opening of this paper. Of the wards of the board of children's guardians a large majority are colored. The National Colored Home cares for 111 negro children. For aged colored persons there is official provision in connection with the Washington Asylum, the Freedman's Hospital, and the National Colored Home, while unofficial but suitable and generous care is given by the Little Sisters of the Poor. The Boys' Reform School receives colored together with white children for industrial and literary education, and the wild and wayward as well as those sentenced by the courts. The Reform School for Girls is entirely devoted to the African race, and when enlarged will be a very important factor in the branch of correctional system caring for negroes.

At the Freedman's Hospital the majority of the inmates—about three-fifths—are colored, and a very nearly similar proportion obtains in the Washington Asylum, the strictly public municipal, charitable, and correctional institution of the District, which combines almshouse, workhouse, and hospital. Columbia Hospital for Women, an institution to which the Government contributes annually \$20,000 for maintenance, besides sums needed for construction and enlargement, and which need not fear comparison with any of its class, has colored patients outnumbering the white. It has an admirable training school, as also has the Freedman's Hospital, the latter utilized entirely for colored nurses, who have shown already, during the first year of systematic work in advanced instruction, signal adaptability for their profession.

There are now in Washington five well equipped training schools for nurses, in connection with the hospitals, including the National Homeopathic Hospital, all of which have been developed during the past five years. At one of the foundling asylums, St. Ann's, colored children are cared for as well as white children. On the whole, with the exception above noted as to colored girls wayward but not committed as fallen women, the provision for the care of sick or dependent negroes is in due proportion to their share of the population of the District. There is pending in Congress a measure for the establishment of a United States home for aged negroes from all parts of the country, to be established and maintained by funds now idle in the Treasury arising from the accumulations of unclaimed bounty and pay of colored soldiers during the war for the Union. It is to be said that the work of charities and correction has been so conducted within the District of Columbia as to go on regularly without friction or serious complaint of injustice as between races. This furnishes a very gratifying indication of the happy solution of American ethnological problems so far as regards public administration.

#### PENSIONERS AND WAYFARERS.

The Municipal Lodging House has already, during the third year of its existence, proved a great public benefit, and has indirectly, but none the less visibly, returned to the District many times its cost, which is limited to an expenditure of \$4,000 a

year. Its rules, exacting work for food and lodging and limiting the stay of wayfarers to three days, are rigidly enforced. It has kept down the tramp element and greatly diminished the evils of station-house lodgings. An earnest effort will be made this winter to secure the transfer of this well ordered establishment, whose present capacity is 73 inmates, to a suitable building designed to be erected by the Government after the model of the Wayfarers' Lodge of the Charity Organization Society in Twenty-eighth street, New York.

The Temporary Home for Union Veterans, which costs the public \$2,500 per year, is a case illustrating the fact that no partiality is shown to the District of Columbia in the division of Congressional appropriations. This home is used exclusively by strangers, veterans coming to Washington awaiting adjustment of claims. They are maintained there by a District appropriation, although the inmates come solely for Federal business. The home is managed by an association of Union veterans, and, like the other eleemosynary establishments of Washington, is under the general direction of the superintendency of charities and the financial control of the Commissioners of the District of Columbia.

#### AN ECLECTIC SYSTEM.

Limits of time and your patience will not admit more detailed description of the official and subvented charitable and correctional corporations of our national capital. I have endeavored to lay before you plainly and without eulogy such outlines of our general system and its chief component parts as will enable you to judge its value and extent, and Washington's appropriate place in the list of benevolent municipalities.

The outgrowth of the experience of a century, with ever varying and expanding needs and opportunities, and never-failing benevolence and enterprise to cope with them, the Washington charitable system is composite. With respect to variety of its methods and the unity of beneficent purpose, it is characteristically American. In official supervision, as practiced since 1891 through the superintendency of charities, its principle is that "wherever a dollar of public money goes to a public or private institution for charitable purposes it should be followed by public authority so as to control its expenditure, and recall it if it is found to be not needed or abused."

This definition I take from the masterly address of Joseph H. Choate, which it was my privilege to hear at the recent very notable meeting of the New York State Charities Aid Society, of which that eminent jurist is president. He was reporting to his association the result of the State constitutional convention, over which he presided, and reciting the provisions regarding charities and correction which had been embodied in the fundamental and permanent law of New York, as the result of an inquiry unsurpassed for thoroughness. As thus considerately and firmly established for our most populous Commonwealth, the plan of relief and reformation bears striking analogy to that instituted by Congress for the national capital. Benevolent foundations of private origin are not rejected, but utilized, while care is taken that no public money is disbursed for which full value is not received in service to the public.

To quote once more, and on equally high authority, from the record of that interesting occasion, in treating of "The value of volunteer aid to official work," James C. Carter said:

"Charity, I take it, is sympathy, compassion, help, and aid, and in the public scheme we find no provision at all for the display of any of those qualities. The public provision, therefore, without this voluntary aid and assistance really is no charity at all. It simply effects a separation and removal of the unfortunate victims of society, puts them out of our sight and out of our thoughts, and there it stops, and in that there is no charity; it is all selfishness and selfishness alone. We still must have this public provision for charity. It can not be furnished by private aid, but it will never accomplish its purpose and it will never exhibit any of the true elements of charity until it is touched and vitalized by the warmth of voluntary sympathy and compassion and love. It is so mysteriously ordered somehow that the sufferings and woes of others seem to be the indispensable conditions by which we ourselves may cultivate the highest and best qualities of our nature. When we do not embrace those opportunities, when we refuse to extend this voluntary aid, we throw away the best opportunities for individual and social improvement."

Upon such lines the charitable and reformatory work of the District of Columbia is proceeding according to law, with enterprise and energy, but also with conservatism and economy. Much has been accomplished since my predecessor took office in 1891, and numerous other improvements are under way. There are several plans of importance matured for consideration by the next session of Congress, of which it would be improper for me to speak in advance of their completed consideration by Congressional committees. It is not only the aim, but the expectation, of the

District authorities that the realization of these projects will place Washington indisputably abreast with the foremost in systematized and fruitful philanthropic endeavor.

#### ALMSGIVING AND RELIEF THROUGH WORK.

Washington's peculiar situation as the center of a large region with a considerable agricultural population lacking winter employment, and its own numerous colored residents of scanty means, to a great extent dependent upon laboring work, create need for special effort to mitigate distress during the inclement seasons of hard times. Voluntary charitable associations are many and various in their methods and objects of relief. For ordinary seasons these regular organizations suffice. But the great distress of the winters of 1893-94 called for unusual exertion that resulted in the formation of the central relief committee, whose efforts were continued by reappointment by the District Commissioners during last winter. In the first year collections of money and supplies of all kinds were made to the aggregate value of about \$50,000, and, so far as regards the operations of the central committee, the entire work of collection and distribution was conducted with only an outlay of \$750, or 1½ per cent.

During last winter substantially the same work was carried on with a yet further decreased expenditure for general central committee service, the percentage rate being reduced to 1 per cent. Such economy was facilitated not only by the full and free use of the police force in Washington to an admirable distributing agency, systematic in method and prompt in accounting, and also by much valuable service of unofficial associations, but, above all, by the generosity of business men in giving free transportation and food supplies. The market men and bakers, for example, contributed meat, vegetables, bread, etc., for about 150,000 meals. The money used was entirely of voluntary contribution, with the exception of \$10,000 voted by Congress in February.

Relief through work is constantly provided in Washington for the transient element, officially by the Municipal Lodging House, and unofficially by the Central Union Mission; while for females employment is furnished by several associations, including such meritorious organizations as the Legion of Loyal Women, guided by the devoted Clara Barton. The central relief committee, with the concurrence of the District authorities, expended \$5,000 for cleaning the streets after the great snowstorm. The result was fairly satisfactory, the chief difficulty being to confine this labor relief to deserving residents, as distinguished from the crowds who flocked into town for employment and free meals from the surrounding country.

A subcommittee of the central body is still at work, in conjunction with similar committees of the board of trade and other unofficial organizations, in making a test of the Detroit planting plan, as part of an inquiry into the advisability of a permanent and unified relief organization for the District. Washington is ready and enterprising in experimenting with new suggestions that find favor elsewhere, while it is realized that the peculiar local conditions of the Federal city as a political and social, rather than a manufacturing or commercial metropolis, together with other characteristics hereinbefore noted, often render advisable variations in the application of such projects.

#### AN INDEPENDENT AND PROGRESSIVE CITY.

By way of illustration of the general idea that Washington must determine and act for itself in such matters, I may cite your own proceedings at Nashville last year, when some of your speakers referred with much emphasis and alarm to the imminent peril of the invasion of the capital by the industrial armies of Coxeyism.

Among several such allusions, I note this one by that much respected authority, Levi L. Barbour:

"It will be remembered, too, how earnestly the tramp question has been studied, and how it was feared that, unless restrained from his nomadic course of life, the tramp and the beggar would ultimately threaten our very social existence. To-day we see them organized into what they are pleased to call 'Industrial armies,' threatening the very heart of the nation with violence unless furnished with work which they never intend to do. What this gathering horde really demands is that the nation adopt the system of 'outdoor relief,' and that all its members shall be the recipients of that living which they conceive the world owes them, regardless of any effort they may make, regardless of any demand for particular kinds of work and prices in payment, regardless of all rights of property, regardless of the right of their fellows to accept work, and regardless of the right of society to do without them."

At Washington, the matter was taken resolutely in hand by the local authorities, with firmness, but without apprehension, and, as the result of the quiet but effective cooperative action of the police, the minor courts, the executive, sanitary, and charitable and correctional authorities, the invading armies were unostentatiously but

steadily dissipated, melting away in car loads, which night after night conveyed the so-called "Industrials" to their usual residences, according to a system ordained by the District Commissioners.

There is a great deal of good work done in such unpretentious fashion in the District of Columbia. Those engaged in benevolence there, unofficially and officially, are busy people nearly all the while, and do not always find time or means to spend in telling what is being done. It is in the absorbing duty that pressed so hard last year and the one preceding that I must find my apology for the fact that, much to my regret and loss of instructive converse, the third year of incumbency is the first one in which the present superintendent of charities for the District of Columbia has been able to enjoy the advantage of attending a national conference of charities and correction.

This foregoing paper is published as affording a terse but sufficiently comprehensive view of the plan and scope of organized benevolence in the District of Columbia.

#### THE ESTIMATES.

The tabulated statement below shows the history of the pending applications for appropriations by the first session of the Fifty-fourth Congress, through the bill for the support of the Government of the District of Columbia, the objects for which renewed appropriations are sought being listed in the order in which they are named in the act providing for the current fiscal year, while new applications are placed at the foot of the tabulation:

#### *Estimates for charities and reformatories for the fiscal year 1897.*

| Name of institution, organization, fund, or office.  | Present appropriation. | Asked for by applicant. | Recommended by superintendent of charities. | Agreed on for estimates. |
|--|------------------------|-------------------------|---|--------------------------|
| <i>General expenses.</i>   |                        |                         |   |                          |
| Salaries:  |                        |                         |   |                          |
| Superintendent of charities .....  | \$3,000                | \$3,000                 | \$3,000                                     | \$3,000                  |
| Messenger .....  | 840                    | 840                     | 840   | 840                      |
| <i>For reformatories and prisons.</i>  |                        |                         |   |                          |
| Washington Asylum:   |                        |                         |   |                          |
| Intendant .....  | 1,200                  | 1,200                   | 1,200                                       | 1,200                    |
| Matron .....   | 600                    | 600                     | 600   | 600                      |
| Visiting physician .....   | 1,080                  | 1,080                   | 1,080                                       | 1,080                    |
| Resident physician .....   | 480                    | 480                     | 480   | 480                      |
| Clerk .....  | 720                    | 720                     | 720   | 720                      |
| Do .....   | 600                    | 600                     | 600   | 600                      |
| Baker .....  | 420                    | 420                     | 420   | 420                      |
| Overseer .....   | 900                    | 900                     | 900   | 900                      |
| (7) 5 overseers, at \$600 each .....   | 3,000                  | 4,200                   | 4,200                                       | 4,200                    |
| Engineer .....   | 600                    | 600                     | 600   | 600                      |
| Assistant engineer .....   | 300                    | 365                     | 365   | 365                      |
| Second assistant engineer .....  | 300                    | 365                     | 365   | 365                      |
| (6) 5 watchmen, at \$365 each .....  | 1,825                  | 2,190                   | 2,190                                       | 2,190                    |
| 1 night watchman .....   |                        | 548                     | 548   | 548                      |
| 1 carpenter .....  |                        | 600                     | 600   | 600                      |
| Blacksmith and woodworker .....  | 300                    | 400                     | 400   | 400                      |
| Hostler and ambulance driver .....   | 240                    | 240                     | 240   | 240                      |
| Female keeper of workhouse .....   | 180                    | 180                     | 180   | 180                      |

## NEW APPLICATIONS.

| Name of institution or organization.   | Present appropriation. | Appropriation asked for. | Recommended by superintendent of charities. | Agreed on for estimates. |
|--|------------------------|--------------------------|---|--------------------------|
| Washington Home for Incurables.....  |                        | \$6,000                  | \$4,000                                     | \$3,000                  |
| Woman's Union Christian Association, for construction of home on donated property..... |                        | 10,000                   | 5,000                                       |                          |

The reasons for recommendations made by the superintendent of charities, together with discussions of several questions incidental to them, for the most part adjusted as preliminary to the recommendations finally prepared for Congress, are shown in the appended series of letters, written by me to Hon. John W. Ross, president of the District Commissioners, pursuant to the act of Congress of August 6, 1890, and to the order of the Commissioners of the District of Columbia dated July 15, 1891:

### WASHINGTON ASYLUM.

This memorandum is written in explanation of the changes requested in the appropriation for the support of the Washington Asylum as compared with the sums allowed for the current fiscal year.

*Overseers.*—Seven, at \$600 each, are placed in the estimates, instead of five now appropriated for. Seven are necessary for the care of three departments of the institutions concerned, namely, the almshouse for males and females, and the male and the female workhouse. Two of the seven are now paid from the contingent fund. Sound policy, in compliance with the spirit of the estimate laws, calls for exact and open specification of such salaried employees. When this schedule was originally outlined the almshouse and workhouse were together in one building. The perpetuation of the old classification and limitation under new conditions, which render the former arrangement obsolete, is mischievous.

*Assistant engineers.*—No change in the number is asked, but an advance of salary is requested from \$350 to \$365 per year, \$1 a day being moderate pay for such service.

*Watchmen.*—The case is similar to that of overseers. Six ordinary watchmen, at \$365 per year each, are needed and used, while one of them is now paid from the contingent fund, as is the case with the night watchman at \$548 per year.

*Carpenter.*—Similar remarks apply to the carpenter at \$600 per year, an employee much needed, and a great part of whose time is occupied in making coffins for the pauper dead, and like work for the general benefit of the community, rather than for the special service of the Washington Asylum.

*Blacksmith and woodworker.*—This skillful and very useful mechanic, who now receives only \$300 as blacksmith, declines to continue to work for less than \$400, which advance is requested and recommended.

*Nurses.*—It is proposed, as necessary to good hospital administration, that the pay of nurses be raised from \$60 to \$120 per year. The work is arduous for a small force of five nurses, and their compensation should be made such as to secure capable women. As stated in other letters of this series, a well-instructed nurse is a prime requisite of modern hospital service, as a matter of public economy and mercy to the suffering.

The above recommendations as to salaries are not new. The necessities of employment at the Washington Asylum and the course pursued have been reported to Congress at recent sessions. It is earnestly hoped that the confusion now existing between salary account and contingent account, which has arisen from the growth of the institution while Congressional action was deferred, may now be remedied, so that the salary list may be a complete, frank, and specific statement of compensation.

*Contingent expenses.*—The estimate of \$52,200 is based on the calculation of a per capita of \$100 per year for each person supported, according to the average of inmates during the last fiscal year. The per capita is the lowest it is safe to assume, and the average last year was low from various causes, including the increased number of short-termed commitments to the workhouse as compared with previous longer terms, and the sentencing to jail of classes of offenders formerly sent to the workhouse. It is quite probable that the average of inmates during the next fiscal year will reach 600 instead of last year's 522. I therefore approve the estimate as reasonable, and as low as can safely be made.

*Central heating station for hospital.*—Congress has for the past two years allowed \$4,000 and \$4,500, respectively, for hospital construction. With these sums two excellent wards have been provided, and by utilizing basement rooms in the one built this year the medical service of the hospital will be placed in good condition. Heating arrangements, however, are antiquated and defective, as well as lacking in cleanliness. It is proposed, by locating a small boiler house at the lowest point on the hospital grounds, to establish a central heating station for the dispensary, physicians' quarters, nurses' quarters, and the seven wards comprising the group of hospital buildings. This work, including all necessary appliances of piping, etc., for heating by steam or hot water, is to be done at a cost not exceeding \$4,000. Very great progress has been made within three years in transforming this hospital, and I feel confident that Congress will allow the change to be completed by the necessary improvement now proposed.

*Vault in potter's field.*—The present place of deposit for bodies of the pauper dead is too far from the cemetery, and is on ground now turned over to the parking commission, which asks for removal of the nuisance. The appropriation of \$600 requested for building a vault in the grounds of the potter's field cemetery is one of those connected with administration not strictly within the province of the Washington Asylum, but associated with its service as a matter of economy and convenience.

*Painting tin roofs, relaying floors, and resurfacing walls.*—Three thousand dollars is requested. The condition of the almshouse and the male workhouse is such as to necessitate extensive repairs. A beginning has been made in one part of the almshouse by resurfacing walls. It is necessary to continue the work throughout the almshouse and male workhouse. Brick floors have become very much worn and uneven, so that it is impossible to keep them clean and dry and to preserve sanitary conditions in the crowded buildings. There should be substituted concrete or cement floors to prevent dirt and disease. Two of the floors in the male workhouse are in such condition that relaying is imperative. Several of the roofs of the large number

of buildings constituting the asylum establishment require repair and painting, for the protection of inmates and the preservation of the property.

*Hospital beds and furnishing.*—The \$500 requested for this purpose can be expended to good advantage in hospital furnishing and appliances to replace worn-out articles and supply medical and surgical facilities suitable to the requirements of modern surgery.

*Burial of indigent dead.*—Heretofore, with the exception of \$300 for coffin making in part compensation for such work, allowed from the District fund for the relief of the poor, the entire expenses of burial of the pauper dead of the District have been borne by the contingent fund of the Washington Asylum. If the work is to be continued in the asylum's charge it is asked that \$1,500 be allowed for it. This would, of course, virtually, proportionately increase the money allowed for asylum use. I would hesitate to recommend it were it not that I see occasion for improving the quality and variety of the food furnished to the almshouse and the hospital, especially to the inmates of the latter. More generous diet would be of great advantage to the sick, notably by the use on proper occasions of sick-room delicacies, which are not to be expected by healthy inmates of a correctional establishment such as the workhouse. Again, the inmates of the almshouse, male and female, many of them very aged and feeble, are not delinquents in the eye of the law, but unfortunates; and I think that with all regard to economy some improvement, especially as to variety in their nourishment, should be made. As a rule, there has been too little opportunity for maintaining a desirable difference between the food supplied to the workhouse, the almshouse, and the hospital. Appropriations have apparently been graded with some deference to the entirely erroneous notion that the Washington Asylum is a "purely correctional establishment," which is by no means the case concerning the maintenance of the disabled poor and sick or injured of the District. The hospital, the only medical and surgical establishment of the District directly under the authority of the Commissioners without the intervention or cooperation of any institutional board, does important work, surgical as well as medical, as a general hospital for the eastern section of the city, and it should be as well supplied in proportion to its capacity as the other hospitals of the city.

SEPTEMBER 21, 1895.

#### REFORM SCHOOL FOR BOYS.

Examination of the estimates of appropriations for the Reform School of the District of Columbia for the fiscal year ending June 30, 1897, and the accompanying letter of explanation, transmitted to me by your order, shows occasion for the following observations:

I see no reason to object to any of the items of the estimates and, in a general way, from the inspection of quarterly accounts and vouchers, I believe them to be reasonable and just. I therefore place them in the digest prepared for the examination of the Commissioners. I would, however, be delinquent were I to fail to notify you of the absence of the customary full information in compliance with the law of 1889, the lack of which obliges me to report without having specific data at hand. Neither have I, through causes known to you, the advantage of being able to report on the condition of the reformatory from recent personal inspection as in the cases of other institutions included in the estimates. The statute above referred to is the act of March 2, 1889 (25 Stats., p. 807), which provides as follows:

"That hereafter the several institutions included under the heads of asylums, reformatories, industrial schools, and charities named in this act and in former and succeeding appropriation acts for the support of the District of Columbia shall report to the Commissioners of the District on or before the 1st day of October of each year a full and detailed account of receipts and expenditures, and all their operations, and said Commissioners shall transmit the same to Congress at the beginning of each regular session, with such suggestions and recommendations as they may deem pertinent, together with estimates for maintaining the same."

The document transmitted does not include such "full and detailed account of receipts and expenditures;" nor does it embrace specific relation of the operations of the school during the past year, nor any narrative of them except by brief and general allusion; nor do the estimates themselves definitely explain the increase of inmates or other facts necessitating enlarged appropriations.

The act of March 3, 1875, calls for the furnishing of estimates to the Secretary of the Treasury "on or before the 1st day of October of each year," and the change in 1889 of date to October from December, as the date was fixed in the act of 1888, was made to match this requirement.

The annual appropriation bills provide that expenditures of this reformatory for supplies, repairs, and other necessary items shall be "all under the control of the Commissioners." As was said by Hon. John W. Douglass, president of a former

Board of Commissioners, in a communication for the Board upon this general subject, "Control implies knowledge;" but such specific and adequate information of recent transactions as is requisite to intelligent action upon appropriations for future operations has not yet been received by the District authorities this year.

Heretofore such full information has been furnished, as in Report on Charitable and Reformatory Institutions for 1894, pages 90 to 108; same report for 1893, pages 59 to 75, and in the annual reports of the Commissioners of the District for 1892, pages 227 to 259, and for 1891, pages 172 to 190, etc. These reports of former years complied with requirements of the law of 1889 and afforded the information needed in each year respectively. It seems clear that, under the law and as necessary to intelligent administration of the affairs of the District Reform School by the expenditure of District funds, such reports should be made to the District authorities, without reference to any other report, duplicate or otherwise, to the Attorney-General or other authority. The act of March 3, 1881 (Abert's compilation, pp. 508-521, Stats., 459, 2d Sup. R. S., 321), describes as follows the annual report required prior to 1888:

"Hereafter the officers of the Reform School shall at the end of each fiscal year make a report to the Commissioners of the District of Columbia, which shall embrace a full and complete inventory of all the personal property in detail, the number of employees, the number of days each is employed during the year and price paid each, and the amount of garden, field, and other products produced, together with the disposition made of said personal property, and so forth."

The latest published annual report of the Reform School shows that of 121 boys received, 102 were committed by the District courts and by the president of the board of trustees of the school, while only 19 were committed by United States circuit courts. The act of 1866 established a "house of correction for the safe-keeping, correction, governing, and employing of offenders legally committed thereto by authority of the courts and magistrates of the District of Columbia." The act of 1870, changing the designation of the establishment to that of the Reform School of the District of Columbia, specified authority to commit by the mayors of the cities of Washington and Georgetown and by the trustees of the school, while the act of 1876 conferred upon the president of the trustees authority to commit incorrigible and vicious children without the intervention of any court or magistrate. Such commitment may be made at the request of any parent or guardian. The law of 1880 enacted that one of the Commissioners of the District should be a trustee of the school, and the act of 1885 placed "all in the discretion of the Commissioners of the District," the annual appropriations for the support of inmates, etc., which have since so continued.

While paying all expenses of the reformatory, the District supplies a great majority of the inmates, including those admitted without court conviction or charge of legal offending, for reformatory discipline or restraint of vicious tendencies of wayward boys. Its main province is that of a local reformatory for those guilty of, or prone to, petty offenses, and its place is within the field of charities and correction rather than in that of penal incarceration for felonious or serious crime.

As the institution receives only boys under 16 years of age, its inmates are naturally subjects of reformatory rather than penal discipline. Education, not punishment, is the primary purpose of the school.

The legal and administrative history and statistical records of the institution thus make it plain why, even apart from the requirement of the law of 1889, the trustees of the Reform School of the District of Columbia should annually, at a convenient time, report fully and in detail all their financial and other operations to the District authorities.

In view of the plain provisions of law on the subject, I do not feel at all warranted in assuming that the trustees of the Reform School do not intend to make such full report; but I respectfully suggest for your consideration whether it may not be well to request that such full report, heretofore made in connection with the annual request for estimates for the fiscal year 1897 as part of the financial budget of the District, be given.

By no means ignoring or questioning the legal and administrative relations of the Reform School of the District of Columbia to the Department of Justice, this memorandum seeks only to set forth the not less important and intimate connection of that reformatory with the District of Columbia, for which it does an important work in accordance with the name it bears.

SEPTEMBER 4, 1895.

---

The annual report of the Reform School of the District of Columbia, dated September 24, does not supply certain information, the lack of which I noted when writing you concerning the estimates forwarded by the president of the board of trustees of the school. For example, there is no statement of the number of inmates

received, committed, and discharged during the year, or of the average number, such as has heretofore always been embraced in the report of the superintendent. (See pp. 93 to 97, Report on Charitable and Reformatory Institutions, D. C., 1894, and pp. 62 to 66, like report, 1893.)

Information as to the number of persons supported by an institution is obviously requisite for intelligent action upon estimates for its maintenance.

If the omission of the report of the superintendent from the papers forwarded this year be accidental, the defect should, it seems, be supplied, in compliance with the law of 1889 requiring from reformatories "a full and detailed account of receipts and expenditures, and all their operations." A statement "of the operations of the various shops" does not in fact supply the needed information.

Were the point merely a technical one, I would not allude to it, but it is not possible to complete appropriation tabulations for your use and the information of Congress as to District appropriations in the absence of the statistics referred to, which have heretofore been annually forwarded to the District Commissioners.

SEPTEMBER 26, 1895.

On request of the District Commissioners, full information was furnished as to all matters alluded to in the foregoing letters, and entirely satisfactory report was received through the communications printed in this compilation under the heading of the annual report of the Reform School of the District of Columbia. The letters upon this subject are, however, included in this report as part of the office work of the year, valuable for reference in that they embody in condensed form important information as to the history and status of one of the leading institutions of the District.

The requests of institutions and organizations included in the schedule "For charities," with certain exceptions noted, were considered in a separate letter, and the recommendations of the superintendent briefly stated in each case. These recommendations, as set down in the third column of the above tabulation, are still adhered to as desirable and expedient. The changes and reductions made in them, as shown in the fourth column of the table, were agreed to only in view of the necessity, apparent to the Commissioners on examining estimates of District revenues, for cutting down the total amount to be recommended for charitable and reformatory uses and purposes. In every case the reasons for the action finally taken in completing the budget will be found in the letters reproduced below, in order that Congressional committees on appropriations may be fully informed in every case. The text of the general letter, addressed on September 20, by the superintendent to Hon. John W. Ross on the subject of the charities schedule, is as follows:

#### CHARITIES SCHEDULE EXPLAINED.

Herewith I send table of estimates for appropriations for charitable and reformatory institutions concerning which requests have been made for provision in the District of Columbia appropriation bill.

In previous letters I have reported upon the estimates of the Reform School of the District of Columbia (for boys), and of the Reform School for Girls. I will now report upon those for other institutions and organizations, with the exception of the board of children's guardians, for which the report and estimates are not yet received, and in relation to which I will write you as soon as the necessary papers shall have been furnished to me by that board in compliance with section 7 of the act approved July 26, 1893.

In the fund "For the relief of the poor," a continuance of the present appropriation of \$14,000, to be allotted, as usual, among appropriate objects before the opening of the next fiscal year, is recommended.

For the Municipal Lodging House, the maintenance appropriation of \$4,000, as given for the present and preceding fiscal years, will be sufficient for the needs of the establishment now in use.

For construction of a proper municipal lodging house, as already explained in communications to you, I very earnestly recommend an appropriation of \$25,000.

In the appropriation for the Temporary Home for ex-Union Soldiers and Sailors, namely, \$2,500, and the annual allowance of \$4,000 for the Woman's Christian Association, both of which have been awarded to these institutions, respectively, for several years, there does not seem to be occasion for recommending any change.

For the Central Dispensary and Emergency Hospital, for maintenance, a continuance of the present appropriation of \$15,000 is asked, and approved.

This institution has an outstanding indebtedness of \$20,000; incurred, \$15,000 in building and \$5,000 subsequently in improving its property. In his annual report, dated September 30, 1892, my predecessor made the following recommendation covering the then existing debt:

"I recommend the following appropriations for the Central Dispensary and Emergency Hospital for the year ending June 30, 1894: For maintenance, \$10,000; for the payment of the debt, \$15,000, provided, that the title to the real estate owned by the corporation shall be vested in the District in trust for the purpose of the hospital."

Last year the president of the hospital, Mr. B. H. Warner, appeared before the Senate subcommittee on District appropriations and asked for \$20,000 for the extinguishment of the present debt, on similar condition of transfer of title of property to the District. The matter was, however, put over for consideration until the coming session. The proposition is again made by President Warner, and I submit it for your consideration, believing that, if Congress will appropriate the money needed, the acquiring of public title to the real estate will not interfere with the zeal and efficiency of the hospital management in collecting from private sources funds to aid in the maintenance of the institution.

Columbia Hospital for Women and Lying-in Asylum asks an increase of the maintenance appropriation to \$25,000, which, on examination, I find to be reasonable and just and necessary to the proper support of the hospital, without incurring debt and giving ground for deficiency applications. For purposes other than maintenance, there is asked a grant of \$5,000, equal in amount to the sum allowed for the current year for heating apparatus, fitting up, and furnishing the new building. It is designed to expend the money next year in repairing and making safe the old hospital building. There is urgent necessity for the reconstruction of the large veranda on the east end of the building, which is an important part of the hospital as an open-air resting place for patients. The roof is leaking badly in several places, and the wall of the wards and bedrooms in the upper stories are in urgent need of repainting and pointing. The blinds and window frames of the north wing are in a very dilapidated condition, so are also those of the one-story building at the east end of the grounds, which is used as the lying-in ward. While the sanitary condition of the plumbing is good and additional baths and water-closets are provided in the nurses' home, the new building just completed, there should be at least two additional water-closets in the main building.

I visited the premises with the inspector of buildings, Mr. Brady, and on careful examination he concluded that the repairs and alterations above specified are necessary, and that the sum of \$5,000 will be required to make them.

If the appropriations are made as recommended the total sum allowed to the hospital for construction and maintenance will be the same as in the fiscal year ending June 30, 1895, namely, \$20,000.

For the Children's Hospital \$15,000 is asked, and should be conceded. The service of the establishment has been very greatly improved in other respects, as well as by addition of the infants' ward, through the expenditure of private means raised by the very devoted and efficient managers of the corporation. The buildings are greatly in need of painting and repairs, and there is occasion for further improvement of medical appliances. The hospital maintains 18 student nurses, pupils in the training school, and outside of its own wards it does very valuable service to the community in supplying skilled attendants to sick citizens at their residences, on application through the registry department. Even at the advanced appropriation recommended, the per capita public cost will be low for a children's hospital managed by trained professionals.

The record of the National Homeopathic Hospital justifies approval of its request for an appropriation of \$10,000. Its expenditures for the last fiscal year were \$20,506.88; the receipts from pay patients were \$5,959.55, and the remainder of the income was collected through private subscriptions, while some money was borrowed to prevent a deficit. The actual deficiency, temporarily covered by loans, was about \$2,000. Increasing surgical work, which has naturally grown with a better equipment of the hospital for such service, necessarily raises the relative cost of maintenance, the treatment of surgical cases being much more expensive than that of medical cases. There is no reasonable prospect of increased private income, while the expenditures of the coming year, including the payment of debt, will not fall below \$25,000. The appropriation for the current fiscal year is \$8,500. I think it is reasonable and just that the appropriation should equal one half the expenditures of the institution less its receipts from pay patients. The free patients, naturally public charges, are twice as numerous as the pay patients.

For the Freedman's Hospital no increase is yet asked, although by intelligent and enterprising medical management very great improvement has been made. The training school for colored nurses is an admirable feature, and while advance has

been made in every direction, that in the surgical department, entailing great expense, is the most marked. Supplied wholly from Government appropriations, this hospital furnishes a striking example of the economy and efficiency of the District system of purchase and payment.

Estimates for the Reform School for Girls have been fully discussed in a previous communication.

The Washington Hospital for Foundlings asks for an increase of \$1,000. The institution is in excellent condition, and its expenses, with a staff of salaried trained nurses, are naturally heavy. It is, however, an asylum rather than a hospital, and its per capita public cost for the last fiscal year, with an average of 35 dependents, was \$171.45. Its maintenance appropriation has stood at \$6,000 since 1888, although \$7,000 was allowed for that year only, and it may be questioned whether Congress would vote the increase in view of the much smaller per capita public cost for maintenance of other institutions of similar mission in which work is chiefly done by unsalaried persons. The appropriation for this establishment was not reduced when those of other child-caring institutions were cut down 40 per cent. I therefore submit for your determination the question whether the small increase requested should be allowed.

The reason given for the request by the directors of this asylum is as follows:

"The number of children has been so large the past year that the expenses have been greatly increased, and the directors feel compelled to ask that the appropriation for 1896-97 be increased to \$7,000, as the indications are that the number of applications for admission will be greatly in excess of any previous year."

For the Church Orphanage of St. John's Parish, for which \$1,800 was allowed during the current fiscal year, a restoration of the former standard appropriation of \$2,000 is requested, and is recommended. During the last fiscal year the average number of orphan inmates was 90 and the per capita public cost \$20. No payment for board is received.

It is clear that \$2,000 would be a very small return for the public service done by this admirable orphanage.

For the German Orphan Asylum similar action is asked and approved, for like reasons. In this case the annual number of orphans is 40 and the per capita public cost \$45.

For the National Association for the Relief of Destitute Colored Women and Children the current appropriation is \$9,900, and an increase is requested to \$11,770. I recommend a restoration in this case of the former appropriation of \$11,000, with the addition of \$770 for repairs. The receipts of the establishment through the board of children's guardians is \$2,446.12, and, exclusive of this revenue, the per capita public cost has been \$99. The establishment virtually is entirely dependent on public funds for maintenance and repairs, and it should be well sustained, being the only asylum of the District equipped for its special work for colored children and giving to them the advantages of public-school education.

St. Ann's Infant Asylum for abandoned and destitute infants now receives \$5,400 per year, with an average of 130 infant inmates and a per capita public cost of \$41.52. It applies for an appropriation of \$6,500. I recommend that \$6,000 be scheduled for it. In view of the large number of children it cares for at a relatively very small cost, who would otherwise be wholly public charges, I think that it should receive no less an appropriation than the Washington Hospital for Foundlings. The expenses of the institution last year were \$13,792, exclusive of fuel, lights, repairs, and other incidentals. Indeed, the facts set forth in the application would fully justify the granting of the \$6,500 asked for, and which was granted in 1890; but, inasmuch as the 90 per cent arrangement, I have placed that sum in the column of my recommendations.

For maintenance, the Association for Works of Mercy asks a restoration of its former appropriation of \$2,000, instead of the \$1,800 now allowed. This should be granted. This reformatory, in charge of an Episcopalian sisterhood, contemplates an enlargement of its establishment with a view to maintaining a preservation branch as well as a penitent branch, as is done by the Roman Catholic reformatory, the House of the Good Shepherd. For this purpose an appropriation of \$35,000 is requested. The plan is a highly commendable one, and is respectfully submitted for your consideration. I can make further report concerning it upon becoming familiar with details of the design, which I have not yet at hand. On the present basis the annual per capita public cost of this institution is \$90 for an average of 20 inmates.

The allowance of \$3,000, requested by the House of the Good Shepherd, should not be denied, it being a restoration to the standard rate, and the statistics for the last fiscal year showing an average per capita public cost of \$30.35 for an average of 89 inmates.

To the application for St. Rose's Industrial School for an allowance of \$5,000, an increase of \$500, like considerations apply. The instruction in dressmaking and

other female occupations given at this establishment is excellent, and its pupils are mostly transferred from St. Vincent's Asylum, an institution which, while one of the largest of its kind in the District, receives no public funds. It is only for trade instruction and for more advanced education of these pupils, finally fitting them for self-support, that public aid is solicited. The annual report of the school explains that decrease in receipts from private sources, incident to business depression, has recently increased the need for public compensation for industrial education to the destitute.

St. Joseph's Asylum for male orphans has on the present basis a record of an annual per capita public cost of \$15.60 for an average of 115 children. It presents a strong case in support of its application for \$5,000. However, notwithstanding the extreme cheapness of its service to the community, I limit my recommendation to a restoration of the former appropriation of \$2,000, as in the case of other similar institutions.

For the Young Women's Christian Home, a continuance of the present appropriation of \$1,000 is asked and earnestly recommended by me. The full consideration of the claims of this establishment given last year by Congress and by the Commissioners renders repetition unnecessary.

For the Industrial Home School, I recommend similar action to that asked in the case of the National Colored Home—an increase of from \$9,900 to the standard of \$11,000. I have not as yet received any renewal of the application of this establishment for transfer to exclusively public account. If such comes to hand, further communication on the subject may be necessary. The present appropriation of the Home School is \$9,900. Its receipts from the board of children's guardians last year were \$1,724.56. Its per capita public cost on the basis of the appropriation for an average of 100 pupils is \$99. The institution is an admirable one, and turns out good tradesmen and well-instructed women. Its general tuition is in accordance with the public-school system. Its grounds and buildings are public property, and are now in condition showing urgent need of repair.

In calculations of per capita cost in figuring for the estimates, I have not included the sums received through the board of children's guardians in payment for the support of its wards. Only two of the District institutions named in the appropriation bills receive any considerable revenue from this source, and the income is so variable and uncertain that it should not be relied on to diminish the appropriations of valuable establishments, such as the Industrial Home School and the National Colored Home, which maintain themselves with difficulty on the sums granted to them by Congress and have no unofficial incomes.

As to the expenditures of the board of children's guardians for the fiscal year 1897, I will report to you on receipt of the report and estimates of the organization, as heretofore stated. Some increase of its allowance will be asked and recommended, but to what extent must be determined hereafter.

Of new applications for Congressional appropriations the first received is that of the Hope and Help Mission, which asks for a direct allowance of \$1,000, instead of \$500 now received, as an allotment from the fund for the relief of the poor. Careful observation of this refuge during more than two years satisfies me that to place it on the regular appropriation list for the sum requested would be for the benefit of the community.

The Newsboys and Children's Aid Society, now also in receipt of \$500 as poor fund allotment, has recently moved into commodious and appropriate quarters, provided by a legacy, the use of which was restricted to such purpose. Besides its allotment of \$500, this establishment last year received \$808.15 for temporary care of boys and girls in charge of the board of children's guardians awaiting action of the court. It has an average of 20 inmates. The money now asked for is needed for maintenance of the new home with more numerous inmates, and I strongly recommend that the application be approved.

The application of the Eastern Dispensary for a maintenance appropriation of \$2,500, instead of the present allotment of \$500, and for \$10,000 for purchase of property and development of an emergency hospital, and that of the Woman's Dispensary for a direct appropriation of \$1,000, instead of the \$500 allotment, present questions which will be treated in a separate communication.

The estimates for support of the Washington Asylum are approved, and detailed written explanation will be furnished, if desired.

A previous communication has explained the estimates for the Reform School of the District of Columbia (for boys) as completely as is practicable with the information as yet at hand.

For the office of the superintendent of charities, I do not now ask for any increase in appropriations, which are requested as for the present year under existing law. For salary of the superintendent, \$3,000, and for salary of messenger, \$840.

SEPTEMBER 20, 1895.

Compliance with the act of August 6, 1890, calls for publication of a letter regarding the estimates for the Reform School for Girls written before the receipt of the full and satisfactory information desired for use of District authorities and Congress, which will be found under the head of the annual report of that institution, and which discusses the important questions of District control and supplies that were referred to in the two previous annual reports of the present superintendent of charities. This communication, moreover, besides giving detailed reasons for the items of appropriations recommended, includes a history of the formation of the establishment, which illustrates its relations to the District of Columbia and to the law department, respectively.

On September 20, when I filed the memorandum above printed regarding appropriations in the schedule "For charities," the official request for appropriations for the board of children's guardians had not been received. On October 11, being then in receipt of that estimate, I wrote the communication printed below, next after the one concerning the Reform School for Girls. These two letters completed the recommendations of this office as to institutions already in receipt directly of Congressional appropriations through the District of Columbia bill. The text of these communications, respectively, is as follows:

#### REFORM SCHOOL FOR GIRLS.

The letter of explanation of estimates for appropriations for support of the Reform School for Girls during the fiscal year ending June 30, 1897, addressed to you by the president of the board of trustees of the institution, contains, in addition to applications for new appropriations, requests for new legislation, requiring careful consideration.

Changes and entirely new submitted items to which there does not seem to be objection are salary for teacher of cooking, \$240; salary of engineer, increase of \$120, from \$480 to \$600; for groceries, etc., repairs and other necessary items, increase of \$500, from \$5,500 to \$6,000; \$2,500 for construction of a storage house, and \$1,200 for painting and repairs.

Instruction in cooking is a most desirable branch of practical education at this school, and there should be some well-qualified person employed to give attention exclusively to it. A well-trained cook is sure of a good livelihood, and it is eminently the mission of such an establishment as this to qualify inmates for self-support and remove them throughout life from the temptations incident to ignorance and idleness. It is scarcely necessary to say that colored girls make capable cooks, and that many of them are more likely to earn a good living in cooking than at any other occupation. It is, I understand, the purpose of the managers of the institution to pick out for special instruction those girls who show most aptitude for learning to cook. The compensation fixed, \$20 per month, is reasonable, while large enough to secure the services of a competent person. I take much interest in the success of this application, having noted how limited is the field of employment for colored girls, and having witnessed with much pleasure the success attending the thorough instruction of nurses in the training school of the Freedman's Hospital, by which a new sphere of usefulness has been opened to well-educated colored females to the advantage of their race and of the community.

Of the proposed increase of the salary of engineer, it is to be said that \$600 per year is not too large a compensation for a competent mechanic and engineer able to do jobs in plumbing and steam fitting, especially in view of the new steam-heating plant.

The increase of \$500 in the maintenance appropriation is wise. Supplies are obtained at the lowest contract prices, and the margin now available for improvement of the farm and keeping the fencing, buildings, tools, and stock in good condition is scarcely large enough. The improvements that have been made in the grounds, three years ago covered by a tangled mass of wild growth, are very striking, and a more liberal and more rapid prosecution of them will greatly benefit the property and tend to materially reduce the expense of the establishment by rendering it to a larger extent self-sustaining.

There seems to be good reason for the erection of a storage house for implements and products of the school, for which \$2,500 is asked. I recommend that some statement of the character and approximate detailed statement of cost of the proposed building be furnished in advance, as the appropriation committees of Congress will undoubtedly call for some specifications before passing the item.

The estimate of \$1,200 for painting outside work and interior walls of the main building seems to be moderate, and the expenditure during the next fiscal year will be a wise one, with a view to the preservation of property three years in use.

It does not seem necessary to repeat the arguments in favor of an extension of the school buildings so as to accommodate a larger number of inmates, as these reasons were fully stated last year to the Commissioners, with the result of approval to the extent of an outlay of \$28,000. It is to be said, however, that the need is a growing one, as month by month additions are made to the number of those colored girls who are proper subjects for reform-school care, but who can not be consigned to the institution by reason of its lack of capacity to care for them. For the fiscal year just closed the per capita cost of maintenance of this institution was \$269.26. This very heavy charge for each inmate can not be much reduced, if at all, so long as the number of inmates is so small. The capacity of the school could be increased, as proposed, to that for 125 inmates without very material enlargement of the outlays for salaries, etc., and undoubtedly with the result of bringing down the per capita for annual maintenance to a sum not in excess of \$150. If there is to be an enlargement of the school, true economy suggests that it be made as soon as possible to the extent of a minimum estimate of District needs for its services.

I pass on to the consideration of the final request presented in Mr. Endicott's letter, which does not relate to any specific appropriation, but to the arrangement by Congress of the entire body of appropriations for the school, with reference to other similar appropriations.

Possibly, discussion of this suggestion might, with propriety, be declined by me, on the ground of its not being proper matter for an estimate of sums needed to sustain the institution—especially in the absence, as yet, of any such full report to the Commissioners of the District of "all the operations" of the school as is required by the law of 1889. However, the application is one so distinctly within the province of this office, under the duties devolving upon the superintendent of charities by the act of August 6, 1890, that it seems incumbent upon me to deal with it fully on its first presentation.

Moreover, while the change proposed is seemingly in itself of little moment, its consequences, probably not fully realized or contemplated by Mr. Endicott, would be so important and far-reaching that it is necessary to render them clearly apparent by thorough examination.

The division of the District appropriation acts into schedules has been so long the basis of Congressional legislation that changes such as the one now proposed would subvert the present charitable and correctional system of the District. An apt instance of this legislative feature is furnished by the following law for institutional reports to your Board, as adopted in 1888 and amended in 1889:

"That hereafter the several institutions included under the heads of asylums, reformatories, industrial schools, and charities named in this act and in former and succeeding appropriation acts for the support of the District of Columbia shall report to the Commissioners of the District, on or before the 1st day of October of each year, a full and detailed account of receipts and expenditures, and all their operations, and said Commissioners shall transmit the same to Congress at the beginning of each regular session, with such suggestions and recommendations as they may deem pertinent, together with estimates for maintaining the same."

President Endicott's suggestion is made in these words:

"In the District appropriation bills the Girls' Reform School of the District of Columbia has been placed, since the founding of the school, under the head of charities and correction, while the Boys' Reform School has been placed under the head of reformatories and prisons. As the two schools are practically upon the same footing and are established by practically the same law (Supp. Rev. Stat. U. S., vol. 1, pp. 101, 596), it is desirable that the Girls' Reform School should be placed under the head of reformatories and prisons."

There are important differences between the legislation for the Reform School (for boys) and that for the Reform School for Girls, such as those noted by Mr. Endicott, concerning the age limit for admission, and the explicit requirement that appointments of officers, agents, teachers, and other employees and the fixing of their compensation shall be subject to the approval of the Commissioners of the District of Columbia. Again, the original incorporators of the girls' establishment were named in the law, and the location of the school and the acquiring of real estate and personal property for the use thereof were made explicitly subject to the approval of the Commissioners. The obvious intent of the original and of subsequent legislation regarding the girls' school was to treat it distinctly as a District reformatory and to promote the control of District authority over it, with respect to appointments, administration, and inspection. The step suggested by Mr. Endicott would be a reactionary one against the well-settled policy of Congress, as illustrated during a long term of years by such important provisos in appropriation bills as

the one placing expenditures for the Boys' Reform School "under control of the Commissioners."

Frequent inspection and systematic reporting at short intervals constitute an essential feature of efficient District control. Such supervision is provided through this office by the law of August 6, 1890, as follows:

"For the purpose of securing a more equitable and efficient expenditure of the several sums appropriated for charities there shall be appointed by the President, by and with the advice and consent of the Senate, as soon as may be after the passage of this act, some thoroughly experienced or otherwise suitable person, not a resident of the District of Columbia, to be designated superintendent of charities."

It has been the contention of the Reform School (for boys) that the quoted words "for charities" in the above, in certain respects limit or prevent jurisdiction of this office as to inspections and reports; and consequently avoiding controversy wherever possible, I have acted in the case of the Boys' Reform School in passing upon accounts, etc., under the order of the Commissioners, dated July 13, 1891. If the change proposed were made, the situation regarding the Reform School for Girls would be claimed to be similar, and you would be without adequate information as to the operations of the reformatory through the agency designated by law for such purpose, if that claim were sustained. This destruction of the usefulness of the superintendency of charities as to this reformatory would be likely to become only one step in the disintegration of the superintendency and the abandonment of the general plan of systematic administration "under the general direction of said superintendent," instituted by the act of 1890, and which has certainly already produced highly desirable results.

Although the original act authorizing the establishment of a Reform School for Girls was passed July 9, 1888, the appropriation under which the erection of the school was commenced was not made until July 14, 1892, when \$35,000 was allowed for a building "according to plans and specifications to be prepared by the inspector of buildings and approved by the Commissioners of the District of Columbia," the money "to be expended under the direction of said Commissioners." It was also provided that land occupied should not be part of that belonging to the Boys' Reform School, and the Engineer Commissioner was one of a board to select the site.

My predecessor in this office was earnestly and effectively instrumental in securing the final erection of this reform school. In his report for 1891 he spoke of the then inert subject as follows:

"This is a public corporation, the trustees being appointed by the President. No money has ever been appropriated to its use, although such appropriations have been urged by nearly all the District officials who are in positions to know best as to its necessity, and by many of the prominent citizens of Washington. To my own mind it appears that the lack of a girls' reform school in the District comes the nearest to being thoroughly disgraceful of any fact connected with our charities."

In his report for 1892 Dr. Warner embodied, with his approval, the estimate of the board of trustees of the school for its support.

The original provision for the erection of the school, as well as the first one for its maintenance in the act of March 3, 1893, and all subsequent appropriation bills, placed the school in the schedule "for charities," and there is no doubt whatever that it was the deliberate intention of Congress that it should be as fully as any other institution in the District within the province of the superintendent of charities.

The schedule "for charities" includes all other reformatories, with the single exception of the Boys' Reform School. In it are the House of the Good Shepherd and the House of Mercy—institutions for white girls of similar mission to that of the Reform School for Colored Girls—and also the board of children's guardians, having by the law of 1892 specific relations with the superintendent of charities, to whom it reports, and with the Reform School (for boys) and the Reform School for Girls. Under the same schedule are all other institutions of reformatory nature for which appropriations are made, or to which allotments from the fund for the relief of the poor are assigned. In view of the considerations heretofore recited I do not ask that the one exception to this rule be terminated by placing the Boys' Reform School with the other reformatories in the schedule "for charities;" but I do most earnestly protest against the withdrawal of the appropriation for the Reform School for Girls, or any other appropriation, from the schedule.

This year's report on the charitable and reformatory institutions of the District will show how great is the progress that has been made under the law of 1890. For the first time there will be adequate presentation of the charitable work of the District in reports not only of associations receiving appropriations through the District appropriation bill, but also of others, such as Garfield and Providence hospitals, doing work within the District, but provided for in other appropriation acts. There will also be statements of the condition of institutions not now receiving public money, but exempt from taxation, and of "the other charitable work of the District," such as that of relief committees, etc.

It is chiefly because the change of schedule suggested by Mr. Endicott would interfere with and tend to destroy the value of the steady prosecution of the difficult and often delicate work of systematizing the benevolent administration of this District, in the interests of charity, economy, and progress, that I feel constrained to ask that it be not concurred in by your Board. However, even were the application one without such relation to general administration, I would still be adverse to it as detrimental to the institution itself, which, like every other well-conducted public establishment, is helped, not hurt, by systematic and friendly expert inspection and by frequent and full report of its operations and finances, such as the system of this office insures.

The District should not be deprived of such facilities for full knowledge of the operations of institutions concerning which it has financial control and responsibility, while by the aid of such information, through a responsible and impartial source, the estimates can be most readily and intelligently prepared.

SEPTEMBER 9, 1895.

#### CHILDREN'S GUARDIANS' ESTIMATES.

At the date of my last communication regarding the estimates and when I explained to the Commissioners the tabulated statement prepared, no formal application from the board of children's guardians had been received, and the figures inserted in the column of requests were those of an informal memorandum furnished by the secretary upon which the board had not yet acted.

I have now in hand a communication from the board submitting formal estimates which aggregate \$31,015. I have accordingly placed that amount in the column of requests, divided into two parts as in the existing law—namely, for administrative expenses, \$4,790, and for care and support of children, \$26,225. I have placed in the column of recommendations of this office, for administration, \$4,600, and for support \$25,400; so as to make an aggregate appropriation of \$30,000, instead of the \$20,000 allowed for the current fiscal year.

The detailed explanation of the board's estimates is inclosed herewith for your information, together with a letter transmitting the same. On the first page of that statement is the table of administrative estimates.

Item 1 is for restoration of the agent's salary to the original amount of \$1,800, in which recommendation I concur, as I do in that of item 3, the salary of clerk and typewriter as now paid; item 4, for rent, and also item 5, for stationery and printing, and item 7, for expenses of placing and visiting children. Item 6 is \$200 for office and sundry expenses, in which, in view of the allowance for stationery and printing and rent, economy might be effected.

Item 2 is for salary of a clerk now paid \$720, for whom \$960 is proposed. On a whole, if the disposition of items is to be left to the board, as now, I believe that \$4,600 will be adequate. Last year's expenditures under this head did not reach \$4,000, but I am convinced that an increase in the number of inspections is very desirable. For the care of children other than feeble-minded the board's estimate on page 2 of the statement is \$18,350. In this I do not see occasion to make any alteration. The allowance should be ample, while the exact amount needed to be expended can not be determined in advance, as it will depend in considerable degree upon the number of children committed to the board by the courts.

The estimate for feeble-minded children on page 4 of the statement is, in my opinion, unnecessarily large, in view of matters reported to you in a recent letter regarding the feeble-minded. As all white children of that class hereafter put out can be arranged for at a maximum of \$200 a year, there does not seem to be sufficient ground for basing the calculation for an increased number up to 35 at an average of \$225 a year charged for those now paid for by the District. Should there be any occasion for changing the estimate I now submit, pursuant to section 7 of the act of July 26, 1892, I will report further upon the personal inspection of institutions for feeble-minded which I am awaiting opportunity to make in accordance with the arrangements of last month. I am confident, however, that there will be no adequate reason for revising these estimates by enlarging them either from such inspections or from any matters that may be hereafter submitted as suggested in inclosed communication. An increase of 50 per cent is believed to be ample for any probable expansion of the work of the board, which I am anxious to facilitate in every appropriate way.

It is gratifying that the board's recommendation this year is such that I can substantially adopt it in its entirety, the difference of calculation regarding the feeble-minded arising out of an offer made to the superintendent of charities and not yet formally laid before the board of children's guardians.

The proposed restoration of the salary of the agent will require an alteration of the text on the fifth page of the tabulated statement, in the seventh line, under the head "For the board of children's guardians," so as to read "not to exceed \$1,800."

On October 11, after having discussed verbally with the Commissioners the applications for additions to the schedules of charitable and reformatory appropriations, I filed written memoranda relative to requests for change from poor-fund allotments to direct Congressional appropriations, and also for new allowances to institutions not now receiving public funds. Under the first head are the Hope and Help Mission, the Newsboys and Children's Aid Society, the Eastern Dispensary, and the Women's Dispensary. Under the second are the Washington Home for Incurables and the Home for Friendless Colored Girls. Remarks upon these cases will be found in the first three letters of that date, reproduced below.

On the same day, being informed that financial conditions necessitated a revision and reduction of the District estimates generally, and that it was desirable to specify what items of the schedules submitted by me might be dropped, or cut down, with least detriment to current charitable and reformatory administration, I prepared and filed the fourth of the following letters.

On October 16, a still further reduction being asked for, I wrote the fifth letter of the following series, which completes the history of the estimates as presented in the fourth column of the foregoing tabulations, with the exception of the restoration of an item in the Washington Asylum list—\$600 for building a vault in the potter's field:

#### HOPE AND HELP MISSION.

Having reported by letter upon all requests for appropriations for purposes now specified in the District appropriation act, it remains to briefly discuss the applications for additions to the charities schedule by change from present poor-fund allotment to direct appropriations or by new appropriations to established institutions not now in receipt of public funds.

Of the former class the first applicant is the Hope and Help Mission. It now receives a \$500 allotment, and asks instead an appropriation of \$1,000, which I very strongly recommend.

The application is for a restoration. The appropriation acts for 1893 and prior years (see p. 17, act for 1891, 1892, and 1893) provided for an allotment by the Commissioners "not exceeding \$1,000 to the Young Woman's Christian Home, and not exceeding \$1,000 to the Hope and Help Mission," which sum was paid to those institutions respectively. In the appropriation act for 1894 both institutions were omitted for reasons which the records of this office do not explain. Congress, last year, on examining the matter of the Young Woman's Christian Home, restored the appropriation of that institution in accordance with the recommendations of the Commissioners and the superintendent of charities. To the Hope and Help Mission the allotment from the poor fund has been made of \$500 annually, but that sum is inadequate to just remuneration for the public service rendered by this reformatory refuge, which fills a want in the community in the heart of the city not otherwise supplied. It has been obliged to move into unsuitable premises which cramp its work.

Last year it collected from private donations to the value of \$12,000 in money and supplies. Even on its present scale it can not be conducted for less than \$2,000 a year, and it is reasonable that the public should bear one-half the cost of what is really an exclusively public service in the truest sense. The annual report shows about 20,000 meals and 7,000 lodgings furnished, while places at service were secured for 125 female inmates. The mission is about to open a nursery where mothers can leave their children when they go out to work. There seems no reason to doubt that Congress in this case will take action similar to that of last year regarding the Young Woman's Christian Home.

OCTOBER 11, 1895.

---

#### NEWSBOYS AND CHILDREN'S AID SOCIETY, EASTERN AND WOMAN'S DISPENSARIES.

Concerning the application of the Newsboys and Children's Aid Society I see no reason to change the recommendations made in my letter of September 20 in favor of an appropriation of \$1,500 for maintenance, instead of the \$500 now given as an allotment from the poor fund.

The Eastern Dispensary asks for \$10,000 for the purchase of the property it now occupies, No. 217 Delaware avenue NE., the title to be vested in the District. The institution has an option of purchase at this price until January 1, 1896, which can be extended for nine months. The dispensary, which two years ago occupied very small quarters, is undergoing a natural development similar to that of the Central Dispensary and Emergency Hospital. In my report for the year 1893 the following was said:

"The Eastern Dispensary, the only one of its kind in the eastern section of Washington, has arranged for the occupation of new and suitable premises, with a view to the use of a part of them as an emergency hospital. There is an opening and want for such an institution in that section of the city, as it is too distant from the Central Dispensary for purposes of quick relief, and there is a population of at least 75,000 thus cut off from proper emergency succor. While, consistently with the rule adopted by me, and in view of the present need of administrative economy, I have declined to recommend that public aid be given to this undertaking during the coming fiscal year, I believe that energetic private work and liberality during the next twelve months will probably put this institution in a condition to deserve consideration as an established work of great public utility at the next session of Congress."

I believe that the time has now come when enlarged usefulness of this establishment can be secured with great advantage to the community, and that money for the purchase of the premises occupied at the low price offered should be granted. I think, however, that \$1,500 should be made to suffice for maintenance during the coming fiscal year, the allotment of \$500 being, of course, withdrawn in this as in other cases where direct appropriations are to be made if Congress accept these recommendations.

In the case of the Woman's Dispensary, I do not feel justified in asking for an increased allowance for direct appropriation this year. I say this without prejudice to the institution, but believing that public aid should follow increased service and charitable enterprise, even somewhat slowly, and that in the case under consideration an additional year of careful management may produce good reason for further recognition.

OCTOBER 11, 1895.

#### HOME FOR INCURABLES AND HOME FOR COLORED GIRLS.

The Washington Home for Incurables, which has never heretofore received any public aid and on behalf of which a bill for a special appropriation narrowly failed of final passage at the close of the Fifty-third Congress, now asks an appropriation of \$6,000 for maintenance.

I have several times had occasion to speak highly of this institution in official reports, and indeed no praise can be too high for its merits. Its annual expenditures are a little over \$8,000, and its income from pay patients and endowments, \$3,200. To support it about \$5,000 has been annually raised by donations, and it is not believed that this income can be relied on permanently. The management desires to extend the benefits of the home more liberally to incurables whose friends are unable to pay for them. It seems just and now necessary that the cost of this establishment for maintenance should be in part borne by the public in return not only for current service, but also for the liberality of those who founded and constructed it.

I recommend an appropriation of \$4,000 as well deserved for the public service of this admirable institution, while leaving to its generous supporters a field for their charity in maintenance as well as improvement and development.

The Woman's Union Christian Association, which has now a small establishment for the education of young colored girls at its home on Erie street, seeks an appropriation of \$10,000 upon ground set forth in the following letter:

"WASHINGTON, D. C., September 28, 1895.

"DEAR SIR: In reply to your letter of the 25th instant, relative to Home for Friendless Colored Girls, I reply that an appropriation of at least \$10,000 is necessary to build a home. The ground (part of lot 2, block 6, Howard University subdivision, known as Effingham Place) has been donated by Miss Maria T. Stoddard, on which it is proposed to erect the home.

"This home, for the training of friendless girls in all branches of domestic industry, and morality as well, has been supported by individual subscriptions of members of the association and their friends, the proceeds of entertainments, etc. While we have been able to do considerable good, as shown by the records of the association and the testimony before your predecessor and yourself, yet the matter of rent has always hampered us in accomplishing much that would have been done. Now, that

# 120 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

the necessary ground has been given, the association would request your assistance in securing an appropriation of \$10,000 from Congress to erect the necessary building thereon.

"Yours, respectfully,

CAROLINE TAYLOR,  
*"President Woman's Christian Union Association."*  
 "M. L. WATSON, Secretary."

This home at one time had a small appropriation from Congress, \$150 a year. Its managers are devoted and enterprising, and now that land has been acquired by them it is fitting that they should be aided in the use of it. In view, however, of the extent of applications for construction this year, I can not recommend that more than \$5,000 be now granted to this meritorious but comparatively small benevolent enterprise.

The applications referred to in this letter and above considered are listed on the sixth page of the tabulated statement of charitable estimates.

With reference to the application of the Association for Works of Mercy for \$35,000 for construction (p. 5, tabulated statement), I am still without particulars to enable me to report understandingly, but will obtain them and inform you on the subject as soon as practicable, in case I find the matter in condition to be properly and hopefully pressed at the coming session. The institution, as you are aware, I regard as a very meritorious one. Its present premises are large, but the building is inadequate, and the design is to locate the establishment elsewhere within the District, but away from the crowded part of the city. I wish particularly to ascertain the relative proportion private benevolence and public aid are expected to contribute to the enterprise.

OCTOBER 11, 1895.

## SCALES OF THE ESTIMATES.

During the two years for which the Commissioner of charities has made recommendations for charitable and reformatory purposes there have been virtually no appropriations for construction. The only possible exceptions are in the cases of the ward at the hospital of the Washington Asylum, the change of heating and sanitary arrangements at the Reform School for Boys, and the building and furnishing of a nurses' home at Columbia Hospital. The aggregate of all these is \$25,700, but in all cases, except the last named, the purpose of the appropriation was renovation rather than construction. In preceding years construction appropriations were relatively large. In 1893 they were \$37,200; in 1894 they amounted to \$39,350; in 1891 they were \$39,850; in 1890 they were \$51,342. The total for these four years was \$169,792.

Naturally, the almost entire suspension of charitable and reformatory construction on public account during two years of hard times has left a legitimate demand for such work to meet constantly developing needs.

Bearing in mind these facts, but at the same time realizing that it may be requisite in order to avoid too large a budget to postpone until another year some very desirable projects, I request your attention to the construction items in the schedule now before you, as tabulated.

Page 1, Washington Asylum: For central heating station for hospital group, \$4,000. This I regard as very important to health, cleanliness, and economy. It would only be a continuance of the regular allowance for hospital improvement and renovation, through which, during the past two years, old and decayed wards have been replaced by new ones. I trust this item may be adhered to and secured.

Same appropriation and page: For construction of vault in potter's field cemetery, \$600. This item, desirable for District purposes, if not strictly asylum construction, was sufficiently alluded to in my letter of September 21.

Page 3, Reform School: New bake oven, etc., \$2,600. This item, twice requested and urgently needed, should be secured.

Same page and appropriation: Chapel building, \$12,000. There certainly should be such a building at the Reform School for Boys, and it is the only considerable construction application made on its behalf. In enforced choice, however, between construction applications this one may not be demanded of the first order of urgency for the coming fiscal year.

Third page charities schedule, Municipal Lodging House: Construction, \$25,000. With much reluctance, I assent to the withdrawal of this item for this year, if it be considered essential to reduce construction estimates. My reasons for proposing it have been fully set forth.

Same page, Central Dispensary and Emergency Hospital: For payment of debt, \$20,000. While desirable and important on condition of transfer of real estate security to the District, if reduction of estimates be deemed essential, this item might

be deferred in favor of some additional propositions regarding equipment of which I have heard, but which have not yet been formally presented.

Same page, Columbia Hospital: For general repairs, reconstruction, etc., \$5,000. This item can scarcely be considered construction. I allude to it here, however, for the purpose of remarking that it should by all means be adhered to as essential to the preservation and continued safe use of the property which belongs to the public.

Page 5, Association for Works of Mercy: Construction, \$35,000. This proposition has been discussed in another letter of this date; for the present it need not be regarded as urgent.

Same page, Industrial Home School: The request for a hospital at a cost of \$5,000 I have not recommended for this year, and the \$2,000 for improvement I think may be barely covered by the recommendation of \$13,000 for maintenance, including repairs. A similar remark applies to the items at the close of page 4 and at the beginning of page 5 for the National Colored Home, for which I have recommended for maintenance, including repairs, \$11,770.

The most important construction item for institutions already on the appropriation list is that for an additional building for the Reform School for Girls (p. 4, tabulated schedule). On consultation with the inspector of buildings with reference to the cost of similar construction at the Washington Asylum a few years ago, I do not find, as hoped, that a building with 90 cells and the requisite equipment for sanitary uses, feeding inmates, heating, etc., can be properly built for much less, if any, than the sum named. I believe the enlargement to be of the first order of urgency, so that the reformatory may be adequate to the demands upon it, while the per capita cost of maintenance may be reduced to a reasonable figure. With respect to the storage house, \$2,500, I have reported favorably in my letter of September 9. If necessary, however, this smaller construction might, but at a great disadvantage, be deferred in favor of the larger one, so urgently required.

The construction propositions on page 6 of the tabulations are sufficiently criticised in letters of this date devoted to them and to the maintenance of the charities with which they are connected.

In case a policy of present economy should be deemed to require it, and only the most urgent construction applications be considered, a review of the items in this letter, with reference to the tabulated statement before you, will show the possibility of reducing the requests for construction appropriations to the extent of \$121,170.

Very few things, if any, are asked for that will not sooner or later be required, and none that can be long postponed have been put in the column of recommendations. It is to be noted also that the suggestions involve, mostly, the acquirement by the District of valuable property at low cost, and in some cases the termination of burdensome interest or rental charges.

Should all recommendations I have made be accorded, the construction appropriation for the three years during which I have made recommendations would not exceed the average of former years.

As to the maintenance items in the schedule before you, I am firm in the conviction that it is for the public welfare that they should not be materially altered.

In the schedule for charities, the special charge of this office, appropriations have been rigorously kept down during the years of distress. For the fiscal year 1894 the aggregate was \$217,653. For the fiscal year 1895, the first for which I recommended, it was \$209,550, and for the present fiscal year, \$216,250. Naturally, an increase would have been expected, especially in view of legislation in recent preceding years involving large outlays for the support of new establishments and organizations.

It seems that the record above cited gives ground for confidence that where slight maintenance increases are now asked for they are absolutely necessary, and, if granted, will be applied.

With respect to the appropriation for the relief of the poor, it is to be hoped that it will not be disturbed in consequence of the transfer of some of its beneficiaries to specific appropriation account. While a large proportion of that fund must go for medical services and supplies, as much as possible of the remainder should be retained for the use its name implies. The total amount proposed to be transferred from minor institutional allotments is only \$1,500, and that should be kept in hand for emergency relief.

In the Freedman's Hospital estimates (tabulated statement, p. 4), at the request of the surgeon in chief, I have changed the wording of the appropriation description to correspond with the present plan of hospital organization.

OCTOBER 11, 1895.

Regretting extremely that the Commissioners fear that it will be necessary to still further reduce the estimates for charities and reformatories, I submit the following list as the most equitable reduction practicable, in addition to the very large one already outlined in answer to your former request in my letter of the 11th instant:

| Beneficiary.                                    | Reduction. | Estimate as reduced. |
|---|------------|----------------------|
| Columbia Hospital, maintenance.....             | \$1,000    | \$24,000             |
| Children's Hospital.....                        | 1,000      | 14,000               |
| National Homeopathic Hospital, maintenance..... | 750        | 9,250                |
| Freedman's Hospital, fuel, etc.....             | 1,500      | 13,500               |
| Reform School for Girls, building.....          | 5,000      | 45,000               |
| Church Orphanage of St. John's Parish.....      | 100        | 1,900                |
| German Orphan Asylum.....                       | 100        | 1,900                |
| National Colored Home.....                      | 770        | 11,000               |
| Association for Works of Mercy.....             | 100        | 1,900                |
| House of the Good Shepherd.....                 | 150        | 2,850                |
| St. Rose's Industrial School.....               | 250        | 4,750                |
| St. Joseph's Asylum.....                        | 100        | 1,900                |
| Industrial Home School.....                     | 1,000      | 12,000               |
| Board of children's guardians.....              | 2,000      | 28,000               |
| Newsboys and Children's Aid Society.....        | 500        | 1,000                |
| Eastern Dispensary, maintenance.....            | 500        | 1,000                |
| Home for Incurables.....                        | 1,000      | 3,000                |
| Woman's Union Christian Association.....        | 5,000      | .....                |

Making a total reduction, in addition to former ones, of \$20,820.

This, if acted upon, would leave a total budget for charities and correction, reformatories, insane, and deaf and dumb amounting to \$537,070.

In scaling the list I have done so as nearly as practicable on a uniform basis, bearing in mind the peculiarities of condition of the several establishments and the relations of present requests to past appropriations.

OCTOBER 16, 1895.

Proposed appropriations for institutions and agencies supported entirely by public funds amount to \$426,068. Such establishments are the Washington Asylum, the Reform School of the District of Columbia, the Government Hospital for the Insane, the Columbia Institution for the Deaf and Dumb, the Municipal Lodging House, the Temporary Home for ex-Union Soldiers and Sailors, the Columbia Hospital for Women, the Freedman's Hospital and Asylum, the Reform School for Girls, the Industrial Home School, and the board of children's guardians.

Appropriations recommended for aided institutions are for an aggregate sum of \$97,950. These organizations are the Woman's Christian Association, the Central Dispensary and Emergency Hospital, the Children's Hospital, the National Homeopathic Hospital, the Eastern Dispensary, the Hope and Help Mission, the Newsboys and Children's Aid Society, the Washington Hospital for Foundlings, the Church Orphanage of St. John's Parish, the German Orphan Asylum, the National Association for the Relief of Destitute Colored Women and Children, St. Ann's Infant Asylum, St. Joseph's Asylum, the Association for Works of Mercy, the House of the Good Shepherd, St. Rose's Industrial School, the Young Woman's Christian Home, and the Home for Incurables. The fund for relief of the poor, \$14,000, in amounts will be divided between private benevolent enterprises and strictly public uses in such proportions as the District Commissioners may allot. The Aged Women's Home, the Homeopathic Dispensary, and the Woman's Dispensary, not included in the above list, are now beneficiaries of this fund.

Subsequently to the completion of the estimates a communication from the United States law department was referred by the District Commissioners to the superintendent of charities, who returned the papers with a report, the substance of which is stated in the following extract:

The suggestion for the correction of schedules in the District appropriation bill by the transfer of the appropriation for the Reform School for Girls from the head "for charities" to the head "reformatories and prisons" has relations to regulations and administrative customs under laws of local application which naturally would escape notice in a general examination of the extensive affairs of a great Federal department.

These matters of local concern and knowledge are so important to the subject as to deserve careful consideration by the learned Attorney-General and by yourselves before determining upon an alteration in the estimates that have already gone forward in the form heretofore established by Congress.

The Reform School for Girls has always been in the schedule "for charities." It was placed there in the original appropriation for the construction of the school (27 Stat., p. 165), a copy of which is transmitted herewith. It provided for a building, according to plans prepared by the District inspector of buildings and approved by the Commissioners of the District, and that the money appropriated should be expended under their direction, while the Engineer Commissioner of the District was one of three officials to select the site, the Attorney-General and the Secretary of War being the other two. It was also provided that the site should be distinct from the land of the District Reform School for Boys.

This original arrangement has been followed in maintenance allowances of succeeding appropriation bills; so that during four successive years Congress has adhered to the plan of placing this District reformatory in the schedule that includes all other reformatory institutions of Washington and vicinity appropriated for, with the single exception of the Reform School for Boys. That reformatory has been allowed to remain in the list in which it was placed before the organization of the District charitable and reformatory system as now constituted. The House of the Good Shepherd and the House of Mercy are female reformatories at which white girls are cared for of similar class to the colored girls sent to the Girls' Reform School (act of October 11, 1888, 25 Stat., p. 544; act of February 13, 1885, 23 Stat., p. 302).

The board of children's guardians (act of July 26, 1892, 27 Stat., p. 270) is a purely reformatory organization, receiving no children except by commitment of courts, and it is required, by the seventh section of the act, to report directly to the superintendent of charities in consonance with the act of August 6, 1890 (26 Stat., p. 309), establishing the superintendency. These reformatory establishments are all under the head "for charities," while the fund "for the relief of the poor," out of which provision is made by the District Commissioners for minor reformatories, such as the Hope and Help Mission, is embraced in the same schedule. Since the establishment of the superintendency all new appropriations for reformatory or charitable uses or purposes have been placed in the same list, in harmony with the well-defined legislative design of unifying and systematizing District control over hospitals, homes, asylums, and reformatories. Accordingly, the financial direction of the Freedmen's Hospital, for example, has been transferred from the Department of the Interior, and its appropriations have been put under control of the District Commissioners (act of March 3, 1893, 27 Stat., p. 551) as, notwithstanding the retention of the old classification, is the supply fund for the Reform School for Boys "all under the control of the Commissioners."

It seems plain, from the above-recited facts and references, that the present location of the Girls' Reform School appropriation conforms to the general rule for such cases, and that to transfer it would be to depart from the rule to suit a solitary exception.

I think Judge Harmon's attention should be asked to the important differences established by Congress between the old District reformatory for boys and the new District reformatory for girls. In both, appointments as trustees are made by the President on nomination of the Attorney-General, and both make annual reports to the head of the law department. Both, however, also make annual reports to the District authorities, pursuant to the act of March 2, 1888 (25 Stat., p. 807). In the Reform School for Girls all appointments of officers, employees, including the superintendent, and the fixing of their compensation, are subject to the approval of the Commissioners of the District of Columbia; so that the entire management of current administration is a District matter. It seems, indeed, that the specific control of the Department of Justice practically ends with the recommendation for appointment as trustees. The inmates of the reformatory are all from the District. Its

work is entirely District work, and is paid for exclusively from District funds, as are other local expenditures. It is not a purely penal institution, because the president of the school has, and has exercised, the right to commit children for incorrigibility or destitution without intervention of courts, while inmates are also received by assignment from the board of children's guardians under the act of July 26, 1892 (27 Stat., p. 220).

While some of the features of localization mentioned are common to the girls' and boys' reformatories, it seems that it was the intent, as it has been the result, of legislation for the girls' school to associate it even more closely than the male reformatory with the local system.

The change of classification suggested would not legally alter the relation of the Girls' Reform School to the law department. It would, however, tend to obscure and render less definite the methods and practices of District management, and in a measure to deprive District and United States authority, constituted for that purpose, of the supervision over details of administration which is essential in observance of the rule that "control implies knowledge." District officials should not be required to make estimates without the fullest information regarding the current operations of establishments appropriated for such as is furnished through the current inspections of and quarterly reports to the superintendent of charities. Institutions in the schedule "for charities" make quarterly reports to the superintendent. Apparently the principal effect of the change proposed would be to stop such direct reporting and embarrass the inspection service which Congress thought of sufficient importance to establish under an officer of Presidential appointment and Senatorial confirmation. I refer to this branch of the subject with reluctance, but with confidence that the Attorney-General, on close examination, as well as yourselves from daily observation in administrative work, will regard the reference as appropriate and necessary to fair consideration of the question in hand.

Statutes herein cited furnish instances of legislation founded upon the classification of appropriation bills. As a matter of nomenclature and scientific classification it may be said that changes are to be desired, such, for example, as placing all charitable and correctional institutions under one head. But I have not asked for such changes, because of the relations of subsequent laws and regulations to established classifications and because of the peculiarity of institutions which do work in different fields, such as the Washington Asylum, including almshouse, hospital, and workhouse.

The Girls' Reform School is differentiated from the prison class by the age limit, and by the fact that its inmates are subjects of reformatory rather than penal discipline. Education, not punishment, is the primary purpose of the institution. Its mission is within the well-defined field of charities and correction rather than in that of punishment for serious crime. Local in origin, name, and scope, I do not think that District authority over it, or your information concerning it, should be curtailed, especially as bearing upon the use of appropriations of the District made upon District estimates.

It is not desired by anyone that the connection of the United States law department with reformatories should be severed, or any change in reporting to that Department be made. The immediate and kindly interest Judge Harmon has taken in the truly charitable work of these reformatories illustrates the benefit of such associations. On the other hand, the law department is in position to realize the importance of local relations, to the directness and efficiency of which the proposed transfer would be detrimental, as I am convinced by careful observation from an impartial official point of view. The change under consideration could not render the Attorney-General's authority over the reformatory broader or more helpful, while it would certainly embarrass those regular operations of the school that are provided for through the District by money for the wise use of which the District authorities have general responsibility. You have just asked Congress for \$45,000 to provide for the Girls' Reform School, a new building from District funds, so as to increase its capacity to 125 inmates maintained at a reasonable cost, from that for 35 inmates at the extravagant outlay of \$270 per capita, and the superintendent of charities has earnestly advocated that appropriation for construction to the exclusion of other very urgent demands and needs of similar purposes. This fact seems to render inappropriate now an alteration to the detriment of District management. The board of trustees of the Reform School for Girls having for the first time elected a treasurer, under authority of the law of July 9, 1888, and notice of such election having been received after the closing of the District estimates, an item of \$600, requested as salary for such treasurer, has been added to the tabulation of estimates as herein published.

The statute constituting the office of Superintendent of Charities and the District order regarding the inspection of charitable and reformatory accounts, above cited, are as follows:

For the purpose of securing a more equitable and efficient expenditure of the several sums appropriated "for charities" there shall be appointed by the President, by and with the advice and consent of the Senate, as soon as may be after the passage of this act, some thoroughly experienced or otherwise suitable person, not a resident of the District of Columbia, whose duties shall be to formulate for the purpose of the expenditures for charities in said District such a system or plan of organized charities for said District as will by means of consolidation, combination, or other direction, in his judgment, best secure the objects contemplated by the several institutions and associations for which such appropriations are made, and for the other charitable work of the District, with the least interference each with the other, or misapplication of effort or expenditure and without duplication of charitable work or expenditure; and all such appropriations shall be expended for the purposes indicated, under the general direction of said superintendent, and in conformity, as near as may be, with such system or plan, subject to the approval of the Board of Commissioners of the District of Columbia. And it shall also be the duty of said superintendent to examine into the character of the administration of said institutions and associations, and the condition, sufficiency, and needs of the buildings occupied for such charitable purposes, and also to ascertain in each case the amount contributed from private sources, for support and construction, the number of paid employees, and the number of inmates received and benefited by the sums appropriated by Congress, and to recommend such changes and modifications therein as in his judgment will best secure economy, efficiency, and the highest attainable results in the administration of charities in the District of Columbia. And said superintendent shall, from time to time, report in detail to the Commissioners of the District, who shall communicate the same with their estimates for appropriations to the next session of Congress, his doings hereunder, together with such estimates and recommendations for the future as in his judgment will best promote the charitable work of the District. All estimates submitted hereunder shall be included in the regular Annual Book of Estimates.

(Act of August 6, 1890.)

OFFICE OF COMMISSIONERS OF THE DISTRICT OF COLUMBIA,  
Washington, D. C., July 13, 1891.

*Ordered*, That hereafter all vouchers for expenditures of appropriations for charitable and reformatory institutions and purposes which receive aid from the District of Columbia shall be submitted to the superintendent of charities for review and approval, and when so examined and approved be transmitted by that officer to the auditor of the District of Columbia.

By order:

WM. TINDALL, *Secretary*.

#### POOR-FUND ALLOTMENT.

On recommendation of the superintendent of charities, the fund for the relief of the poor for the current fiscal year was appropriated for distribution by the following order:

OFFICE OF THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA,  
Washington, April 6, 1895.

*Ordered*, That the appropriation for the relief of the poor for the fiscal year to end June 30, 1896, is hereby apportioned as follows:

|  |          |
|--|----------|
| For the physicians to the poor.....  | \$7, 200 |
| For medicine and printing prescriptions for the physicians to the poor.....                        | 3, 700   |
| For the Homeopathic Dispensary, including medicine for the homeopathic physicians to the poor..... | 500      |
| For the Eastern Dispensary.....  | 500      |
| For the Woman's Dispensary.....  | 500      |
| For the Hope and Help Mission.....   | 500      |
| For the Children's Aid Society.....  | 500      |
| For the Aged Women's Home.....   | 300      |
| For coffins for the indigent dead.....   | 300      |
| Total .....  | 14, 000  |

By order:

WM. TINDALL, *Secretary*.

The direct appropriations for the fiscal year ending June 30, 1896, being shown in the first column of the table of estimates hereinbefore published, this allotment completes the record of present allowances to charitable and reformatory uses from appropriations for the District. If pending applications for transfer to the regular appropriation list be granted, the fund for the relief of the poor will be left to a small extent free for employment more strictly in accord with its declared object.

It is believed that the above statistics, correspondence, and records will furnish to Congressional committees acting upon appropriations an easily accessible and satisfactory statement of charitable and correctional needs and claims, while presenting a condensed recital of legislative history of value and importance to public and institutional officials, as well as to the appropriating authorities.

#### JUVENILE DEPENDENTS.

On this subject there have been forwarded to a Congressional committee 22 letters with 61 inclosures in response to requests for information. In the letters there were discussed a number of recommendations for new legislation, emanating from several sources, and the inclosures consisted of special reports of institutions and societies in response to circulars from this office. The documents constituting this correspondence can not with propriety be published in advance of action or authorization by the committee to which they were addressed. Mention is, however, made of them as constituting a considerable feature of the year's work and because their existence as confidential, privileged matter explains the omission from this report and compilation of discussion and recommendations that otherwise would, probably, have been found therein.

It is, however, proper and necessary to include in my annual report to you, and through you to Congress, a competent account of the work of charitable and correctional organizations devoted to the care of dependent or delinquent minors. For that purpose, I make use of a statement submitted by me, on August 30, to the convention of the Waif Saving Association of America, then in session at Detroit. The text of that paper and of the letter transmitting it is as follows:

WASHINGTON, D. C., August 26, 1895.

Gen. RUSSELL A. ALGER,

*President of the Waif Saving Association of America, Detroit, Mich.*

DEAR SIR: Your communication of August 2, 1895, suggesting the appointment of five delegates to represent Washington at the convention of your association was referred to me by the Commissioners of the District of Columbia, Hon. John W. Ross, Hon. George Truesdell, and Maj. Charles F. Powell, U. S. A.

I regret to state that, owing to the absence at this season of citizens prominent in works of benevolence, it has not been found practicable to secure the attendance of unofficial delegates who would adequately represent the extensive child-saving work of the Federal Capital City. It was hoped that the superintendent of charities and other officials connected with such duty might be able to attend. This, however, is unfortunately prevented by urgent occupation with annual reports and estimates, the time for preparation of which has been shortened by absence from Washington at the National Conference of Charities and Correction and other similar gatherings, for which engagements were made in advance of information concerning your convention.

Under these circumstances and finding so late that it is impossible to spare time to go to Detroit, as, notwithstanding difficulties, I had until to-day hoped to do, I send to you, with the concurrence of the Commissioners of the District and by their desire, a succinct statement of current operations of child-saving institutions and agencies in the District of Columbia. This, I beg, may be accepted in lieu of personal representation, under the circumstances, as the best that can now be done, with the assurance that, with timely notice of the holding of next year's convention, the

District of Columbia will not lose the opportunity of enjoying the advantages of participation in your proceedings by a duly accredited delegation.

Together with the statement hereinbefore referred to, I inclose copy of the latest printed report on charitable and reformatory institutions of the District of Columbia, which may be useful for reference on points not fully explained by the brief statement hastily prepared for your convention.

With great respect, your obedient servant,  
JOHN TRACEY,  
*Superintendent of Charities, District of Columbia.*

#### JUVENILE DEPENDENTS, DISTRICT OF COLUMBIA.

Congressional appropriations for the care of juvenile dependents of the District of Columbia now amount to \$126,367 per year. Like other expenditures of the government of the District this sum is paid through the United States Treasury—one-half out of the proceeds of general taxation and one-half out of the District revenues. The average number of dependents supported or aided by this money is 1,320. Eighteen institutions and agencies participate in the distribution of the fund and in the care of these dependents. Fourteen of these child-caring establishments are located within the District and occupy public property worth \$458,000, and private property valued at \$899,000, all exempt from taxation.

#### THE REFORMATORIES.

Four of these institutions are reformatories, namely: The Reform School of the District of Columbia (for boys), the Reform School for Girls, the House of the Good Shepherd, and the Home of the Association for Works of Mercy. The reform schools are purely official institutions. The House of the Good Shepherd is managed by a Roman Catholic sisterhood, and the House of Mercy by a sisterhood of the Protestant Episcopal Church. The Reform School (for boys), with 210 inmates, receives \$39,752, against which it turns into the Treasury about \$3,500 from sales of products; the Reform School for Girls, with 35 inmates, receives \$9,425; the House of the Good Shepherd, with 89 inmates, \$2,700, and the House of Mercy, with 20 inmates, \$1,800. The unofficial reformatories depend largely on private contributions for maintenance. The most valuable of the reformatory properties is the large tract occupied by the Boys' Reform School, estimated at \$300,000; and real estate of the Reform School for Girls being rated at \$35,000, that of the House of the Good Shepherd at \$74,000, of which \$15,000 came from public funds, and that of the House of Mercy at \$44,000, of which \$14,000 was supplied from public funds. The per capita public cost for annual maintenance of these reformatories is, respectively: Boys' Reform School, \$189.62; Reform School for Girls, \$270; House of the Good Shepherd, \$30.35, and the House of Mercy, \$90. The calculations for the different schools include expenditures for repairs and improvements during the year as well as for current outlays strictly for the support and instruction of inmates.

To the official reformatories juvenile delinquents are committed by sentence of courts, and also for incorrigibility, by the presidents of the institutions. The laws provide for commitment by courts to the unofficial reformatories, with the consent of the institutions, and there is a special statute for commitment to the House of Mercy by the orphans' court. In practice, however, admission to the unofficial reformatories is generally by consent of parents or guardians, or through the instrumentality of child-caring agencies. The House of the Good Shepherd has a "preservation class" as well as a "penitent class." The Reform School for Girls is devoted, at present, entirely to colored inmates; the Boys' Reform School receives both white and colored, and the other two institutions white girls only.

#### FOUNDLING ASYLUMS.

There are two foundling asylums, both specially incorporated by act of Congress, and having powers of indenture and supervision during minority. They are the St. Ann's Infant Asylum, chartered in 1863, and the Washington Hospital for Foundlings, an unofficial corporation, founded in 1885, through the munificence of Mr. Joshua Pierce, a philanthropic resident of Washington. St. Ann's, with an average of 130 inmates, receives public aid to the extent of \$5,400 a year, a per capita public cost of \$41.53, and occupies private property estimated at \$150,000. The Washington Hospital for Foundlings, on private property valued at \$100,000, has an average of 35 inmates, well cared for by trained nurses, graduates of Bellevue or other leading nursing schools, and receives Government aid at a per capita rate of \$171.45 to the extent of \$6,000 per year. It accepts only white children, while St. Ann's receives colored children as well, and, since the discontinuance of the Colored Foundling Asylum, many colored infant dependents are cared for by the board of children's guardians.

## THE ORPHANAGES.

The asylums for destitute children, beyond the age of infancy, receiving public funds, are four in number. The Church Orphanage of St. John's Parish receives \$1,800 toward the support of 90 children, on property worth \$60,000, of which \$10,000 was appropriated by Congress, its annual per capita public cost being \$20. The German Orphan Asylum has \$1,800 of public funds for an average of 40 inmates supported on property worth \$64,000 of which the taxpayers contributed \$24,000, its annual per capita public cost being \$45. St. Joseph's Asylum has \$1,800 to assist in maintaining 115 children, on private property worth \$120,000. Its annual per capita public cost is \$15.60. The National Colored Home of the Association for the Relief of Destitute Colored Women and Children has an appropriation of \$9,900 for the support of 100 colored children, with a property estimated at \$70,000, two-thirds of public and one-third of private origin. This institution has among its inmates 17 wards of the board of children's guardians, who are paid for, at the rate of \$8 per month by public funds, through that board, in addition to the direct appropriation for the home. Exclusive of such payments its annual per capita public cost is \$99, the revenue from private contributions being light. St. John's Orphanage receives no payments from friends or relatives for the support of inmates, while the other institutions of this group derive small revenues from boarding half-orphans.

## INDUSTRIAL SCHOOLS.

There are two industrial schools in receipt of public funds, at which, as well as the reformatories, instruction is given in industries and useful arts. They are the Industrial Home School, which receives both boys and girls, and teaches pupils chiefly to be florists, woodworkers, seamstresses, and cooks, admitting only needy children resident in the District of Columbia, and St. Rose's Industrial School, which teaches dressmaking and fine sewing to girls graduated from St. Vincent's Female Orphan Asylum, a large institution that has no Government support. These industrial schools each occupy property to a value of about \$50,000, the former on public and the latter on private ground. The Home School, except in manner of incorporation, is virtually a public institution, having very little other income than its annual appropriation of \$9,900, its payments through the board of children's guardians for the support of 12 wards, and receipts from sale of the products of its farm and workhouse. Its per capita public cost, on a basis of the annual appropriation, is \$110, the average number of inmates being 90. The St. Rose's Industrial School receives \$4,500, an annual per capita of \$81.90 for an average of 55 inmates.

## CHILDREN'S HOSPITAL.

The Children's Hospital, an excellent institution, established twenty-five years ago, on private property worth \$250,000, receives \$10,000 a year toward the medical and surgical care and general support of 65 children, whom it admits on public official order, or without it, when needing professional care. It has a special ward for sick infants, and its medical staff is assisted by a very competent corps of trained nurses, who are associated in training schools with those of other hospitals of the city.

## NEWSBOYS' HOME.

The Newsboys and Children's Aid Society is engaged in work more directly within the declared province of your convention than is any other society of Washington. It receives from public funds a small allotment of \$500 per year. A legacy of \$30,000 has enabled the society to purchase commodious premises into which it is moving, and there is no doubt that its usefulness will be greatly increased. Its home is utilized as a temporary lodging house for children in care of the board of children's guardians while awaiting commitment by the courts and transfer to institutions or to private homes.

## BOARD OF CHILDREN'S GUARDIANS.

Of the organization, authority, and general plan of operation of the board of children's guardians under the law of 1892 a full account will be found in the inclosed report of the District charities for 1895, pages 50 to 74. The annual report for the fiscal year recently closed has not yet been completed. The total number of wards of the board is now 270, distributed as follows: In private homes at public cost for inspection only, on trial, 47; indentured, 85; apprenticed, 8; boarded at public cost in private homes, 58; boarded at public cost in institutions, 46; feeble-minded at Elwyn, Pa., and at Falls Church, Va., 23. The appropriation for this agency is \$20,000, out of which there is paid the support of feeble-minded dependents at institutions outside of the District, as well as that of a few wards at the Tuskegee Nor-

mal Institute in Alabama. St. Mary's Industrial School of Baltimore, and the Industrial School for Colored Children at Manassas, Va. The number of cases examined by this board during the last fiscal year is 307, the number of children committed as wards by the courts, 110. The members of the board of children's guardians are appointed by the judges of the criminal court and the police justices of the city, and it is a strictly official agency. Its guardianship continues during the minority of its wards, who, under the law, must be inspected by its agent at least once a year. Such systematic inspection of dependents and continued responsibility for them is the most strongly distinctive feature of this agency. Of its wards 44 are white and 156 are colored. Exclusive of the feeble-minded, many of whom were in public charge previous to the creation of the board, its wards who may be styled waif wards by way of distinction are 95 white and 160 colored.

#### HUMANE SOCIETY.

Of the Humane Society's child-caring agency, in operation since 1885, a description will also be found in inclosed pamphlet, pages 36 to 41. During the last fiscal year the agent of this society has investigated 312 cases and placed in various institutions 158 children, of whom 127 are white and 31 colored.

There is no public appropriation for this work, except that for the salary of the agent as a policeman of the District, \$1,080 per year, and he has the use of the transportation facilities of the police department. Other expense is not necessary in this case, as persons arrested are cared for by the criminal authorities, and in other instances transfers are made by the agent direct to institutions from the previous abiding places of the children.

In the above review of minor dependents of the District mention has been made of religious denominations only in cases in which institutions are managed by sisterhoods and no salaries are paid. Moral instruction of some kind is of course given in all of them, and in the official institutions, as the Reform School of the District, opportunity is afforded for worship of the different churches.

#### NOTABLE CHARITIES.

There are several important child-caring agencies in the District which do not now receive any public aid, but gratuitously support children who would otherwise be public charges. Among such are the Washington City Orphan Asylum and St. Vincent's Asylum, each with an average of 120 inmates, and the Home for Friendless Colored Girls, with 25 inmates. There are also a number of minors among the deaf and dumb, the insane, and the inmates of hospitals, the almshouse, and workhouse, as well as in institutions for temporary refuge, such as the Young Women's Christian Home and the Hope and Help Mission. Altogether the dependent minors of the District supported through public and private funds devoted to charities and correction number about 2,000 souls.

In a population of 270,000, of which one-third are of the race to which emancipation came within a generation, this proportion is not unduly large; while it is believed that, notwithstanding some improvements to be made and defects to be remedied, fairly adequate care is taken of juvenile dependents and at very reasonable cost.

It is to be said of the child charities of Washington that, in their great variety, they afford relief to almost every class of cases, and that the different systems of bringing out of destitute and often degraded childhood good citizenship in self-supporting and law-abiding maturity are having fair trial. It is right that this should be the case at the national capital, where, during so many years, private benevolence has supplemented public administration and has contributed so largely in money, in experience, and in philanthropic devotion toward the succor of the afflicted, the reformation of the wayward, and the teaching of the ignorant poor.

My principal reason for taking time during a very busy year to give attention to the preparation and presentation of documents to public conventions and conferences at distant points was the prevalence throughout the country of an entire misapprehension as to the extent and merits of the charitable and correctional system of our capital city and District, which had been erroneously regarded as relatively crude and defective, while in fact in the number, efficiency, and variety of benevolent enterprises, official and unofficial, Washington's charities compare favorably with those of other communities, even much larger ones, and do credit both to the munificent charity of private citizens and to wise legislation for public support or aid by Congress.

## CORPORAL PUNISHMENT OF CHILDREN.

A disciplinary incident of the year's administration not within the lines of the Congressional correspondence above mentioned relates to the bodily punishment of juvenile dependents by institutional officials. A charge was made that a child named George Turner, 7 years old, had received serious injury from a beating inflicted by the superintendent of the German Orphan Asylum, who was said to have struck the boy with a parlor rifle. The managers of the institution promptly called a meeting for a public inquiry, while I at once made an investigation independently, with the result of showing that in this instance the accusation against the asylum authorities was entirely false. The reports made by me to Commissioner Ross were:

In relation to the allegations against the German Orphan Asylum, on complaint of Mrs. Alice L. Turner, published in the Washington Post of to-day, I respectfully report that I have entered upon an investigation of the matter and taken the statement of the complainant, which does not agree in some important respects with the newspaper narrative.

I have also inquired of Officer Wilson, agent of the Humane Society, as to his action in the affair, and, with the permission of the Commissioners and the superintendent of police, he will prepare a statement for your information.

The authorities of the asylum deny absolutely that the boy was ever subjected to corporal punishment, as charged, and a meeting of the board of directors has been called for Monday evening next, to which all parties concerned have been invited and which I shall attend, to make a thorough inquiry. Meanwhile I will investigate independently at the asylum premises.

As soon as a reliable conclusion is reached I will make final report to you.

SEPTEMBER 20, 1895.

---

Investigation this afternoon at the German Orphan Asylum of the complaint by Mrs. Turner of alleged ill treatment of her son, George Turner, by an officer of the institution elicited evidence showing:

First. No corporal punishment was inflicted upon the boy by Superintendent Arnold, or any other employee of the establishment, at or about the time specified by the complainant, or, so far as can be ascertained, at any time.

Second. Four weeks ago, not long before the lad was taken home, and about the time referred to in the complaint, George Turner, while on the playground in the grove, was struck on the back with a stout stick, part of a limb of a tree, held by his half-sister, Minnie Folk, and a stone, heated by being laid in the sun, was put on Georgie's face and leg by Minnie.

Third. Nothing was known of these happenings at the time by the asylum authorities beyond notice that there was rough play on the hill under the trees, in sight of and near the main building of the institution, when Mammie Lavender, aged 14 years, the oldest girl pupil, was put in charge for a few minutes, until the children left the pleasure ground.

The examination of the children, each questioned separately and without knowledge of the others, was as follows:

Minnie Folk, aged 11 years, daughter of Mrs. Turner by her first marriage, said that she had heard, while at home, that the superintendent had beaten her little brother, but that she knew nothing of it and had not heard about it at the asylum. She said she had been well treated at the institution, but would rather be home now "by little Georgie." Asked if Georgie had been hurt at any time at the asylum, she said at first that a girl had put a hot stone on him and that some one had hit him. Finally she said that she herself had used the hot stone for fun and had hit him with her hand while he was lying on a bench, where George Rothague held him. Then she admitted that she had picked up a stick from under the bench and struck him twice on the back.

George Rothague, aged 12 years, said that he had seen Minnie Folk strike her brother with a stick and put on him the stone that had been lying in the sun while the small children were playing in the hill grove.

Mammie Lavender, aged 14 years, said that she saw Minnie Folk strike Georgie with the stick once when she was going to the hill, having been told to look after the little children.

Harry Kennelly, aged 6 years, said that while he and the others were playing he saw Minnie Folk strike her little brother with a stick four or five times as he was lying on the bench.

John Folk, aged 13 years, the oldest of Mrs. Turner's children at the institution; said that he did not see anything of the trouble, but that before they went home his little brother Georgie told him that their sister Minnie had struck him and hurt him for being naughty while they were playing. The stone trick does not seem to have done any injury.

Superintendent Ermold denied positively that he had ever physically punished Georgie, who had always behaved himself well, to his knowledge; was a favorite from his good behavior, and needed no punishment.

Neither the order nor the method of my inquiry nor the names of all the witnesses were suggested by the asylum authorities. In carrying on the investigation I followed ideas derived from various sources, including the complaint of Mrs. Turner, whose statement—not affidavit, as incorrectly stated—did not positively accuse Mr. Ermold personally, even by hearsay.

It seems probable that the boy, Georgie Turner, who is only seven years of age, sought to avoid blaming his sister when his mother noticed his bruises, and that is how the story started about the alleged brutal punishment.

Should the examination on Monday develop evidence to modify conclusions above stated, I will report accordingly.

SEPTEMBER 21, 1895.

In the matter of the complaint of Mrs. Turner against the German Orphan Asylum, I respectfully make further report, as follows:

Yesterday afternoon I visited Mrs. Turner and her little son Georgie at her residence in Georgetown. The boy acknowledged that he had been beaten by his sister, as described in my report of Saturday, and that he had told his elder brother that his sister had hurt him. He also said that he had not told his mother about his sister striking him, because he was afraid that his sister would be punished for it. He was very reluctant to admit that he had told a falsehood about Superintendent Ermold, but he was unable to consistently describe the time, place, or cause of the alleged whipping.

I left the house understanding that the mother and son would appear at the inquiry in the evening. This they failed to do.

SEPTEMBER 24, 1895.

The occasion seemed a proper one to secure a record and establish, so far as practicable, a uniform rule regarding institutional punishment, and accordingly a circular letter was sent to child-caring institutions, and replies were received as follows:

OFFICE OF THE SUPERINTENDENT OF CHARITIES

OF THE DISTRICT OF COLUMBIA,

*Washington, D. C., September 25, 1895.*

Please send at your earliest convenience a copy of the rule or rules of your institution or association, if any, permitting, regulating, or forbidding corporal punishment of minors, and also state what has been the practice as to physical punishment by beating or striking, with or without a weapon, during the fiscal year ending June 30, 1895, and since that date, if any change has since been made.

This request is not made in consequence of any complaint, but with reference to occasion for the compilation of statistics on the subject, in doing which it is desired to have the advantage of the statement of child-caring organizations in the District, as to their present respective disciplinary methods.

While some establishments have specific rules regarding bodily punishment, permissive or prohibitory, others have not such regulations as matter of record, and it is believed that none will object to reporting the facts as to their regulations and practices.

Copies of this request have been sent to all other child-caring associations and reformatories of the District that receive public funds.

Yours, respectfully,

JOHN TRACEY,  
*Superintendent of Charities, District of Columbia.*

ST. JOSEPH'S ASYLUM,  
Washington, D. C., September 26, 1895.

In compliance with the request contained in your communication of yesterday, I would state that our rule on discipline strictly forbids corporal punishment. The prefect of discipline shall neither inflict nor shall she allow to be inflicted by any teachers, corporal punishment such as striking.

The punishment commonly permitted in our houses are: First. Bad notes; second, to be detained to study unlearned lessons, or to perform neglected duty.

It is positively forbidden to strike children, to send them out of the class, to deprive them of food, or to impose upon them any punishment that may be degrading.

We endeavor by remaining with our children at all times, and exercising constant vigilance, to make the prevention of disorder rather than their punishment our chief care, and we find those means prove most satisfactory.

I am, dear sir, yours, very respectfully,

SISTER EUPHRASIA.

NATIONAL COLORED HOME,  
Washington, D. C., September 27, 1895.

Replying to your communication of to-day, I would say that the association in charge of the home has no rule relating to corporal punishment other than that given in the annual report, a copy of which I mail you.

While I have observed this rule in the spirit, candor compels me to acknowledge that I have, on several occasions, broken it in the letter. In such instances (rare) I have used a broad, light ferule on the palm of the hand.

Very respectfully,

C. L. FRANKLIN, *Matron.*

The rule referred to says: "Whilst obedience is required of the children to the duly appointed officers, no corporal punishment shall be allowed."

THE HOUSE OF MERCY,  
Washington, D. C., September 30, 1895.

In reply to your communication of September 25 I beg to inform you that corporal punishment is not practiced in this institution. There is no written rule on the subject, but I have been careful that those who assist me here should understand that under no circumstances would I inflict corporal punishment, nor would I permit any of my assistants to punish in that way.

Sincerely, yours,

SISTER DOROTHEA,  
*Sister in Charge.*

NEWSBOYS AND CHILDREN'S AID SOCIETY,  
Washington, D. C., September 26, 1895.

In answer to your notice requesting a copy of our rules (if we have any) relating to corporal punishment, I beg to say, no rules were given to me relating to corporal punishment. When I was appointed to the position of superintendent of the Home of the Newsboys and Childrens Aid Society, I believe the ladies interested in the work of their institution took much pains to assure themselves that they were putting a sensible, kindly woman at the head of things, knowing that if they did not do so their work would not be a success, and then wisely they allowed her to make her own rules, though, no doubt, watching carefully to see if she were the woman they hoped her to be.

I am sure if it be possible to train a girl or boy without resorting to the use of the rod, it should be done, and I can quite understand how a parent who has brought a child up from babyhood shudders with horror at the thought of anyone touching the little boy with a cane or switch.

Indeed, it seems strange to me that a parent would ever need, in these days of enlightenment, to raise his hand to a child when it seems so simple to train the little feet into the right path.

But what a want of judgment of a parent, looking into the management of a home for poor children, says to the superintendent: "I have never needed to whip my children, and why should you do so?"

If we received our little ones as innocent and pure as the parent receives his, I believe there would not be a cane found in any institution; but, alas, they come to us with their minds poisoned; their hearts think bad thoughts, and their tongues say bad words; the world has been against them, and they are against the world.

After a time when they perhaps learn to really care for those over them, love makes everything easy, and it is enough to show one is disappointed in some failure to do right to make the child regret and express sorrow for the fault.

But at the first, when the feeling often is—especially among older boys—"if I can not get my own way, I will get as much of it as I can," why, sometimes, it is really necessary to give a caning. Besides, there are some faults that children brought up in the lowest surroundings may have that well-cared-for children know nothing about; and these faults must be stamped out or the child's body and soul will be lost. Outsiders, who are so ready to judge and condemn the head of an institution, really (unless they have occupied such a position themselves) never dream of all the cares and anxieties one must have when one has so many different characters and peculiar faults to deal with.

For my own sake I use the rod as little as possible, because there is always the danger that one may grow used to it, too much or too often, and it is only as a last resort I would wish to use it.

I think my report would be incomplete if I did not say something about the habit growing quite common of some children in an institution accusing an assistant or superintendent, to the public, of abuse, and the public nearly always seems to think, "Well, there must be some truth in the child's story." Now, the fact is, a child who has been caned is usually one of the very refractory ones; a boy, say, who may be the ringleader in naughtiness; and I have noticed he will almost invariably try to make out he has been hurt too much, and look carefully if he can not find some little bruise on the skin to prove to the other boys that he received more than he should; and perhaps some little blister that you and he both knew was on his hand previous to the stroke you have given him, he will whine over and point to, to prove you hit him too hard.

Some time ago one boy of about 16 because I reproved him for neglect of his work said rudely, "I shall tell 'so and so' you beat me."

I expressed surprise and said, "Why, I have never even shaken hands with you, much less touched you to cane you." (Had he been with me some time, he seemed so much in earnest, I should have thought perhaps I had caned him and forgotten about it, but he had only been a few weeks in the home.) I discussed the thing with him, as to how he could wish to say a thing that to everyone was evidently so untrue, and he said, "Well, I don't care; I shall say you beat me, anyway."

It may be that is the spirit which prompts many a boy to speak so untruly of those over him.

Also in some cases a boy may show bruises that he assures those interested he received from the superintendent's cane, when perhaps, if the case could be properly investigated, the said bruises were received in some tussle with his own playmates, for boys often give each other hard punches in their rough play which will sometimes make a black, ugly bruise, or perhaps they fall down when running and cut themselves, and a vindictive boy (and they are to be found in every home) will turn his bruises to good account if it so suits him. There is one thing I am sure about, and that is, that a big girl should never be whipped. She is naturally so much more modest than a boy that she feels the indignity far more than people sometimes imagine, and it only hardens her; and indeed, a big boy, unless he is decidedly stubborn and determined to persist in some fault, only feels degraded, and one wishes to teach them self-respect, not make them feel insignificant.

I have a boy at present, over 13 years of age, who has a peculiar temperament, and sometimes he gets into such wild spirits he can not control himself. When I find that putting him for a short time by himself will not compose him I give him a slap with the cane and he at once subsides; presently he will come out of his retirement as sweet and pleasant as possible.

So that really it is quite impossible to train children as if they were machines. Each child needs studying and special management, and those who are so ready to believe that every trainer of youth is a modern Bluebeard never dream of the patience, kindness, forbearance, and prayer needed to carry the superintendent of a home through even one day.

Yours, respectfully,

B. MORDAUNT WILSON,  
*Superintendent of Newsboys and Children's Aid Society.*

---

CHILDREN'S HOSPITAL,  
*Washington, D. C., September 27, 1895.*

Your letter of the 25th instant, requesting "a copy of the rules of your institution, if any, permitting, regulating, or forbidding corporal punishment," is at hand. As no such punishment was ever contemplated by the management of the Children's Hospital there are therefore no rules that apply to that subject.

134 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

In this connection I deem it proper to say that since the establishment of the institution, some twenty-five years ago, there is no record of an attempt on the part of any employee to resort to such punishment.

Very respectfully,

M. W. GALT, *President.*

---

ST. JOHN'S ORPHANAGE, *October 1, 1895.*

I am sorry to be so tardy in my reply to your question of September 25, but I have been out of town.

We have no written rules to direct the discipline of our orphanage. Our school-teachers and others in charge of departments are allowed to a certain extent control of their respective charges, but all matters of importance are referred to the sister in charge.

While in theory we admit the occasional usefulness of corporal punishment the practice is pretty much held in abeyance here. Indeed, upon talking the matter over since the receipt of your letter there seems to have been but a few cases where there has been occasion for special punishment, and we seem to have been favored on the whole with very good children.

We do not by any means profess to be standard authority on this question and shall be glad to answer any further inquiry you may like to make, and should also be highly pleased if you will come and see for yourself the practical working of our system.

Very truly, yours,

SISTER SARAH, *Sister in Charge.*

---

ST. ROSE'S INDUSTRIAL SCHOOL,  
*Washington, D. C., September 28, 1895.*

In reply to your circular of September 25 I would say we have no rules in regard to punishment. Our girls, being mostly of advanced years, are taught to behave from sense of duty and honor, which we find always works well.

Respectfully,

SISTER CLARA.

---

HOUSE OF THE GOOD SHEPHERD,  
*West Washington, September 30, 1895.*

The circular dated September 6 has been received. We are happy to give you the desired information regarding our method of punishment of the inmates of this institution.

We exercise great vigilance over their conduct and very rarely are obliged to resort to any severe punishment.

With the small children we sometimes use a ruler to slap them on the hands, but the principal punishment is to deprive them of a part of one meal for one day.

Should any of them become incorrigible we separate them from the others and lock them in a room by themselves until they promise to be docile and obedient.

We train them to habits of industry and have found this more effectual in the work of their reformation than any punishment.

Hoping this will prove satisfactory, we remain,

Yours, respectfully,

SISTERS OF THE GOOD SHEPHERD,  
MOTHER MARY, *Superioress.*

---

INDUSTRIAL HOME SCHOOL, *October 8, 1895.*

In reply to your inquiry of the 25th instant in regard to corporal punishment in the Industrial Home School I herewith transmit a report of the secretary of the institution.

There are, she states, no regulations on the subject of punishment and that which is inflicted is in accord with the maternal tenderness of our excellent superintendent.

Very respectfully,

JOHN D. MCPHERSON, *Vice-President.*

INDUSTRIAL HOME SCHOOL,  
*Washington, D. C., October 5, 1895.*

Mr. JOHN D. MCPHERSON.

DEAR SIR: I have inquired at the home and make the following report:  
There are no written or printed rules regarding the discipline of the children at the Industrial Home School, but any punishment necessary has been left to the discretion of the superintendent.

The usual punishments for minor offenses is to deprive them of their play hours and sending them to bed, but the children are never deprived of their meals as a punishment.

As a last resort, where the above punishment fails, corporal punishment is resorted to by striking the hand with a ruler 2 inches wide and a quarter of an inch thick. No change in rules has been made since the end of the fiscal year, June 30, 1895. These are the only punishments in use at the home. Great pains are taken to keep the children occupied, either at work or study, and no child is ever punished without being warned beforehand.

Yours, respectfully,

H. W. BLACKFORD, *Secretary.*

---

BOARD OF CHILDREN'S GUARDIANS,  
Washington, D. C., October 7, 1895.

In reply to your letter of September 25, 1895, relative to permission or prohibition of the infliction of corporal punishment upon wards of the board of children's guardians, I am instructed to say that in all cases where children are placed in institutions it is expected that they will be dealt with by the officers thereof in all respects the same as other children not wards of the board.

There have been no rules established by the board for the government in this matter of persons not officers or managers of institutions to whose care wards of the board are intrusted. Inquiry is made as to the practices and intent in this regard of applicants for children, and preference is given those (other things being equal) who believe in their ability to control a child without resort to bodily punishment.

In the supervision of the children in foster homes the agent of the board inquires what punishment, if any, has been resorted to, and with what effect. Foster parents are advised that the highest success with children will usually be attained with a minimum of punishment and that whipping is only to be resorted to in cases of flagrant insubordination. Striking about the face or head with the hands or with any instrument is forbidden whenever any such method is reported. If a foster parent is suspected of having punished inconsiderately or in anger a special inquiry is made and the foster parent is cautioned or the child removed, as seems to be necessary. No child is left with any person who disregards the advice and directions of the agent in this regard.

Foster parents who can be fully trusted to be reasonable and who are in charge of children of heavy, sluggish temperament and mean disposition are advised to administer not to exceed six strokes across the shoulders with a switch.

Yours, respectfully,

HERBERT W. LEWIS,  
*Agent Board of Children's Guardians.*

---

GERMAN ORPHAN ASYLUM,  
Washington, D. C., October 10, 1895.

At the meeting of our board held last evening a resolution was adopted prohibiting corporal punishment at our institution and our "house regulations" were accordingly amended. This action was taken to meet the views of the honorable Commissioners and yourself and not by reason of any abuse of the clause permitting the same.

Very truly, yours,

EDW. W. KOCK, *Secretary.*

My own conviction, based upon careful observation, is that whipping of minor dependents should very rarely be resorted to; that it naturally tends to produce evils greater than it can cure, and that far better results can be secured by other punishments into which the element of temper or momentary irritation is less likely to enter, and which would be more effective in correcting the child, without deterioration of the dignity and disciplinary control of the institutional guardian. Neither the reports above printed, nor facts revealed by constant inspection and inquiry, show any general or serious abuse in this regard to be prevalent in the District. I submit the question whether general regulations on the subject should be issued or prohibition of bodily punishment need be enforced by law as a condition of appropriations. Unless otherwise directed, I will continue to exercise the authority of this office to discourage corporal punishment of children by striking, with or without any weapon.

It seems well, at this point, to observe that the greater experience I have in the multiform and interesting duties of the Superintendent of Charities, the clearer is my conviction that the mission of this office is to be carried out rather by steady devotion to administrative duties than by sweeping revolutionary legislation. Indeed, much legislation suggested from time to time is found to be already in the statutes, and, with a few exceptions, all needed authority or restriction of practical value is to be found in existing laws and legalized regulations of various corporations. The chief difficulty prior to 1890 was in the misunderstandings and rivalries which troubled the Commissioners and vexed Congressional committees in the absence of the general direction and unifying administration of competent supervisory authority devoted exclusively to that task. Hence, I have sought to cause existing laws to effect all that they were intended to secure, and only ask for new legislation when there is obvious lack of legal power to accomplish the beneficent results desired by philanthropists and lawmakers.

## FEEBLE-MINDED CHILDREN.

The correspondence below will be further explained by statistics on the subject submitted with the report of the board of children's guardians:

OFFICE OF THE SUPERINTENDENT OF CHARITIES  
OF THE DISTRICT OF COLUMBIA,  
*Washington, D. C., August 23, 1895.*

Hon. JOHN W. ROSS,

*President Board of Commissioners District of Columbia.*

DEAR SIR: There are at the Pennsylvania Institute for the Feeble-Minded twenty-two inmates from the District of Columbia of ages varying from 10 to 23, who have been consigned to the care of that establishment at different times from October 27, 1884, to June 11, 1895. With two exceptions these children were placed at Elwyn before July 1, 1893, on which date they were transferred, by the appropriation act for the fiscal year 1884, to the account of the board of children's guardians.

The standard charge for such children is \$250 per year, graded down according to the capacity of the inmate for doing some work in part return for support. The average cost is now about \$215 per capita. I am officially informed that a bill for the support of the children during six months of the last fiscal year, amounting to \$2,360.79, remains unsettled. I believe that the charge against the District by this institution is higher than should hereafter be paid, and I believe it should be at once reduced, either by regrading the District inmates, or by transferring them, as a body, or in part, to the Maryland Institute near Owings Mills in Baltimore County, or to the establishment at Falls Church, Va., both of which institutions stand ready to take charge of feeble-minded dependents at reduced rates, and at one of which some have already been placed.

There may be serious question as to the responsibility and accountability of the board of children's guardians (whose jurisdiction is over dependent children committed to it "for care before majority") concerning such dependents who are of full age. There are also other matters regarding the feeble-minded dependents calling for investigation and adjustment, in the interests of economy and good administration.

The superintendent of charities has authority and duty in the premises, generally, by the law of August 6, 1890, and specifically by the law of July 6, 1892.

For the purpose of attending to this matter, which has become very urgent, and of avoiding future deficiencies, I respectfully request that authority be given for me to proceed, on District account, to Elwyn, Delaware County, Pa., Owings Mills, Baltimore County, Md., and Falls Church, Va. The expense of such visits and inspections, made in one trip, will be light, and it is my purpose to go to the points specified as soon as arrangements can be made with the managers of the institutions named, with whom I have consulted.

Very respectfully,

JOHN TRACEY,  
*Superintendent of Charities, District of Columbia.*

# REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA. 137

OFFICE OF THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA,  
Washington, D. C., August 27, 1895.

*Ordered:* That the superintendent of charities is hereby authorized to proceed, on account of the District of Columbia, to Elwyn, Delaware County, Pa.; Owings Mills, Baltimore County, Md., and Falls Church, Va., on business relating to the care of feeble-minded children at the District's expense.

By order:

WM. TINDALL, *Secretary.*

Unexpected pressure of office duties delayed the inspections referred to until late in the season, but no time has been really lost thereby in arranging for new location or rates for care of these demented wards.

## ANNUAL TABULATIONS.

The addresses above printed, although substantially correct in important respects, include some statistics, which, while as accurate as could be given at the time of their preparation, were yet subject to correction or receipt of later and revised reports.

Such corrections are made in the estimate tables hereinbefore presented, and in the annexed table of operations and resources of institutions, which have been carefully prepared to answer the requirements of the law of 1890, without the intrusion of superfluous matter, or confusion by complicated and misleading cross classifications.

The table of property devoted to charitable uses and exempt from taxation, very obligingly furnished, at my request, by the assessor of the District, Mr. Matthew Trimble, is a novel and valuable feature in the reports of this superintendency. Based upon the most recent completed and authorized valuations, it yet, necessarily, fails to take into account many valuable improvements recently made on institutional grounds, by clearing and cultivation as well as by construction. With this explanation, and regarding exemption from a general burden as equivalent to a specific donation, I present the following table as an additional evidence of the extent of the contributions of District taxpayers to our charities:

*Property within the District of Columbia, devoted to charitable use and exempt from taxation.*

| Name and address of institution.  | Square, etc.                      | Ground.  | Improvement. | Total.   |
|---|-----------------------------------|----------|--------------|----------|
| Aged Women's Home, 1255 Thirty-second street NW.                                  | 1203, lot 1 .....                 | \$4, 369 | \$2, 000     | \$6, 369 |
| Association for Works of Mercy, 2408 K street NW.                                 | 28, lots 81 and 82 .....          | 14, 873  | 8, 800       | 23, 673  |

\* United States property.

† District of Columbia property.

Reference to the appended tables of operations and resources of institutions will indicate how large are the proportions of the properties thus exempt originally derived from private and from public sources, respectively. Several institutions, formerly public beneficiaries through appropriations in aid of construction or maintenance, are now, and for some time have been, self-sustaining.

Taking into account tax exemptions and past aid, there is no considerable benevolent institution in the District that is not, or has not been, the recipient of substantial public favor in promotion of its good work.

#### ORIGIN AND GROWTH OF INSTITUTIONS.

The dates of establishment of charitable and reformatory institutions by Congressional enactment or by articles of incorporation are shown in the list below. The references are to the formation of the establishments substantially as now constituted. In several instances they were preceded by ancient benevolent enterprises devoted to similar work under other names and through other methods, as in the cases of the Washington Asylum, the outgrowth of the poorhouses of the corporations of Washington and Georgetown, and the Reform School of the District of Columbia, the successor of the House of Correction, which in its turn had replaced the Guardian Society in 1866. Others, as St. Ann's Infant Asylum, were, in fact, in operation for years previous to formal incorporation. The extensive Emergency Hospital was developed from the small Central Dispensary by such natural evolution as is now contemplated in the case of the Eastern Dispensary:

| Name of association.   | When and how organized.     |
|--|-----------------------------|
| Aged Women's Home.....   | Organized Dec., 1868.       |
| Association for Works of Mercy.....  | Incorporated Feb. 6, 1884.  |

Bearing in mind the origin of the majority of these corporations in volunteer, individual, or neighborhood effort, systematized before being formally legalized, the above list will furnish data useful as aid to future action, and in correcting or preventing misapprehensions.

#### MUNICIPAL LODGING HOUSE.

An additional year's experience has emphasized the need for the construction of a proper Municipal Lodging House. I have personally examined such establishments so far as opportunity would allow, and Superintendent Dunn has made careful inspection of the establishments and systems reputed to be the most successful in caring for wayfarers and mitigating the tramp nuisance.

The following extracts from letters and reports, in connection with the report of the Municipal Lodging House for the fiscal year, hereinafter printed, will, it is believed, furnish sufficient explanation of the designed improvement in official charitable administration, in the line of prevention of evil, which, when legitimately practicable, is a far better course than to rely upon the correction of evils and evil doers after harm has been done.

The following is from a letter written by me to the president of the Board of District Commissioners from Astoria, N. Y., on April 12, 1895:

I have to-day carefully looked over the buildings and workings of the Wayfarers' Lodge and Wood Yard of the Charity Organization Society, 516 West Twenty-eighth street, New York, with the purpose of getting information useful in the erection and management of a new municipal lodging house in Washington. We certainly should have a new establishment by authorization of Congress at the coming session, in place of the present crowded and unsuitable premises, and to-day's observation has confirmed my impression that the New York lodge, completed in November, 1893, furnishes the best model. It is certainly far superior to the Baltimore Wayfarers' Inn and any other I have seen.

The buildings and grounds in Twenty-eighth street, exclusive of an additional leased lot, cost about \$60,000. I can see some points in which economy might well be effected, in addition to reduction of cost for size. But, bearing in mind what you said recently about the use of public land now at your disposal, the erection of a proper municipal lodging house would require from \$20,000 to \$25,000 for building and furnishing, allowing for the use of such available furniture as we may now have. I think we should ask for \$25,000 in the estimates to cover all.

The plumbing and steam fitting in the Twenty-eighth street structure is of the best modern sort, everywhere open to observation without exposing anything unsightly, and there is sufficient room for sleeping and convenient working. Just now there is more room than needed, as the demand for accommodations is less than half what it was at the same season a year ago. This, by the way, is one of several indications of better times that encourage me to believe that no special-emergency relief movement will be required in Washington next winter. A municipal lodging house will, however, always be needed. I am clear in the conviction that in having a strictly official institution to relieve the station houses and make wanderers work for food and shelter, as a public police measure, Washington has adopted the right plan. I say this without disputing the merits of volunteer effort of the charitable in the same direction.

In one respect worth noticing New York experience confirms our own as to wood-yard operations. There is no profit made on the wood, hauling and handling using up the margin between the rough wood and the sawed and split. Here they have tried hard to make it pay, but find it impossible. Hence it seems that the present at first sight unsatisfactory arrangement at the Municipal Lodging House in Washington is as good as can be made for the present.

To-morrow I intend going through establishments for unskilled female workers, and also relief laundries, bearing in mind a talk with you on that subject. I am not yet quite satisfied about the potato-patch industrial-farm-relief business, on Mayor Pingree's Detroit plan, but I am to have the full facts about its workings by Thursday. The principal experiment is near where I am, and there is a good deal of improvement, I think, to be made on the management of it, if the example be followed in the District of Columbia.

I am quite sure that, unless you need me for something I do not know of, I am doing right in utilizing my time of slow convalescence in looking into these matters, when it is the best season both for observation of work and hearing discussions of experts about it. There is scarcely any charitable or correctional project of the day not under practical trial hereabouts, and here I can learn without extra expense what it would cost to go to study elsewhere.

In August the superintendent of the Municipal Lodging House made application for authority to inspect similar establishments in Eastern cities, with a view to obtaining information as to improved construction and management. Believing that such visits would be of benefit in planning a new house, as well as in conducting the present one, I forwarded the request with this letter of approval:

The within application is respectfully forwarded approved.

The Municipal Lodging House of Washington has proved a most gratifying success after three years of well-conducted operation. It has certainly saved to the District many times its annual appropriation of \$4,000, and has been a very important factor in restraining vagrancy and preventing disorder. The premises now occupied are entirely inadequate and unsuitable for the work to be done. Lack of room for handling and storing wood prevents the profitable disposal of the production of the yard, while the overcrowding of the dormitories, rendering them unhealthy, is one of the many disadvantages of the present cramped quarters. In the forthcoming annual report of the superintendent of charities I will urgently recommend the erection of a suitable lodging house, in great degree after the model of the one maintained by the Charity Organization Society of New York, which has been recently carefully inspected with that view. In some respects, however, there should be variations for Washington use from the plans of any of the lodging houses of other cities. Mr. Dunn's proposed visit would be of great advantage in securing the economical adaptation to our needs of the best features of these institutions, and of this no one can be better fitted to judge than the practical and painstaking manager of our establishment.

Even apart from construction, Superintendent Dunn should have opportunity to examine new minor devices and methods for the advantage of current administration.

I therefore earnestly recommend that if legally practicable the order requested by him may be issued. The annual appropriations "for Municipal Lodging House and wood and stone yard, \$4,000," is without any specifications or limitations of items of proper expenditures.

---

WASHINGTON, D. C., *September 19, 1895.*

SIR: Having for some time past manifested a desire to visit some of the Eastern cities of the United States for the purpose of making a personal inquiry into the methods pursued by them in connection with the management of their municipal

lodging-house plants, with a view of collecting, if possible, any new ideas, improvements, or suggestions I might be able to secure, for the purpose of utilizing them to the benefit of our home institutions, I have the honor to state that on the 25th day of last month I made a hasty visit to the cities of New York, Boston, New Haven, and Providence for the purpose in question.

Owing to the brief time allotted me, and the further fact that my expenses were to be borne out of my private purse, I am sorry to say that my opportunities for an extended visit to these points and a searching investigation of details were necessarily curtailing, and consequently prevented me from collecting as much data as I otherwise would have done if conditions had been different.

#### NEW YORK.

I must confess that I was rather disappointed in not finding a more extensive plant in the city of New York. My preconceived notions led me to believe that I would find everything on a scale of magnitude corresponding with the wealth and business reputation of the Empire City. While its buildings are quite well adapted to its work, and its wood yards ample as to space, yet it afforded but little material in the way of advanced ideas.

#### BOSTON, MASS.

Boston had a board consisting of three persons, appointed by the governor of the State, to consider the subject of the unemployed and measures for their relief in the towns and cities of the State. As a partial outcome of this system various agencies of both a public and private nature have been established, consisting of special citizens' relief committees, municipal departments giving employment on public works, labor organizations, private charities organizations, poor departments, etc.

The Wayfarers' Lodge, as it is called (which corresponds to our Municipal Lodging House), and wood yard combined have fully met the expectations of its promoters, and as stated in their report this department continues to be a most salutary safeguard and convenient work test, while affording shelter and food to thousands of our unfortunate fellow-men. During the past year 74,671 meals were furnished and 33,371 persons lodged; 16,814 of these were of American birth, the balance were from foreign countries. The increase over the previous year was about 200 per cent.

#### PROVIDENCE, R. I.

At Providence, R. I., the building in which the lodging house is located cost \$187,000. It is an elaborate structure and serves the purpose of a police station, woman's relief department, and lodging house and wood yard. Under the system in vogue there at present their home people—heads of families—who make application at the wood yard for work are paid 50 cents a day and board for their labor. The amount paid out in this way during the past year was \$6,884.37. The amount received from the sale of this wood was \$9,783.66, leaving a profit to the yard of \$2,899.29.

In the annual report of the overseers of the poor of the city of Providence for the year 1894 it is stated that during that year the wood-yard branch of the relief department was utilized to its full tension. The large number applying for assistance made it impossible to give them all employment in the yard, but the honest and industrious were employed whenever it was possible to give them work. The number of men employed was gauged by the amount of wood sold. If wood was sold in large quantities then more men could be employed to meet the demand.

The yard always kept going to its full capacity, and no able-bodied man is assisted unless he has performed a certain amount of work in the yard.

This branch of the department, while not a money-making scheme, has served well the object of its inception. It was intended to build up the character of the man and make him feel that he was obliged to give something in return for what he received; and in this way he was made to feel that the charity of this department was an honest one, and if he had heretofore been inclined to rely upon others for assistance he was now brought to his senses and made to realize that it was far nobler and better for a man to be independent and self-supporting than relying upon the charity of others.

From the foregoing it would seem to require no further argument to prove the great utility of a wood yard, conducted on proper principles, and on a scale sufficient to absorb the demand made upon it by the unemployed, as a great measure in the way of municipal relief. Of course if the same plan now in operation at the Providence, Boston, and New Haven yards, of paying 50 cents per day and board each to its respectable home unemployed, were adopted by us provision would have to be made for a different method than that which now prevails for the purchase of wood and the sale of the same after it is sawed and split.

## NEW HAVEN, CONN.

I was surprised to find that the lodging house at New Haven contained no rooms for the wayfaring lodger, and the superintendent was obliged to seek accommodations for these people in other places. The demand has been such that he has now asked for an appropriation of \$20,000 to erect an addition to the present structure for lodging purposes. Outside of this important feature the establishment is well equipped in the way of a wood yard and other necessary adjuncts.

The method for disinfection of lodgers' clothing differs in nearly all yards, no general plan having been fixed upon. We use the sulphur and ammonia process, with good success, while they employ hot air, washing, washing out and other processes, to the injury of the clothing, which at best will not stand much wear and tear. The establishment at New Haven will adopt the same process of disinfection as we have, being satisfied of its superiority over all others.

In the New Haven establishment I noticed a feature that struck me as not only unique but capable of beneficial results. It was a boys' gymnasium, fitted up in good shape for the exclusive use of the street-arab element of the city. Attached to the gymnasium was a fully equipped carpenter shop, with a practical superintendent in charge, whose duty was to teach these boys the uses of tools. The experiment, I was informed, was very successful and was highly complimented by the public.

While in New Haven I took occasion to visit the Calvary Industrial Home, No. 679 Chapel street, which is conducted strictly along church lines. Tramps are admitted into that institution and remain ad libitum; they are supposed to saw a little wood in the way of recompense. During my visit I found sixteen tramps resting quietly and snugly in their beds, but not a tramp did I discover at the house with the work test attached.

The feeling in this section is very bitter against street begging and almsgiving to tramps.

In the suburban towns surrounding the city of Boston they have different methods of dealing with the tramp element; some are sent to the State farms, others to the county poorhouse farm. This is considered what is termed by tramps a "warm snap," because the diet is generous and the equivalent in work comparatively light.

At Cambridge, Mass., tramps are put in cells and given crackers and water, as well as in many other places in the State.

In many of the larger suburban towns and cities in Massachusetts they have no work test, which generally results in an increase of the tramp element in their midst.

I was informed that now tramps in and around Boston are as a class much younger on the average than formerly. A complete record or description list is kept of each one as to height, eyes, hair, complexion, birthplace, residence, and occupation. If the same tramp appears more than three times in the same month at the Wayfarers' Lodge he is sent to the workhouse for from three to four months.

The State board appointed to investigate the subject of the unemployed in Massachusetts (mention of which was made in a previous part of this statement) has made a very lengthy and exhaustive report, giving statistical information based upon facts coming under their immediate personal observation, as well as others gathered from reliable sources, that would be very valuable for reference by any person who might be interested in the matter.

Under the head of "Evidence collected regarding wayfarers and tramps" I was so favorably impressed with the results of an interview which the State board had with Col. T. J. Borden, president of Associated Charities of Fall River, Mass., which bears so forcibly on the question of a work test through the medium of a well-regulated wood yard as a means to checkmate the evil of door-to-door begging, and at the same time relieve suffering and distress on the part of the worthy unemployed in other directions, that I am constrained to embody it as a part of this statement.

Col. T. J. Borden said:

"About the 1st of February last the board of managers of the Associated Charities were instrumental in the establishment of a wood yard for the purpose of affording relief to those temporarily in need, and with a view of depriving such of any excuse for house-to-house begging. The result has been almost entirely to stop such begging, and yet the amount of labor performed in the wood yard has averaged less than sixty hours per week, being less than the constant employment of one person. The facts as to the facilities afforded for employment at the yard have been kept prominently before the public, and the effort has had the cooperation of the overseers of the poor. This work test has demonstrated that there has been very little suffering from lack of employment for able-bodied persons.

"We do not give a great deal of assistance to families where there are able-bodied men. We have taken special pains to advise all citizens, instead of giving food to applicants at the door, to send them to the wood yard, let them work, and get a ticket for a meal. We have endeavored as much as possible to discourage the feeding of tramps at house doors.

"Q. Is there much of it, do you think?—A. There was considerable of it, but this movement has checked it amazingly. Very few tramps come to the city.

"Q. Can you tell us what the plant of your wood yard cost, simply for advice or recommendation in regard to other places?—A. The rental of the land was given to us. It is in a very central place.

"Q. Was it given by the city?—A. No; it belongs to one of the corporations.

"Q. What would it cost if you had to pay for the rental?—A. The fitting up cost us about \$500, raised by private subscription.

"Q. What is the cost of superintendence?—A. A great many towns object to establishing such a system because it costs more than it is worth. It takes one man to superintend it, and we pay him \$1.50 a day. We are at a little disadvantage in having so small a number of applicants that it does not pay to maintain a team for delivering wood. We have to pay for a team to have it delivered, and that is quite a little drawback. They have the biggest wood yard in Providence that I know of. They have done a bigger wood trade in Providence this last spring than, I should think, all the wood yards together in Boston. In Providence they employed as many as 200, as compared with 100 in Boston.

"Q. Could you give us an idea of how many, at \$1.50 a day, could superintend a wood yard of that size?—A. They only have one man in Providence, I think, and he is a graduate in the yard; his first experience was sawing wood in the yard. We took a man in the business, who had been running a wood yard on his own private account, and put him in there.

"Q. Do you suppose there would be any objection that would amount to anything on the part of those who have a similar industry on their private account?—A. There is a little feeling in that way, but not much. What one man could saw and split by hand would be but a drop in the bucket compared with what could be sawed by steam.

"Q. Looking at it from a purely business point of view, could such an institution be made self-supporting?—A. Not quite; it would come pretty near it. I suppose if they had anywhere from ten to twenty men all day it would be self-supporting.

"Q. Do you think it wise for a municipality or town to establish one of these?—A. The one in Providence is run by the city.

"Q. Have you any conclusions as to whether it is better to run it by the city or by private organization?—A. Of course this is not of very much advantage unless it is uniform throughout the State. If you adopt a wood yard for Fall River you get rid of the tramps, but the neighboring towns get the tramps. Now, it is desirable to recommend something which would be adopted in every town, so that the whole State would get rid of them.—A. In a place like Brookline I should not think there would be tramps enough to make business for a wood yard.

"Q. They make business enough for the police.—A. We do not make any effort to get anyone into the wood yard; if they want to go there, they go there of their own accord. We do not give them anything except relief.

"Q. Lodging is a relief.—A. Yes, but it is an inexpensive relief.

"Q. It is inexpensive in a certain sense, but isn't it expensive to assist in any way which affords those fellows a chance to roam around? Why would it not be desirable to apply your wood-yard test? If a man comes there and applies for a night's lodging grant it on one condition, that he shall work so long in the wood yard.—A. If we give them a lodging such as they do in Boston on Chardon street it would be worth something. They have cots enough there to give sleep to about 200 people. They give them a bath and steam their clothes, and the men are much better when they go out than when they go in. But all the lodging we give them is board bunks, three shelves, one above the other, no padding of any kind, and it is right in the cell room. Until I went up to Providence I thought it was a barbarous place, but when I saw what they have there I find ours much better. Each man has a berth 3 feet wide, without any bedding, and the standards that support them are iron. You can put on a hose stream and clean the room out, but in Providence they have the shelves put up about 20 inches high and pile them right in there solid; they put as many as 64 or 65 in a room 13 feet long.

"Q. Should you not think it might be desirable, however, to be even more strict with these people who are loafing about? The tramp evil is one that is being brought to our attention, and there seems to be an earnest desire in some way to settle that particular class.—A. There are many people who are tramps—perhaps not a very large percentage—that are very respectable people.

"Q. Do you think that many people who sleep in stations are honest people desiring work?—A. Not very many.

"Q. Then it is desirable that the State should get rid of them or else shut them up?—A. Yes, sir. The work test is the best medicine that can be applied.

"Q. Do you think it would be practicable to apply the work test for lodgers at the station house?—A. Yes; but they turn up at night and in the morning they want to clear out and go to the next town. If a man applies to the station house here two or three nights running he is likely to get locked up somewhere.

"Q. There are fifty towns in Massachusetts to which a man can go and get his lodging. If he should stay two nights on an average at a place it would make one hundred nights that he can stay in Massachusetts without getting locked up for vagrancy. That is about as long as he wants to stay in one State.—A. We will join in any work in that direction, and will be glad to. My impression is that it would be of some expense to begin with. There may not be more than two tramps, and it is a question whether it would be worth while to send down a man to take care of them.

"Q. Is a man given a stint?—A. The man who has charge of the wood-yard is supposed to watch that thing closely. He has had experience in handling a yard, and knows how much a man ought to do, and if he sees a man shirking he keeps a pretty close eye on him. If we were going to have a large number we should measure the wood out. We should have a rack to fill, and have that quantity of wood done instead of working by the hour; but there is not business enough."

In conclusion I beg to say that from the observations made abroad, brief as they were, I am more deeply convinced than ever of the necessity of a more suitable building and yard than we now possess. As is evident to you, we now find ourselves handicapped by these exceedingly cramped quarters, greatly reducing our facilities for doing that good to unfortunate humanity that is rightly demanded of an institution of this nature.

If I had my way in the matter of the planning and erection of an improved plant for the purpose of a wayfarers' lodge and wood-yard attachment I would recommend a house to be provided with all modern improvements and to contain not less than 100 beds; one room to be used as a chapel for religious exercises morning and evening, and particularly should a rule be enforced compelling all inmates to remain for these exercises. Attached to this lodge should be a wood yard capable of holding and storing 150 cords of wood. In seasons of great distress I would interpose no objection to the adoption of the plan of giving employment as far as possible to our worthy unemployed home people at the rate of 50 cents per day each and board. Of course this plan would necessitate the purchase and sale of large quantities of wood, but so long as the city of Washington is under governmental control instead of municipal management all the Departments of the Government as well as the District should be obliged to purchase their wood at our plant, which could be furnished as cheaply and as good as at any other large yard, and thus serve the double purpose of relieving distress on the one hand and becoming self-sustaining on the other. I sincerely trust, therefore, that the incoming Congress will see this matter in its true light and send a committee to examine and report upon the advisability of taking immediate steps for the erection of such a plant for the purposes named, which shall correspond not only with the necessities of the case, but the honor and dignity as well of the capital of the nation.

Very respectfully,

W. H. DUNN,  
*Superintendent Municipal Lodging House.*

Col. JOHN TRACEY,  
*Superintendent of Charities, District of Columbia.*

Other proposed appropriations are adequately discussed in the letters explanatory of the estimates for the fiscal year ending June 30, 1897.

#### A HOME FOR INEBRIATES.

No specific appropriation is listed for an inebriate home in the absence of any enactment authorizing such a public institution, the bill considered by the late Congress having failed of passage. The following documents are submitted for ready reference and as showing the opinion and desire of District authorities respecting such an institution.

The text of the bill is:

[H. R. 8630.]

A BILL to provide for the care and cure of inebriates in the District of Columbia.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Commissioners of the District of Columbia are hereby authorized and directed to establish and maintain within said District a hospital for inebriates, for the treatment and cure of persons suffering from the habitual excessive use of alcoholic liquors; which said hospital shall be a public institution of the District of Columbia and under the control of said Commissioners.

SEC. 2. That the officers and employees of the said hospital for inebriates of the District of Columbia shall be as follows: One medical superintendent, who shall be

paid an annual salary not exceeding one thousand eight hundred dollars; one hospital steward, whose annual compensation shall be a sum not exceeding six hundred dollars; one male attendant, at an annual compensation not exceeding four hundred and eighty dollars. The hospital steward and the male attendant shall be appointed as special police officers during their term of service in said hospital. One matron, at an annual salary of not to exceed three hundred and sixty dollars; one cook, at an annual compensation not greater than one hundred and eighty dollars; one laundress, at an annual compensation not exceeding one hundred and forty-four dollars; one female servant, at an annual compensation not greater than one hundred and twenty dollars. All employments for said service in said hospital shall be by resolution of the Board of Commissioners of the District of Columbia, who may at any time remove any persons so employed.

SEC. 3. That all supplies for the hospital for inebriates of the District of Columbia shall be obtained by requisition upon the Commissioners of the District; and all such requisitions and all accounts and vouchers thereof shall be subject to the inspection of the superintendent of charities of the District of Columbia, who shall have full powers of inspection and report over said hospital and all the transactions thereof. Annually and quarterly reports shall be made to said superintendent, who shall recommend annually such appropriations as may be necessary to carry on the work of said hospital. The said hospital shall also be at all times subject to the inspection of the health officer of the District of Columbia.

SEC. 4. That the Commissioners of the District of Columbia shall have authority to lease premises for the use of the hospital for inebriates, at an annual rental not exceeding one thousand eight hundred dollars, and to expend for the furnishing and maintenance thereof such sums as may be necessary and from time to time be duly appropriated therefor.

SEC. 5. That the hospital for inebriates of the District of Columbia shall have care of persons of the following classes to the extent of its capacity to receive and treat them:

First. Such persons as may be committed to said hospital by the police court or criminal court of the District; and the judges of said courts shall have power to commit to said hospital for a period not to exceed ninety days any person who may be convicted of the habitual excessive use of alcoholic liquors who might otherwise be amenable to commitment to the workhouse; and any person so committed may be at any time discharged from such hospital upon proof that he has been cured, and the certificate of the medical superintendent of said hospital may be accepted as evidence in such proceedings.

Second. Such persons as may be recommended for treatment in said hospital by the Commissioners of the District of Columbia.

Third. Such persons as may voluntarily apply for admission in said hospital and pay for treatment and support therein not less than ten dollars a week for every such patient.

Payment in full or in part may be received from patients of the second class, and shall be secured whenever practicable according to the means of the patients. All moneys received from patients for treatment or support shall be forthwith turned over to the proper officer of the District of Columbia for deposit in the Treasury of the United States under such regulations as the Commissioners of the District may prescribe; and said Commissioners shall have authority to make and to change all regulations concerning the management of said hospital and the system to be pursued therein.

SEC. 6. That this act shall take effect immediately.

This measure, introduced by Representative Meredith, of Virginia, was referred to the Commissioners of the District for examination and report, and by them to the superintendent of charities. After thorough inquiry, the papers in the case were returned, on February 5, 1895, with the following indorsement:

Respectfully returned. The public care of inebriates under special treatment has recently become a subject of very general consideration throughout the country. In some localities arrangements have been made for the reception of such patients at public expense in private corporate institutions. In Maryland, under the act of 1894, the commitment of drunkards for special treatment and care is provided for in a manner resembling the provisions for lunacy commitment, except that the consent of the inebriate is required. Projects for similar arrangements have been considered in about twenty other States. The within bill for the foundation and support of a public hospital for inebriates provides in a proper way for official direction, inspection, and accountability. In that respect it is in harmony with the District system for public charitable and correctional institutions. While no method of treatment is specified in the measure, I am aware that its introduction was promoted

by Dr. J. A. Westlake, and I have accordingly made inquiries concerning his plan and record. I find that, long a physician in good standing at Elmira, N. Y., he there treated a large number of inebriates with satisfactory results. During the past year, at Washington and vicinity, he has had charge of thirty cases, in four of which relapses are said to have occurred after discharge. I have talked with three of his patients who speak very highly of the benefit done to them, and inclose herewith copies of letters to me.

Dr. Westlake now treats inebriates at Highland, Md., just beyond the District line, in a private sanitarium, which, on inspection, appears to be well conducted and suitable for its present use.

The allowance and limitations for salaries and other expenditures proposed in the within bill seem to be reasonable, while adequate. I have ground for believing that the public cost of such an institution would be reduced to some extent by private contributions which, under the act, would be turned over to the United States Treasury.

For the purpose of presenting full information on this important and interesting subject, reference is made to the act of March 30, 1876 (19 Stat. L., p. 9). This law provides for the establishment of a Washington City inebriate asylum as a private corporation under condition that "no money shall ever be appropriated by the United States to aid in the construction or support of said institution." Notwithstanding this proviso, applications were made for Congressional aid, and the failure of the project is ascribed to the denial of these requests. It seems clear that no such institution of adequate facilities can be founded and supported entirely by private means. Prior to 1884 the District authorities several times recommended appropriations to carry out the objects of the law of 1876, working repeal of the prohibitory clause. This course might yet be pursued, as there has been no forfeiture of that charter and several of the incorporators survive. Although it seems preferable to enact the bill for a purely public institution, as considered in the Fifty-third Congress, the plan of 1876 may be deemed worthy of further consideration, or it may be thought desirable to combine with the new measure features of the old one, the text of which is as follows:

AN ACT to incorporate the Washington City Inebriate Asylum in the District of Columbia.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That all persons who shall become subscribers pursuant to this act shall hereby constitute and be declared a community-corporation and body politic forever, or until Congress by law direct this charter to cease and determine, by and under the name of the Washington City Inebriate Asylum of the District of Columbia; and by and under the same name and title they shall be able and capable in their corporate name to take, purchase, have, lease, and hold real estate, not exceeding sixty acres, in the District of Columbia, and erect thereon a building or buildings suitable for the purposes of an asylum hereinbefore named; and to take, purchase, hold, and convey such personal property as may be necessary to carry out the objects of said asylum, namely, the care and medical treatment and control of the inebriate and for no other purpose. Said asylum shall have power to sue and be sued, to make and use a common seal, and alter the same at pleasure, to take and hold any grant or devise of land, or any donation or bequest of money or other personal property to be applied to the maintenance of said asylum. But the limitation that the said asylum shall not take, purchase, have, lease, and hold real estate shall only apply to property leased or purchased, and shall not prevent the said asylum from taking and holding any estate, real or personal, given or devised to it, not exceeding in value five hundred thousand dollars: *Provided*, That the property held by the said asylum shall never exceed five hundred thousand dollars in value.

SEC. 2. That any person donating the sum of ten dollars to the asylum hereby incorporated shall be deemed a subscriber and stockholder.

SEC. 3. That the fund of said institution shall be fifty thousand dollars, but may be increased to three hundred thousand dollars at any time the board of directors may think it compatible with the best interest of said asylum, and shall be deemed personal property.

SEC. 4. That all the affairs and concerns of said asylum shall be managed by, and conducted under, the direction of twenty-five trustees, who shall be subscribers and citizens of the United States of America, and who shall be elected by the subscribers,

after the present year, annually, on the first Thursday in November of each year, by ballot, by a plurality of subscribers present or represented by proxy, each and every subscription of ten dollars having one vote; if for any cause such election shall not be so held, the said asylum shall not be deemed dissolved, but an election shall be held within twelve months thereafter; notice of time and place of such election shall be published for two weeks immediately preceding the day appointed therefor in at least two newspapers of the District of Columbia. The said board of trustees, annually, from their own body, and as soon as may be after their election, shall proceed to elect, by ballot, a president and one treasurer of said asylum, who, so long as they shall continue trustees of said asylum, shall hold their offices respectively during the pleasure of the board of trustees; and the said trustees shall have power to fill vacancies in their own body, caused by the death, resignation, removal, or otherwise, of any trustee or trustees, and to make all by-laws, not inconsistent with the Constitution and laws of the United States, as they may deem proper for the management of the affairs of said asylum, and shall appoint annually, by ballot, at least thirty days before such election of trustees of said asylum, three fit and disinterested persons inspectors of the then next election of trustees, and, at any time before the election, supply any vacancy which may occur in the office of any such inspector. Nine of the board of trustees, of which number the president or vice-president must be one, shall constitute a quorum for the transaction of business. All committees, physicians, agents, and officers authorized by this act or by the by-laws of this asylum shall be appointed by the board of trustees.

SEC. 5. That no subscriber of this asylum shall be liable in his or her individual capacity for any contract, debt, or engagement of said asylum after the full amount of their subscription is paid in.

SEC. 6. That W. W. Corcoran,\* George H. Plant, George W. Riggs,\* W. W. Moore, Samuel Norment, J. W. Thompson, Matthew G. Emery, John T. Given,\* A. E. Perry,\* John C. Harkness, William Stickney,\* J. C. McKelden, Joseph Burrows,\* doctor of medicine; William J. Murtagh, Columbus Alexander,\* William R. Riley,\* D. D. Cone, Thomas Berry, George W. Stickney, D. P. Halloway,\* John W. Simms, E. C. Carrington,\* James H. Stone,\* Dickerson Nailor,\* and Joseph T. Howard, doctor of medicine, shall constitute the first board of trustees, who shall hold their offices until a new board of trustees is elected; and they shall be commissioners, whose duty it shall be to locate the said asylum and to receive subscriptions to the funds of said institution.

SEC. 7. That the said institution shall have power to receive any inebriate who shall voluntarily make application thereto, and retain him or her therein for such period as may be deemed advisable by the physician in charge.

SEC. 8. That any justice of the supreme court of the District of Columbia, upon petition or complaint, duly verified and presented by any relative of an inebriate or habitual drunkard, or by any officer of this asylum, or by any officer of police of said District of Columbia, shall proceed thereupon to appoint a commission to inquire into the case in the same manner as is directed by law in relation to the care and custody of the persons and estates of idiots, lunatics, persons of unsound mind, and drunkards, and according to the rules and practice of the said supreme court in such cases. The person charged with being an inebriate shall have notice to be present himself, or by counsel, before such commission, and to defend himself from such charge. Upon becoming satisfied by the return of said commission that the person in question is an inebriate, or habitual drunkard, any justice of the supreme court may issue a warrant committing such inebriate or habitual drunkard to the said asylum for a period not exceeding one year as said justice may deem proper; and such warrant, duly issued, shall be full and sufficient justification for all acts done by any properly authorized officer under and in accordance therewith. Such order of commitment may be vacated or modified by any justice of said supreme court on cause duly shown. After complaint has been made, and pending the proceedings under this section, the justice hearing the case may commit the person charged with being an inebriate, or habitual drunkard, to said asylum, and the person so temporarily committed shall be discharged therefrom if, on the return of a commission, it be determined that he is not a proper person to be detained. The estate and person of any inebriate committed to said asylum shall be liable for his support therein; and the committee, trustee, or guardian of every such person shall pay out of his estate such reasonable and proper sums as shall be fixed by the justice ordering the commitment.

SEC. 9. That for the purposes of this act any person who, by the use of intoxicating liquors, or other intoxicants, has lost self-control, or become incapable of proper attention to the care and management of his affairs, or habitually or periodically neglectful thereof, or dangerous to himself or others, shall be regarded as an inebriate or habitual drunkard.

---

\* Dead.

SEC. 10. That the trustees and superintendent of said asylum shall, so far as may be practicable, employ such inebriates as are without the means of support in such labor as may be adapted to their capacity; and for this purpose they shall arrange in separate departments of their buildings, or in separate edifices, workshops and appliances by which such labor may be made, if possible, a source of income and a means of promoting the reformation of the persons employed. From the profits of such labor, if any, the actual cost of support of each inebriate may be deducted and retained by the institution, and any surplus shall be paid to his (or her) family, or, in case he (or she) have no family, to himself (or herself) or his (or her) committee, trustees, or guardian for his (or her) benefit, at the time of his (or her) discharge from the asylum. And labor performed upon the grounds or premises of the asylum by inmates thereof shall be fairly appraised, and the proceeds shall be disbursed as above provided.

SEC. 11. That no person shall sell any strong or spirituous liquors or wine or fermented liquors within the distance of one-fourth of a mile from the outward bounds of the land and premises of the said asylum hereby incorporated, and whoever shall violate the terms of this section shall forfeit fifty dollars for each offense, and shall also be guilty of a misdemeanor: *Provided*, That the site or location of said asylum be not nearer than one-quarter of a mile of the corporate limits of the city of Washington.

SEC. 12. That no person shall enter or pass upon the land or premises of said asylum, other than the officers of said asylum, officers of justice, and those having business with said asylum, without a written or printed pass or permit from that officer of the asylum who may be empowered by the by-laws of said asylum to issue such pass; and any person violating the provisions of this section shall forfeit the sum of ten dollars, and be guilty of a misdemeanor. All penalties imposed in this act shall be sued for and recovered in the name of the president of the asylum, and shall be paid to the treasurer thereof, for the support of any poor persons who may be inmates of said asylum.

SEC. 13. That the superintendent of said asylum is hereby authorized to appoint two or more of the attendants and employees of said asylum as policemen, whose duty it shall be, under his order or that of the assistant superintendent, to arrest and return to the asylum such inebriates as have escaped therefrom, or any patient who shall violate any law of the asylum, or person trespassing on the grounds or premises of said asylum, contrary to the provisions of section twelve of this act.

SEC. 14. That the board of trustees of said asylum shall make an annual report at their first meeting in November of their proceedings, income, expenditures, the number of patients received, discharged, and remaining in the institution, verified by the affidavit of the president and the treasurer; which report shall be filed in the office of the Secretary of the Interior.

SEC. 15. That any State or Territorial legislature, municipal council, or authorities of the District of Columbia, may provide for the maintenance in the said asylum of any number of poor patients by appropriating sufficient funds for that purpose; and any person who shall donate or leave by legacy the sum of five thousand dollars to the said Washington City Inebriate Asylum shall establish forever a free bed in said asylum; two thousand five hundred dollars shall provide a free bed in said asylum for six months in each year; the donor or legator shall name the patient who shall occupy the said free bed; but in case the donor or legator shall fail to name a patient to occupy the free bed which said donor or legator shall have endowed, then the trustees of said asylum shall fill the said free bed with a poor patient; the said patients in said free beds shall be provided with medical treatment free of charge, and like all other patients shall be subject to the rules and regulations of the said asylum.

SEC. 16. That Congress may, at any time, alter, amend, or repeal this charter: *And provided*, That no money shall ever be appropriated by the United States to aid in the construction or support of said institution.

Approved, March 30, 1876.

#### NATIONAL ASYLUM FOR AGED NEGROES.

The plan for the establishment of a national home for aged colored persons embodied in the bill H. R. 7095 (report No. 933) was so very fully explained in the reports and proceedings of both branches of Congress that it would be superfluous to discuss it at length, even were it a strictly District enterprise, instead of an exclusively Federal one. However, in view of location and unavoidable local relations of such an establishment, it seems proper to make extracts from the records of this

office concerning it. In the annual report of the superintendent of charities for 1894 the following reference to the project was made:

The bill for the erection of a national home for aged colored persons (H. R. 7095), which is still pending in the Senate, was reported in the first instance from the Military Committee of the House as a national measure, and not as District legislation. It proposes to devote to the uses of the institution certain money accumulated in the Treasury for unclaimed pay due to colored Union soldiers. Although the sum proposed to be devoted to the enterprise, \$100,000, in the first instance, is a large one, and the institution is to be located in the District of Columbia, the present stage of progress of the measure in Congress, and the discussion that has been had upon it in the House of Representatives and in the Senate committee, seem to obviate the necessity for comment upon it from this office, unless it should hereafter be referred to for report by the local authorities.

The bill was subsequently referred for examination in connection with a report of the House Committee on Military Affairs, the following documents being sent from Congress to the District authorities:

[H. R. 7095.]

AN ACT To provide for the erection of a national home for aged and infirm colored persons, and for the maintenance of the inmates thereof.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the sum of one hundred thousand dollars, out of all moneys, arrears of pay, and bounty which were due the estates of deceased colored soldiers who served in the late war and were in the hands of the Commissioner of the Freedmen's Bureau and have been repaid into the Treasury, be, and is hereby, appropriated, out of any money in the Treasury of the United States not otherwise appropriated, for the purpose of erecting a national memorial home for aged and infirm colored people, and to aid in maintaining the inmates of the same out of said fund, the building or buildings for said home to be erected in the District of Columbia, upon lands owned by the association known as "The Home for Aged and Infirm Colored Persons," a corporation duly incorporated under and by virtue of the incorporation laws of the District of Columbia: *Provided*, That no money shall be paid to said association until the deed for said property shall have been approved by the Attorney-General of the United States, and until the association shall have given good and sufficient bond, to be approved by the Attorney-General, conditioned upon the faithful discharge of their duties in the proper expenditure of the above-mentioned fund: *Provided*, That this institution shall not become a charge upon the United States Treasury at any time.

SEC. 2. That the plans, specifications, and contracts for the buildings to be erected for said home shall be submitted and subject to the approval of the Secretary of War, and the Secretary of the Treasury is authorized and directed to pay the money hereby appropriated to the association known as "The Home for Aged and Infirm Colored Persons," in the manner provided for and upon the fulfillment of the terms of this act: *Provided*, That if residents of the District of Columbia become inmates of said home and are supported in whole or in part by appropriation made by Congress, the entire expense shall be a charge upon the revenues of the District of Columbia.

Passed the House of Representatives June 12, 1894.

[Report to accompany H. R. 7095.]

The Committee on Military Affairs, to whom was referred the bill (H. R. 7095) to provide for a national home for aged and infirm colored persons, and for the maintenance of the inmates thereof, have had the same under consideration and beg to submit the following report:

The purpose of the bill is to provide for the establishment of a national home for aged and infirm colored people, and a sum of money now lying in the Treasury of the United States which is due the estates of deceased colored soldiers, is sought to be used for this purpose. A joint resolution was passed by Congress in 1867 (see Stat. L., vol. 15, p. 26), which provided that all moneys certified to be due colored soldiers should be paid to the Commissioners of the Freedman's Bureau. At that time most of the colored people from the Southern States who would be entitled to this money that had been slaves had no individual relationship, and where they had it was impossible to trace it. The law now governing the proper adjudication of these claims requires that the heirs of the deceased colored soldier must prove their lawful marriage relation by record evidence, and that to be certified to by a

notary public or clerk of the court in the several States, but as no marriage record was ever kept of the slaves it is impossible that the law can be complied with, so that in a great many instances the proper proof can not be made. The Second Auditor of the Treasury in 1892, in his annual report, makes the following statement:

"When the Bureau (referring to the Freedman's Bureau) was discontinued in 1872 the unexpended balance of said funds was turned over to the Adjutant-General's Department for disbursement, and every effort was made to find the persons entitled thereto. In many instances it was ascertained that the payees were dead, and in all such cases the funds were held for seven years and then repaid into the Treasury on the legal presumption of the death of the payees. The total amount repaid was \$504,000. In 1882 it was found that more than one-half of that sum had been claimed, the actual amount remaining unclaimed being \$240,233."

Your committee find that while all the money has been claimed (and in many instances as many as ten persons from as many different States filed claims as the lawful heirs of one deceased soldier) since the date of that report there still remains in the Treasury at least \$300,000, which, under existing conditions, can never be paid out on account of the utter insufficiency of the proof furnished to establish the claims. There have been numerous requests made by the colored people generally to apply the sum for the advancement and benefit of their race, but as there was no law in existence whereby this money could be so used no progress was ever made.

In 1893 a number of colored gentlemen in the District of Columbia formed a corporation for the purpose of establishing and maintaining a home for the aged and infirm colored people of the United States, and by private subscription have acquired a tract of land sufficient to erect a suitable home thereon, and have come to Congress for a transfer to them for that purpose of a portion of the fund in the Treasury which justly, equitably, and legally belongs to the colored people. There is no question but that the aged colored people who were once slaves are more subject to destitution and require charitable aid more than any other class of people in the United States, and as it is not the province of this Government to establish charitable institutions, but rather assist those already established in the District, these people suffer for want of an institution of their own. There are at the present time only ten colored people permitted admittance in the charitable institutions in the District of Columbia on account of a lack of accommodations, and those are provided for in the basement of the Children's Asylum on Eighth street; therefore it is eminently proper that they should receive recognition to such an extent as will enable them to care for the needy and aged of their own race out of the funds which really belong to them and are withheld in the United States Treasury.

By taking this money for the purpose set out, it is only giving the colored people the benefit and use of the fund that rightfully belongs to them, and which, if not appropriated for their use or some other, will lie idle in the Treasury of the United States until some disposition is made of it. The fact should clearly be borne in mind that this fund would be paid to the heirs of the deceased colored soldiers if proper proof could be made, but inasmuch as the requirements of the Department can not be complied with, and satisfactory regulations as to identification of the claimants can not now be made, unless some legislative action is taken whereby the money can be utilized for the benefit of these people it will remain where it is, and the race of people who are entitled to every penny of it will be deprived of what is justly due them. The total number of colored soldiers who served during the war was 186,017, distributed among the several States as follows:

|                            |         |                          |          |
|----------------------------|---------|--------------------------|----------|
| Louisiana .....            | 24, 052 | Connecticut .....        | 1, 764   |
| Kentucky .....             | 23, 703 | Indiana .....            | 1, 597   |
| Tennessee .....            | 20, 133 | Michigan .....           | 1, 387   |
| Mississippi .....          | 17, 869 | New Jersey .....         | 1, 185   |
| Maryland .....             | 8, 718  | Florida .....            | 1, 044   |
| Pennsylvania .....         | 8, 612  | Delaware .....           | 954      |
| Missouri .....             | 8, 344  | At large .....           | 733      |
| Virginia .....             | 5, 723  | Iowa .....               | 440      |
| Arkansas .....             | 5, 526  | West Virginia .....      | 196      |
| South Carolina .....       | 5, 462  | Wisconsin .....          | 155      |
| Ohio .....                 | 5, 092  | New Hampshire .....      | 125      |
| North Carolina .....       | 5, 035  | Vermont .....            | 120      |
| Alabama .....              | 4, 969  | Maine .....              | 104      |
| New York .....             | 4, 125  | Minnesota .....          | 104      |
| Massachusetts .....        | 3, 966  | Colorado Territory ..... | 95       |
| Georgia .....              | 3, 486  | Texas .....              | 47       |
| District of Columbia ..... | 3, 269  | Officers .....           | 7, 122   |
| Kansas .....               | 2, 080  | Not accounted for .....  | 5, 083   |
| Rhode Island .....         | 1, 837  |                          |          |
| Illinois .....             | 1, 811  |                          |          |
|                            |         | Total .....              | 186, 017 |

Now, the sum proposed to be appropriated in this bill and for this institution and for the benefit of the colored people of the country is less than 60 cents for each colored soldier who served in the Federal cause during the rebellion.

If it were not for the difficulties in the way of individuals making their proof to entitle them to the payment of their just claims against the Government there would not be so many instances among the people requiring assistance.

Therefore it appears to this committee that there can be no just and reasonable objection to the Treasury of the country contributing in this manner for the object of this bill out of the patriotic earnings of the colored people which must forever remain unpaid to the owners thereof through no fault of theirs.

The committee therefore recommend the passage of the bill.

On reference of the bill and report to the superintendent of charities by the Commissioners of the District the papers, after examination, were returned on June 22, 1895, with the following indorsement:

Respectfully returned. The proviso at the end of the second section is obscure, susceptible of widely differing interpretations, and inconsistent with the proviso at the end of the first section of the bill. If the institution can not "become a charge upon the United States Treasury at any time" its inmates can not be "supported in whole or in part by appropriations made by Congress" from public funds. If the home is to be a national institution for residents of all parts of the country it is difficult to see why inmates from the District of Columbia should be on a different footing from those coming from States and Territories. The fund of \$100,000 for the home is to be paid over, apparently in bulk, to the incorporators by the Secretary of the Treasury, and the only restriction placed by the law on the administration of the institution is that the building plans shall be approved by the Secretary of War. The fund being derived from unclaimed arrears of pay and bounty and not from taxation, the institution, as contemplated by the bill, will cease to be a public charge on the drawing of the fund. It is claimed that the District of Columbia has at present scant accommodations for aged and indigent colored persons. It is true that the National Association for the Care of Destitute Colored Women and Children can now maintain only 10 inmates over 60 years of age together with about 100 children. Reduced appropriations in connection with the establishment of the board of children's guardians prevent more extensive use of the charter powers and privileges of this institution for the benefit of the aged. The Home for the Aged of the Little Sisters of the Poor has among its 208 inmates 43 colored persons over 60 years of age, of whom 31 are women and 12 are men. These aged colored dependents, cared for in a separate wing of the establishment, are now supported entirely by private benevolence, the institution receiving nothing from the Government. The Washington Asylum has at this date in the almshouse branch 57 colored men and 45 colored women, of whom 88 are over 60 years of age, 50 males and 38 females. It is probable that some of these dependents would be more suitably provided for in a home than in an almshouse. While these accommodations for aged people of the District of Columbia are inadequate to the wants of a community in which nearly one-third of the population consists of persons of color, Washington is not relatively in a worse condition for such public dependents than are several other cities. There does not seem, therefore, to be any sound reason for the discrimination in respect to the District of Columbia sought to be made by the second section of the within bill, which was perhaps to some extent based on the inaccurate statement that "there are at the present time only 10 colored people permitted admittance in the charitable institutions of the District of Columbia." Undoubtedly the sweeping assertion was intended to apply only to the aged; but even so applied it is incorrect, as appears from the above-cited return of 141 such inmates in three institutions of the District at this date.

Congressional proceedings supply very full information as to this measure, which, passed by the House, narrowly failed of final passage by the Senate in the closing hours of the session. An inquiry addressed to this office subsequently to the filing of the above indorsement was answered as follows in a letter dated June 25, 1895, and addressed to the president of the Board of District Commissioners:

I respectfully reply as follows to your inquiry regarding the farther amendment suggested to House bill 7095, to alter lines 12, 13, and 14 so as to read:

"Buildings for said home to be erected in the District of Columbia upon farming lands, not less than 25 acres, owned or purchased by the association known as 'The Home for Aged and Infirm Colored Persons.'"

Unquestionably, the home should be located within the District, but outside the city limits. Inasmuch as aged and infirm dependents can not do farm work there would seem to be less occasion for a large tract of land for the contemplated institu-

tion than there would be for a reformatory or asylum for able-bodied public dependents of working age. I am informed that a piece of land near Anacostia, 3 acres in extent, has been acquired by gift for the use of the proposed home.

While possibly a site larger than 3 acres would be preferable, it seems questionable whether the suggested amendment for farming lands should be insisted upon.

Since my report of June 22 upon the bill, in accordance with the reference to your Board from the Senate Committee on the District of Columbia, my attention has been called to the fact that many colored soldiers were recruited in the District of Columbia for State regiments, especially for those of Eastern States. This indicates that of the undistributed fund from arrears of pay and bounty due colored soldiers a share larger than the ordinary accredited quota really belongs to this District, and that, consequently, discrimination against the District in the administration of the national home would be even more unjust than appears from examination without reference to the history of the recruiting of colored soldiers.

#### EMERGENCY AND INDUSTRIAL RELIEF.

In addition to the reference to this subject in the New Haven address previously referred to it is well to make record of the composition and transactions of the central relief committee of last winter, appointed on January 4 by the Commissioners of the District, the members of which were Mrs. J. W. Babson, Justice C. C. Cole, Charles G. Conn, John F. Cook, L. S. Emery, Lawrence Gardner, Miss Harriet B. Loring, Theodore W. Noyes, Dr. L. W. Ritchie, John G. Slater, James W. Somerville, John Tracey, B. H. Warner, Beriah Wilkins, and Simon Wolf.

Mr. Simon Wolf being obliged to resign his membership in view of necessity for prolonged absence, Mr. Isaac L. Blout was appointed in his stead. For similar reason Mr. B. H. Warner declined to accept the chairmanship of the committee, although continuing to be a member of it.

The officers and subcommittees as finally selected were: Chairman, C. C. Cole; vice-chairman, Miss Harriet B. Loring; secretary, L. S. Emery; treasurer, Beriah Wilkins.

Committee on ways and means, Theodore W. Noyes, I. L. Blout, Beriah Wilkins, Dr. Ritchie, and Mrs. J. W. Babson.

Distribution committee, Lawrence Gardner, Miss H. B. Loring, John F. Cook, John Tracey, and J. W. Somerville.

Auditing committee, B. H. Warner, John G. Slater, and Charles G. Conn.

A committee to canvass for contributions of money and supplies, consisting of John B. Wight, Mrs. H. B. F. Macfarland, and George E. Emmons, was also appointed.

The details of the course and result of this relief movement are sufficiently shown by the following final reports:

#### REPORT OF TREASURER OF CENTRAL RELIEF COMMITTEE.

DEAR SIR: I have the honor to submit below a statement of the receipts and disbursements of the charity fund passing through my hands as treasurer of the committee:

##### *Receipts.*

|                                       |            |

BERIAH WILKINS, *Treasurer.*

Hon. C. C. COLE,

*Chairman Citizens' Relief Committee.*

## REPORT OF THE CANVASSING COMMITTEE.

WASHINGTON, D. C., *February 9, 1895.*

DEAR SIR: The committee appointed to canvass the city for the relief of the poor beg leave to submit the following report:

On the 1st of January we began our work by dividing the District of Columbia into 35 districts adopting a new plan in the northwest, of districting by streets rather than by sections. We then secured as far as possible a chairman for each district requesting the chairmen to select their own assistants and manage the work according to suggestions received from us. These chairmen secured the services of 40 canvassers. Where it was impossible to get chairmen the work of districts was conducted from the office of this committee.

Thirty-one thousand subscription blanks were divided among the canvassers, and Wednesday, January 30, was decided upon as the day for the distribution, and Friday, February 1, as collection day. The result of this canvass up to this date, in money, amounts to \$12,104.32, nearly all of which has been turned over to Mr. Beriah Wilkins treasurer, a detailed account of which will be given later. A receipt was sent to each person for money contributed through the mail when it was possible to obtain the address. No account of the number of blanks upon which orders for supplies and clothing were written was kept by this committee, as they were turned over at once to Mr. Gardner, chairman of the distributing committee. We estimate, however, that the bundles of clothing must have been several thousand and the value of supplies at least \$2,000.

In presenting this report the committee feel that it would be well for them to make certain suggestions, in connection with the work, based on their experience and upon suggestions received from others, which they think would be useful if a similar committee is appointed next year.

First. We recommend that the committee on canvass be much larger than this year, containing representatives from the different sections of the city, and that, inasmuch as the work of this committee and that of the distributing committee are so closely allied, these two committees be one and the same.

Second. That the work of canvassing and collecting for the relief of the poor be entered upon earlier in the season, certainly not later than December 1.

Third. That the fund thus collected be largely used for the purpose of payment of services rendered rather than given gratuitously, and also that a value be placed on clothing and supplies which shall be given in lieu of wages for services rendered, as is the custom in other cities, thus avoiding the charge of pauperization so often made against this work.

It is impossible to mention by name all those who have contributed, but the committee desire to express their appreciation not only of the money and supplies that have been received, but of the expressions of sympathy and interest which have accompanied them.

Washington is surely a generous city. This outpouring of money and supplies followed many and urgent appeals from other sources, but the prompt and generous response is an evidence of how willing our people are to help those who are in distress.

JOHN B. WIGHT,  
GEORGE E. EMMONS,  
Mrs. H. B. F. MACFARLAND.

Hon. C. C. COLE,  
*Chairman Central Relief Committee.*

#### REPORT OF THE DISTRIBUTION COMMITTEE.

Your committee on distribution respectfully submit the following as their report:

The committee held daily sessions from the opening of the rooms at 624 Louisiana avenue until the 9th of the present month, so as to be able to act promptly in the distribution of such supplies as reached us and to attend to any other important matters calling for immediate action. As to the current details of the work of distribution, we refer to our weekly reports. The following table shows the amount of money appropriated by your committee and our recommendations to the several agencies. In one instance there is an overdraft, which we would respectfully ask an appropriation for, namely, \$1.15 to the St. Vincent de Paul Society.

|  |              |
|--|--------------|
| Metropolitan police .....                        | \$9, 200. 00 |
| Associated Charities .....                       | 7, 000. 90   |
| Central Union Mission.....                       | 3, 100. 00   |
| St. Vincent de Paul.....                         | 1, 700. 00   |
| Young Men's Christian Association (colored)..... | 1, 000. 00   |
| United Hebrew Charities.....                     | 550. 00      |
| Deaconesses' Home.....                           | 450. 00      |
| Loyal Legion .....                               | 200. 00      |
| Labor on street work.....                        | 5, 000. 00   |
| Miscellaneous expenditures.....                  | 702. 58      |
| Total .....                                      | 28, 902. 58  |

#### THE STAR POUND PARTY.

The pound party created and managed by the Evening Star was a success far beyond the most sanguine expectations, and did a work at a time before this committee was thoroughly organized and before we had anything on hand to distribute to the agencies. Coming as it did at a time when this charity was of much assistance to the poor of the city, great credit is due the proprietors of the Star for their thoughtfulness in organizing this movement. The proceeds of the collection supplied the agencies for nearly two weeks; the groceries and provisions sent in were of the best, and, being put up in packages, were easily handled.

#### COLLECTION OF CLOTHING AND SUPPLIES.

The collection of clothing and supplies was, at the request of the chairman of the committee on collections, who has fully reported, undertaken by this committee. In the pursuance of this work we are under obligations to Messrs. Woodward & Lothrop, A. Lisner, Hygienic Ice Company, and Knox's Express for the loan of wagons to make the collections.

The quantity of clothing collected did not quite equal that of 1894, but the response was very generous and did great good in many quarters.

#### AGENCIES AND METHODS.

From two years' experience your committee (which is nearly the same as of 1894) has naturally been placed in a position to learn much of the system used by the different agencies in relieving the wants of the needy, and we find that for a general, direct, and speedy means of reaching the poor the police are the most useful. The cost of distribution through this agency is absolutely nothing. The use of the patrol wagons to send for supplies and the station keepers to distribute on orders from policemen on the beats we found worked remarkably well. The police helped and rendered us a good deal of assistance in ferreting out attempted impositions.

As to the individual work of the Central Union Mission—that is, the work subject to the examination of its agents—we have no adequate knowledge. We have frequently asked it to furnish us with specific reports or data as to what was done, but through some misunderstanding we have never received any. The work of the Associated Charities was well done in many parts of the city. This organization furnished us daily with a list of all parties relieved by it, which was compared with a list from all the police and any duplication sifted out at once. Would say that there were but few duplications discovered. Special cases that were reported to our committee for examination were in turn referred to the Associated Charities, and reports made by this organization on special cases were very complete, showing great care in the examinations. The services rendered by the Young Men's Christian Association (colored), which acted in conjunction with the Central Association of Colored Churches, were well done, the officers of both organizations working in perfect harmony. Each case relieved was thoroughly investigated and found to be worthy. Your committee felt that every dollar allotted to this organization was carefully spent. The St. Vincent de Paul, with its 15 subdivisions, rendered good aid. While the amount given to this organization only averaged about \$100 to each subdivision the money was carefully used and many benefited. The United Hebrew Charities confined their work principally to their own people, and we know that each case helped was well and carefully examined and thoroughly deserving. The small amount allotted to the Deaconess' Home was, we believe, well spent and a great many worthy cases relieved. The classes of cases relieved through this agency could not be reached through others, the ladies in charge being very careful in their investigations. To the Women's Loyal Legion, your committee voted \$200, sent to us to be used for the purchase of material and labor. An examination of the report to the general committee will convince anyone that the money was judiciously used.

#### STREET WORK.

Under the direction of the general committee your committee expended \$5,000 on street work; that is, it employed a number of men to shovel snow from the streets during the period of the late snow storm. The assistance of the street-cleaning department of the District of Columbia was invoked and its officers rendered us great help, and to Superintendent McKenzie and his assistants we are under a debt of gratitude. The expenditure of this money was to an extent an experiment, and your committee can hardly report that they are entirely satisfied with the result. In the first place, putting so many men at work at once, it was almost impossible to select really deserving men in all cases, and if the work should ever be attempted again we would advise that the men to do the work be selected by the police and any agency that may be at work for the citizens' committee. Of the \$5,000 expended over \$1,100 was required for the employment of wagons, which of course was necessary, and over \$400 for the employment of a superintendent. While we have no complaint to make either as to the wagons or superintendent, at the same time you will note that it required 30 per cent of the amount appropriated to reach the laborers, a percentage we think far too high for the amount of money expended.

#### MEAL TICKETS.

With the approval of the central committee your committee issued meal tickets at 10 cents each, good at the dining rooms of the Central Union Mission. The tickets were placed on sale at stores and leading hotels. The returns this year were not as much as last, which may be accounted for from the fact that we had a number of free soup houses. The total number of tickets sold was 743, which amounted to \$74.30. The number we have been called on to redeem by the Mission to date is 400.

#### ESTIMATE OF COST OF DISTRIBUTION.

From the treasurer's report it will be seen that the total amount of cash received amounted to \$30,869.47. The committee estimate the total at about \$37,000. The cost of distribution, therefore, and part of the collection was a little less than 1 per cent, a rate which your committee feel sure was not equaled in the United States during the winter.

We hear much about the plans that work better, but for emergency work such as was undertaken by the citizens this year, we think the system in Washington as a whole is one that the contributors can well feel proud of.

In conclusion, your committee trust that it will be many years before the Commissioners will be again called upon to organize a citizens' relief committee, which should be done in extreme bad times or in a hard winter. Your committee have found a number of instances where people who were helped in 1894 made no provision during the year to protect themselves in the coming winter, thinking they would get help this year from the citizens' committee; therefore we think it well to disabuse the minds

of this class of people from the idea that the citizens' relief committee and a general collection is to be a yearly occurrence. From the information now before your committee and a general observation they believe that the police force, under its present efficient manager, Colonel Moore, and the chief clerk, Mr. R. Sylvester, who does all the charity work gratuitously, are fully able to cope with an ordinary winter, and we believe that their organization is fully equal to almost any emergency beyond the reach of the established charitable associations, of benevolent fraternities, missions, and parishes operating steadily in their respective fields.

All of which is respectfully submitted.

LAWRENCE GARDNER,  
*Chairman.*

JAMES W. SOMERVILLE.

#### REPORT ON THE FREE-SOUP HOUSES.

WASHINGTON, D. C., March 29, 1895.

DEAR SIR: I have the honor to present herewith detailed reports as to the free-soup houses established under authority of the citizens' committee:

The one at 490 Louisiana avenue was opened January 23 and was closed on Monday, March 18. It was under the immediate supervision of Capt. John T. Smith, who signed the inclosed report, and who was most faithful and efficient in the administration of this charity, making collections of money and material so as to conduct the same without incurring any obligation.

Mr. W. T. Crump had charge of the preparation and serving of the soup, and together with five other men rendered diligent and faithful service. He is a poor man, and I feel that it would be only a deserving recognition of his services if a small appropriation could be made for his benefit, as he spent about eight weeks in the service of the committee for which he made no charge.

It will be seen that a very large number of people were served every day. Probably quite a number were fed who were undeserving, and in the future, if this charity is continued, it would be well to pursue the plan adopted in other cities—let able-bodied men and women who apply for aid render some compensation therefor in services. This plan has been pursued in Baltimore with very acceptable results, yet I doubt whether it is well to indiscriminately feed applicants from day to day, as in the course of time much imposition will be practiced.

It will be seen that 93,000 quarts of soup were distributed and that the number of patrons per day numbered 1,500, making the total number about 84,000.

The market men were especially liberal, the wholesale and retail butchers having contributed 18,000 pounds of beef, several wagonloads of bones, and 200 barrels of vegetables. The pork dealers also gave 2,000 pounds of fresh pork and bacon. In fact applications for aid were generally met in the most generous manner. Contributions were acknowledged through the press from day to day.

The premises No. 490 Louisiana avenue were kindly donated free of rent by Mr. Thomas J. King, and were admirably suited for the purpose.

In reference to the Georgetown soup house which was opened January 22, and continued to run for forty-one days, Mr. J. A. Blundon took upon himself the trouble and annoyance of fixing up an old house which had remained vacant for some time, and for which Messrs. Wescott & Wilcox charged no rent.

Mr. Blundon made all collections and supervised the distribution of soup, so as to see that it was not given to any who did not deserve it.

Applicants were required to obtain tickets which had been distributed among stores and private families, and great care was used to see that none but the worthy were aided. Five thousand four hundred and twenty-two persons were fed, besides a number of families known to be deserving were permitted to send buckets for soup.

A list of contributors is furnished herewith, and also the detailed report of Mr. Blundon.

As a matter of experiment the soup-house branch of the relief work done by the citizens' committee was successful.

Respectfully, yours,

B. H. WARNER,  
*Chairman.*

Hon. C. C. COLE,  
*Chairman, Citizens' Relief Committee.*

## REPORT OF METROPOLITAN POLICE.

SIR: During the period of extreme cold weather, January 19 to March 15, 1895, the police department, at an expenditure of \$6,284.26, together with supplies appropriated through the citizens' relief committee, provided fuel for 13,590 persons, provisions for 27,245, distributed 2,412 lots of clothing, and 20 pairs of good shoes to the poor—rendering assistance in all to more than 43,267 persons.

During the same period the department, from private contributions, secured 169 families against eviction from their homes; bought one small cooking stove and 25 pairs of shoes for the destitute.

Respectfully,

RICHARD SYLVESTER,  
Chief Clerk.

Maj. WILLIAM G. MOORE,  
Superintendent of Metropolitan Police.

Respectfully forwarded to the chairman citizens' central relief committee.

WM. G. MOORE,  
Major and Superintendent, Metropolitan Police.

## REPORT OF THE ASSOCIATED CHARITIES.

The following exhibits the amount of money and material turned over to the Associated Charities by the citizens' relief committee:

Received—

Orders on dealers for 12 $\frac{1}{2}$  tons of coal.  
Orders on Washington and Georgetown Gaslight Company for 202 bushels coke.  
Orders on A. Geary Johnson, for one-fourth cord kindling wood.  
Orders on Saks & Co. and Jacob Strasburger for 26 pairs of shoes.  
Orders on Mrs. Beck for 300 bread tickets.  
Orders on Dupont Pharmacy for 10 prescriptions.  
Orders on George Kennedy & Son for \$5 worth of groceries.  
From central relief committee, 500 loaves of bread.  
Thirteen loads of groceries, etc., to central office and divisions.

Bills presented and paid by treasurer as follows:

|                               |            |
|-------------------------------|------------|
| No. 1, February 2, 1895.....  | \$988. 77  |
| No. 2, February 15, 1895..... | 908. 70    |
| No. 3, February 21, 1895..... | 1, 265. 58 |
| No. 4, February 21, 1895..... | 623. 64    |
| No. 5, March 2, 1895.....     | 1, 383. 06 |
| No. 6, March 18, 1895.....    | 1, 402. 08 |
| Total .....                   | 6, 571. 83 |
| Balance due .....             | 433. 17    |

The expenditures in the different parts of the city have been about as follows:

On bills presented from the—

|                          |              |
|--------------------------|--------------|
| Central office .....     | \$1, 459. 95 |
| First precinct.....      | 216. 00      |
| Second division .....    | 274. 00      |
| Third division .....     | 532. 69      |
| Fourth division.....     | 401. 63      |
| Sixth division.....      | 553. 79      |
| Eighth division.....     | 258. 42      |
| Ninth division.....      | 490. 46      |
| Tenth division.....      | 410. 95      |
| Eleventh division.....   | 1, 297. 78   |
| Anacostia division ..... | 322. 16      |
| County division.....     | 338. 62      |
| Total .....              | 6, 556. 45   |

Number of different families aided from the central office and the divisions from January 1 to March 16, 1895, are about as follows:

|                                |       |
|--------------------------------|-------|
| Central office.....            | 2,479 |
| First division.....            | 238   |
| Second division.....           | 300   |
| Third division.....            | 412   |
| Fourth division.....           | 480   |
| Sixth division.....            | 477   |
| Eighth division.....           | 450   |
| Ninth and tenth divisions..... | 434   |
| Eleventh division.....         | 1,251 |
| County division.....           | 50    |
| Anacostia division.....        | 81    |
| Total number of families.....  | 6,652 |

The Associated Charities has offices and stations covering the entire District of Columbia. First division, Georgetown; second division, 2015 H street NW.; third division, 117 K street NW.; fourth division, 607½ Rhode Island avenue; sixth division, 1225 Ninth street NW.; eighth division, 305 Ninth street NE.; ninth and tenth divisions, 225 Tenth street SE.; eleventh division, 490 L street SW.; Anacostia, besides the county, aided by mounted police.

L. S. EMERY, *Secretary.*

#### UNITED HEBREW CHARITIES.

The following is a statement of funds drawn on and paid by treasurer of the District relief committee to above association:

|  |         |
|--|---------|
| Feb. 11. D. Solomon, provisions.....     | \$30.00 |
| J. Loeb, provisions.....                 | 43.57   |
| Feb. 19. M. Oppenheimer, provisions..... | 9.25    |
| Mar. 2. Reizenstein, fuel.....           | 56.77   |
| Kronheimer, provisions.....              | 32.42   |
| Mar. 7. Coleman, fuel.....               | 66.55   |
|  | 238.56  |
| Wearing apparel.....                     | 14.43   |
| Provisions.....                          | 25.50   |
| Fuel.....                                | 5.23    |
| Total amount.....                        | 283.72  |
| Respectfully submitted.                  |         |

I. L. BLOUT, *President.*

#### REPORT OF THE DEACONESS' HOME, 1140 North Capitol Street, March 15, 1895.

DEAR SIR: We received from central relief committee, \$450, which we expended for food, fuel, and clothing, and distributed to the poor in the vicinity of this institution.

Yours, respectfully,

IDA E. MINER,  
*Deaconess.*

L. S. EMERY,  
*Secretary of Central Relief Committee.*

#### SOCIETY OF ST. VINCENT DE PAUL.

DEAR SIR: I compliance with your request of 13th instant, you are advised that the sum of \$1,551.03 was received by the Society of St. Vincent de Paul from the central relief committee, and that with said sum fuel and provisions were purchased and distributed to the needy in various sections of the city, the relief being given through the different conferences connected with the Society of St. Vincent de Paul.

Of the sum so received and distributed the whole has been accounted for and proper vouchers furnished to the treasurer of the central relief committee.

Very respectfully,

JAS. D. MANKIN, *Secretary.*

L. S. EMERY,  
*Secretary Central Relief Committee.*

## REPORT OF THE CENTRAL UNION MISSION.

|   |              |
|---|--------------|
| Number of grocery orders filled.....  | 9, 168       |
| Number of fuel orders filled.....   | 761          |
| Number of clothing orders filled .....  | 1, 741       |
| Total number of orders filled.....  | 11, 670      |
| Number of families relieved.....  | 5, 958       |
| Largest number of applicants in one day (estimated).....                                      | 1, 200       |
| Largest number of families relieved in one day.....   | 600          |
| Number of sewing women employed.....  | 90           |
| Number of men and women given other employment (not including the industrial department)..... | 29           |
| Number of meals given as relief.....  | 3, 003       |
| Number of lodgings given as relief.....   | 384          |
| Bills paid by the central relief committee.....   | \$3, 033. 00 |
| Value of provisions received from relief committee.....                                       | 106. 37      |
| Total received from committee .....   | 3, 139. 37   |

If the committee pays the last bills presented the amount paid will be increased to \$3,600. In addition to the amount of the provisions credited to the committee, two loads of provisions from the Star were received and invoiced at \$50.

The above figures are taken from the daily records kept, and are true according to the best of my knowledge and belief. The names and addresses of all the families included in the above statement are recorded and can be furnished to the committee if desired.

Respectfully,

E. D. BAILEY,  
Chairman of the Board.

## REPORT OF LEGION OF LOYAL WOMEN.

WASHINGTON, March 16, 1895.

DEAR SIR: In answer to your favor of the 13th instant, which was delayed in reaching me, owing to a mistake in the address, I have to submit the inclosed report as to the material and money for work and material, of the total value of \$200.05, received by our organization from the central relief committee. I desire to add that those employed from this fund were not members of the Legion; and in giving out the garments, after they were made, the women were encouraged, whenever the circumstances warranted, to do some work in payment for the clothing. If any clothing remains on hand we shall store it until next season's cold weather.

I have to thank your committee for giving us the power to increase our usefulness, and hope our work has been satisfactory to you.

Very respectfully,

ELLEN SPENCER MUSSEY, *President.*

L. S. EMERY,  
*Secretary Central Relief Committee.*

*Report of material and money received and work performed from funds furnished by central relief committee.*

ELLEN SPENCER MUSSEY, *President.*

The sums reported as unexpended balances of appropriations for the several distributing agencies were allotted to them respectively for future charitable use. Of the balance remaining in the hands of the treasurer of the central relief committee, \$1,000, or so much thereof as required, was placed at the disposal of the committee on plans of agricultural relief, the operations of which will be hereinafter described. The relief street work, in removal of snow and ice, at the expenditure of \$5,001, was conducted under the general supervision of Major McKenzie, superintendent of the street-cleaning department. Should there be occasion for such work in the future the relief-work gangs should be placed under the supervision of experienced employees of the street-cleaning contractor, who are retained during winter months at reduced pay. Their services could be secured at a cost not greater than \$1 per day each, and the excessive expenditure for supervision be thereby avoided.

Other experienced superintendents of outdoor work could be utilized from the Washington Asylum force with further effect in making the relief money available for the greatest possible number of the most needy class. There should also be more careful avoidance of hasty and indiscriminate hiring than was practicable under the circumstances attending last winter's operations, so that crowds of strangers might not be attracted to the city, but relief confined to worthy residents.

The reports of the various organizations and the experience of last winter confirm my conclusion of last year, that existing charitable associations, with which Washington is so liberally supplied, should continue to be utilized as distributing agencies by any central collecting and managing authority, and that, as to distribution, the efforts of the latter should be chiefly directed to the prevention of duplication in relief and the detection of imposture. Under the conditions that obtain in the District of Columbia no one method or sort of aid will suffice for all cases. In order that relief may be general and impartial it must be given in a variety of ways suited to various classes of applicants.

Where work for the able-bodied can be secured it should by all means be preferred; but it must always be borne in mind that those in greatest distress are unfit for hard labor, while very many of them are unable to engage efficiently even in the lighter indoor occupations.

Special characteristics of Washington life and population render peculiarly necessary discrimination and variety in temporary aid. Above all it is requisite to avoid anything tending to the creation of a pauper class, shiftless during the working season through reliance on charitable support in winter time.

#### MUNICIPAL HOSPITAL SERVICE.

As shown by the report of the sanitary officer to the superintendent of the Metropolitan police, public patients were sent to hospitals by that branch of the District service during the late fiscal year as follows: Freedman's Hospital, 936; Providence Hospital, 848; hospital of the Washington Asylum, 392; Garfield Hospital, 255; Emergency Hospital, 121; Homeopathic Hospital, 97; Columbia Hospital, 66; Children's Hospital, 31, and 5 to the Sibley Hospital.

Many patients in maternity cases are sent to Columbia and other hospitals from dispensaries. The Children's Hospital receives through the same channel, as well as from child-caring asylums. Accident cases are brought to the Emergency Hospital by its own ambulance service, and other medical establishments accept inmates coming by transportation, public or private, other than that of the sanitary office. Hence it is necessary to refer to the report of the several hospitals and to the tabulation of their statistics in order to accurately measure their services to the community. Nevertheless, making allowance for these circumstances, the sanitary officer's reports afford a fair indication of the number of free public patients cared for by the general hospitals of the District, respectively, in return for the appropriations made for their maintenance.

The figures given above show a total of 2,751 cases sent to hospital by the sanitary officer during the fiscal year ended June 30, 1895. During the succeeding quarter, the months of July, August, and September, 1895, there were sent to the hospitals in the same manner 1,102 patients, or at the rate of 4,408 cases a year.

The number exceeds that recorded during any previous quarter, and the fact shows that, even when no serious epidemic prevails, the hospital accommodations of Washington are no more than adequate to the demands upon them. During the summer and fall at all places of medical refuge the usual accommodations were fully occupied, and it was necessary to improvise additional ones in order to meet the urgent demand for treatment of public patients. There were also a sufficient number of cases of the minor infectious diseases treated by makeshift isolation in homes and improvised isolated quarters furnished by the medical charities to further enforce the necessity of final and sufficient action upon this long-postponed but vital subject. Concerning this most pressing public want the Commissioners, Congress, and the public are already so fully informed that further recommendation on my part for legislative action would be superfluous. Something has been done in the course of current administration toward mitigating the evil and providing partial remedy in various ways, and such action will be continued to be taken at every opportunity pending the removal of legal obstacles or further legislation to obviate or overpass them. Under such circumstances it does not seem necessary to add to the

statements made on pages 27 to 32 of my report of last year. The erection of the smallpox hospital under the direction of the health officer is one gratifying step in the work of guarding the District against plague.

Designed improvements in the administrative facilities of existing hospitals are adequately described in the letters of this office to the District Commissioners in explanation of the estimates which are hereinbefore cited at length. In the medical branch, as well as in other lines of charitable and correctional work, the present need of the District of Columbia is for the improvement in and perfection of establishments already in operation or authorized by law, and not for the creation of new ones. The only exceptions to this general statement known to me are those specifically set forth in this report and already considered by Congress.

#### MEDICAL AND LAY BOARDS.

There is apparent need in medical establishments having laymen as members of boards of direction for a more distinct line of demarcation between medical and general administrative control. As a rule, professional questions should be determined by professional men, and the medical staffs should settle the incumbencies of medical positions and the distribution of professional duties between them. On the other hand, men of business and of nonmedical professions are qualified to manage matters of general administration and financial direction, especially in establishments that depend in great degree upon private funds for their maintenance, while in several cases the ladies' aid societies are the most efficient auxiliaries in securing contributions necessary to the support of hospitals and dispensaries. Such difficulties as are incidental to this mixed control must be met as they occur for the sake of the great public good the composite system economically effects. They are matters for administrative remedy by constant prudence and mutual consideration among those devoted to the common aim of humanitarian service, rather than for legislation subversive of existing methods, and entailing very great increase of public burdens. The influence of the superintendent of charities, by advice and "general direction," should continue to be exercised to promote harmony and efficiency of management through observance of the proper distinction between the various branches of cooperative effort.

#### IMPROVE EXISTING INSTITUTIONS.

As a rule, the national capital District is adequately furnished by public provision and private benevolence with agencies for the care, training, and cure of unfortunates. It remains to continue to so administer those benevolent foundations as to utilize them to the full, with enterprise, but with economy. With the comparatively inexpensive but still extensive improvements that have been suggested, there will be no community in this country, if anywhere, better equipped relatively to its proportion and characteristics of location and population than the District of Columbia. Another year's experience in the methods that have been persistently, if undemonstratively, pursued since the superintendency of charities was instituted should go very far toward achieving this result and make plain to all the wisdom of the system of strict official supervision over the variety of agencies for dealing with many kinds of afflictions that befall "all sorts and conditions of men" in a metropolitan community. Already comparison

may be well challenged with any American city and suburbs of equal size in the economy, variety, and extent of relief afforded and in the marked decrease, if not entire disappearance, of duplication of charitable work or expenditure, of interference of institutions and associations each with the other, and misapplication of effort or expenditure, which, under the act of August 6, 1890, it is the duty of the superintendent of charities to combat and prevent. It is submitted that in no better way than through the "general direction" of the superintendent over the expenditures and operations of benevolent organizations, in constant cooperation with and aided by the extensive power and control of the Commissioners over civic administration and expenditure, could so much have been accomplished in so short a time, with so assured a prospect of still further benefit from persevering effort in the management of the simple, inexpensive, and effective machinery provided by law.

In this connection it is proper to refer to the general promptness and accuracy that have been secured in the rendering of quarterly administrative and financial returns upon the forms of this office, as well as special reports often called for. Steadily improved observance of regulations in this regard has not only benefited the charitable organizations, but also, by correcting error and careful preliminary consideration of disputed points, materially lightened the work of the office of the District auditor and the accounting and administering officials of the United States Departments with which institutions within the District have business relations.

The examination, item by item, of accounts of expenditures of all charitable uses and purposes for which provision is made in the District bill is in itself a work of much labor. It is of great advantage in keeping the superintendent currently informed of all the operations of the corporations and establishments concerned and in facilitating the practice of economy and sound judgment in administration. By disclosing defects and needs through the sure test of outlays and requisitions and showing how and where the best supplies and service may be obtained at the least cost, it enables the experience of any one establishment to be made of service to others and promotes uniform economy and efficiency, while indicating to the examining officer toward what special end in each instance his personal examination at institutions as a Government inspector should be directed. These observations are made in justice to the office I have the honor to hold, because only thorough knowledge of its current work can supply information of the amount of good it has power to accomplish under existing laws. Its operations, naturally quietly conducted, have in the great majority of cases been much facilitated by the cheerful and prompt cooperation of official and corporate managers, who have found the interests under their care promoted by the advice and service of the superintendent.

It is also my duty to express to the Commissioners of the District of Columbia acknowledgment of the appreciation, confidence, support, and direction they have given to my efforts in an arduous, difficult, and often delicate task.

In submitting this fifth annual report of the superintendency I am constrained to allude to my regret that sickness has compelled me to defer until other opportunity the discussion of some topics which it was designed to present for consideration at this time.

JOHN TRACEY,  
*Superintendent of Charities for the District of Columbia.*

THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

*Statistics of expenditures of charitable and reformatory institutions on basis of maintenance appropriations, District of Columbia bill, for fiscal year ended June 30, 1895.*

\* Daily average of dispensary cases, 144.

† Not including \$10,000 for construction.

‡ Not including \$4,000 for construction.

NOTE.—Per capita cost calculations for hospitals furnish no test of relative value of services, especially in emergency or surgical cases. Nor do dispensary cases, shown in annexed reports, enter into calculations of number of inmates. For statistics of the board of children's guardians, see report of that board, included in this compilation.

## 166 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

Statistics showing operations of groups of institutions of different classes on basis of appropriations for fiscal year ended June 30, 1895.

| Class of institution                                       | Appropriation. | Contributed from private sources. | Average daily number of inmates supported. | Paid for salaries during year. | Value of public property used. | Value of private property used. |

| Central Dispensary and Emergency Hospital ..... | 11,025            | 11,025                | 50      | 35,476         | 1,461       | 540.19                   | 12         | 11,013      |         |
| Homeopathic Dispensary .....                    | 2,157             | 2,157                 |         | 3,469          | 101         |                          |            | 2,157       |         |
| Woman's Dispensary .....                        | 1,183             | 3,568                 |         | 4,099          | 241         |                          |            | 3,568       |         |
| Total .....                                     | 28,899            | 38,802                | 483     | 88,504         | 4,002       | 8,588.74                 | 194        | 31,386      | 582     |

NOTE. Allotments of \$500 each from the District appropriation "for the relief of the poor" were paid to the Eastern, Homeopathic, and Woman's dispensaries, respectively. Garfield and Providence hospitals are not included in these tables because they are not provided for in the District bill, appropriations for them being made in the sundry civil bill.

- Woman's Dispensary, 328 Maryland avenue SW.
- Washington Asylum Hospital, Nineteenth and C streets SE.
- Workhouse, Nineteenth and C streets SE.
- Young Woman's Christian Home, 311 C street NW.

## REPORT OF THE INTENDANT OF THE WASHINGTON ASYLUM.

WASHINGTON ASYLUM,  
Washington, D. C., August 26, 1895.

GENTLEMEN: In submitting my annual report of the operations of this institution I beg leave to call your attention to the following estimates for its maintenance for the fiscal year ending June 30, 1897:

|  |           |
|--|-----------|
| For contingent expenses, including provisions, fuel, forage, groceries, meats, dry goods, shoes, lumber, hardware, drugs and medicines, gas, ice, repairs, tools, tailoring, extra service, and other necessary articles, based on a daily average of 522 persons supported the past year, at \$100 each per annum.. | \$52, 200 |
| For central heating station, boilers, piping, necessary appliances for heating by steam or hot water the buildings composing the hospital department of the institution, consisting of dispensary and physicians' quarters, nurses' quarters, operating room, and wards 1, 2, 3, 4, 5, 6, and 7.....                 | 4, 000    |
| For construction of vault in Potter's Field Cemetery.....  | 600       |
| For general repairs to buildings, steam heating and cooking apparatus, painting tin roofs, resurfacing walls and floors of almshouse.....  | 3, 000    |
| For beds, bedding, and furnishing for the hospital.....  | 500       |
| For salaries:  |           |
| One intendant .....  | 1, 200    |
| One visiting physician .....   | 1, 080    |
| One resident physician .....   | 480       |
| One clerk.....   | 720       |
| One clerk .....  | 600       |
| One matron .....   | 600       |
| One baker .....  | 420       |
| One overseer.....  | 900       |
| Seven overseers, at \$600 each .....   | 4, 200    |
| One engineer .....   | 600       |
| One first assistant engineer.....  | 365       |
| One second assistant engineer .....  | 365       |
| Six watchmen, at \$365 each .....  | 2, 190    |
| One night watchman.....  | 548       |
| One carpenter.....   | 600       |
| One blacksmith and woodworker.....   | 400       |
| One hostler and driver .....   | 240       |
| One female keeper at workhouse.....  | 300       |
| One female keeper at workhouse.....  | 180       |
| One trained nurse.....   | 420       |
| Four cooks, at \$120 each .....  | 480       |
| Two cooks, at \$60 each .....  | 120       |
| Five nurses, at \$120 each .....   | 600       |
| Total .....  | 77, 908   |

I have estimated the cost of the burial of the dead of the indigent poor of the District buried at public expense as follows:

|  |          |
|--|----------|
| For lumber, paints, hardware, service of carpenter, pay of driver, forage for horse, and repairs to wagon and harness..... | \$1, 500 |
|--|----------|

As stated in my last annual report, this work being of no possible benefit to the asylum, I trust that a separate appropriation may be made to defray the expense incurred, or that the service may be transferred to the health officer, where it would seem properly to belong, as all orders for coffins and permits for burial are issued from his office.

The number of coffins issued during the year was as follows:

|   |     |
|---|-----|
| Issued on order of the health officer.....                    | 766 |
| Issued for burial of deceased inmates of the institution..... | 67  |
| Total .....   | 833 |

The number of burials in potter's field during the same period was 666.

The improvements made during the year and paid for from the contingent fund were as follows: Harness room (12 by 16 feet) at the stable; new floors in twelve rooms, two halls, and corridors of the almshouse; also resurfacing the walls of the same, which work is now nearly completed.

A new steam-heating apparatus has been placed in the house occupied by the intendant during the past spring, and is expected to be quite an improvement over the old system of heating by stoves. The hospital wards, Nos. 3, 5, 6, and 7, have been painted inside and out, including the tin roofs of the same.

A new ward, for which an appropriation of \$4,000 was made by Congress, has been erected for the use of the white male patients, in place of the old frame building formerly used for that purpose. The work of construction was commenced early in November, completed in the spring, and first occupied June 12 last.

The tin roofing of the almshouse and other buildings, with the exception of the hospital wards which have recently been painted, need painting; and new flooring, baseboards, and wainscoting are needed in portions of the almshouse. I have estimated that this, with general repairs to buildings, steam heating and cooking apparatus, will cost \$3,000.

The estimate for increase in the number of officers asked for is to cover temporary appointments made from time to time as their services are required, and now paid from the contingent fund. The increased compensation asked for the blacksmith is to enable me to retain the services of a blacksmith and woodworker whose work is valuable, and whom we shall lose unless the increase asked for is granted.

The value of the work turned out by the blacksmith, other than regular smithing, has been largely increased by the fact that Mr. Rotherdale is a woodworker also, and has been able to not only keep carts and farm implements in repair, but has repaired extensively three single wagons, one buggy, the dead wagon, and has built three fine carts, worth at least \$75 each.

The work of the shoe and harness shop consisted of repairs to 750 pairs of shoes, making 2 pairs pole straps, 136 hame straps, 28 bridles, 48 halters, and 1 pair of breeching straps, together with a large amount of repairs to harness of all kinds.

I would also renew my recommendation of last year for an increase in the compensation of the nurses employed in the hospital, as recommended by Dr. Bovée.

The male prisoners of the workhouse have been largely employed in street grading during the past year, which, together with cleaning the streets adjacent the markets and pavements around the schoolhouses

and street crossings of ice and snow during the winter months, have accomplished a large amount of necessary work as follows:

|                                   | Days<br>worked. | Rate per<br>day. | Amount.     | Total.        |
|-----------------------------------|-----------------|------------------|-------------|---------------|
| In grading streets:               |                 |                  |             |               |
| Officers .....                    | 455             | \$1. 00          | \$455. 00   |               |
| Men .....                         | 22, 743         | 1. 00            | 22, 743. 00 |               |
| Horses .....                      | 1, 884          | 1. 00            | 1, 884. 00  | \$25, 082. 00 |
| In cleaning streets near markets: |                 |                  |             |               |
| Officers .....                    | 173             | 1. 00            | 173. 00     |               |
| Men .....                         | 725             | 1. 00            | 725. 00     | 898. 00       |
| In shops .....                    | 921             | . 50             | 460. 50     |               |
| On farm .....                     | 4, 184          | . 50             | 2, 092. 00  |               |
| In laundry .....                  | 9, 210          | . 50             | 4, 605. 00  |               |
| In sewing room .....              | 2, 456          | . 50             | 1, 228. 00  | 8, 385. 50    |
| Total .....                       |                 |                  |             | 34, 365. 50   |

Loads of material removed from markets, 173.

The following table is the estimated value and quantity of produce raised on the farm during the past year and consumed on the place:

| Articles.      | Quantity. | Value.    | Articles.      | Quantity. | Value.     |
|----------------|-----------|-----------|----------------|-----------|------------|
| Hay .....      | 10        | \$180. 00 | Pease .....    | 15        | \$30. 00   |
| Potatoes ..... | 150       | 120. 00   | Tomatoes ..... | 500       | 250. 00    |
| Onions .....   | 50        | 50. 00    | Eggs .....     | 1, 100    | 220. 00    |
| Beans .....    | 25        | 50. 00    | Chickens ..... | 200       | 50. 00     |

The labor of the female prisoners of the workhouse has been used to the best advantage of the institution. Some have been employed in the sewing room in making and repairing clothing and other necessary articles for the use of the inmates; others in the laundry and in scrubbing and cleaning the various buildings of the establishment. The principal articles of clothing, etc., made in the sewing room during the past year for the use of the inmates of the institution were:

| Alvin Rolfs .....        | do .....                 | Mar. 1, 1895    | Mar. 9, 1895            |
| William W. Burlew .....  | do .....                 | May 10, 1895    |                         |

By a visitation of tuberculosis to the herd of cattle 11 head were condemned by the Bureau of Animal Industry and killed. Said Bureau paid \$150 for the same, which was credited to the contingent fund, and 7 fresh cows were purchased to fill the places of those so slaughtered. One cow died during the year.

The live stock of the institution at present consists of 16 horses, 14 cows, 1 bull, 3 heifers, 5 calves, 23 hogs, and 43 shoats.

By reason of fewer commitments to the workhouse during the past year the daily average has been somewhat reduced. A corresponding increase will be found in the per capita cost of maintenance.

The average number of persons maintained in the institution during the year was 522, a considerable decrease from the previous year, due no doubt to the liberal provisions made for the class who frequent insti-

tutions of this character by charitable persons and private organizations during the past winter.

The amount expended from the contingent fund during the past year for extra guards, labor, etc., amounted to \$3,864.10.

The \$300 set apart for the relief of the poor was expended in the purchase of materials for coffins, etc.

The appropriation of \$4,000, appropriated for grading streets, alleys, and roads by inmates of the asylum, was expended under the direction of the engineer department for that purpose.

During the year 26 inmates of this institution were transferred to St. Elizabeth Insane Asylum.

Religious services have been held each Sunday morning and evening during the year at the different departments as usual. My thanks are extended to all taking part in the same.

I herewith forward report of the visiting physician, Dr. J. Wesley Bovee, of the operations of the hospital department, with his recommendations for its further improvement, and trust that it may meet your approval.

I also desire to thank Col. John Tracey, superintendent of charities, Col. William G. Moore, superintendent of police, and Mr. F. O. Becket, property clerk, for valuable assistance and aid during the past year.

I beg leave to tender to your honorable Board my sincere thanks for your cordial support in my efforts to make the institution worthy of the District of Columbia in all its departments—almshouse, hospital, and workhouse.

#### STATISTICAL TABLES.

Very respectfully,

WALTER H. STOUTENBURGH,  
Intendant Washington Asylum.

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## REPORT OF HOSPITAL.

WASHINGTON ASYLUM, August 22, 1895.

SIR: The report of the conduct of the medical department of the Washington Asylum for the fiscal year ended June 30, 1895, is herewith submitted:

During the year 769 patients have been treated in the hospital, and more than twice that number, suffering from ailments too slight for hospital treatment, have been treated in the various departments of the institution outside the hospital.

The number of deaths from all causes was 98.

A new ward for white male patients has been erected and bids fair to answer its purpose admirably.

The appropriation for a new ward for colored patients is now available, and it is hoped the building will be ready for occupancy before cold weather.

It is very desirable that the hospital buildings be heated by steam or hot water, and I trust that an appropriation for this purpose may be obtained from Congress at the coming session. When this is realized we may hope to secure one of the most important adjuncts to a well-equipped hospital, viz, a complete system of nurses and nursing.

Up to the present time I have not succeeded in securing good nurses for the salaries allowed, \$5 a month. Other hospitals in the city pay pupil nurses at least \$10 a month for the first few months, after that \$15 to \$30 per month. The woman or man

whose services are not worth more than 5 a month is not fit to be a nurse. The nurse stands next to the physician in the great responsibilities associated with a public hospital. I very strongly urge that this subject be brought to the attention of the superintendent of charities, that he may recommend, according to his judgment, an increase to at least \$15 per month for each of six nurses. With six well-paid nurses under the control of our present excellent superintendent of nurses, I am confident no fault could be found with that branch of the service.

The sanitary condition of the workhouses and almshouse has been improved and is really very good.

I am glad of this opportunity to mention the uniform courtesy shown me by the various officers of the institution, including yourself, and to call your attention to the excellent service of the resident staff of the hospital during the year.

The statistics of the hospital follow.

Very respectfully,

J. WESLEY BOVÉE, M. D.,  
Visiting Physician.

INTENDANT WASHINGTON ASYLUM.

#### STATISTICS OF THE HOSPITAL.

#### PROPOSED CHANGES IN ESTIMATES.

#### WASHINGTON ASYLUM,

Washington, D. C., September 17, 1895.

DEAR SIR: I beg that the following may be inserted under head of "Improvements," after paragraph relating to new hospital ward, in my annual report.

The removal of old wood fences that inclosed the hospital and male workhouse grounds and the substitution of a netted-wire fence with dressed and painted cedar posts, making a decided improvement in the appearance of the grounds; also, building poultry house, 16 by 20 feet, and an inclosed yard of wire fence, making in all 1,350 feet of fence.

There was also \$792.09 expended in provisions distributed to outside quarantined families, quarantine station, etc., on account of smallpox in the city, by request of the Commissioners of the District, and on orders from the health office. As this service was in no manner beneficial to the institution, but, on the contrary, an additional menace to its inmates from fear of introducing the disease among them, I respectfully ask that the institution may be relieved from such service in future, and that the amount of \$792.09 expended from the contingent fund for this service be placed among the credits due the institution, thus making its total credits \$36,828.66.

Very respectfully, etc.,

W. H. STOUTENBURGH,  
Intendant Washington Asylum.

Col. JOHN TRACEY,  
Superintendent of Charities.

REPORT OF COLUMBIA HOSPITAL FOR WOMEN.

COLUMBIA HOSPITAL,  
*Washington, D. C., August 28, 1895.*

SIRS: I have the honor to transmit herewith the annual reports of the several departments of Columbia Hospital for the fiscal year ended June 30, 1895, as follows:

The report of the medical board; the report of the treasurer; the report of the superintendent; the report of the superintendent as to moneys received from pay patients; the report of the superintendent relative to the training school for the year ended May 31, 1895.

I call your attention to the report showing the completion of the building for the training school for nurses, and to the evidences presented of the magnitude and value of the work done and that can be done by this important adjunct to the institution.

I also call your attention to the report demonstrating the necessity for an appropriation of not less than \$10,000 for repairs that are absolutely necessary for the preservation of the main building.

I am instructed by the directors to say that for the coming year an appropriation of \$25,000 for the maintenance of the hospital and training school and \$10,000 for the estimated cost of essential repairs to the main building are required, and the directors earnestly request your cooperation in obtaining these appropriations.

It is not to be forgotten that the ownership of the hospital and grounds is in the United States, and that the hospital has no revenues except from the appropriations made by Congress and the moneys received from pay patients. By reason of the stringency of the times the income from this last source has been and is likely to be during the next year greatly diminished.

Respectfully, your obedient servant,

NATH'L WILSON,  
*President Board of Directors.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

---

REPORT OF MEDICAL BOARD.

COLUMBIA HOSPITAL,  
*Washington, D. C., August 27, 1895.*

GENTLEMEN: The annual report of the medical board of the hospital for the fiscal year ended June 30, 1895, is hereby respectfully submitted.

J. WESLEY BOVÉE,  
*For the Medical Board.*

The BOARD OF DIRECTORS, COLUMBIA HOSPITAL.

| Diseases for which other operations were required--Continued.         |        |           |                          |       |           |        |
| Hematocoele .....   | 1      |           |                          |       |           | 1      |
| Hemorrhoids .....   | 1      |           |                          |       |           | 1      |
| Laceration of cervix .....  | 4      | 1         |                          |       |           | 5      |
| Laceration of perineum .....  | 2      |           |                          |       | 1         | 3      |
| Laceration of perineum and hemorrhoids .....                          | 1      |           |                          |       |           | 1      |
| Polypus, intrauterine .....   | 1      |           |                          |       | 1         | 2      |
| Procidentia, cystocele, and rectocele .....                           | 1      |           |                          |       |           | 1      |
| Procidentia uteri and colpocele .....                                 | 1      |           |                          |       |           | 1      |
| Pyosalpinx, double .....  | 1      |           |                          |       |           | 1      |
| Retained placenta .....   | 1      |           |                          |       |           | 1      |
| Salpingitis and endometritis .....                                    | 1      | 1         |                          |       |           | 2      |
| Salpingitis and laceration of cervix .....                            |        | 1         |                          |       |           | 1      |
| Salpingitis, retroversion, lacerated perineum, and endometritis ..... |        | 1         |                          |       |           | 1      |
| Stenosis of cervix .....  | 1      |           |                          |       |           | 1      |
| Tuberculosis mamma .....  |        | 1         |                          |       |           | 1      |

The following operations were required for cure of the above conditions:

|   |    |
|---|----|
| Alexander's operation, curettage and perineorrhaphy ..... | 1  |
| Amputation of cervix .....                                | 1  |
| Amputation of cervix and curettage .....                  | 1  |
| Atresia vagina (operation for) .....                      | 1  |
| Colporrhaphy and excision of hemorrhoids .....            | 1  |
| Colporrhaphy, anterior and posterior .....                | 1  |
| Curettage, legation, and excision of hemorrhoids .....    | 1  |
| Curettage and cauterization .....                         | 1  |
| Curettage and bladder exploration .....                   | 1  |
| Curettage and drainage .....                              | 17 |
| Curettage and packing .....                               | 2  |
| Dilatation and curettage .....                            | 1  |
| Enucleation of vaginal cyst and curettage .....           | 1  |
| Excision of fibroid of abdominal wall .....               | 1  |
| Exsection of breast .....                                 | 1  |
| Incision of abscess of recto-vaginal septum .....         | 1  |
| Le Fort's operation for vaginal closure .....             | 1  |
| Ligation and excision of hemorrhoids .....                | 1  |
| Perineorrhaphy .....                                      | 3  |
| Perineorrhaphy and curettage .....                        | 3  |
| Perineorrhaphy and excision of hemorrhoids .....          | 1  |
| Removal of mamma and axillary glands .....                | 5  |
| Removal of polypus, intrauterine .....                    | 2  |
| Trachelorrhaphy .....                                     | 5  |
| Trachelorrhaphy and curettage .....                       | 5  |
| Trachelorrhaphy, perineorrhaphy, and curettage .....      | 4  |
| Vaginal hysterectomy .....                                | 7  |
| Total .....   | 68 |

# REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA. 193

## Obstetrical report.

|   |     |   |    |
|---|-----|---|----|
| Patients in hospital July 1, 1894:          |     | Eclampsia, post-partal.....               | 1  |
| Delivered .....                             | 12  | Epulis .....                              | 2  |
| Undelivered .....                           | 14  | Excessive intestinal putrefaction.....    | 1  |
| Admitted during the year.....               | 328 | Fibroma uteri.....                        | 2  |
| Total to be accounted for.....              | 354 | Footling presentation.....                | 2  |
| In hospital July 1, 1895:                   |     | Harelip.....                              | 1  |
| Delivered .....                             | 15  | Hemorrhage, post-partal, secondary.....   | 3  |
| Undelivered.....                            | 8   | Hemorrhage from vagina in infants.....    | 5  |
| Discharged cured or delivered.....          | 308 | Hemorrhoids.....                          | 4  |
| Discharged relieved.....                    | 1   | Hirsute infant .....                      | 1  |
| Left hospital undelivered.....              | 22  | Hourglass contraction of uterus.....      | 1  |
| Total.....                                  | 354 | Hydrothionuria.....                       | 1  |
| Patients delivered during the year.....     | 299 | Hysteria.....                             | 1  |
| Abortions.....                              | 4   | Hyperemesis gravidarum.....               | 1  |
| Threatened abortions averted.....           | 8   | Inverted nipples.....                     | 3  |
| Sex and color of children:                  |     | Lacteal secretion in infant:              |    |
| Males—                                      |     | Male .....                                | 1  |
| White.....                                  | 49  | Female.....                               | 2  |
| Colored .....                               | 106 | Malaria, intermittent, quotidian.....     | 8  |
| Females—                                    |     | Mania, ante-partal .....                  | 1  |
| White .....                                 | 52  | Melena neonatorum, hemophilia .....       | 1  |
| Colored .....                               | 94  | Meningocele.....                          | 1  |
| Male, Arab.....                             | 1   | Miscarriage averted.....                  | 8  |
| Total .....                                 | 302 | Papilloma of external ear.....            | 1  |
| Operations:                                 |     | Phimosis.....                             | 15 |
| Forceps deliveries—                         |     | Placenta previa, marginal .....           | 1  |
| At inferior strait.....                     | 5   | Posterior rotation.....                   | 6  |
| At middle strait.....                       | 1   | Prolapsus funis.....                      | 2  |
| Abscess of eyelid, incised and curetted..   | 1   | Puerperal insanity.....                   | 1  |
| Adhesio lingual.....                        | 10  | Pyosalpinx cured spontaneously by rupture |    |
| Adherent placenta.....                      | 1   | in uterus.....                            | 1  |
| Amputation of supernumerary fingers...      | 3   | Recto-vaginal fistula, cured.....         | 1  |
| Circumcision for adherent prepuce.....      | 15  | Rheumatism, acute articular.....          | 2  |
| Curettage and drainage.....                 | 4   | Sciatica.....                             | 1  |
| Extraction of placenta (hourglass contrac-  |     | Secondary nipples.....                    | 2  |
| tion) .....                                 | 1   | Transverse presentation.....              | 2  |
| Incision of alveolar abscess.....           | 1   | Twins .....                               | 3  |
| Ligation and excision of hemorrhoids....    | 1   | Uremia, cured .....                       | 1  |
| Perineorrhaphy .....                        | 16  | Uremia and retinitis, albuminuric .....   | 1  |
| Podalic extraction.....                     | 2   | Version, spontaneous.....                 | 1  |
| Suturing of lacerated labia majora.....     | 1   | Infantile mortality, causes of:           |    |
| Version, bipolar cephalic.....              | 1   | Central venous thrombosis.....            | 4  |
| Version external.....                       | 3   | Atelectosis pulmonum.....                 | 1  |

## REPORT OF SUPERINTENDENT RELATIVE TO HOSPITAL.

COLUMBIA HOSPITAL,  
Washington, D. C., July 16, 1895.

GENTLEMEN: I have the honor to submit the following report:

During the past year there have been 573 patients admitted to the hospital and 568 have been discharged. The daily average is 42.36. The number of operations performed, 139; 69 of them laparotomies and 70 minor operations. One thousand six hundred and ninety new patients have been admitted to the dispensary and 1,852 treated. The amount of money collected from pay patients is \$2,089.

A great deal of repairing in different parts of the hospital has gone on during the past year, but owing to lack of funds much has been left undone.

There are many things that demand almost immediate attention and may be classed among the absolute necessities. Foremost among these may be mentioned the need of a general renovation of the interior of the hospital.

The work of the hospital has gone on as usual, and at times we have felt the need of more free beds, particularly in the obstetrical wards.

We shall be able to accommodate more patients when the nurses vacate the rooms they now occupy and move into the new building, which is almost completed and will in a very short time be ready for furnishing. Unless, however, we have an increase in funds as well as room we shall be as badly off as ever, for it will scarcely be possible to care for more patients than we have done in the past year on the same amount of money.

Careful observation has shown a decided indisposition on the part of many patients to pay even a small sum weekly, although circumstances point to their ability to do so. In this way many beds are taken up by people who might pay, thereby occupying other than the free beds, increasing the income of the hospital, and not depriving the really poor people of room which would otherwise be theirs. This is an established fact, but one that it is difficult to know how to obviate.

Among many improvements which might be made are better facilities for serving the meals in the free wards. We need an upper pantry, which would mean a more economical and satisfactory distribution of food with less work, and would be a very great improvement upon the present mode. This would cost very little, lighten work, give more space to the lower pantries, and enable us to serve the meals very hot. It would mean as well a considerable saving in crockery, as everything is sent from the lower floor now, and a considerable amount of breakage is unavoidable.

Both entrances for patients too ill to walk and obliged to come in on stretchers might be improved upon, more particularly the one by way of the Twenty-fifth street door. It is impossible to admit a patient in this way without great difficulty. The elevator is in a dark place and the few steps leading up to it difficult of access. The other entrance can only be reached from Twenty-fourth street over a roadway of cobblestones and is equally unpleasant and painful.

Among the pressing needs of the hospital may be mentioned an electric light introduced into the operating room, or a room fitted up on the upper floor with a skylight, thus securing all the light possible. Too much stress can not be laid upon the necessity of doing everything possible to facilitate speed in the operating room, where so often a few minutes gained may mean a great deal in the way of results.

The new building to be used for the nurses' home is almost ready to be furnished. It has been pronounced by many visitors who have gone over the building one of the finest homes in the country. The bedrooms are prettily finished and of good size, the bathrooms are well fitted with all modern improvements, and the plumbing throughout the house is excellent. When quite finished and ready for occupancy the home will compare favorably with those of New York, Philadelphia, Baltimore, and Boston. The report of the training school will be presented separately from the regular hospital report.

The inventory has not been completed owing to the absence of necessary memoranda, which it has been impossible to secure. I shall be able to present it to the committee within a few days, and must ask their indulgence until then.

Very respectfully,

ELLA UNDERHILL, *Superintendent.*

The BOARD OF DIRECTORS, COLUMBIA HOSPITAL.

#### REPORT OF THE SUPERINTENDENT RELATIVE TO MONEYS RECEIVED FROM PAY PATIENTS.

COLUMBIA HOSPITAL,  
Washington, D. C., July 16, 1895.

GENTLEMEN: I have the honor to submit the annual report of money received from pay patients during the fiscal year ending June 30, 1895.

Very respectfully,

ELLA UNDERHILL, *Superintendent.*

The BOARD OF DIRECTORS, COLUMBIA HOSPITAL.

REPORT OF THE SUPERINTENDENT RELATIVE TO THE TRAINING SCHOOL.

COLUMBIA HOSPITAL,  
Washington, D. C., July 16, 1895.

GENTLEMEN: I have the honor to present the report of the training school for the year ending May 31, 1895.

The school at present numbers 30 nurses, 18 under instruction at the Children's Hospital and 12 at Columbia. During the past year there have been 180 applicants. Twenty-two were accepted, 2 have left on account of ill health, and 1 has been dismissed. Weekly classes have gone on as usual under direction of superintendents of either hospital assisted by the head nurses.

Lectures have been delivered by the faculty as follows: Obstetrics, Dr. A. F. A. King; Gynecology, Dr. I. S. Stone; General surgery, Dr. J. Wesley Bovée; Anatomy, Dr. J. Foster Scott; Physiology, Dr. G. N. Acker; Diseases of the eye, Dr. Swan M. Burnett; Diseases of children, Dr. S. S. Adams; Special emergencies and fevers, Dr. J. Van Rensselaer; Materia medica, Dr. Stanton Hough and Dr. Barton. That our school is becoming well known is shown by the fact that several applicants have written from places far distant—Illinois, Texas, Canada—in fact very few, comparatively speaking, are from our own section of the country. We also have numerous applicants for post-graduate course in obstetrics. Many nurses from the Baltimore, Philadelphia, and Boston hospitals have applied for it, knowing the excellent service we command.

The graduates of the school now number 28 and have an *alumnæ* benefit and sick fund started in which all are interested. The commencement exercises were held at the Nurses' Home June 13, when we graduated our third class, numbering 11. The guests numbered about 250, the largest number we have had. Addresses were delivered by Commissioner Truesdell, who presented the diplomas, and Dr. G. N. Acker. The exercises were presided over by Mr. Nathaniel Wilson, president board of directors Columbia Hospital.

Two of the graduates have gained an enviable reputation by their work during the smallpox epidemic. Two others are holding responsible positions in hospitals, and many of them are doing private duty in this city.

The registry for nurses, having an office at the Children's Hospital in addition to our own, is growing steadily. During the past year we have supplied 84 calls, many of them for contagious diseases.

May we not count on your efforts to recommend the nurses belonging to this registry, and to do all in your power to help those who are making the very best use of the advantages they have been afforded.

The medical board have shown a most kindly interest in this undertaking, and have done their part toward making it the success it is.

Very respectfully,

ELLA UNDERHILL, *Superintendent.*

The BOARD OF DIRECTORS, COLUMBIA HOSPITAL.

---

REPORT OF COMMITTEE ON PERSONAL PROPERTY.

COLUMBIA HOSPITAL,  
Washington, D. C., June 30, 1895.

GENTLEMEN: The committee on personal property report for the past year that they have had careful oversight of the property of the hospital. The outlay for this department of the institute has been kept as small as possible, the property well cared for, the accounts properly adjusted, and the inventory is up to date.

Undesirable property has been carefully examined and condemned or appropriated for other uses.

Respectfully,

JOHN T. MITCHELL,  
*Chairman Committee on Personal Property.*

The BOARD OF DIRECTORS, COLUMBIA HOSPITAL.

# 196 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

## REPORT OF THE TREASURER.

COLUMBIA HOSPITAL,  
Washington, D. C., July 15, 1895.

GENTLEMEN: I have the honor to submit for the information of the Commissioners of the District of Columbia the following report of receipts and disbursements on account of Columbia Hospital during the fiscal year ended June 30, 1895, with an estimate of the amount required for the support of the hospital during the fiscal year ending June 30, 1897:

|  | United States appropriations.      |                                  | Pay patient fund. | Total.      |
|--|------------------------------------|----------------------------------|-------------------|-------------|
|  | For support and maintenance, 1895. | Building for nurses' home, 1895. |                   |             |
| RECEIPTS.  |                                    |                                  |                   |             |
| By balance on hand, July 1, 1894.....  |                                    |                                  | \$202. 29         | \$202. 29   |
| By amount appropriated by act approved August 7, 1894.....                           | \$20, 000. 00                      | \$10, 000. 00                    |                   | 30, 000. 00 |

## ESTIMATE.

For the necessary support and maintenance of Columbia Hospital for Women and Lying-in Asylum for the fiscal year ending June 30, 1897, the sum of \$25,000 will be required.

I am, with respect, your obedient servant,

JNO. D. MCCHESENEY, *Treasurer.*

The BOARD OF DIRECTORS, COLUMBIA HOSPITAL.

## OFFICERS, ETC., OF THE HOSPITAL.

*Officers.*—Nathaniel Wilson, president; Louis W. Ritchie, M. D., and M. W. Beveridge, vice-presidents; John T. Mitchell, secretary; John D. McChesney, treasurer.  
*Medical board.*—Gynecologists: Isaac S. Stone, M. D., and J. Wesley Bovée, M. D.  
 Obstetricians: A. F. A. King, M. D., and J. Foster Scott, M. D.  
*House staff.*—W. M. Barton, M. D., resident physician; Rudolf H. Von Ezdorf, M. D., first assistant resident physician; Irving W. Rand, M. D., second assistant resident physician.

*Superintendent.*—Miss Ella Underhill.

*Directors.*—Hon. Charles J. Faulkner, United States Senate; Hon. George Truesdell, District Commissioner; S. W. Woodward, F and Eleventh streets; F. H. Smith, 1418 F street; John F. Head, M. D., 2015 R street; Louis D. Wine, 916 F street; John T. Mitchell, 3234 N street; A. S. Solomons, 1205 K street; Henry A. Willard, 1333 K street; Louis W. Ritchie, M. D., 3259 N street; Nathaniel Wilson, 912 Seventeenth street; M. W. Beveridge, 1618 H street; Gen. John G. Parke, U. S. A., No. 10 Lafayette square; John D. McChesney, 2030 Sixteenth street NW.

*Board of lady visitors.*—Mrs. Charles A. Mann, president, 1517 L street NW.; Mrs. J. D. McChesney, vice-president, 2030 Sixteenth street NW.; Mrs. Fred L. Moore, secretary, 1680 Thirty-first street NW.; Mrs. Nathaniel Wilson, 912 Farragut square; Mrs. Byron Sunderland, 328 C street NW.; Mrs. J. E. Rankin, Howard University; Mrs. Florence Cairns, 1301 K street NW.; Mrs. George Doolittle, 1337 L street NW.; Mrs. Dr. John Trimble, 3009 O street NW.; Mrs. Emily St. Aubert Zane, 1743 Q street NW.; Miss Delafield, 1715 I street NW.; Mrs. Arthur Fendall, 1729 P street NW.; Mrs. A. H. Witmer, 1109 Sixteenth street NW.; Mrs. John Poor, 1724 Connecticut avenue NW.; Mrs. Dr. John Van Rensselaer, 2 Thomas circle NW.; Mrs. Dr. A. F. A. King, 1315 Massachusetts avenue NW.

#### COMMITTEES.

*Executive.*—Nathaniel Wilson, president; John T. Mitchell, secretary; John D. McChesney, treasurer; S. W. Woodward, F. H. Smith, and M. W. Beveridge.

*Rules.*—President of the board (ex-officio), Ex-Surg. Gen. Charles Sutherland, U. S. A., and John F. Head, M. D.

*Expenditures.*—F. H. Smith, S. W. Woodward, and M. W. Beveridge.

*Audit.*—Henry A. Willard and Louis D. Wine.

*Personal property.*—John T. Mitchell and Louis W. Ritchie, M. D.

*Ways and means.*—The treasurer (ex-officio), Hon. George Truesdell, and Ex-Surg. Gen. Charles Sutherland, U. S. A.

*Annual report.*—The president of the board (ex-officio) and John D. McChesney.

*Lady visitors.*—Henry A. Willard, Gen. John G. Parke, U. S. A., and Hon. Chas. J. Faulkner.

*Visiting committee for 1895.*—January, February, and March: Hon. Chas. J. Faulkner, Hon. George Truesdell, and John D. McChesney. April, May, and June: John T. Mitchell, M. W. Beveridge, A. S. Solomons, and Ex-Surg. Gen. Charles Sutherland, U. S. A.

# REPORT OF THE CENTRAL DISPENSARY AND EMERGENCY HOSPITAL.

WASHINGTON, D. C., *October 1, 1895.*

DEAR SIR: I transmit herewith report of Dr. Swan M. Burnett, president of attending staff of the Central Dispensary and Emergency Hospital, appended to which is a table summarizing the work of this institution for the year ended June 30, 1895; also report of the superintendent, Miss R. M. West, and of John B. Wight, the treasurer, giving receipts and expenditures.

Exhibits are also annexed showing the contributions of money, food, and materials during the year. It will be observed from these that the list of contributions is a long one, showing the widespread interest taken by the people in this institution, which is growing every year in proportion to the increased work and efficiency of the hospital.

The appropriation for last year was only \$12,000. It will be noticed that in the report of the treasurer various expenditures were made for payment of notes, interest, fire escapes, legal fees, etc.

The indebtedness of the hospital had been increasing, owing to demands upon its service, and money was temporarily advanced by some of the directors to meet emergencies.

This was repaid by means of an additional loan of \$5,000 made on the property, making the total debt upon the hospital secured by deed of trust \$20,000.

The property is worth \$75,000. The interest on the debt is paid from the funds of the hospital and increases its annual cost.

An electric elevator has been substituted for the old one, involving quite a large outlay, but will result in a very material annual saving to the institution. Fire escapes have also been erected, at a very considerable cost.

Perfect sanitary conditions must be preserved, and constant repairs to the building are necessary, and much money and effort are required to keep the premises in good order, as a majority of the thousands of patients who are treated at the institution are not particularly neat. The halls and part of the buildings have just been painted and put in good order, and more work is now being done in the way of overhauling the first story, which includes the kitchen, dining-room, and other rooms. The operating room on the second floor will be asphalted and tiled to put it in proper condition.

During the past year the ladies' auxiliary board has rendered effective service and mapped out desirable work for the future.

The subject of establishing a ward for the treatment of contagious diseases of a minor character was considered by the board, and it was not thought advisable to make such an offer to the Commissioners at the present time. The board of directors have decided that the work of the hospital shall be confined to emergency and dispensary cases, and for those which do not require long-continued treatment in the hos-

pital. Occasionally a patient is brought to the hospital under circumstances which make it necessary that he or she be retained here for a short time, but, as far as possible, our wards are kept in readiness for such cases as come within the original scope of the work which this institution is expected to care for.

Our efficient secretary, Mr. Randall Webb, after a long legal conflict in the case of the suit of Leitch & Son, who sought to enforce a lien against the hospital, has been successful in obtaining a judicial decision in our favor, which relieves us from the payment of a large amount of money.

During the past year the board has lost one of its most efficient and earnest members, Mr. E. Kurtz Johnson, who was deeply interested in our work for many years.

The members of the attending staff have all been devoted and efficient in attending to the duties devolving upon them. I may say the same of the members of the consulting staff; whenever called upon they are ready to respond with their advice and services.

During the past year rooms have been fitted up and furnished by William Galt, esq., by the executors of the late George A. McIlhenny, in memory of Mr. McIlhenny, and by C. C. Willard, esq., in memory of his son, Walter J. Willard. The thanks of the community are due for these very generous donations.

Maj. H. L. Cranford deserves special thanks for repairing the asphalt drive in front of the building free of charge.

More room is greatly needed to bring the hospital up to the standard of similar institutions in other large cities. Physicians and surgeons from the different sections of the Union express surprise at the large amount of work performed by the institution, and that it is not made a model in its appointments.

Careful attention is called to the mention made of this subject in the accompanying reports.

The need of additional stable accommodations and enlarged ambulance service is also set forth in said reports.

The appropriation for the year ending June 30, 1897, should not be less than \$15,000 for annual expenses, in addition to which several thousand dollars will be raised by donations and the ladies' auxiliary board.

It is also very desirable to have the \$20,000 debt of the hospital removed, as it bears interest at 6 per cent, requiring the annual payment of \$1,200.

Much valuable work has been done by this institution in the training of nurses and in clinical instruction to students.

These varied uses of the hospital, which do not interfere with its efficiency or materially add to its expense, are of great value to the public and of no little importance in the education of medical men and those having the care of patients.

In conclusion permit me to thank you for the assistance you have so uniformly rendered to the institution and to express the high appreciation of the service of the police and health departments.

Very respectfully,

B. H. WARNER, *President.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

## REPORT OF THE MEDICAL AND SURGICAL WORK DONE AT THE CENTRAL DISPENSARY AND EMERGENCY HOSPITAL FOR THE YEAR ENDED JUNE 30, 1895.

DEAR SIR: I herewith transmit a summary of the work done at the Central Dispensary and Emergency Hospital for the year ended June 30, 1895.

The hospital year has heretofore ended December 31, and our recent published report (a copy of which is sent with this) gives a detailed tabulated statement of the operations of the institution during the year 1894, and to this I would refer you for any desired information as to the special character of the work done in the different branches of the dispensary and emergency departments.

In an institution such as ours the work must unavoidably increase from year to year, and we find ourselves constantly under the necessity of making provision for its expanding growth. The proper equipment and carrying on of a dispensary and hospital to-day is something so different from what it was even ten years ago as to be hardly the same. The demands of science and the claims of humanity require more time, more space, and more apparatus. Our work has always exceeded our real requirements in these particulars, but never so much as to-day. Our present building is much too small for the enormous dispensary work. Under the arrangement at present in vogue each of the seven dispensary services has properly only two days in each week at its disposal.

So great, however, has the pressure of the attendance grown that most of the services have been compelled to hold clinics on other than regular days, some every day. This, however, has been effected at great inconvenience and overcrowding on some of these days, and is most unsatisfactory from many points of view. To have persons seriously ill sent away to remain three days without treatment because they did not come on the day set apart for the receiving of such patient not only works great harm and causes a prolongation of suffering, but defeats one of the prime objects for which the dispensary was founded. Each clinic of the dispensary department should have a set of rooms set apart for its exclusive use and hold a daily service therein. In order to obtain this some change must be made in our present quarters whereby the nurses' dormitories and the laundry will be removed outside the building, or ground adjoining the hospital purchased and the present building extended. In the opinion of the medical staff the latter is the most preferable plan—in fact the only plan that would really help us permanently out of our difficulty as to want of room for dispensary work and give us the new operating room which is so badly needed.

I would again call attention to the need of accommodations for our ambulance nearer the hospital than it is at present. Under the present arrangement of the ambulance being kept at the first precinct station, several blocks away, much valuable time is lost in answering calls. Moreover, the accommodation for the horse and driver, while the best the authorities can furnish, are far from being what is desirable or even necessary for health and comfort.

It is absolutely necessary that we have another horse. The faithful one we have had since the establishment of the ambulance service is now broken down with overwork, and we have been compelled to give him a rest, and even should he be able to come again into service there should be another to relieve him.

I would call attention to the valuable work being done in the Lionel laboratory, connected with the hospital, in the advantages of which all branches of the dispensary service participate.

The maternity service recently established in connection with the clinic for diseases of women has already demonstrated its usefulness, and has a promising future of good and valuable work.

The hospital management in general would like to express through you its appreciation of the promptness with which Sanitary Officer Frank has responded to every call made upon him for assistance in his department.

I am, sir, yours, most respectfully,

SWAN M. BURNETT, M. D.,  
President of the Attending Staff of the Central Dispensary and Emergency Hospital.

The BOARD OF DIRECTORS CENTRAL DISPENSARY AND EMERGENCY HOSPITAL.

## REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA. 201

Table showing work of Emergency Hospital from June 30, 1894, to June 30, 1895.

| Month.         | New patients. |          | Revisits.                | Emergency cases. | Redress-ings in emergency room. |

## REPORT OF JOHN B. WIGHT, TREASURER.

## To the Board of Directors:

I herewith submit a statement of the receipts and expenditures of the dispensary and hospital for the year ended June 30, 1895, as shown by my books and by the monthly reports submitted at each meeting of the board.

## Receipts:

|                                       |             |
|---------------------------------------|-------------|
| From United States appropriation..... | \$12,000.00 |
| From board of patients.....           | 540.19      |
| From miscellaneous sources.....       | 7,081.19    |
| From donations.....                   | 2,043.81    |
| Total.....                            | 21,665.19   |

## Expenditures:

|  |             |
|--|-------------|
| Amount expended from Government account..... | \$12,000.00 |
| Amount expended from private account.....    | 8,787.61    |
| Total.....                                   | 20,787.61   |

Balance on hand June 30, 1895..... 877.58

Yours, respectfully,

JOHN B. WIGHT, Treasurer.

# 202 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

## REPORT OF MISS R. M. WEST, SUPERINTENDENT.

GENTLEMEN: The fiscal year ended June 30, 1895, began for us with an unusual number of emergency cases, 316 in July, 1894; 315 in August, 1894, and ended with 222 during June, 1895. Some of these were directly the result of the excessively hot weather. For their rational and scientific treatment we have no proper room, and for want of better facilities the entrance hall was used as the only place in the hospital affording air, space, attachment for hose, and an outflow for water. This was extremely awkward, as people were passing in and out. To the ignorant the necessary proceedings might have seemed harsh, and might have called forth the unsparing criticism to which we are so often subjected.

No time should be lost in preparation when such patients are at our door. As we have been called upon to treat these conditions for several successive summers there should be a proper place, with the indispensable appliances, always ready. There is no available spot in the present building.

In noting the steady increase in the number treated it must be borne in mind that the "new patients" include the dispensary department only; the emergency cases are accounted for separately. Some of the latter are referred to the dispensary for further treatment, but the greater part are separate and distinct.

Actual numbers can give but little idea of the gravity of some of our emergencies, of the long, tedious surgical operations necessary, and the vigilant care afterwards. Night and day service is often required from the same people, and on Christmas, 1894, the house staff rendered continued service from Monday morning until Tuesday night, our record being for the thirty-six hours 29 cases, including several operations of importance.

With the increase and development of work it becomes more necessary that the entrances should not be free and open. The janitor's duties are therefore confined to them more particularly, and he is no longer at liberty to render assistance in other parts of the institution. In addition to emergency applications, from 10 a. m. until 4 p. m., there is a perpetual passing in and out of dispensary patients through the doors and stairway. They must be directed to the department where they can be relieved, and the emergencies called to the attention of the house staff instantly. Some of these regard institution property as common spoil. We have missed only articles of small worth, it is true, but vigilance is required to see that nothing more valuable is carried off.

It is expected that every telephone message shall receive instant attention, and throughout the twenty-four hours our wire is in constant use. After an accident we have to respond to inquiries from the newspapers, relatives and friends of the victim, and frequently from witnesses who ask only from curiosity. If the casualty be of any magnitude the calls are incessant, and one person must be stationed at the 'phone. No calls can be disregarded, as it may be of the greatest importance.

To comply with the regulations of the elevator inspector we have limited the use of the elevator to two men—the janitor and the utility man—who are experienced and over the age required. Some assistance is given in the house by the ambulance driver when his legitimate duties permit it. Every endeavor is made to keep the building in a proper and creditable condition of cleanliness, but the press of work and its spasmodic character prevent the order and system which is so much desired. These matters of domestic detail are brought to your attention with a view to an explanation of the necessity for the number of employees. To those unfamiliar with the hospital's requirements this may seem large, in proportion to the size of the building and the number of its permanent inmates, but we can not manage with fewer.

In this connection may be mentioned the laundry, which is still in the condition of a year ago in respect of its equipment. Its work has also grown far beyond its capacity. The dispensary department furnishes a large amount and the emergency is not behind. Many patients admitted late at night remain for that night only, but it is necessary to change the bed clothing before the beds can be occupied again. In a certain class of emergencies we require an extraordinary amount of bedding. For example, one case recently used seven sheets in five hours; each of these was washed and ironed by hand, entailing an enormous amount of labor. The ordinary laundry furniture would be impracticable in the present situation, i. e., directly over the ward containing patients.

The janitor and utility man still sleep on the ground floor, and this year, as last, at certain seasons they have been unfit to do their day's work thoroughly because of the unhygienic position of their rooms.

The increased appropriation enabled us to make some necessary improvements and to keep up the repairs. The entire first floor having been painted a cheerful color, it is possible now to keep the walls clean, and the entrance is more inviting than formerly. The stairways, upper halls, and wards need painting, and the flooring all over the house will need replacing at an early date. We hope to accomplish this in the near future. The wear and tear is perhaps greater upon this than upon any other hospital of the size in the District.

Two valuable acquisitions, the fire escape and the sterilizing apparatus, the ladies' auxiliary assisted us to purchase.

Donation day, appointed for May 11, was of great assistance. The articles given were all sensibly chosen and met our needs, reducing the marketing bills for two months quite perceptibly. A list of them is appended and of the donations received during the year.

We acknowledge gratefully the courtesy of the police department in permitting us to keep our horse in the stable of the first precinct, which is only large enough for their own use. It is, however, three squares away, and much time is lost in sending for the ambulance. During the hot months it is imperative that we should have a second horse, but we can not impose further upon the police department for its maintenance.

Respectfully submitted,

ROBERTA M. WEST,  
Superintendent.

The BOARD OF DIRECTORS, CENTRAL DISPENSARY AND EMERGENCY HOSPITAL.

# REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA. 209

Contributions to Central Dispensary and Emergency Hospital on donation day, May 11, 1895.

| Contributor.   | Donation.         | Contributor.                      | Donation.                    |

## OFFICERS, ETC., OF THE CENTRAL DISPENSARY AND EMERGENCY HOSPITAL.

*Officers.*—B. H. Warner, president; H. F. Blount, vice-president; H. Randall Webb, secretary; John B. Wight, treasurer.

*Directors.*—C. J. Bell, H. F. Blount, M. J. Boardman, A. T. Britton, Swan M. Burnett, Calderon Carlisle, John Davis, John W. Foster, William Galt, Mrs. J. R. Hawley, W. H. Hawkes, G. B. Harrison, J. Taber Johnson, H. L. E. Johnson, W. W. Johnston, James Kerr, N. S. Lincoln, G. L. Magruder, T. Morris Murray, D. W. Prentiss, A. A. Thomas, E. L. Tompkins, J. Ford Thompson, Miss M. J. Waite, B. H. Warner, H. R. Webb, H. L. West, W. C. Whittemore, John B. Wight, Mrs. E. O. Wolcott. *Ex officio:* Dr. W. C. Woodward, health officer, District of Columbia; John A. Frank, sanitary officer, District of Columbia.

*Consulting staff.*—Dr. J. Taber Johnson, Dr. G. L. Magruder, Dr. W. W. Johnston, Dr. D. W. Prentiss, Dr. N. S. Lincoln, Dr. J. Ford Thompson.

*Attending staff.*—Dr. Swan M. Burnett, president; Dr. Wm. H. Hawkes, secretary.

*Director of the eye and ear clinic.*—Dr. Swan M. Burnett.

*Director of the clinic for diseases of the throat and chest.*—Dr. T. Morris Murray.

*Director of the clinic for children's diseases.*—Dr. Wm. H. Hawkes.

*Director of the clinic for diseases of women.*—Dr. H. L. E. Johnson.

*Director of the surgical clinic.*—Dr. James Kerr.

*Director of the clinic for general diseases.*—Dr. George Byrd Harrison.

*Director of the clinic for nervous diseases.*—Dr. E. L. Tompkins.

*Resident physician.*—Dr. James Robb Church; Dr. Peter M. Smith, senior assistant; Dr. Edmond D. Shortlidge, junior assistant.

*Superintendent.*—Miss Roberta M. West.

*Assistants.*—To the eye and ear clinic: Dr. William H. Fox, Dr. C. R. Dufour. To the clinic for throat and chest: Dr. J. H. Mundell, Dr. Lincoln Johnson, Dr. John F. Moran, Dr. T. A. Claytor. To the clinic for diseases of children: Dr. Arthur Snowden, Dr. Francis Lieber, Dr. W. L. Robins, Dr. Philip Jaisohn. To the clinic for diseases of women: Dr. W. T. Gill, Dr. C. K. Koonen, Dr. F. S. Nash. To the general surgical clinic: Dr. E. M. Parker, Dr. James Stuart, Dr. Lincoln Johnson, Dr. T. B. McDonald, Dr. F. S. Nash, Dr. J. Ryan Devereaux, Dr. E. M. Hasbrouck, Dr. W. C. Masterson, Dr. W. B. French. Genito-urinary and skin clinic: Dr. S. E. Watkins, Dr. T. Ritchie Stone, Dr. A. S. Maddox. Rectal diseases clinic: Dr. G. D. Lewis, Dr. G. B. Heinecke. To the clinic for general diseases: Dr. L. W. Glazebrook, Dr. James Stuart, Dr. A. R. Shands, Dr. A. Rhett Stuart, Dr. E. W. Reisenger, Dr. S. L. Johnson. To the clinic for nervous diseases: Dr. T. Clark, Dr. J. B. Baggett.

*Director of the Lionel laboratory.*—Dr. William M. Gray; Dr. E. M. Parker, assistant.

## REPORT OF THE LADIES' AUXILIARY BOARD.

The BOARD OF DIRECTORS, CENTRAL DISPENSARY AND EMERGENCY HOSPITAL:

In view of the increasing needs of the Central Dispensary and Emergency Hospital the board of directors considered that an auxiliary board, composed of ladies, would materially aid in the carrying on of the work of the institution.

The duty of this auxiliary board would be to raise funds and to dispose of them as the organization might determine.

Accordingly 100 invitations were sent to prominent ladies of Washington to meet at the Emergency Hospital on November 20, 1894.

At this meeting a temporary organization was formed, and the secretary pro tempore was requested to send out 500 copies of the following circular letter:

"CENTRAL DISPENSARY AND EMERGENCY HOSPITAL,  
"Ohio Avenue and Fifteenth Street.

"DEAR MADAM: At a meeting of the board of directors of the Emergency Hospital it was decided to form a ladies' auxiliary board of seventy ladies, out of which an executive committee will be appointed. It is hoped that you will allow your name to be on this board.

"The work of the hospital has increased so much during the last year that some outside assistance must be given it, and it has been suggested that each lady should contribute \$1 yearly, and endeavor to secure other contributing members at the same rate, thus avoiding the necessity for raising money in any other way.

"These members of the ladies' auxiliary board will be entitled to vote for the officers of the board at the annual meeting, at which time the ladies will decide how the money contributed will be used for the year.

"Would you be willing to act on this board and attend the meeting to be held at the Emergency Hospital Tuesday, December 4, at 4 p. m.? Kindly reply as soon as possible to

"Miss A. BELL,

"Secretary pro tempore 1517 Thirty-fifth street NW."

In response to this many letters were received which showed the keen interest taken in this good work, and at the meeting held December 4, at the hospital, there were about 100 present. Mrs. J. R. Hawley, having been appointed president temporarily, took the chair. A constitution and by-laws were voted upon and adopted, and appointments for the first year were made as follows:

Mrs. J. R. Hawley, president; Mrs. B. H. Warder, first vice-president; Mrs. W. D. Cabell, second vice-president; Mrs. B. H. Warner, third vice-president; Mrs. James Kerr, treasurer; Miss Aileen Bell, secretary.

*Executive Committee.*—Mrs. C. M. Ffoulke, chairman; Miss M. E. Gale, secretary; Mrs. Gardiner Hubbard, Mrs. Z. B. Vance, Mrs. W. A. Gordon, Mrs. Archibald Hopkins, Mrs. E. F. Riggs, Mrs. S. S. Howland, Mrs. Uhl, Miss C. S. Story, Mrs. Mulligan, Miss F. P. Spofford, Miss Annie Warner, Mrs. G. L. Magruder, Mrs. Church.

On March 29 the auxiliary board met at the hospital to draw up some propositions to lay before the contributing members. On April 2 it was resolved that the executive committee should carry out the decision of the contributors at the annual meeting, and also that the board should consist of 50 instead of 70 members.

At the annual meeting, on April 2, 1895, the following election of officers took place: Mrs. Edwin F. Uhl, president; Mrs. B. H. Warder, first vice-president; Mrs. J. R. Hawley, second vice-president; Mrs. B. H. Warner, third vice-president.

*Executive Committee.*—Mrs. C. M. Ffoulke, chairman; Miss M. E. Gale, secretary; Mrs. W. D. Cabell, Mrs. Z. B. Vance, Mrs. W. A. Gordon, Mrs. Archibald Hopkins, Mrs. E. F. Riggs, Mrs. S. S. Howland, Miss C. S. Story, Mrs. Mulligan, Miss F. P. Spofford, Miss Annie Warner, Mrs. G. L. Magruder, Mrs. Church, Mrs. Parker.

The other members of the board are Mrs. George Andrews, Miss C. J. Bell, Mrs. Clark, Mrs. Childs, Mrs. Duane, Mrs. Bruce Gray, Mrs. Heaton, Mrs. Hammond, Mrs. Lisner, Mrs. Luquer, Mrs. Dr. Magee, Miss McCeney, Miss Purcell, Mrs. Phillips, Mrs. Van Haake, Mrs. Hall, Miss Whitney, Miss Waite, Mrs. Hawkes, Mrs. E. Stanton, Mrs. J. Taber Johnson, Mrs. Woodward, Mrs. Goddard, Mrs. Webb, Mrs. Harper, Mrs. Rockwood, Mrs. Julius Lansburgh, Mrs. Winlock, Mrs. Jed.

The contributing members number 489.

After some discussion the contributors voted to assist the board of directors in the purchase of a new sterilizing apparatus and fire escapes, as recommended by the auxiliary board.

The executive committee of 15 members selected by the president has held a number of meetings to transact the business of the board and to receive the reports of the subcommittee of two upon their visits of inspection to the hospital.

The work of the first year has been satisfactory and encouraging. At all times the efforts of the ladies have met with the hearty appreciation of the directors, and the relations existing between the two boards are most harmonious.

Mrs. EDWIN F. UHL, *President.*  
Miss AILEEN BELL, *Secretary.*

## A SKETCH OF THE CENTRAL DISPENSARY AND EMERGENCY HOSPITAL.

When we look upon our present hospital building, imposing in its very simplicity and unsurpassed by any hospital of its class in the perfection of its system and in its good and efficient work, it is hard to realize the very humble beginnings from which it has grown. In this, however, it does not differ from most institutions of permanent value in a community which have only followed the natural law of development to meet the actual needs as they arose and pressed themselves forward for recognition, and we stand to-day a realization and exemplification of that law of public necessity. The Central Dispensary and Emergency Hospital is not only a permanent and indispensable institution of Washington, but one which stands closer to her citizens of high and low degree than perhaps any other.

Like many another, if not most medical charities, the birth of the Central Free Dispensary was presided over by young medical men. The recently graduated physician has almost always an abundance of one thing, fortunately for him. If he had not enthusiasm, and plenty of it, his lot would be for the most part a very unhappy one. He loves science, he is strongly moved by his humanitarian instincts, he is ambitious that the one shall have all the benefits to be had of the other, and he is anxious to lend himself as the intermediary.

Some time in the spring of 1871 Dr. G. L. Magruder, fresh from a service at the Columbia Hospital, realized the necessity of extending to those afflicted with all ailments the advantages of treatment which were there offered to those suffering with the diseases peculiar to women. It was at his call, on or about April 15, that five other young physicians equally enthusiastic met, and with him formally organized the central dispensary. These five young men were H. H. Barker, Austin Brockenbrough, Robertson Howard, P. T. Keen, and Ralph Walsh. The institution that they then founded was the only general dispensary service in the city at that time, and remained, until recent years, the only place for outdoor relief open to the poor of Washington, regardless of age, color, or sex.

The majority of these men were alumni of the medical department of Georgetown College, and this institution most generously allowed them the use of the college building at the corner of Tenth and E streets for the beginning of their enterprise. The college gave them the free use of two rooms, with counter and the shelving for drugs. Dr. Magruder was the first treasurer, and we find, from an examination of the book of subscriptions, that on April 8 W. H. Baldwin is the first recorded name, with a donation of \$1. Dr. James E. Morgan and O. A. Daily follow with the same sum. The whole amount of donations, "principally by physicians and druggists," as the first report says, was \$150. This, with \$300 which was appropriated by the legislature of the District, but which realized only \$278, was the sum total expended during the year ending May 7, 1872, for the treatment of 511 patients.

During the first year several changes took place in the attending staff. Drs. Keen and Brockenbrough having removed from the city, Drs. Boarman and Ross were elected to fill these vacancies. The board of directors of the dispensary for the first year was as follows:

*Consulting medical board.*—Drs. Joshua Riley, Noble Young, L. Mackall, jr., J. Howard, T. Eliot, W. G. Newman, J. E. Morgan, and C. H. Cragin.

*Attending staff.*—Drs. G. L. Magruder, surgery; H. H. Barker and Robertson Howard, diseases of women and children; R. S. L. Walsh, eye, ear, and skin; C. V. Boarman, heart, throat, and lungs; W. H. Ross, head and abdomen; Lawrence Wilson, dispensary physician; E. C. Morgan and J. S. Stephenson, assistants to dispensary.

The directors (in addition to the medical staff) were: N. P. Chipman, John C. McKelden, George P. Fisher, M. G. Emery, J. Carroll Brent, W. J. Murtagh, Jesse B. Wilson, J. W. Thompson, J. W. Barker, Arthur Shepherd, George H. Plant, B. H. Stinemetz, W. M. Shuster, W. M. Morrison, and D. W. Middleton, jr.

In the early part of 1874 an effort was made to establish a German dispensary for the benefit of the German element of our population, but, principally through the efforts of Dr. George M. Kober and Dr. Kleinschmidt, the scheme was abandoned, and the funds that had been subscribed and collected (about \$800) and the influence of the originators were thrown in favor of the central dispensary.

The third annual report (there does not seem to have been a second), published in January, 1875, gives a summary of the work done during the first three and a half years of the existence of the dispensary, which was 2,236 new cases and a total of 7,425 prescriptions compounded. The members of the attending staff at that time were Drs. Barker, Boarman, Ross, Briscoe, Kleinschmidt, and Walter. Up to this period there does not seem to have been any regular organization of the board, as no list of officers appears on the report.

The dispensary from the beginning laid itself out on the broadest lines along which it proposed to develop, and has persistently refused to lend itself to the furtherance of any party or faction. It represented the medical profession as a body

and belonged to suffering humanity, without regard to sex, creed, or color. While it enjoyed the hospitality of the medical department of Georgetown University, it was not considered even by the university itself as in any way a part of that institution. The time soon came when its growing importance and widening scope raised the question in the minds of some as to the propriety of a public charity of its comprehensive character longer remaining under the aegis of some one medical school. It was therefore resolved, in 1876, to make the bold venture of removing to quarters of its own, and these were found in a wooden building, No. 514 Sixth street NW. At this time a reorganization, or rather a perfected organization, was effected, and the first officers of the board of directors were as follows: B. U. Keyser, president; A. S. Solomons, vice-president; T. J. Durant, secretary; D. W. Middleton, jr., treasurer. The attending staff was H. H. Barker, diseases of women; W. C. Briscoe, surgery; G. L. Magruder, children; W. H. Ross, heart and nervous system; Ralph Walsh, eye, ear, throat, and lungs, John Walter, general diseases, and Swan M. Burnett, general assistant to the staff. There was also a house physician and three assistants. There was also a board of lady visitors, of which Mrs. William Dennison was president, Mrs. D. R. McKee vice-president, and Miss Solomons secretary. The hospital year was made to end March 31, and on that day, in 1878, there had been treated for the preceding twelve months 3,677 new patients, for whom 12,382 prescriptions had been compounded. The expenses for the year had been \$1,285.54. It was on the 1st of March of that year that an amateur performance of "Martha" was given for the benefit of the dispensary, which netted \$600.

During this year, 1878, some changes were made in the staff on account of the removal of Dr. Ross to Mexico. Dr. Walsh gave the eye to Dr. Burnett, who was then made a full member of the staff. Diseases of the heart were transferred to the throat department and nervous diseases to general diseases.

In the early part of 1879 was given the first presentation in this country by amateurs of the opera of "Pinafore," for the benefit of the dispensary, which was at that time on the point of dissolution for want of funds. This performance netted over \$1,000, and its success was largely due to the energy of Miss Waite, who a short time before had begun her connection with the institution, for which she has ever since been such a zealous and untiring worker. There were many troublous and perilous times in those days, and many of us feel that but for the labor without stint, the interest that never flagged, and the enthusiasm which knew no obstacles, of her and two or three other faithful friends, we, as an institution, would exist only as a pathetic memory. We then received but a pittance from the District, and were almost wholly dependent upon voluntary contributions. It was not until 1879 that the District authorities allowed us so much as \$65 a month out of the poor fund. This was made \$1,600 a year in 1880, and gradually increased until it reached \$2,900 in 1883. It was then reduced to \$2,400, at which it remained until 1892.

It was in the beginning of 1880 that the first patient was admitted into the dispensary for operation and treatment. Up to this date operations were either done at the dispensary and the patients afterwards sent home, or the operations were done at the houses of the patients, which were usually the veriest hovels. On December 22, 1879, the board, through the recommendation of the staff and at the request of the ophthalmic surgeon, granted the sum of \$7.50 to fit up a caddy-hole in the attic for the reception of cases for operation. The first patient taken in was a woman for the operation of iridectomy. About the same time the ophthalmic surgeon held the first Sunday clinic given in the institution before a class of students, though students had always been welcome to attend the daily services of most of the directors of clinics. Thus early did the management of the dispensary recognize that one of its prime functions was educational. Some years after (1882) regular clinics were given for two seasons by all the members of the staff.

As far back as the summer of 1880 the question of establishing an accident hospital in connection with the dispensary was agitated among the staff. They recognized fully the crying need of such a hospital in the center of the city, and felt that upon them devolved the duty of initiating the enterprise. It is true they had no money to back up such an undertaking, but they had what is sometimes more than its equivalent—a conviction that it was the thing to do and the energy and determination to do it. We find it therefore recorded at a meeting of the board on the 11th of November, 1880, that "Dr. Burnett reported that the staff had, through a committee (of Brock, chief of police, in reference to the establishment in connection with the dispensary of an emergency hospital. These gentlemen regarded the scheme favorably and a committee was appointed from the board to take charge of the matter." The committee consisted of Messrs Drew, Wilson, Keyser, and Drs. Howard, Reyburn, Barker, Walsh, and Burnett.

\* The name "emergency" I think was given by Mr. B. U. Keyser, at that time secretary of the board.

Soon after this a project was started by the Commissioners and chief of police for the erection of a building at the corner of Ninth and K streets, to be used conjointly as a dispensary and police station. After a good deal of discussion of systems and plans the project was finally abandoned. This seems to have been a year fruitful of changes, for the question of being incorporated was brought forward,\* and after much opposition from some of the older and more conservative members of the board this was finally agreed upon, and some time after the articles of incorporation were filed. The committee on incorporation was: Messrs Durant and Duncanson and Dr. Walsh.

The old quarters on Sixth street were getting more and more inadequate for the work of the dispensary, and the establishment of an emergency hospital, which had been resolved upon, was an impossibility in that building. A committee was therefore appointed to take the matter of another and more suitable building into consideration, and finally at a called meeting on May 28, 1881, "Dr. Burnett stated the object of the meeting to be the consideration of the subject of the removal of the dispensary to Tenth street, opposite the gas office, and the establishment of an emergency hospital, and on motion it was ordered that the dispensary be removed to 416 Tenth street as soon as a lease of the building can be procured, for the purpose of establishing, as soon as possible, an emergency hospital in connection with the dispensary." Dr. Magruder was appointed a committee of one to secure the building. Messrs. Drew and Duncanson constituted a committee to solicit donations for supplies and furniture for the Emergency hospital.

On June 30, 1881, Messrs. Barker and Drew and Drs. Burnett and Magruder were appointed a committee to take charge of the removal to 416 Tenth street, on or before July 1.

On July 8, 1881, "it was ordered that the Commissioners of the District and the major of police be notified that the emergency hospital is now ready to receive and care for patients."†

The equipment for an emergency hospital was the scantiest possible, consisting of two cots in the rear room of the building. There was a resident physician and one assistant, who lived in the house, but who took their meals outside.

From the beginning there has been a hearty cooperation and the utmost harmony existing between this institution and the police department. Before the emergency hospital was established, many, perhaps a majority, of the minor accidents (or those supposed to be trivial) were taken to the police stations and the police surgeon sent for, or, in case he could not be found, a doctor of some kind was called in. Much unnecessary suffering was caused by this and the consequences of neglect (often unavoidable) were sometimes disastrous. None were so well aware of this as the police officers themselves, and to-day in each member of the force you will find a staunch friend of the emergency hospital. All the while the dispensary and hospital was on Tenth street, and even after its removal to Twelfth street, and before the ambulance service was established, the resident was allowed to go to the First precinct station to attend persons brought there by the force that needed medical or surgical attention.

It was the rule adopted by the staff at the time of the starting of the emergency department that the executive officer for the month should take charge of the emergency work during that period and be called when the resident physician did not feel that he should assume the responsibility of treatment. By courtesy, however, some members of the staff afterwards waived this privilege in favor of the director of the surgical clinic of the dispensary.

On December 9, 1881, Dr. Ralph Walsh resigned and Dr. E. C. Morgan, whose connection with the dispensary dates back to its origin, was elected to fill the vacancy thus made in the staff. The ear was at that time transferred to the eye clinic.

In December, 1881, Mrs. General Audenried proposed to furnish a room in the hospital for the care of patients admitted for treatment, and her generous offer was accepted by the board. This room was used principally for cases admitted from the dispensary department, but was also occupied by patients from the emergency department. Two other rooms in the building were also fitted up and used for the same purpose later.

---

\*At a meeting of the staff, November 5, 1880, Dr. Burnett offered the following resolution: "*Resolved*, That in the opinion of the staff it is absolutely necessary for the good of the institution that we be immediately incorporated." This resolution was ordered to be communicated to the board.

†In a book of "*Reminiscences*" recently published by Dr. S. C. Busey, of this city, an account of the origin of the emergency department of the central dispensary is given, which is erroneous in every important particular and is evidently based upon gross misinformation. The foregoing account is made from data taken from the records of the meetings of the medical staff and board of directors of the dispensary.

Mrs. James M. Carlisle gave a public concert for the benefit of the dispensary in the winter of 1881-82, which netted about \$800. The comic opera of *The Debutante* was given in 1882 and realized a considerable sum for the dispensary. It was during that year that our present efficient president, Mr. B. H. Warner, was elected to the office which he has continued to fill with his accustomed zeal and ability. His immediate predecessor had been Gen. William McK. Linn, and before him Mr. Jesse Simmons had served for several terms. Mr. A. S. Solomons at one time held the office, and was for many years an earnest worker. Mr. W. M. Galt in the earlier years served for several terms with great advantage to the dispensary. Mr. T. J. Lewis was the faithful secretary for many years, and following him was Mr. B. U. Brown, who is dear to the memory of all the older members of the board for his generous efficiency and a working interest in everything that pertained to the welfare of the hospital. By his death we feel that we lost a most valuable friend of the institution. His successor was Mr. F. E. Mahan, who was indefatigable and untiring in his labors, and it is due to his energy practically that we finally secured a building of our own on Twelfth street.

In May, 1883, there was a reorganization of the staff, whereby Dr. J. B. Hamilton took charge of surgery, Dr. George W. Johnston diseases of women, and Dr. William Lee, general and nervous diseases.

After careful deliberation and thorough discussion, the board resolved, on March 12, 1884, to purchase the building No. 121 Twelfth street, for the use of the dispensary and hospital for the sum of \$12,000. To raise this amount bonds were issued and subscribed for by members of the board. The committee on removal was: Dr. G. W. Johnston and Messrs. Warner and Mahan. The occupancy of the new quarters was completed the latter part of 1884.

In May, 1885, Dr. Hamilton resigned his position as surgeon and Dr. J. F. Thompson was elected to fill the vacancy thus caused.

Mr. Brown resigned his secretaryship in 1885, to the regret of his fellow-members of the board and our present efficient incumbent, Mr. Webb, was unanimously elected to fill the vacancy.

In December, 1885, Dr. E. V. Morgan, in charge of the clinic for diseases of the throat and chest, tendered his resignation on account of failing health. Dr. G. B. Harrison, at that time Dr. Morgan's assistant, and at present one of the attending staff, had charge of the department for several months prior to the resignation of Dr. Morgan. In the month of Dr. Morgan, which occurred several months later, the staff lost a valuable and highly esteemed member and the directorate an earnest worker. Dr. T. Morris Warner, the present director of that clinic, was nominated and elected to the vacancy thus caused.

The building on Twelfth street soon became totally inadequate for the work of the institution, and the question of a building designed for our use was often discussed, and finally, at the suggestion of Mr. B. H. Warner, who was then vice-president, the lot at the intersection of the avenue and Fifteenth street was finally decided upon and purchased. Through the efforts of the president and several other members of the board, an appropriation of \$20,000 was secured from Congress in 1886 for the construction of a new hospital. This, with the \$25,000 realized from the sale of the house on Twelfth street, constituted the fund for the construction of the proposed new building. In 1886, further efforts placed us on the regular taxpaying list with a yearly assessment of \$4,000, which was successively increased in order to meet the pressing demands upon the hospital to \$20,000, \$22,000, and \$25,000 for the current year.

In November, 1886, Messrs. Warner, Carlisle, and Whittemore and Drs. Magrader and Lee were appointed a private plan for the new hospital. To this committee others were added from time to time, and finally the plans were completed by Messrs. Schneider & Fox, and building operations began under the supervision of the Institute authorities. In June, 1888, Dr. Magrader, after years of valuable service, both as a member of the staff and the directorate, resigned from the attending staff on account of other pressing duties. He was elected a member of the consulting board, and Dr. W. H. Hawley succeeded him as director of the children's clinic. In January, 1889, Dr. G. W. Johnston resigned, and Dr. H. L. E. Johnson, who had been connected with the dispensary as student and assistant for several years, was elected to this charge of the ward for women. Dr. Thompson resigned from the active staff in October, 1889, and Dr. James Kerr was elected in his stead as director of the surgical clinic.

The committee on building were: Dr. Magrader, chairman; Messrs. Warner and Carlisle and Drs. Kerr and Lee. Dr. Johnson was chairman of committee on furnishing, Drs. Barnett and Kerr being the other members.

After the many delays and annoyances always found in the construction of a building of this importance, the hospital was finally completed and was thrown open to the public for inspection on the evening of March 24, 1892. In January of that year, however, the work of the hospital had been transferred to the new structure.

from the building at No. 407 Fifteenth street, which had been used temporarily for the purpose for some four months, the house on Twelfth street having been relinquished on account of projected improvements by its owners.

Through the liberality and energy, principally of Mr. A. A. Thomas, one of our directors, an ambulance fund was raised, and on the 8th of April the ambulance committee, with Dr. Kerr as chairman, reported that \$750 had been collected for that purpose, and an ambulance selected which would be ready for use in July.

In May the house staff and domestic management were reorganized and a matron appointed, Miss Gaddis being elected to that position. She some months later, resigned, giving place to Miss Mullen.

In November, 1892, at the request of Dr. Burnett, the board granted the use of the southeast room on the fourth floor for the establishment of the Lionel Laboratory and Library: the room to be fitted up and equipped at his expense. This was done, and the laboratory was put in operation during the following spring.

Rooms to be known as "memorial rooms" have been fitted up in the new building by the executors of the late George A. McIlhenny, who was for many years a generous contributing member, by Mr. William Galt, a member of the board and once its vice-president, and by Mr. C. C. Willard, in memory of his son, Walter J. Willard.

In March, 1893, the dispensary and hospital suffered a great loss in the death of Dr. William Lee, director of the clinic of general and nervous diseases. This clinic was then divided and Dr. George Byrd Harrison was elected to take charge of general diseases and Dr. E. L. Tompkins of nervous diseases.

On November 10, Miss Mullen's resignation as matron was accepted and Miss Roberta M. West, of the Philadelphia Hospital, was appointed superintendent of the hospital, her duties to begin December 15.

After removal to the new building the work of the hospital rapidly increased and has continued to do so each succeeding year, as the tabulated statement embodied in the report of the staff shows. Our work, both in the dispensary and emergency departments, has become more perfectly organized, and a well-regulated system has been the outcome of our experience and necessities. Our good works have carried our name into every corner and recess of our populous city, and there are no better known figures in our streets and avenues than our good gray horse Frank and his ambulance.

Our first donation day was on March 17, 1894, and it yielded \$458 in money and about \$500 in supplies.

In this short record it has not been possible to mention by name all the gentlemen who have, from time to time, constituted our boards of directorship. Many not occupying official position have been as faithful and energetic as those who did, and all have had the welfare of the institution at heart. Many noble women, too, have given their time, labor, and money to us. Everything has not gone smoothly at all times, but it would be safe to say that harmony has prevailed in the management of the affairs of this hospital to a much greater extent than in most institutions of its kind. It is the one hospital in our city in which the medical men who do the work have an equal share in the management of its affairs. The good effect of this is seen in many ways. It has brought laymen and medical men into more intimate relations and allowed the laymen to have a more perfect knowledge of the workings of the hospital, and has thus enabled the business men of the board to act with a more intelligent comprehension of its actual needs.

It has been our boast that we have done, under this organization, more for the money we had than would otherwise have been possible, and we are proud of the manner in which our finances have been managed. Mr. D. W. Middleton was our first treasurer. He was followed by Mr. Edward Temple; then came Mr. Eugene Morgan, and after him Mr. C. J. Keil, whose capable work we are all familiar with, served us under circumstances which he could not control forced him to give up his post. Mr. W. B. Gurley was then elected and served until last year, when he resigned, and we were fortunate enough to secure the services and interest of the present incumbent, Mr. John B. Wright.

In the matter of medical education we feel that we have done most excellent work. Our clinics and operations are attended by crowds of students, and in many fields we feel that our facilities for instruction are not surpassed by institutions of much greater pretensions; and our motto in this as in all other departments is still "Efficiency."

SWAN M. BURNETT, M. D.,  
*Chairman Committee on Publication.*

THE BOARD OF DIRECTORS CENTRAL DISPENSARY AND EMERGENCY HOSPITAL.

## REPORT OF THE FREEDMEN'S HOSPITAL.

FREEDMEN'S HOSPITAL,  
Washington, D. C., July 1, 1895.

GENTLEMEN: In submitting the annual report of the work done at the Freedmen's Hospital during the fiscal year ending June 30, 1895, I desire to call attention to so much of the past history of the institution as will serve to show how complete a change has been wrought in recent years, not only in the internal conditions here, but also in the sentiment with which the public mind has come to regard the hospital and its work.

I can speak all the more freely of these matters since my own management of the hospital has been of such short duration (less than a year) as to render it unlikely that anyone will be disposed to account for the improvements in the hospital service by attaching any undue credit to the present management of its affairs.

This hospital was established during the last years of the late war by the Freedmen's Bureau, and was located at first in that section of the city known now as Le Droit Park, and lying adjacent to the present grounds of the hospital.

Washington was at that time a military city, under military government, and it afforded in many ways an asylum for the large number of fleeing colored refugees from the neighboring Southern States, who were received here and cared for as contrabands of war.

In a mass of people such as these were—without homes, clothing, or food—sickness, disease, and death found easy victims, and it soon became a question of public concern as how best to care for the destitute sick of this multitude of people.

Under the pressure of such circumstances this hospital was established with funds provided by Congressional appropriation, and for the benefit primarily of the poorer class of colored people who needed the care and the comfort of hospital service. The limited means first given to the hospital did not enable it to provide the best, or even suitable, facilities for carrying on its work, but as the demands grew larger the means were increased and the facilities improved.

The change of quarters to the present site was made in 1869.

The general public was slow to appreciate and take advantage of the facilities offered here for the proper treatment of the sick; and the fact that the Freedmen's Hospital was, as its name implies, held to be conducted especially for the benefit of the lately freed people operated to discount the professional character of the whole institution, not only in the minds of the white people of this community, but in the minds of the more favored portions of the colored people as well. This prejudice against the hospital in the public mind has been gradually overcome by the marked improvement in the service afforded at the hospital by the increased facilities employed there, and by the location of the medical department of the Howard University within the hospital grounds. In a word, the fostering care of the Government has made of the hospital a national institution, overstepping the limitations of race, color, or creed, and opening wide its doors to the sick and helpless from every condition of life.

But no account of this new condition at the hospital would be true that did not properly emphasize the valuable services contributed through the professional skill and executive ability of my predecessors, one and all, in the management of the institution. Through the

efficiency of their administrations the hospital has grown from a small, unorganized institution, with a few patients of the poorer classes of colored people, into a well-organized, systematic institution, equipped with many modern facilities, classified into several departments of practical hospital work, and receiving as patients men and women of both races and of all classes.

Since assuming personal charge of the hospital in September, 1894, it has been my purpose to carry out and extend the policy of progress and improvement pursued by my predecessor, and to direct the work of the hospital along those broad, practical business lines that would make of it a first-class hospital in every essential particular.

With this object in view I have undertaken to establish a system of

#### INTERNS,

a corps of young graduates from various medical schools, who might be received here for practical work in the line of their profession preliminary to entering fully upon their professional career. In nearly every first-class hospital in this country and in Europe the practice has obtained of receiving the medical graduates as interns, giving them temporary residence within the hospital, and assigning to them duties in all the wards of the hospital and in every branch of its professional work. In this system the interns get the benefit of a varied practical experience along the line of their profession, and the hospital is benefited by being relieved of the necessity for keeping on its pay rolls a large number of practicing physicians who at best can give but a small part of their time to the regular work of the hospital.

In adopting this system at the Freedmen's Hospital I have been prompted, first, by the consideration of its business advantage to the hospital, and secondly, by the fact that it offers the best possible chance to place within the reach of young colored medical graduates an opportunity for advancement which unfortunately is not accorded them, so far as I am aware, in any other hospital in the United States, except in the Provident Hospital in the city of Chicago.

I am glad to be able to report that up to the present time the practice of the system at this hospital has yielded very satisfactory results, and that the outlook for the future is full of hope and encouragement.

The young men thus far selected have been intelligent, capable, earnest, industrious, and painstaking in their work, and reflect credit upon their profession. The manner in which they have discharged their duties has certainly demonstrated the wisdom of the plans as applied to this hospital, and has greatly minimized the labor heretofore performed by the managerial staff, since the major part of the scientific work is now done by the interns, and under such proper safeguards of direction as will prevent the occurrence of error. It is my intention to appoint annually, through competitive examinations, as many interns as the necessities of the work will require, such appointment to last one year, and to carry with it a small allowance to cover the personal expenses of the intern during his one year's residence at the hospital.

Another feature of modern hospital work which I have endeavored to add to this hospital is a

#### TRAINING SCHOOL FOR NURSES.

Like the intern system, the training school for nurses has its practical and its professional advantages. Just in proportion as the modern medico-scientist with his new and varied appliances has advanced

beyond the rural quacks of the past, so must the modern nurse, the physician's indispensable aid, advance beyond her red-bandannaed predecessor, whose "broken" doses and quiet vigils have done quite as much as disease has done to populate the other world. The physician must depend almost as much upon the nurse as upon his physics for the beneficial results of his professional service, and that nurse is best fitted for the work whose intelligence is conducted along professional lines; who knows most about the human system, its friends and its foes, its dangers and its blessings, and who adds to a tender sympathy a comprehensive knowledge.

The practice of medicine and surgery to-day demands the aid of such nurses; and the hospitals of the country, quick to discern the needs of the sick room, have undertaken to supply this great need by establishing schools for the efficient and comprehensive training of young women who are willing to follow as a life profession this humanitarian and scientific calling.

The establishment of such a school at this hospital has been successfully effected. I was led to take this step by the considerations above stated, and also by my desire to open a new industrial opportunity to the many capable young colored women who are being graduated year after year from our public schools, and against the majority of whom nearly every avenue of lucrative employment is closed.

In the nature of things only a few of these young women can obtain positions in the public schools each year, and the civil service offers still fewer chances to the District residents. From other industrial lines that call for the exercise of intelligent judgment and trained ability, such as stenographers, typewriters, and clerks in stores and business offices, and other similar vocations, these young women are rigidly excluded by the operations of a prejudice that can neither be denied nor controlled.

This training school for nurses affords not only a scientific but an industrial education of a high grade, and broadens the field of usefulness for a large number of hitherto unemployed persons who are eager to secure employment.

The introduction of this feature into the hospital work has produced very satisfactory results. These young women, with their quick intelligence, their eager ambition, and their faithfulness to duty greatly improved the condition of things in every ward in the hospital. This training school is under the superintendence of Miss Sarah C. Ebersole, a graduate of the Illinois Training School for Nurses; and her experience and splendid discipline have made the school a complete success.

My experience in hospital work has shown me the necessity for establishing

#### AN AMBULANCE SYSTEM

to meet the needs of the great number of emergency cases that necessarily arise in a city of the size and character of Washington.

Accordingly I fitted out an ambulance for the use of this hospital about the 1st of January last, and have held it subject to the call of emergency cases at all hours of the day and night. An experienced intern accompanies the ambulance on each trip it makes, and on returning to the hospital the patient is carried immediately to the examining room, where the attention of the physician in charge is given to the case.

Up to the present time the ambulance has answered an average of thirty calls a month. The ambulance now in use is not up to the modern standard of such vehicles, but it was the best that could be procured with the means at hand. Through the kindly cooperation of the District authorities I have reason to believe that a new and modern ambulance will be provided for the use of the hospital out of the present appropriation. This provision will greatly aid our work in that direction, and enable us to offer prompter and more satisfactory service to the general public.

With a view to systematizing the work of the hospital so as to produce the best possible results, I have organized it into the following departments: Medical, surgical, gynecological, obstetrical, dermatological, and genito-urina diseases, throat and chest, pathological, and bacteriological. And in these several departments the work is performed under the supervision of a medical staff composed of gentlemen who have achieved eminent success as practitioners in their respective lines of professional work.

The members of the staff are:

*Medical.*—Physicians: Consulting physician, T. B. Hood, M. D. Attending physicians, John E. Brackett, M. D., G. N. Perry, M. D., S. R. Watts, M. D., and Thomas Martin, M. D.

*Surgical.*—Surgeon-in-chief, Daniel H. Williams, M. D. Attending surgeons, E. A. Balloch, M. D., and N. F. Graham, M. D.

*Gynecological.*—Consulting gynecologist, J. Taber Johnson, M. D. Attending gynecologists, F. J. Shadd, M. D., and Julia R. Hall, M. D.

*Obstetrical.*—Consulting obstetrician, Thomas C. Smith, M. D. Attending obstetricians, John R. Francis, M. D., and E. F. King, M. D.

*Dermatological and genito-urina diseases.*—Robert Reyburn, M. D., and J. R. Wilder, M. D.

*Throat and chest.*—Louis P. Smith, M. D.

*Pathological.*—D. S. Lamb, M. D., and J. M. Lamb, M. D.

*Bacteriological.*—W. W. Allegar, M. D.

The working force of this hospital has been so reorganized as to serve the double purpose of securing the best possible service with the funds appropriated and of affording the greatest good to the greatest number. The appointment of a nonsalaried medical staff, such as usually help to do the work of every first-class hospital in this city and throughout the United States, has rendered necessary the practical abolition of the positions of the first and second assistant surgeons, whose duties are efficiently performed by the staff of over twenty physicians and the corps of resident interns under the supervision of the surgeon-in-chief. I am of the opinion that the work of this hospital can always be performed by the medical staff, the corps of interns, and a surgeon-in-chief. It would be manifestly unfair to the entire staff to accept their professional services gratis while two assistants are retained at high salaries for just such service as is rendered by the staff.

While this institution is, in a large sense, a race institution, there is no good reason for permitting sentiment to dominate sense in the control of its affairs, and every means should be resorted to to make the hospital first-class in every respect.

I would recommend that the executive business of this hospital be placed under the control of a surgeon-in-chief and a superintendent or warden, the duty of which latter officer should be to look after the business affairs of the institution.

I would here repeat the recommendation made in the last annual report submitted to you with reference to securing such legislation as shall provide for the needed improvements in the buildings now occupied by the hospital. There is very urgent necessity for a new modern brick building of sufficient dimensions to contain all the outlying buildings of the hospital. This building should be equipped with every modern facility for carrying on our work in all its varied departments, and contain suitable quarters for the residence of those actually engaged in the hospital work. At present the ward accommodations are afforded by several frame structures scattered about the grounds at more or less remote distances from the main building, and provided with but meager facilities for heating, lighting, and ventilation.

The hospital for years has been compelled to transfer patients on stretchers from the different wards to the operating room whenever a surgical operation had to be performed; and this difficulty has just been obviated by the erection of an inclosed passage between the main building and one of the wards, so that patients can now be carried to the operating room without being exposed to inclement weather. The cost of such new building as is needed would be \$75,000, and an additional \$25,000 would be needed to equip the building with the necessary facilities for the work to be done. I would also recommend that in future legislation touching the management of the institution the surgeon-in-chief be required by law to reside at the hospital. Under the present arrangement of forces here it is absolutely necessary that the services of the surgeon-in-chief be constantly available for emergencies and for the current routine work of the hospital. In my own experience during the past year there have been more than a hundred calls for immediate services on the part of the surgeon-in-chief between the hours of 5 p. m. and 7 a. m., and this fact clearly demonstrates that an executive officer, to be of any practical benefit here, should be at all hours available within the hospital inclosure.

In the event that it is not deemed possible at this time to obtain provision for a new hospital building such as I have mentioned above, I would respectfully recommend that the present buildings be heated by steam, so that the matter of regulating the temperature of the rooms in which the sick are accommodated may be reduced to a certainty. A proper and prompt control of the temperature of the sick room is a *sine qua non* in modern medical practice, and this is certainly not obtainable with the present means of heating now employed in the wards of this hospital.

The operation of the new plan of disbursement for the hospital by which the funds are disbursed by the authorities of the District of Columbia has proven entirely satisfactory, and I wish here to return to the Commissioners my thanks for the many official courtesies shown me in my official business at their office, and for the facilities afforded me by them in the discharge of my duties here. I desire to express my appreciation of the uniform kindness accorded me by Col. John Tracey, superintendent of charities; Auditor J. T. Petty, and Mr. F. O. Beckett, property clerk.

Rev. Dr. J. E. Rankin, president of Howard University, has taken a deep interest in the welfare of this hospital through its relation to the medical department of the university, and I wish to express my appreciation of the kind assistance rendered me by Dr. Rankin in many ways beneficial to the hospital.

During my temporary absence from the hospital through illness immediately after my appointment the hospital was placed under the management of Dr. John R. Francis, who was appointed first assistant

surgeon; and on my return to duty I found the affairs of the hospital in such a creditable condition as to call forth this special mention of the efficiency and fidelity with which Dr. Francis discharged the duties assigned to him.

I would respectfully call your attention to the appended tables, which fully show the character and quantity of the work done here during the past year. I wish to call your attention to the increasing number of surgical cases which have come to the hospital during the past year. This fact may be accounted for by the addition of the ambulance system to the hospital service, thus bringing to the hospital a greater number of emergency and surgical cases than have heretofore come under our supervision.

This experience has led to the completion of improved facilities for giving prompt attention to all emergency cases. A special ward has been fitted up for this service and a special detail of interns and nurses has been made with a view to affording immediate relief to those who come to us through emergencies.

Very respectfully, yours,

DANIEL H. WILLIAMS,  
*Surgeon-in-Chief.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## REPORT OF THE NATIONAL HOMEOPATHIC HOSPITAL.

WASHINGTON, D. C., *July 31, 1895.*

DEAR SIR: I have the honor to transmit herewith a statement of the receipts and expenditures of the National Homeopathic Hospital Association for the fiscal year ended June 30, 1895. Also a statement showing the number of patients treated in the hospital and dispensary during the same period.

The receipts of the year, including a balance of \$443.82 on hand at the beginning of the year, were \$21,089.23, and the expenditures \$20,506.88, leaving a balance in bank to the credit of the hospital on June 30 of \$582.35.

An examination of the receipts shows that \$8,000 came from Congressional appropriation, \$5,959.55 from pay patients, \$1,605.95 from earnings of nurses, \$1,400 from ladies' aid association, \$3,384.91 from borrowing, and \$295 from donations and miscellaneous sources.

The statement of expenditures shows that the amount paid for salaries and wages, medical and food supplies, wood and coal, ice, gas, and other items of maintenance was \$14,430.34; for hospital appliances, including printing and blanks, and furniture and carpets, \$879.58; for insurance, telephone service, and interest on loans, \$649.22; for general repairs, \$1,536.45; for plumbing, repairs to machinery, heating apparatus, and elevator, \$998.35; for painting exterior and interior of the hospital building, \$1,230.25. Other items of a miscellaneous character, including a note for \$500, bring the total of expenditures to the amount named above.

Eliminating the items for repairs and improvements to the building and other items not of a current character, there remains, as representing the actual amount paid for maintenance, \$16,166.12, which exceeds by over \$600 the income from pay patients, earnings of nurses, and the Government appropriation. The actual deficiency, however, is much larger than this, as there were bills amounting to about \$1,400 unpaid at the end of the year. The actual deficiency was therefore about \$2,000.

The receipts from pay patients and the earnings from nurses can not be counted on to materially increase in amount. The institution therefore needs, in order efficiently to do the work required of it, an appropriation from Congress of \$10,000, and it is respectfully requested that that amount be included in the estimates to be submitted and recommended by the Commissioners of the District of Columbia. The request for this amount of appropriation is not thought to be unreasonable in view of what has already been said as to the cost of maintaining the hospital, and especially so when it is considered that of the 458 patients treated in the hospital during the last year 295 paid nothing for their treatment, and only 163 were able to pay anything, and some of these only a nominal sum, and that all of the 5,593 dispensary patients were free. The purely charity work of the hospital costs about three times as much as that for which remuneration is received, or something over

\$12,000; and as the hospital is not maintained for the benefit of its trustees or medical staff, but in the interest of those who need and can avail themselves of its privileges, it seems only reasonable to ask that Congress appropriate a sufficient amount, approximately at least, to take care of this work.

The property of the hospital association is now in good condition, and the hospital is well equipped for both medical and surgical work. The surgical work is steadily increasing, and with it the cost of maintenance, the treatment of surgical patients being much more expensive than that of medical patients.

Very respectfully,

CHAS. LYMAN, *Vice President.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

*Receipts and expenditures of the National Homeopathic Hospital Association for the year ended June 30, 1895.*

## REPORT OF GARFIELD HOSPITAL

WASHINGTON, D. C., *September 5, 1895.*

DEAR SIR: In response to your request for information with regard to the operations of the Garfield Memorial Hospital, I take pleasure in forwarding the following report of its work for the year ended June 30, 1895:

|  |        |
|--|--------|
| Patients remaining June 30, 1894.....                  | 57     |
| Patients admitted during year.....                     | 1, 114 |
| Total .....  | 1, 171 |
| Patients discharged—                                   |        |
| Cured .....  | 634    |
| Improved.....  | 294    |
| Unimproved .....                                       | 63     |
| Untreated .....  | 31     |
| Companions .....                                       | 5      |
| Number of deaths.....                                  | 63     |
| Patients remaining.....                                | 81     |
| Total .....  | 1, 171 |
| Number of white patients.....                          | 953    |
| Number of colored patients.....                        | 218    |
| Total .....  | 1, 171 |
| Number of male patients.....                           | 684    |
| Number of female patients.....                         | 487    |
| Total .....  | 1, 171 |
| Number of free patients.....                           | 842    |
| Number of pay patients.....                            | 329    |
| Total .....  | 1, 171 |
| Daily average number of free patients.....             | 55. 6+ |
| Daily average number of pay patients.....              | 16. 6+ |
| Total daily average number of patients.....            | 72. 2+ |
| Death rate, per cent, 0.0538.                          |        |
| Total number of hospital days, 26,376.                 |        |
| Average time of each patient in hospital, 22.5 + days. |        |

During the year the demands upon this hospital for care of the sick and suffering poor have been greatly increased, so much so as to make it impossible to meet all of them with the limited income.

As an illustration of this increase of work, the figures for the year 1893 may be compared with those for 1894 and the first six months of 1894 with the first six months for 1895.

In 1893, 479 patients were admitted; in 1894, 777. In the first six months of 1894 there were 269 admissions; in the first six months of

1895, 606, or an increase of 337 patients. During the fiscal year ending June 30, 1894, 456 patients were admitted; during the fiscal year ending June 30, 1895, 1,114, being an increase of 658 admissions.

Beginning July 12, 1894, a dispensary service was opened, and from the above date to July 12, 1895, 1,340 new patients were treated.

Following are the reports of the several departments of the hospital for the year 1894.

Very respectfully,

JOHN M. HARLAN,  
*President.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

#### REPORT OF THE SUPERINTENDENT TO THE BOARD OF DIRECTORS.

GARFIELD MEMORIAL HOSPITAL, *January 1, 1895.*

The annual report of the superintendent for the year 1894 is respectfully submitted.

During the year just past several important steps have been taken and numerous indications of an increasing prosperity have become manifest. Although very little has been done in the direction of construction, considerable time and money have been spent in improving the appearance of the hospital grounds.

The approach to the administration building, instead of being straight and precipitous, has been converted into a winding driveway, graded and graveled, with an inclination of only 5 or 6 feet in 100. This leads up to the wide terrace, which is especially designed for the convenience of carriages. In the center of this terrace a large marble fountain has been placed through the generosity of one of the members of the board of directors, Mr. H. A. Willard.

A shed for carriages occupies the west end of the terrace. All the banks have been sodded and every effort has been made to add to the attractiveness of the surroundings. A flight of brownstone steps, a gift of another member of the board, leads up to the main building. This last autumn the District Government completed the grading of Sherman avenue, the street on the east side.

This, in addition to destroying a beautiful row of maple trees, may be a great expense to the hospital on account of the necessity of grading and sodding a large area of ground facing that avenue.

The new administration building, which was occupied for the first time last May, contains the offices, lecture rooms, dining rooms, and apartments for the officers and nurses. While this building was in course of construction two wards were used as storerooms, thus temporarily limiting the capacity. Since May these wards have been reopened, and in addition a floor of private rooms in the Ladies' Aid building, which was formerly used by the nurses. These rooms have been neatly furnished and are intended for a class of patients who are not able to pay the usual price for a private room and who for many reasons object to the publicity of a free ward. The price, per week, for these rooms is \$10. The scale of prices now is from \$10 to \$25 per week, according to desirability.

With the increasing accommodations and facilities for treating patients, there has been an almost constantly increasing number of admissions. Among the pressing needs of the institution to meet the constantly increasing demands the following may be mentioned: Our present operating room has many objectionable features. It is in the direct line of travel between the main building and the free wards. Visitors and patients going to the free wards in the Miller building are compelled to pass through the operating room, or accept the unpleasant alternative of making a detour of the buildings, or going upstairs and through one of the private wards to reach their destination.

The present room has no skylight, and as vertical light is very essential in some of the complicated operations of abdominal surgery, the defect is apparent.

The Garfield Hospital, in addition to its charitable functions, is an educational institution. Medical students attend clinics here, and the present amphitheater is not suitable, nor sufficient. The operating room now in use would serve a very satisfactory purpose as an outpatient department.

There is great demand for a new mortuary.

The kitchen building is poorly adapted to the present needs of the institution.

The introduction of an electrical plant would obviate the difficulty which is constantly arising from the use of gas. Aside from electricity being a better illuminant, it could be made use of in running elevators and electrical fans, the latter of which are very desirable during the hot days of summer.

## 240 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

A detailed report of the medical work will be found elsewhere.  
Great assistance, as in past years, has been rendered by the ladies' aid society, and to it the hospital is indebted for all of its house furnishings.  
Respectfully submitted.

A. L. STAVELY, M. D.,  
*Superintendent.*

### REPORT OF THE PRESIDENT OF THE BOARD OF LADY MANAGERS.

WASHINGTON, *January 1, 1895.*

*To the Garfield Memorial Hospital Board:*

Ten years have passed away since my first report to your honorable board, in which time we have witnessed wonderful strides in the growth and efficiency of the Garfield Memorial Hospital.

Every year the capacity has been enlarged, until to-day we find facilities for the treatment of more than a hundred patients and the accommodation of forty pupils in the training school and home for nurses, and ample quarters for all the necessary employees for such an institution.

The original wards and administration building have been supplanted by a magnificent edifice, which combines in its construction all the requisites for the training school and administration of the hospital. And while it is not as extensive as some other hospitals with national reputations, in far-reaching charity and satisfactory results it is surpassed by none.

The report of the physician in charge and superintendent of the training school furnish all the evidence required to secure the generous interest of the public and the Congress of the United States, without whose support we should be unable to continue the work on the present liberal scale.

The board of lady managers have at no time relaxed their energies in behalf of the good work, and have now in hand important projects to obtain money with which to furnish supplies and add comforts to the patients.

Earnestly soliciting a continuance of national and private benefactions, and pledging the board of lady managers to unflagging effort in behalf of the Garfield Memorial Hospital,

I am, respectfully,

MARY S. LOGAN.

### REPORT OF THE SECRETARY OF THE BOARD OF LADY MANAGERS.

WASHINGTON, *January 1, 1895.*

The duties prescribed for your recording secretary are not such as to call for an extended report. In June last the present incumbent succeeded Mrs. Mary Logan Tucker, whose devoted services to the hospital will be greatly missed.

Her last report was made early in the summer, and no further meetings of the board of lady managers were held until October, at which time the furnishings of the training-school building were completed.

I would particularly call your attention to the reports of the physician in charge and the superintendent of the training school, wherein they refer to the excessive number of patients treated during the summer months.

The hospital has at no time been so perfectly equipped nor so well administered as at present. The board of lady managers is quite complete, the members of which continue to manifest great interest in their duties, and vie with each other in their unselfish devotion to the cause.

Respectfully submitted.

L. S. ALDRICH, *Secretary.*

Balance December 31, 1894..... 4,448.10

In the United States Treasury..... 3,382.36  
In Riggs & Co.'s bank..... 1,065.74

Total..... 4,448.10

The books and vouchers of the treasurer, Samuel R. Church, from January 1, 1894, to November 1, 1894, and of his successor E. M. Dilli, from November 1, 1894, to December 31, 1894, have been examined and the foregoing amounts found correct.

JNO. A. BAKER,  
*Chairman Finance Committee.*

## REPORT OF THE MEDICAL STAFF.

*To the President of the Board of Directors :*

A detailed report of the work done in the wards and private rooms of the hospital during the past year is herewith presented. It will be seen that there has been a rapid increase in the number of patients, and a corresponding growth in the extent and character of the medical work.

In the last six months of 1894, 29 more patients were admitted than during the whole of the year 1893. Exactly twice the number of pay patients were treated in 1894. In 1893, 479 patients were admitted; in 1894, 777 were admitted, an increase of 298.

The largest number admitted in any one day was 7; the largest number remaining any one day was 81; the largest number of admissions in any one month (September) was 101.

During the year 56 cases of typhoid fever were treated, of which number 9 were remaining January 1, 1895, and all but one of these convalescing.

Three deaths from typhoid fever occurred in 1894, making a death rate of only 5.35 per cent.

The usual routine treatment employed was that of Brand, consisting in the use of cold-water baths. One case which is supposed to have died of typhoid fever had symptoms resembling intestinal tuberculosis and a family history of tuberculosis; but owing to the fact that the patient was the member of a family stricken with typhoid fever, that diagnosis was made. Excluding the uncertain case, the mortality would have been only 3.7 per cent.

On the 12th of July, 1894, by the suggestion and on the responsibility of the medical staff, a free dispensary was opened, and up to the 1st of January, 1895, 570 new cases were treated, 976 prescriptions filled, and over 1,300 visits made by applicants for treatment.

A pathological and bacteriological laboratory has been thoroughly equipped, and possesses nearly all the modern conveniences for thorough scientific, clinical investigation. Dr. Philip Jaisohn has been appointed pathologist, and this work is under his supervision.

In consequence of the increasing number of patients, there has been an increasing demand upon the training school for nurses.

An arrangement has been entered into by which the Garfield school supplies the Home for Incurables and the Washington Hospital for Foundlings. As a result of these two facts the number of nurses has been increased from 13 to 30.

A directory for nurses has been started, at which graduates of all reputable training schools are allowed to register. The object of this directory is to supply physicians so desiring with experienced nurses.

The hospital has many needs. There are excellent conveniences for the treatment of private and but few for the treatment of free obstetrical cases. Three free cases were admitted and delivered between the opening of the hospital and May 21, 1894.

Since the latter date 13 free patients have been delivered. The object in admitting free obstetrical cases, apart from its being a desirable feature of a general hospital, is to give the nurses a thorough training in obstetrical nursing. A ward especially designed for this purpose should be constructed large enough for the accommodation of twelve or more patients.

Our free wards, which are four in number, accommodating between sixty and seventy patients, have on many occasions been much crowded, suggesting the necessity of further extension. It is hoped that it will not be long before a new wing for free patients shall be erected, so as to give needed room, and to allow for a better accommodation and separation of the different classes of cases.

The dispensary service has so far been supported by the contributions of the medical staff. The feeling has been that as no dispensary existed in this part of the city such a service would be of great value to the poor, and would at the same time bring to the hospital wards cases which would otherwise be without proper medical attendance in their own homes. Looking forward to the time when the Garfield Hospital will be the largest general hospital in Washington, such dispensary work will become a necessary part of its duty. The fact that nearly 600 patients have applied for relief during the first six months shows that no mistake has been made in inaugurating this new department, and it is hoped that the board of directors will give it cordial support.

The dispensary cares for the minor ailments of the poor, gives assistance in emergencies, wounds, and injuries, and when convalescents no longer need treatment in the hospital they can be transferred to the "out-door service;" the hospital is thus relieved of expense, while the patient continues to receive care and watching until his complete recovery.

The reputation of a hospital both at home and abroad depends upon the efficiency of the work done within its wards and upon the energy and enthusiasm of all those

connected with its administration. The zeal which has marked the work of the past year is a happy augury of future success.

The medical staff testifies to the earnestness and efficiency of the superintendent and chief medical officer, Dr. Stavely, to whom much of the past year's success is due. The assistants, Drs. Elliott, Behrend, and Burch, deserve special commendation for the manner in which they have performed their arduous duties. For the satisfactory superintendence of the training school and the capable organization of the nursing force of the hospital thanks are due to Miss Nevins, who has met every expectation in her department.

Respectfully,

WILLIAM W. JOHNSTON, M. D.,  
President of the Medical Staff.

Tabular statement of number of patients admitted to the Garfield Hospital from the beginning, June 18, 1884, to January 1, 1895.

Vaccinations are not included in the enumeration.

At the last annual report the training school numbered 13 nurses. Six of these have completed the two years of training and have received the diploma, namely: Mary B. Ridout, Nellie C. Kennerly, Charlotte L. Prentiss, Martha C. Woodward, Violet Meredith, and Ida A. Danielowska.

With the growth of the hospital work marked changes have taken place in the training school. More than 200 applications were received; 26 served the month of probation, 20 of whom were accepted.

The increased number has made possible the division into junior and senior classes with graduation at a fixed time each year. The hospital affords excellent general training to the nurses, including obstetrics, and their work in the wards has been generally satisfactory to patients and doctors.

The new building, with its generous provision for the comfort of the nurses, has no doubt helped to secure the refined, intelligent women most desirable in such a school. Nearly every facility for theoretical instruction is provided, including a large, well-ventilated study, a valuable manikin, secured in Paris during the past summer, charts and models, and the latest text-books for nurses in anatomy and physiology, materia medica, and principles of nursing. Books of reference are added to the school library from time to time.

Classes are held regularly each week, and there is a systematic course of lectures for juniors and seniors from October to June, with written examinations at stated periods, and a final examination in May on the following subjects: Surgical, medical, and gynecological nursing, obstetrics, materia medica, children's diseases, and dietetics.

In September, 1894, an arrangement was made with the Home for Incurables and Foundlings Hospital by which our nurses should give six months of the required two years to one institution or the other. Gradually nurses have been sent out and their places filled with probationers until there are now 5 at the Home for Incurables and 5 at the Foundlings Hospital, making 30 in the school. It will be necessary to add at least 10 to that number as soon as practicable.

The instruction of the nurses proceeds uninterruptedly at each institution, and thus far the plan has proved very satisfactory.

It is evident that facilities are required for teaching pupil nurses the science and art of cooking for the sick.

As this is an important part of the nurse's training, it is hoped that a diet kitchen may soon be provided, where, under the direction of a competent teacher, the nurses may devote a certain time to important theoretical work in that line and to the preparation of different articles of sick diet. Too much can not be said of the value of this instruction to those who become private nurses.

The advisability of extending the period of training from two to three years is a question which it is hoped will be seriously considered during the coming year.

A directory for nurses has recently been opened at the suggestion of numerous friends of the hospital. It is for the convenience of doctors, nurses, and the general public, who, as a matter of course, send to a hospital for a nurse.

Only women who have received thorough training and a diploma are allowed to register, and the success of this arrangement seems assured.

Respectfully submitted.

GEORGIA M. NEVINS,  
Superintendent of Nurses.

## OFFICERS, ETC.

*Board of managers.*—President, Mrs. John A. Logan, Illinois, Calumet Place; first vice-president, Mrs. John M. Harlan, Kentucky, University Park; second vice-president, Mrs. Julius C. Burrows, Michigan, The Elsmere; third vice-president, Mrs. Henry A. Willard, District of Columbia, 1333 K street NW.; fourth vice-president, Mrs. David J. Brewer, Michigan, 1412 Massachusetts avenue NW.; fifth vice-president, Mrs. Earl English, New Jersey, 1518 K street NW.; Sixth vice-president, Mrs. William Pitt Kellogg, District of Columbia, The Shoreham; corresponding secretary, Mrs. Anderson D. Johnston, District of Columbia, 1332 V street NW.; recording secretary, Mrs. J. Frank Aldrich, Illinois, The Portland; treasurer, Mrs. Miranda Tullock, New Hampshire, 121 B street SE.

*Directors.*—Mr. Justice John M. Harlan, president, University Park; Mr. Henry A. Willard, first vice-president, Kellogg Building; Mr. John A. Baker, second vice-president, 1819 H street NW.; Mr. H. Sidney Everett, secretary, Metropolitan Club; Dr. John S. Billings, U. S. A., Surgeon-General's Office; Mrs. Miranda Tullock, 121 B street SE.; Mr. Reginald Fendall, Fendall Building; Mrs. John M. Harlan, University Park; Mrs. Jean Margaret Lander, 45 B street SE.; Mrs. John A. Logan, Calumet Place; Mr. Joseph K. McCammon, 1420 F street NW.; Mr. E. Francis Riggs, Riggs' Bank; Mr. A. S. Solomons, 1205 K street, NW.; Mr. J. Ormond Wilson, 1439 Massachusetts avenue NW.; Mr. S. Wolf, 926 F street NW.

Expiration of terms of service of directors: 1896, Messrs. Fendall, McCammon, Wilson, Solomons, and Dr. Billings; 1897, Mr. Justice Harlan, Mr. Willard, and Mesdames Harlan, Lander, and Tullock; 1898, Messrs. Baker, Everett, Riggs, and Wolf, and Mrs. Logan.

Executive committee: Dr. John S. Billings, Mr. H. Sidney Everett, Mr. Reginald Fendall, Mrs. John M. Harlan, Mr. Joseph K. McCammon, Mr. J. Ormond Wilson, Mr. Simon Wolf.

Finance committee: Mr. John A. Baker, chairman; Mr. E. Francis Riggs, Mr. A. S. Solomons.

Training school committee: Dr. John S. Billings, chairman; Mrs. John M. Harlan, Mrs. Miranda Tullock, Mrs. John A. Logan, Mr. Simon Wolf.

*Medical staff.*—Consulting staff: Dr. William W. Johnston, president, 1603 K street NW.; Dr. Nathan S. Lincoln, 1514 H street NW.; Dr. James W. H. Lovejoy, 900 Twelfth street NW.; Dr. Henry C. Yarrow, 814 Seventeenth street NW. Attending staff: Dr. George N. Acker, 916 Sixteenth street NW.; Dr. Samuel S. Adams, 1632 K street NW.; Dr. G. Wythe Cook, secretary, 3 Thomas Circle; Dr. Henry D. Fry, 1133 Fourteenth street NW.; Dr. Arthur A. Snyder, 3051 N street NW.; Dr. J. Ford Thompson, 804 Seventeenth street NW.; Dr. John Van Rensselaer, 2 Thomas Circle; Dr. W. Holland Wilmer, in charge of diseases of the eye and ear, 1330 New York avenue NW.; Dr. Joseph H. Bryan, in charge of diseases of the throat and nose, 806 Seventeenth street NW.; Dr. James C. McGuire, in charge of diseases of the skin, 818 Seventeenth street NW. House staff: Superintendent of the hospital and chief resident physician, Albert L. Stavely, M. D.; first assistant resident physician, Middleton S. Elliott, M. D.; second assistant resident physician, Edwin B. Behrend, M. D.; extern, Llewellyn Luckett, M. D.; pharmacist, John A. Koch, Phar. D. Superintendent of the training school and matron of the hospital, Miss Georgia M. Nevins.

*Incorporators.*—Mr. Justice John M. Harlan, president, United States Supreme Court; Mr. John A. Baker, 1819 H street NW.; Mr. William Ballantyne, 428 Seventh street NW.; Prof. Alexander Graham Bell, 1331 Connecticut avenue; Dr. John S. Billings, U. S. A., Surgeon-General's Office; Mrs. Eliza N. Blair, Manchester, N. H.; Mr. Woodbury Blair, 1651 Pennsylvania avenue NW; Dr. Samuel C. Busey, 1545 I street NW; Mr. Lewis J. Davis, 1315 F street NW.; Mr. Josiah Dent, 3101 U street NW.; Mr. H. Sidney Everett, Metropolitan Club; Mr. Reginald Fendall, Fendall Building; Mr. A. Walton Fleming, 1320 F street NW.; Hon. James Gilfillan, New York City; Mrs. John M. Harlan, University Park; W. W. Johnston, M. D., 1603 K street N. W.; Hon. William Pitt Kellogg, The Shoreham; Mrs. Jean Margaret Lander, 45 B street SE.; Mrs. John A. Logan, Calumet Place; Mr. Joseph K. McCammon, 1420 F street NW.; Mr. Frederick Pilling, 914 I street NW.; Mrs. Fannie Ricketts, San Jose, Cal.; Mr. E. Francis Riggs, Riggs' Bank; Mr. James H. Saville, Glover Building; Mr. A. S. Solomons, 1205 K street NW.; Miss Aline E. Solomons, 1205 K street NW.; Mrs. M. G. Stanley-Brown, 1318 Massachusetts avenue NW; Gen. D. G. Swaim, corner Fourteenth street and Kenesaw avenue; Dr. J. Ford Thompson, 804 Seventeenth street NW.; Mr. John W. Thompson, National Metropolitan Bank; Dr. Smith Townshend, 408 Sixth street NW.; Mrs. Miranda Tullock, 121 B street SE.; Mr. Henry A. Willard, Kellogg Building; Mrs. Sarah B. Willard, 1333 K street NW.; Mr. S. Wolf, 926 F street NW.; Mr. J. Ormond Wilson, 1439 Massachusetts avenue.

## LADIES' AID ASSOCIATION.

*Incumbents.*—Mrs. Grover Cleveland, New York; Mrs. John A. Logan, Illinois; Mrs. John M. Lander, Massachusetts; Mrs. Henry W. Blair, Mrs. Miranda Tullock, New Hampshire; Mrs. John M. Wilson, Mrs. Winthrop Gray, New York; Mrs. James B. Ricketts, California; Mrs. S. E. Skinner, Miss E. C. Smith, New York; Mrs. Joseph R. Hawley, Connecticut; Mrs. John M. Harlan, Kentucky; Mrs. C. P. Hepburn, Iowa; Mrs. C. M. Clarke, New York; Mrs. J. N. Dolph, Oregon; Mrs. C. F. Mandersea, Nebraska; Mrs. Earl English, New Jersey; Mrs. H. W. Blackford, Mrs. A. J. Bentley, Mrs. William G. Metzgerott, Mrs. J. K. Ashford, Mrs. H. Rea, Mrs. A. B. Haggard, Mrs. H. A. Willard, Mrs. S. C. Pomeroy, Mrs. N. W. Burchell, Mrs. W. W. Burdette, Mrs. R. I. Fleming, Mrs. S. O. Richey, Mrs. Matthew G. Emery, Mrs. Anton Heger, Mrs. O. G. Staples, Mrs. Philip E. Chapin, Miss Kate Foote, Miss A. R. Taylor, Miss E. B. Johnston, Mrs. M. Kearon, Mrs. D. W. Prentiss, District of Columbia; Mrs. Alex. J. Bentley, 1116 Ninth street NW., District of Columbia; Mrs. Frederick G. Berger, 2423 Thirteenth street NW., District of Columbia; Mrs. Newton C. ## REPORT OF PROVIDENCE HOSPITAL.

PROVIDENCE HOSPITAL,  
Washington, D. C., July 25, 1895.

DEAR SIR: In compliance with your request I submit to you a condensed report of our hospital for the fiscal year ended June 30, 1895.

Providence Hospital was established June 10, 1861, by the Sisters of Charity, for the use of the indigent sick, but during the late war was much used by the soldiers

The hospital was incorporated by act of Congress April 8, 1864, since which year Congress has annually appropriated a sum of money for the support and medical and surgical treatment of indigent persons, and from time to time has increased this appropriation until now it provides for 95 patients, at the rate of 53 cents per day, which amounts to \$19,000 yearly.

While the appropriation the hospital receives is limited and provides only for nonresident sick, yet by receipts of money from private wards and rooms a charity fund is created for the benefit of the sick poor of the District.

No cases are refused admission to the wards except those of insanity, thus fulfilling the requirements of a general hospital.

There is, in addition to the hospital, a commodious ward, entirely disconnected from the main building, where cases which require isolation may be treated without endangering the welfare of others. To this ward several patients have been admitted within the past few months.

*Total number of patients treated during the year ended June 30, 1895.*

|                                 |         |
|---------------------------------|---------|
| Admitted.....                   | 1, 774  |
| Discharged .....                | 1, 020  |
| Improved.....                   | 361     |
| Unimproved.....                 | 115     |
| Died .....                      | 145     |
| Remaining .....                 | 133     |
| Total.....                      | 1, 774  |
| Total number of operations..... | 286     |
| Prescriptions compounded.....   | 17, 428 |

During the past year a number of improvements have been made in the hospital, thus ranking it with the best hospitals of the country.

We desire to note in particular the introduction of steel ceilings in the wards, corridors, and private rooms, by which the same are rendered more cleanly and attractive, while at the same time they are a great improvement from a sanitary point of view; also the laying of new oak floors in said wards and corridors.

The hospital has also during the year just past been newly painted throughout, and numerous improvements in the plumbing and ventilation have been made, all of the most modern pattern.

During the past year a course of instruction for the sisters and nurses has been kindly given by the members of the medical and surgical staff connected with the hospital, the result of which has proved most satisfactory.

Most respectfully yours,

SISTER BEATRICE,  
*Sister in Charge.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

The following are the latest reports of the medical and inspecting authorities of the hospital:

REPORT OF THE BOARD OF VISITORS.

NOVEMBER 13, 1894.

The undersigned, with great pleasure, renew their previous expression of entire satisfaction with the admirable management of Providence Hospital.

They have carefully examined in detail the various departments, from parlor to kitchen, also the work being done in each, and report, as heretofore, that they have no suggestions to make looking to any change in the management.

Those under treatment, whether surgical or otherwise, have all the appliances that intelligent and refined nature could possibly invent. The board is actuated to say that they have an abiding faith that the record now being made will always give great promise in future, and will reflect the highest credit to those who, by patient and faithful work, have brought the hospital to its present high standard.

THOS. P. MORGAN,  
*For Board of Visitors.*

REPORT OF THE SANITARY COMMITTEE.

*To the Medical Board, Providence Hospital.*

GENTLEMEN: The undersigned committee of your board, appointed at the October meeting to investigate the sanitary condition of the hospital, beg leave to report that they have thoroughly examined all portions of the main building and of the out-buildings; that they find everything orderly and scrupulously clean; that all parts of the hospital (wards, private rooms, mess rooms, kitchen, water-closets, etc.) are free from objectionable odors, and are abundantly supplied with light, heat, and air; that the plumbing is in excellent order throughout the building; that the water supply is everywhere ample; that, in short, your committee are of the opinion that the condition of the hospital is excellent and up to date in sanitary appliances.

Your committee also desire to state that the Sister in charge has during the past year spent a large sum of money in making repairs and correcting whatever seemed in the least defective, and that it is her intention to continue promptly to remedy whatever defects may be found.

Respectfully submitted.

HARRISON CROOK,  
WILLIAM H. HAWKES,  
THOMAS N. VINCENT,  
*Committee.*

REPORT OF THE COMMITTEE OF THE MEDICAL BOARD.

*Medical Board of Providence Hospital.*

GENTLEMEN: Your committee have the honor to submit herewith for your consideration a condensed statement and tabulated report of cases treated in the hospital for the year ending October 31, 1894:

# 260 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA

During the year just passed a number of improvements have been made in the hospital, thus keeping it thoroughly abreast with the best hospitals in the country. We desire to note in particular the introduction of steel ceilings in the wards, corridors, and private rooms, by which the same are rendered more cleanly and attractive, whilst at the same time they are a great improvement from a sanitary point of view.

The hospital has during the year just passed been newly painted throughout, and numerous improvements in the plumbing and ventilation have been made, all of the most modern pattern.

During the past year the course of instruction for the Sisters and nurses which was outlined at the last annual meeting has been put into practical operation, and your committee desire to report the alacrity with which the members of the staff have responded to the new duty placed upon them. We desire, moreover, to bear testimony to the improvement which has followed as a result of the several lectures and the interest taken by all who have attended them. During the past year the following gentlemen of the staff volunteered their services:

Dr. Bayne, surgical dressings; Dr. Mallan, fractures, their treatment; Dr. Crook, surgical anatomy; Dr. Kerr, surgical operations; Dr. Callan, the sick room, its management; Dr. Cuthbert, fever, its management; Dr. Vincent, special fevers, their management; Dr. Luce, diseases of nervous system; Dr. Bovee, abdominal operations, their treatment; Dr. Richardson, special care of throat and ear; Dr. Burnett, special care diseases of the eye; Dr. Kinyoun, bacteriology; Dr. Magruder, materia medica; Dr. Reyburn, emergencies; Dr. Hawkes, diseases of children; Surgeon-General Sternberg, disinfection; Dr. Eliot, skin diseases; Dr. Marbury, anatomy; Dr. Davidson, physiology.

Clinical instruction has during the past year been given by the several members of the staff in medicine, surgery, and the specialties to the students who were in attendance upon the several clinics. We desire to call your attention to the explanatory notes accompanying the statistical tables, inasmuch as they explain what might seem at first sight a high mortality in certain diseases, but which, upon inspection, will show the same to be unavoidable.

Finally, your committee report that the resident physician has performed his many duties to the entire satisfaction of the hospital authorities, and we are indebted to him for the carefully prepared statistical reports.

Respectfully submitted.

THOMAS N. VINCENT,  
SWAN M. BURNETT,  
CHARLES R. LUCE,  
Committee.

PROVIDENCE HOSPITAL, Tuesday, November 13, 1894.

PROVIDENCE HOSPITAL,  
*Washington, D. C., November 13, 1894.*

GENTLEMEN: I have the honor to present herewith a tabulated statement regarding the patients treated in this hospital for the year November 1, 1893, to October 31, 1894, inclusive.

Very respectfully,

CHARLES C. MARBURY, M. D.,  
*Resident Physician.*

The MEDICAL BOARD OF PROVIDENCE HOSPITAL.

Tabulated statement of the hospital from November 1, 1893, to October 31, 1894.

*Surgical operations from November 1, 1893, to November 1, 1894.*

| Operations.   | Number of cases. | Remarks.  |
|---|------------------|---|
| Amputations of—   |                  |   |
| Finger.....   | 8                | Six crushed in railroad accident.   |
| Eight toes and two fingers.....                                 | 1                | For senile gangrene; died.  |
| Great toe.....  | 2                | One died of tetanus.  |
| Forearm.....  | 1                | Crushed in railroad accident; recovered.  |
| Lower third of femur.....                                       | 3                | One for septic arthritis at knee; one for frost bite; one for railroad accident; three recovered. |
| Leg below knee.....   | 1                | For compound fracture with great laceration of soft tissue; recovered.                            |
| Both legs below knees.....                                      | 1                | Railroad accident; simultaneous amputation; died of shock.  |
| Leg just above ankle.....                                       | 1                | For tubercular ankle joint.   |
| Reamputation of painful stump (below knee).                     | 1                | Recovered.  |
| Laparotomies:   |                  |   |
| Double pyosalpinx.....  | 1                | Double salpingo-oöphorectomy; recovered.  |
| Double pyosalpinx and ovarian abscess....                       | 3                | Double salpingo-oöphorectomy; two recovered; one died of pyaemia.                                 |
| Double pyosalpinx, cystic ovaries, and endometritis.            | 3                | Double salpingo-oöphorectomy, uterus curetted and packed; recovered.                              |
| Double pyosalpinx, ovarian abscess, and intestinal obstruction. | 1                | Double salpingo-oöphorectomy; died of shock.  |
| Putrid infection, double pyosalpinx, and ovarian abscess.       | 1                | Double salpingo-oöphorectomy; died of exhaustion.   |
| Sarcoma of ovary.....   | 1                | Removed; recovered.   |
| Fibromata uteri.....  | 1                | Exploratory laparotomy; recovered from operation.   |
| Multiple fibromata uteri.....                                   | 1                | Abdominal hysterectomy; died of shock.  |
| Multiple fibromata uteri and double ovarian cysts.              | 1                | Double salpingo-oöphorectomy; recovered.  |
| Double ovarian cysts.....                                       | 1                | Do.   |
| Double tubo-ovarian cysts.....                                  | 1                | Double salpingo-oöphorectomy; remaining.  |
| Prolapsus uteri.....  | 1                | Hyterorrhaphy and ablation of right appendage.  |
| Hydronephrosis (large cyst of peronephritic tissue).            | 1                | Cyst and kidney removed; many adhesions; recovered.   |
| Appendicitis.....   | 8                | Two recovered; five died; one remaining.  |
| Operations on bones and joints:                                 |                  |   |
| Dislocations reduced—   |                  |   |
| Knee.....   | 1                |   |
| Hip.....  | 3                |   |
| Radius and ulna.....  | 1                |   |
| Shoulder.....   | 1                |   |
| Fractures reduced:  |                  |   |
| Nose.....   | 1                |   |
| Inferior maxilla.....   | 3                |   |
| Clavicle.....   | 2                |   |
| Ribs.....   | 5                |   |
| Malar and frontal bone.....                                     | 1                | Fragments removed; hemorrhage checked; died; fracture at base of skull.                           |
| Tibia and fibula.....   | 5                | Two compound.   |
| Shaft of femur.....   | 5                |   |
| Neck of femur.....  | 4                | One died of delirium tremens; one of shock and old age.   |
| Tibia.....  | 2                |   |
| Humerus (shaft).....  | 3                |   |
| Scapula.....  | 1                |   |
| Colles's fracture.....  | 3                |   |
| Tumors extirpated:  |                  |   |
| Epithelioma of lip.....   | 2                | Recovered.  |
| Fibro-lipoma (thigh).....                                       | 1                | Died of uræmia.   |
| Sebaceous cysts.....  | 2                |   |
| Scirrhus (breast).....  | 1                |   |
| Operations on rectum:   |                  |   |
| Hemorrhoids (ligated).....                                      | 4                | One died two weeks after operation, of uræmia.  |
| Hemorrhoids (ligated and cauterized).....                       | 3                |   |
| Fistula in ano (incised).....                                   | 5                | In two cases canal dissected out and edges sutured.   |
| Rectal fissure (cauterized).....                                | 1                |   |
| Prolapsus:  |                  |   |
| Reduced.....  | 2                |   |
| Clamped and cauterized.....                                     | 1                |   |
| Radical cure.....   | 1                | Sections excised from mucous lining and edges sutured.  |
| Operations on genito-urinary organs:                            |                  |   |
| Circumcision.....   | 4                |   |
| Hydrocele (tapped).....   | 2                |   |

# 274 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

*Surgical operations from November 1, 1893, to November 1, 1894—Continued.*

| Operations.  | Number of cases. | Remarks.  |
|--|------------------|---|
| <b>Operations on genito-urinary organs—Cont'd.</b> |                  |   |
| Orchitis strapped.....                             | 8                |   |
| Gradual dilatation for stricture.....              | 6                |   |
| Stricture (external urethrotomy).....              | 4                | All recovered: two without guide.               |
| Radical cure of varicocele.....                    | 4                | Open operation: four recovered.                 |
| Ligation of freanal artery.....                    | 1                | Result of chancre.                              |
| Edema of prepuce (punctured).....                  | 1                | Result of insect sting.                         |
| Impacted calculus (removed).....                   | 1                | From urethra.                                   |
| Vesical calculus (removed).....                    | 1                | Supra-pubic cystotomy: recovered.               |
| Castration.....                                    | 1                | For syphilitic testicle.                        |
| Penis (amputated).....                             | 1                | For cancer.                                     |
| Urethral fistula.....                              | 1                | Edges denuded and sutured.                      |
| Hernia, strangulated inguinal.....                 | 2                | Operated on in extremis: died from peritonitis. |
| <b>Female generative organs:</b>                   |                  |   |
| Uterus dilated and curetted.....                   | 23               |   |
| Trachelorrhaphies.....                             | 4                |   |
| Trachelorrhaphies and perineorrhaphies.....        | 2                |   |
| Vaginal hysterectomies.....                        | 3                | Two recovered; one died.                        |
| Abortion.....                                      | 2                | Dead fetus and membranes delivered.             |
| Trachelorrhaphies and uterus curetted.....         | 2                |   |
| <b>Eye:</b>  |                  |   |
| Cataracts (extracted).....                         | 2                |   |
| Strabismus.....                                    | 1                | Tenotomy.                                       |
| <b>Operations on ear:</b>                          |                  |   |
| Foreign body removed from external.....            | 1                |   |
| Otic cerebral abscess.....                         | 1                | Trephined and abscess drained.                  |
| <b>Abscesses incised:</b>                          |                  |   |
| Liver.....   | 2                | Both died.                                      |
| Foot.....  | 3                |   |
| Hand.....  | 4                |   |
| Ear.....   | 1                |   |
| Groin.....   | 6                |   |
| Neck.....  | 3                | Two tubercular.                                 |
| Breast.....  | 1                |   |
| Stump.....   | 1                |   |
| Alveoli.....                                       | 2                |   |
| Lachno rectal.....                                 | 1                |   |
| Arm.....   | 1                |   |
| Knee.....  | 2                |   |
| Hip.....   | 1                | Tubercular.                                     |
| Thigh.....   | 1                |   |
| Finger.....  | 1                |   |
| Ear.....   | 1                |   |
| Parotid gland.....                                 | 2                |   |
| <b>Incised and lacerated wounds sutured:</b>       |                  |   |
| Face.....  | 4                |   |
| Chin and wrist.....                                | 1                |   |
| Foot.....  | 3                |   |
| Hand.....  | 7                |   |
| Arm.....   | 1                |   |
| Knee.....  | 1                |   |
| Scalp.....   | 4                |   |
| <b>Miscellaneous</b>                               |                  |   |
| Plaster of paris applied.....                      | 20               |   |
| Silicate of soda applied.....                      | 2                |   |
| Strangulated hernia (reduced by taxis).....        | 2                |   |
| Stomach washed out.....                            | 4                |   |
| Paracentesis.....                                  | 2                |   |
| Thorocentesis.....                                 | 4                |   |
| Skin grafts applied.....                           | 3                |   |
| Tubercular sinus curetted.....                     | 1                |   |
| Septic arthritis of knee.....                      | 1                | Counter openings and drainage                   |

## GENERAL INFORMATION CONCERNING THE HOSPITAL.

Providence Hospital is located at the southeast corner of Second and D streets SE., having a high and commanding position on an eminence left by the grading down of the surrounding streets by which the drainage is made perfect, causing the walls to be dry at all seasons of the year. The front faces a large reservation, giving not only a fine view to the north, but on the west the southern portion of the city is overlooked—Georgetown, the Long Bridge, Arlington Heights, and the blue hills beyond constituting a fine view from the windows of the public wards. The elevation of the hospital above the surrounding grounds and buildings exposes it to the breezes from every quarter, by which it is cooled in summer and the air kept fresh and pure at all times.

*History.*—Providence Hospital was established June 10, 1861, by the Sisters of Charity for the use of the indigent sick, but during the late war was much used by the soldiers. From a small and modest beginning, under the fostering care and special interest of the late Hon. Thaddeus Stevens, of Pennsylvania, who on all suitable occasions befriended the institution, and the ever-to-be-remembered gratuitous services of the medical staff, the institution in all its appointments may now be considered a model one.

The hospital was incorporated by an act of Congress April 8, 1864, since which year Congress has annually appropriated a sum of money for the support and medical and surgical treatment of 95 indigent persons per day. During the lives and Congressional services of the Hon. T. Stevens and Samuel J. Randall, they gave this appropriation their cordial support and influence. The lamented President Garfield on more than one occasion aided by his influence the humane work of the hospital.

The special departments, such as gynecology, laryngology, and the eye and ear, are in charge of well-known specialists, so that by this division of the work, added to the regular medical and surgical staff, patients admitted to this hospital can feel that they will receive the most careful and thorough treatment.

While the appropriation the hospital receives is limited and provided only for non-resident sick, yet by receipts of money from private wards a large charity fund is created for the benefit of the sick poor of the District. No cases are refused admission except those of insanity or diseases of a contagious character, thus fulfilling the requirements of a general hospital.

To the public wards patients are admitted on the order of the Surgeon-General of the United States Army, where they receive every care and attention. There are also private wards and rooms into which patients are admitted on the payment of \$7, \$10, \$15, or \$20 per week.

Sailors are admitted to the marine ward and treated by a medical officer of the Marine-Hospital Service.

There is connected with the hospital a commodious ward, entirely disconnected from the main building, where cases which require isolation may be treated without endangering the welfare of others.

The house is heated by steam, careful attention is paid to proper ventilation, and the water supply is abundant. The average air space to each patient is 896 cubic feet, exclusive of the halls, which contain an aggregate of 88,320 cubic feet, or an additional average of 781  $\frac{1}{4}$  cubic feet to each patient.

The members of the medical and surgical staff will, whenever called upon, visit and prescribe for patients in private rooms, as well as those in the public wards of the hospital. Patients occupying private rooms, and able to pay for medical attendance, will be required to pay the usual fees to the staff physicians and surgeons.

Clinical instruction in the various branches of medicine and surgery is given by the staff. Clinical instruction is also given in their respective branches by the specialists attached to the hospital.

For the surgical clinic a large, well lighted room, known as the operating room, capable of accommodating 150 persons, is arranged in the form of an amphitheater, so that students can witness the various steps of the operation as they are explained by the surgeon.

All communications should be addressed to Sister Beatrice, superioress.

## OFFICERS, ETC., OF PROVIDENCE HOSPITAL.

*Board of visitors.* Hon. Thomas P. Morgan, ex-Commissioner of District of Columbia; Hon. Matthew G. Emery, ex-mayor Washington City; Hon. W. B. Webb, ex-Commissioner of District of Columbia; A. S. Solomons, esq., 1205 K street NW.; Thomas Somerville, esq., merchant; Hon. L. G. Hine, ex-Commissioner of District of Columbia.

*Medical board.* J. W. Bayne, M. D., president, 110 Second street SE.; James T. Young, M. D., vice president, 1336 New York avenue NW.; T. F. Mallan, M. D., secretary, 117 B street SE.; S. A. H. McKim, M. D., 25 Fifth street SE.; N. S. Lincoln,

M. D., 1514 H street NW.; J. W. Bulkley, M. D., Wormley's Hotel, Fifteenth and H streets NW.; Robert Reyburn, M. D., 714 Thirteenth street NW.; Z. T. Sowers, M. D., 1320 New York avenue NW.; C. V. N. Callan, M. D., 1422 F street NW.; H. M. Newman, M. D., 2403 Pennsylvania avenue NW.; G. L. Magruder, M. D., 815 Vermont avenue NW.; Harrison Crook, M. D., 918 Fourteenth street NW.; Llewellyn Eliot, M. D., 1106 P street NW.; W. H. Hawkes, M. D., 734 Seventeenth street NW.; Swan M. Burnett, M. D., 1770 Massachusetts avenue N. W.; M. F. Cuthbert, M. D., 1462 Rhode Island avenue NW.; C. W. Richardson, M. D., 1102 L street NW.; J. Wesley Bovee, MD., 1404 H street NW.; James Kerr, M. D., 1711 H street NW.; Thomas N. Vincent, M. D., 1221 N street NW.; Charles Sutherland, M. D., Surgeon-General U. S. A., retired, 2026 G street NW.; Walter Wyman, M. D., Surgeon-General Marine-Hospital Service, the Shoreham, Fifteenth and H streets NW.; Joseph J. Kinyoun, M. D., United States Marine-Hospital Service, New Jersey avenue and B street SE.; George M. Sternberg, M. D., Surgeon-General U. S. A., 1019 Sixteenth street NW.; C. R. Luce, M. D., 206 B street SE.

*Consulting board.*—S. A. H. McKim, M. D., N. S. Lincoln, M. D., J. W. Bulkley, M. D., J. T. Young, M. D., G. L. Magruder, M. D., Z. T. Sowers, M. D., Robert Reyburn, M. D., W. H. Hawkes, M. D., H. M. Newman, M. D., Charles Sutherland, M. D., Walter Wyman, M. D., George M. Sternberg, M. D., and Llewellyn Eliot, M. D.

*Surgical staff.*—J. W. Bayne, M. D., T. F. Mallan, M. D., Harrison Crook, M. D., and James Kerr, M. D.

*Medical staff.*—C. V. N. Callan, M. D., M. F. Cuthbert, M. D., Thomas N. Vincent, M. D., and C. R. Luce, M. D.

*Gynecologist.*—J. Wesley Bovee, M. D.

*Diseases of the throat and ear.*—C. W. Richardson, M. D.

*Ophthalmic surgeon.*—Swan M. Burnett, M. D.

*Bacteriologist and pathologist.*—Joseph J. Kinyoun, M. D.

*Resident physician.*—Charles C. Marbury, M. D.

*Externe.*—Falconer Davidson, M. D.

*Dentist.*—A. J. Brown, D. D. S.

## REPORT OF THE CHILDREN'S HOSPITAL.

WASHINGTON, D. C., *July 25, 1895.*

DEAR SIR: In accordance with the request conveyed in your letter of June 5, addressed to Mr. W. S. Thompson, that a report of the operations of the Children's Hospital "during the fiscal year ending June 30, 1895, be made on the 1st of August or at the earliest convenient time after that date," the inclosed statements are transmitted.

You will perceive that the expenditures during the year have been \$427.04 in excess of the income. The amount from endowments (\$4,200) is the only sure income of the institution, if we except the \$10,000 appropriated by Congress. The \$4,519.06 put down as "from other sources" is made up of receipts which are, from their nature, of course precarious. In this sum are included, first, a legacy of \$1,000; second, the receipts from the "charity ball," \$1,000; third, the receipts from "a market," \$600, both of the latter under the auspices of the "ladies' board," and a contribution of \$500 from the president of the board of directors. The residue has been obtained from many, generally small, voluntary contributions.

From this statement it is evident how very uncertain the income is, and how greatly it is dependent upon good luck, upon the good will of the friends of the hospital, or upon benevolences or legacies.

It will be seen that no notice is taken in the report of the treasurer accompanying this paper of large amounts raised and expended yearly by the "ladies board." They, out of their own funds, furnish much in the way of furniture, beds, bedding, etc., and other essentials which do not appear in the treasurer's report. They have, for instance, within the last two years, at their own expense, caused to be constructed in this hospital a cold-storage room, which has been of immense advantage and great saving of expense, and have fitted up and furnished completely an infants' ward of twelve beds.

There are many things of great importance for the welfare of the hospital, many of necessity, which it is impossible for the managers to think of accomplishing without a more assured income. Among these are improvements, necessary repairs about the buildings and premises, and extension of benefits to a larger number of children. The needy condition of the institution has rendered necessary a reduction of the number of admissions allowed.

This hospital is the only purely charitable institution of the kind in the District of Columbia. Its benefits are extended to children, both white and colored, from all parts of the country. During the past year, as our hospital statistics show, natives of sixteen different States have been treated, besides those from the District of Columbia and five foreign countries.

The resident physician receives \$480 a year and gives his entire time to the service. No other physician connected with the hospital receives any pecuniary compensation whatever for his services. The directors, of course, receive nothing. The superintendent, who devotes her time exclusively to the management and supervision of the establishment, receives \$1,000 a year. The pharmacist receives \$480 a year. Besides these no salaries are paid except to nurses and the necessary

servants. The nurses render their services for very low pay in consideration of the instruction received in the hospital from the superintendent and from lectures delivered in the nurses' training school by members of the medical staff.

As for the list of employees of the hospital for publication in the biennial register, we are not aware that such list has been furnished from the hospital for that purpose. That published in the last register must have been obtained from the monthly accounts sent to the Comptroller of the Treasury. There are but two members of the executive committee of the hospital now in the city, Mr. Galt and myself, and we are reluctant to comply with your request without consultation with at least a majority of the committee.

The appropriation made by Congress is, as we understand it, given to be expended at the discretion of the board of directors for the necessary expenses of the hospital, either in payment of salaries, partly or wholly, at one time or another, as the board may think proper or find convenient, or to other necessary uses, in such cases, paying the salaries from the funds from other sources. The list of employees is not invariable, but is changed from time to time as circumstances may render necessary or expedient. If the list should be reported for the register it would seem to make the employees Government officials, to render the list a fixed one, and consequently a source of embarrassment in the management. Of course we desire to do what the law requires, but we do not think that it calls for this interpretation.

This is the twenty-fifth year of the existence of the hospital. During this period building grounds and appliances for its use have been acquired to the estimated value of \$200,000, and this with but moderate assistance from the Government. To obtain for the hospital such buildings and grounds would now require the payment of a rent alone of \$10,000 annually. The property is now encumbered with a debt of \$20,000.

Considering the great and universally acknowledged usefulness of the institution, the fact that the income is so precarious and insufficient, the urgent necessity for repairs and improvements, and also that the amount at present appropriated by Congress is only half that used for the absolutely necessary current expenses, the board of directors think that they are warranted in urgently soliciting an additional appropriation of \$5,000, making a total of \$15,000.

Very respectfully,

J. W. H. LOVEJOY,

*Chairman of the Executive Committee, Children's Hospital.*

Col. JOHN TRACEY,

*Superintendent of Charities.*

## REPORT OF WASHINGTON HOSPITAL FOR FOUNDLINGS.

WASHINGTON, D. C., *July 26, 1895.*

DEAR SIR: The board of directors of the Washington Hospital for Foundlings have the honor to transmit to you the annual report of that institution for the fiscal year ended June 30, 1895:

|   |      |
|---|------|
| Number remaining in hospital June 30, 1894.....       | 25   |
| Number admitted during year ended June 30, 1895 ..... | 49   |
| Total .....   | 74   |
| Adoptions during the year.....                        | 9    |
| Deaths .....  | 23   |
|   | — 32 |
| Number remaining in hospital June 30, 1895 .....      | 42   |
| Daily average during the year.....                    | 34½  |

*Deaths during the fiscal year.*

| Tonsilitis .....                | 3      |                |       | 3      |
| Pneumonia .....                 | 2      |                |       | 2      |
| Convulsions .....               | 1      |                |       | 1      |
| Acute perocarditis .....        |        |                | 1     | 1      |
| German measles .....            | 24     |                |       | 24     |
| Scarlet fever .....             | 3      |                |       | 3      |
| Pulmonary edema, acute .....    |        |                | 1     | 1      |
| Emphysema .....                 |        |                | 1     | 1      |
| Otitis media, suppuration ..... | 4      |                |       | 4      |
| Ophthalmia .....                | 1      |                |       | 1      |
| Total .....                     | 91     | 19             | 23    | 133    |

The number of children has been so large the past year that the expenses have been greatly increased, and the directors feel compelled to ask that the appropriation for 1896-97 be increased to \$7,000, as the indications are that the number of applications for admission will be greatly in excess of any previous year.

We deem it advisable to call your attention to the fact that there were 23 deaths this year, while during the year ended June 30, 1894, there were 44.

This great reduction in mortality, exceeding that of any previous year, has been attained by the valuable assistance of the matron and her corps of intelligent and faithful nurses..

Respectfully submitted by the board of directors.

Z. T. SOWERS, *President.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

## REPORT OF ST. ANN'S INFANT ASYLUM.

ST. ANN'S INFANT ASYLUM,  
Washington, D. C., July 23, 1895.

DEAR SIR: In compliance with the request contained in your communication of the 5th ultimo, I respectfully submit the following report of St. Ann's Infant Asylum for the fiscal year ended June 30, 1895, which is now, as it has been for a quarter of a century, under the charge of the Sisters of Charity, of the Order of St. Vincent de Paul.

During the year ten Sisters, with myself as superior, were on duty at the institution, and our services to the orphans and foundlings in the asylum were, as they have always been, rendered without any charge whatever upon the funds appropriated by Congress for the support of the institution.

The number of paid employees connected with the asylum during the year was as follows:

|  |       |
|--|-------|
| Ten female house servants, at \$8 per month and board..... | \$960 |
| One male servant, at \$15 per month and board.....         | 180   |
| One boy, at \$5 per month and board.....                   | 60    |
| Twenty wet nurses, at \$10 per month.....                  | 2,400 |

Total expenditure for labor of employees, not including their board..... 3,600

The average number of inmates daily was 130. Board was paid by relatives or friends of persons cared for at the asylum in 15 cases. The gross amount received during the year from this source was \$1,021.48.

The largest number of inmates at one time was 130; the smallest, 125; the number of inmates on last day of fiscal year was 128.

No worthy application for admission to the asylum was refused. Children of all nations and creeds, white and colored, Protestant and Catholic, are admitted and cared for.

The number of infants supported outside of the asylum during the year, for whom wet nurses have to be specially employed and paid for out of the appropriation granted by Congress, was 45.

My quarterly reports, regularly rendered, give the list of those inmates who left the institution, with full particulars, as required in each case.

The deaths during the year were 82.

In my quarterly reports the detail statement in each case of death—name, age of person, cause of death, and length of time in the institution—is given.

The financial statement, showing the receipts and expenditures of the asylum during the year, also appears from my regular reports, with all requisite vouchers, which have been promptly rendered to your office and also to the Treasury Department.

The principal officers of the asylum at the close of the fiscal year were myself, president, and Sister Vincentia, secretary of the board of directors.

I have no suggestions to offer upon the subject of future administrative improvement or legislation in respect to our institution. The record shows how carefully and economically the asylum has been managed.

The cost per capita for the support of the inmates kept in the institution was about \$8 per month, a much lower rate, as I am informed, than that of any similar institution in the District. This does not include the infants outside of the asylum in charge of wet nurses.

I respectfully invite your special attention to the rights, duties, and privileges of St. Ann's Infant Asylum as provided by the act of Congress, approved by President Lincoln March 3, 1863, and to the fact that our incorporators have every year since 1863 held annual meetings.

The orphans and foundlings are properly cared for, fed, clothed, and supported at the asylum until they reach the age of 7 years, and the Sisters of Charity devote their whole time, night and day, to them. By sewing, personal appeals to the charitably disposed, selling of ornaments, books, etc., the Sisters, under great difficulties, have managed with the small appropriations granted to them by Congress to enlarge the asylum and properly support its numerous helpless inmates.

In 1877 Congress first granted an appropriation of \$5,000 toward the support of the orphans and foundlings at St. Ann's; a like sum was appropriated each year thereafter to the asylum until 1887, when, being satisfied of the absolute necessity therefor, Congress increased the allowance to \$6,000, which sum was continued each year by Congress until 1890, when, upon the merits of the case, the appropriation was increased to \$6,500.

Last year Congress reduced the appropriation to \$5,400, and the same amount (\$5,400) was appropriated this year.

For the next fiscal year we ask for an appropriation of \$6,500, which is nearly \$6,000 less than the amount absolutely required to enable the Sisters to support these abandoned and homeless infants, as will be observed from the following recapitulation of the expenses and receipts during the fiscal year ended June 30, 1895, to wit:

Expenses:

|  |              |
|--|--------------|
| Board, clothing, and support of 90 children inside asylum, estimated at \$8 per month..... | \$8, 640. 00 |
| Estimated cost for medicine for all the children inside and outside asylum .....           | 400. 00      |
| Paid employees .....   | 3, 600. 00   |
| Board of 12 servants, estimated at \$8 per month.....                                      | 1, 152. 00   |
| Total .....  | 13, 792. 00  |

Receipts:

|   |                  |
|---|------------------|
| Appropriation by Congress .....                                   | \$5, 400. 00     |
| From relatives and friends of inmates and all other sources. .... | 2, 422. 73       |
|   | <hr/> 7, 822. 73 |

Amount of expenses in excess of receipts..... 5, 969. 27

In the foregoing statement I have made no estimate of the expenditures for fuel, lights, ordinary repairs of building and furniture, and other incidental expenses, amounting annually to many thousand dollars. For these reasons we respectfully submit that Congress should grant the appropriation requested for our asylum, to enable the Sisters to feed, nurse, clothe, house, and properly care for the unfortunate waifs of humanity, who are never denied admittance to St. Ann's.

Most respectfully,

SISTER ELIZABETH RELIHAN,  
*President.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

REPORT OF THE NATIONAL ASSOCIATION FOR RELIEF OF  
DESTITUTE COLORED WOMEN AND CHILDREN.

COL. JOHN TRACEY,  
*Superintendent of Charities:*

I respectfully submit the following report of the National Association for the Relief of Destitute Colored Women and Children for the fiscal year ended June 30, 1895:

It is a matter of congratulation to the association that the appropriation of the usual sum by Congress has been restored to us, and that the great anxiety concerning the maintenance of our institution has been relieved. There was a time during the year when all resources were exhausted and we feared that we would be obliged to throw the home upon the hands of the Commissioners.

The work in two of the departments, discontinued last year for lack of funds, has been resumed, and at present everything is going on in a most gratifying to the managers.

The number of dependents, 128: Boys, 71; girls, 46; aged women, 11. Died during the year, 2 boys and 2 girls.

Last April the scourge of diphtheria visited the home for the first time. There were 20 cases during the three months that it continued.

Although it was reported to the board of health and they sent out their agents, they discovered no cause for the disease in the sanitary condition of the home. The disease continued for a month, baffling every effort of the physician and those in charge to subdue it. The board of health was again urged to send experts to the rescue. They then ordered a complete renovation of the plumbing. This was a great undertaking, involving the whole line of pipes through the grounds to the sewers, incurring great expense, which at that time we could ill afford to pay.

The mother and assistant who came to us last year have proved themselves most efficient in every branch of the work. To them it is largely due that the diphtheria was no more fatal in its results and was confined to only one part of the house.

Dr. Wilder continues to give his services gratis. We desire to acknowledge his faithfulness at all times, but particularly when the dreaded disease invaded the home.

The schools are doing good work, with faithful, earnest teachers, in the graded departments and in the industrial and kindergarten departments. The foundlings have been cared for outside the home for the past year.

The committee on admission and dismissal are glad to report that steps have been taken by the management to supervise more completely the children after they are placed in families. It is found that persons taking them are apt to disregard the indenture which they sign, making it obligatory upon us to watch carefully to see that they are kept as closely to the agreement as possible. This has been found very difficult to do by letter.

The committee regret that the appropriation has never been sufficient to warrant the hiring of agents to go about among the children to inquire into their ways of life; they are aware also that such supervision requires the most judicious management, and that it is difficult to find persons suitable for such missions. The committee having this matter

in charge has been enlarged by adding several from the association, and it is expected that they will visit all children in or near the city and avail themselves of whatever agency they can command to carry on this branch in a more satisfactory manner. In furtherance of this, the board has agreed upon a new indenture paper, which will meet the requirements better than the one which has been in use so many years.

The only object of the institution being to make our children happy and grow up into useful, law-abiding citizens, we must make every effort toward that end, availing ourselves of all the new light we can get on the treatment of dependent children from those who are making it a study.

While the association stands ready at all times to assist the board of children's guardians in their work, and have received children from them temporarily, we desire it to be understood that the institution is in no sense a reformatory for refractory or incorrigible children.

Our object and practice is to take abandoned children, and those whose parents are unable to provide for them, at the age of 3 years, keeping them until 12 years of age, carrying them through the various grades from the kindergarten to the sixth grade of our public schools. Practical industrial instruction is given in housekeeping, sewing, carpentering, knitting, and gardening.

Owing to the dilapidated condition of the fences and grounds we are constrained to request that the appropriation be increased to \$11,000. I call special attention to the condition of the fencing. The place is not safe and the children can not be kept within the grounds. Also to the condition of a coal vault in the front yard. It was built under the direction and supervision of the late building inspector, Mr. Entwisle, at large cost and from funds specially appropriated by Congress for that purpose. It has never been of any use and is falling more and more into decay.

It will be observed that vacancies in the association are rarely filled, and that we are thus restricted in our selection of members of the board of management. It is a suggestion worthy of consideration that the present members try to enlist the sympathies of the efficient, influential, and, so far as may be, wealthy people of our acquaintance, inviting them to join our association.

A. M. PURVIS, *Secretary.*

*Report of B. G. Francis, treasurer, in account with the United States Treasury.*

To appropriations for 1895..... \$9,900.00

By payments of bills and orders as follows:

|                          |            |                           |          |
|--------------------------|------------|---------------------------|----------|
| Groceries.....           | \$1,580.14 | One leg brace .....       | \$20.00  |
| Clothing.....            | 476.76     | Medical attendance.....   | 50.00    |

**REPORT OF THE NATIONAL ASSOCIATION FOR RELIEF OF  
DESTITUTE COLORED WOMEN AND CHILDREN.**

Col. JOHN TRACEY,  
*Superintendent of Charities:*

I respectfully submit the following report of the National Association for the Relief of Destitute Colored Women and Children for the fiscal year ended June 30, 1895:

It is a matter of congratulation to the association that the appropriation of the usual sum by Congress has been restored to us, and that the great anxiety concerning the maintenance of our institution has been relieved. There was a time during the year when all resources were exhausted and we feared that we would be obliged to throw the home upon the hands of the Commissioners.

The work in two of the departments, discontinued last year for lack of funds, has been resumed, and at present everything is going on in a way most gratifying to the managers.

The number of dependents, 128: Boys, 71; girls, 46; aged women, 11. Died during the year, 2 boys and 2 girls.

Last April the scourge of diphtheria visited the home for the first time. There were 20 cases during the three months that it continued.

Although it was reported to the board of health and they sent out their agents, they discovered no cause for the disease in the sanitary condition of the home. The disease continued for a month, baffling every effort of the physician and those in charge to subdue it. The board of health was again urged to send experts to the rescue. They then ordered a complete renovation of the plumbing. This was a great undertaking, involving the whole line of pipes through the grounds to the sewers, incurring great expense, which at that time we could ill afford to pay.

The matron and assistant who came to us last year have proved themselves most efficient in every branch of the work. To them it is largely due that the diphtheria was no more fatal in its results and was confined to only one part of the house.

Dr. Wilder continues to give his services gratis. We desire to acknowledge his faithfulness at all times, but particularly when the dreaded disease invaded the home.

The schools are doing good work, with faithful, earnest teachers, in the graded departments and in the industrial and kindergarten departments. The foundlings have been cared for outside the home for the past year.

The committee on admission and dismissal are glad to report that steps have been taken by the management to supervise more completely the children after they are placed in families. It is found that persons taking them are apt to disregard the indenture which they sign, making it obligatory upon us to watch carefully to see that they are kept as closely to the agreement as possible. This has been found very difficult to do by letter.

The committee regret that the appropriation has never been sufficient to warrant the hiring of agents to go about among the children to inquire into their ways of life; they are aware also that such supervision requires the most judicious management, and that it is difficult to find persons suitable for such missions. The committee having this matter

in charge has been enlarged by adding several from the association, and it is expected that they will visit all children in or near the city and avail themselves of whatever agency they can command to carry on this branch in a more satisfactory manner. In furtherance of this, the board has agreed upon a new indenture paper, which will meet the requirements better than the one which has been in use so many years.

The only object of the institution being to make our children happy and grow up into useful, law-abiding citizens, we must make every effort toward that end, availing ourselves of all the new light we can get on the treatment of dependent children from those who are making it a study.

While the association stands ready at all times to assist the board of children's guardians in their work, and have received children from them temporarily, we desire it to be understood that the institution is in no sense a reformatory for refractory or incorrigible children.

Our object and practice is to take abandoned children, and those whose parents are unable to provide for them, at the age of 3 years, keeping them until 12 years of age, carrying them through the various grades from the kindergarten to the sixth grade of our public schools. Practical industrial instruction is given in housekeeping, sewing, carpentering, knitting, and gardening.

Owing to the dilapidated condition of the fences and grounds we are constrained to request that the appropriation be increased to \$11,000. I call special attention to the condition of the fencing. The place is not safe and the children can not be kept within the grounds. Also to the condition of a coal vault in the front yard. It was built under the direction and supervision of the late building inspector, Mr. Entwisle, at large cost and from funds specially appropriated by Congress for that purpose. It has never been of any use and is falling more and more into decay.

It will be observed that vacancies in the association are rarely filled, and that we are thus restricted in our selection of members of the board of management. It is a suggestion worthy of consideration that the present members try to enlist the sympathies of the efficient, influential, and, so far as may be, wealthy people of our acquaintance, inviting them to join our association.

A. M. PURVIS, *Secretary.*

*Report of B. G. Francis, treasurer, in account with the United States Treasury.*

To appropriations for 1895..... \$9,900.00

By payments of bills and orders as follows:

|                          |            |                            |                 |
|--------------------------|------------|----------------------------|-----------------|
| Groceries.....           | \$1,580.14 | One leg brace .....        | \$20.00         |
| Clothing .....           | 476.76     | Medical attendance.....    | 50.00           |

B. G. FRANCIS, *Treasurer.*

## MATRON'S REPORT.

*Enrollment for fiscal year ended June 30, 1895.*

|   | Boys. | Girls. | Women. | Total. |
|---|-------|--------|--------|--------|
| Dependents in the home June 30, 1894..... | 50    | 24     | 0      | 83     |
| Admitted.....                             | 10    | 10     |        | 20     |
| Dismissed.....                            | 11    | 6      |        | 17     |
| Died.....                                 | 1     |        |        | 1      |
| In the home June 30, 1895.....            | 48    | 28     | 9      | 85     |

The above figures do not include any wards of the board of children's guardians boarded at the home. In addition to numbers given, two boys whose private homes were found to be unsuitable were received into the home for a few weeks until satisfactory homes could be found for them outside, which was done in both cases.

Respectfully submitted.

C. L. FRANKLIN, *Matron.*

## EXTRACTS FROM CHILDREN'S LETTERS.

DEAR FRIEND LORETTA: Yours received with much pleasure, and as this is an excellent day—it being so stormy—for writing, you see I am answering your letter. I suppose you have heard of Roger Williams Park in Rhode Island. It is considered the best place in the State for skating, so we enjoy the lakes in winter as well as in summer. In the summer we think it great sport to go rowing, etc., on the lakes. It is a beautiful park in summer; there is most everything for one to enjoy and to take pleasure with.

I was glad you enjoyed reading the booklet I sent you. I think you had a nice lot of Christmas presents. I enjoyed mine also, which was the following: The first thing, which I value very highly, was a very nice Oxford Teacher's Bible from the people with whom I live. My Bible I had when I left the home is all worn out, so you see I have used it a great deal, but I shall always keep it to remember the good it has done me. I did not expect to have such a nice one, with all the references, maps, etc., in it. I had two books—one was a story book; the title was a very queer one, which is called A Bachelor Maid. I have read it all through; it is a very interesting story. The other one was a very handsome book, called A Treasury of Favorite Poems, by the different poets. I had a handkerchief box with nine handkerchiefs in it and three other handkerchiefs from different ones, which makes a dozen I had in all. I also had a bottle of perfumery, a little workbox, two silver hat pins, a silver pin for my belt, two boxes of candy, a white apron, a silk scarf, and a box of writing paper. I believe that is about all I had.

There are so many changes in the home since I left I don't suppose there are many I should know, but I am looking forward to the time when I will come to see you all. I am glad you are one of the girls that was at the home when I was. It recalls our childhood days and my start in life, although my lot has been very different than most of the girls. I have taken Christ for my example and friend, and I don't see how anyone can succeed and be happy without such a friend, and let me advise you, Loretta, to take Him as your Saviour if you have not already done so.

With love to yourself and all, I am yours, sincerely,

---

DEAR MISS FRANKLIN: I am sorry I did not write before. I still love my home. Mrs. Rolerfort has a nice baby. His name is Louie Preston. Mrs. Rolerfort feeds him on Eagle brand condensed milk, and he is getting fat on it. Louie will be 7 months old the 16th of this month. We are all well. Doctor took Mrs. Rolerfort, Louie, and me to visit Mr. and Mrs. Burrell at White Sulphur Springs last summer. I spent a lovely time while there. The springs and surroundings are most beautiful. I tried to drink the sulphur water, but it had too bad a smell for me. I took several sulphur baths. Mr. and Mrs. Burrell have a lovely home. They live in a new house that has ten rooms in it. They are parlor, library, dining room, kitchen, and five bedrooms. They have plenty chickens, ducks, hogs, a cow, vegetables, and fruit. I drove the cow to and from pasture; I fed the chickens and hogs; gather vegetables and apples. I enjoyed my stay at White Sulphur ever so much. I traveled all the way from White Sulphur to Newark alone. I am getting along quite well in my studies. Besides studying reading, spelling, and arithmetic, I study geography; also a little grammar. Newark is a very busy city—full of factories. I wish you would visit Mrs. Rolerfort and see our lovely city.

Give my love to all the teachers and the children. Tell the children I hope they will get a good home as I have. I must close, wishing you and all the teachers and all the children a merry Christmas and a happy New Year.

I am your dear little boy,

---

DEAR MISS FRANKLIN: I arrived safe. I was delighted when I arrived at so many new attractions. I was at church last Sunday. I like the church very much; it was such a delightful little place. I like the country food very much. We have chestnuts, apples, walnuts, peaches, grapes, and lots of other kinds of fruits. I feed the horses, hogs, and also help to milk the cows. I am learning to do my work very fast. We have 8 hogs, 5 pigs, 6 horses, and 4 cows, and great many chickens and turkeys and geese.

I give my love to all the children and to all the old people. I will bring my letter to a close.

Yours, truly,

---

DEAR MISS HEACOCK: It has been a long time since I have written you. I hope I will be more regular after this. It snowed yesterday and is quite cold to-day. We had fine fun to-day snowballing each other. To-night I have pain in my head. Mrs. Clingan says we must not play snow at school any more. I study at school reading, spelling, physiology, arithmetic, language, and geography. Before I go to school I wash dishes, sweep kitchen, and make beds. I went last year forty-six Sabbaths to Sunday school. For attending so regular I was presented with a very pretty Testament, and I have that nice Bible, too, you gave me. I must go to my lesson. I bid you good-bye, thanking you again for your kindness to me when I was little.

Yours, truly,

---

DEAR MISS S. C. FRANKLIN: I will write you this letter to let you know how I have been getting along. I like to hear from the home; it does me good when I get a letter from you. This month is my birthday. I will be 15 years old October 27, 1894. I like this place very well, but they work we boys hard and do not like to dress them neat. That is all we get for working, is our eating and clothes. That is all the fault James Thompson finds of the place. If I can not go nice and neat all the time, I would like to have a Sunday suit to put on Sundays. Please tell me what become of Cornelius. Give my love to all the boys and girls. Tell them I had a spell of sickness; it lasted me a week. Please send me one of the same books; only an old one, 1890. I will give you a cart load of thanks for it.

Yours, truly,

---

James Thompson sends his love to you. I do not see much of Willie Clark.

## 290 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

### OFFICERS, ETC., OF THE NATIONAL ASSOCIATION FOR DESTITUTE COLORED WOMEN AND CHILDREN.

*Officers for 1895.*—Mrs. M. S. Pomeroy, president, 1339 K street NW.; Miss L. S. Swan, vice-president, No 1 Thomas circle; Mrs. B. G. Francis, treasurer, 2106 Pennsylvania avenue; Mrs. A. M. Purvis, secretary, 1118 Thirteenth street NW.

*Board of managers.*—Mrs. E. G. Dole, Mrs. A. M. Edgar, Mrs. A. M. Shadd, Mrs. H. A. Cook, Mrs. L. S. Doolittle, Mrs. J. W. Scudder, Mrs. H. M. Hatch, Mrs. M. L. Meriwether.

*Trustees.*—Mr. John F. Cook, Dr. C. B. Purvis, Rev. F. J. Grimke.

#### STANDING COMMITTEES.

*Household committee.*—Mrs. A. M. Shadd, Freedmen's Hospital; Mrs. L. S. Doolittle, 1925 I street; Mrs. M. L. Meriwether, 1822 Thirteenth street; Mrs. E. G. Dole, 1014 Fourteenth street; Mrs. F. T. Baxter, the Shoreham; Mrs. H. Douglass, Anacostia, D. C.

*Clothing committee.*—Mrs. J. W. Scudder, 1006 New Hampshire avenue; Mrs. M. V. Datcher, 1212 Sixteenth street; Mrs. E. P. Messer, 1935 Eleventh street; Mrs. H. M. Hatch, 1316 S street.

*Educational committee.*—Mrs. Helen A. Cook, 2222 Sixth street; Mrs. E. W. Lynch, 1511 Corcoran street; Miss L. S. Swan, 1 Thomas circle; Mrs. H. P. Ward, Hamilton House.

*Committee on admission and dismissal.*—Mrs. A. M. Purvis, 1118 Thirteenth street; Mrs. M. L. Meriwether, 1822 Thirteenth street; Mrs. M. V. Datcher, 1212 Sixteenth street; Mrs. E. P. Messer, 1935 Eleventh street; Mrs. Clara Tunnell, Howard University.

*Matron.*—Miss C. I. Franklin; assistant, Miss H. E. Hood.

*Teachers.*—Miss N. A. Plummer; assistant, Miss M. R. Goines. Industrial school.—Miss S. Storum. Kindergarten.—Mrs. A. E. Williams.

*Physician.*—Dr. James R. Wilder.

#### ACT OF INCORPORATION.

AN ACT to incorporate the National Association for the Relief of Destitute Colored Women and Children.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That Sayles J. Bowen, Daniel Breed, George E. Baker, their associates and successors, being members of the said society, by paying into its treasury the sum of two dollars annually, or life members by paying fifty dollars at one time, are hereby incorporated and made a body politic by the name of "The National Association for the Relief of Destitute Colored Women and Children," for the purpose of supporting such aged or indigent colored women and children as may properly come under the charge of such association; to provide for them a suitable home, board, clothing, and instruction, and to bring them under Christian influence, and by that name shall have perpetual succession, with power to use a common seal, to sue and be sued, to plead and be impleaded, in any court of the United States; to collect subscriptions, make by-laws, rules, and regulations needful for the government of said corporation not inconsistent with the laws of the United States; to have, hold, and receive real and personal estate by purchase, gift, or devise; to use, sell, or convey the same for the purposes and benefit of said corporation, and to choose such officers and teachers as may be deemed necessary, prescribe their duties, and fix the rate of their compensation.

SEC. 2. *And be it further enacted,* That the officers of said association shall consist of a president, vice-president, secretary, treasurer, and a board of managers, to be composed of nine members, the whole to constitute an executive committee, whose duty it shall be to carry into effect the plans and purposes for which said association was formed; all of which officers shall be elected on the fifteenth day of March next, and hold their offices until the second Tuesday of January, eighteen hundred and sixty-four, on which day, and annually on the second Tuesday of January in each succeeding year, at the annual meeting of said association, which shall be held on such day, their successors shall be elected, and hold their offices for the term of one year and until their successors shall be duly elected; and in case of a vacancy it shall be filled by the other members of the executive committee.

SEC. 3. *And be it further enacted,* That said society may receive into a house or building to be provided by it any destitute child or children, at the request of the parents or guardians, or next friend, or the mother, if the father be dead or has abandoned his family or does not provide for their support or is an habitual drunkard,

such parents, guardians, or next friend or mother making a written surrender of such child or children. The superintendent or other officer in immediate charge may, with the concurrence of the executive committee or of a board of trustees, to be appointed by said committee and to consist of three persons, citizens of Washington, govern the inmates, preserve order, enforce discipline, impart instruction in useful knowledge and some regular course of labor, and establish rules for the preservation of health and for their proper physical, intellectual, and moral improvement. The trustees may, with the consent of the executive committee, bind out by indenture such children as may be deemed capable of learning trades or of becoming useful in other occupations to such persons as will give them the benefit of good example, wholesome instruction, and other means of improvement in virtue and knowledge, and the opportunity of becoming intelligent, moral, and useful members of society.

SEC. 4. *And be it further enacted*, That it shall be lawful for said association, by and with the advice and consent of the Secretary of War, to occupy, for the objects of said association, any lands not exceeding one hundred acres and the improvements thereon which the Government may now own or may hereafter acquire contiguous to the city of Washington by confiscation or purchase, such occupation to continue for such a number of years as the Secretary of War may, in writing, prescribe.

Approved, February 14, 1863.

#### BY-LAWS ADOPTED BY THE ASSOCIATION, 1866.

1. Any person may become a member of the association by paying the sum of \$2. At the meetings of the association ten members shall constitute a quorum. At the meetings of the executive committee five shall constitute a quorum for transacting business.

This by-law was amended June 10, 1879, as follows: "Any person may become a member of the association, upon nomination at a regular meeting of the association, by a vote of two-thirds of the members present, and by paying into the treasury the sum of \$2. At the meetings of the association ten members shall constitute a quorum. At the meetings of the executive committee five shall constitute a quorum for transacting business."

This by-law was further amended October 13, 1891, by inserting after "treasury" the word "annually;" also, on January 8, 1895, that the annual membership fee be \$1.

2. At the stated meetings of the executive committee and at the quarterly meetings of the association the order of business shall be: First, minutes of the preceding meeting; second, reports of committees and officers; third, unfinished business, new business, adjournment.

3. The president, or, in her absence, the vice-president or president pro tem., shall preside at the meetings, preserve order, and see that the officers perform their duties, and all drafts upon the treasury, approved by the managers, shall be signed by the presiding officer at the meeting at which they have been passed.

4. The secretary shall keep correct minutes of the proceedings of the meetings of the association and of the managers and give due notice of the place of all meetings—a notice of the annual and quarterly meetings of the association to be advertised for at least two days in a daily paper published in Washington City. The secretary shall conduct the correspondence and countersign all drafts upon the treasury.

5. The treasurer shall take charge of all moneys belonging to the association not otherwise ordered by the board, and shall deposit them in such institutions or invest them in such ways as the board may direct, and shall make no payment except by its order. All bills ordered by the board shall be paid by the treasurer. She shall report, in writing, at each monthly meeting, to the executive committee the amount received and expended during the month; also all indebtedness. She shall keep a list of the contributors and an accurate account of the receipts and expenditures of the institution, which accounts shall at all times be open to the inspection of the managers. She shall make a written report to the annual and each quarterly meeting of the association and give bonds in the sum of \$1,000 for the faithful performance of her trust.

6. At the first stated meeting held after the annual meeting of the association the executive committee shall elect from their number the following standing committees: A committee upon education, a committee upon clothing, a committee upon household, a committee upon admission and dismissal.

7. Of the committee upon admission and dismissal: The committee, or one of its members, shall visit the home once each month. To this committee all applications for admission shall be referred. They shall keep a book of registry in which they shall enter the name and age of every woman and child received, the date of admission, whence and from whom received. If the woman or child has near relatives,

note the degree of kindred and residence of same; ascertain whether the children have had measles, whooping cough, or smallpox, and whether they have been vaccinated. These particulars shall be recorded, together with other circumstances which may be of importance to them or to the institution at a future day. If the child be brought by a parent, obtain his or her signature to the form provided for the same. When children are placed out, state particularly with whom, the residence and occupation of master and mistress, and note the date of removal from the home, whether by death or otherwise. When children are placed on trial, if returned they shall be well clothed by their employer, or he be required to pay 25 cents a week for as many weeks as they have served him. A promise to do so shall be made by him in writing on receiving the child.

8. The household committee, or one of its members, shall visit the home once a month, and oftener if necessary. They shall see that its affairs are administered with order, prudence, and economy; that proper attention is paid to the habits, manners, and persons of the children, and that peace, harmony, and domestic religion are cultivated; and, whilst obedience is required of the children to the duly appointed officers, no corporal punishment shall be allowed. They also shall keep a book of the records of all gifts and benefits conferred on the institution which do not appear on the treasurer's record. They shall make monthly a call on the matron for a report in writing of the same.

9. It shall be the duty of the committee on clothing to see that the women and children are supplied seasonably with all necessary clothing, including hats, caps, shoes, and other articles of wearing apparel which may be needed, on leaving the home. They shall report when necessary to the board.

10. The committee on education, or one of its members, shall visit the school once a month, and provide furniture, books, and whatever may be needed for the use of the school.

11. The above-named committees shall render monthly reports to the board, all of which shall be in writing, as well as all resolutions and resignations. The executive committee shall elect three trustees, to continue in office until their successors are chosen. A special meeting of the association may be called by the board at any time, due notice being given.

12. The by-laws may be amended at any regular or duly called meeting of the association by a vote of two-thirds of those present.

#### AMENDMENTS TO BY-LAWS.

13. Children under 3 years of age will not be admitted to this home.

14. The association, at any regular or duly called meeting of the association, may by a vote of two-thirds of those present expel a member, but the vote shall be taken by yeas and nays, and be recorded by the secretary in the journal of the proceedings. (Adopted June 12, 1870.)

15. Members of the association, other than members of the executive committee, shall be eligible to position on any of the regular or special committees of the association. (Adopted January 10, 1880.)

16. The executive committee shall have power to appoint matron, assistant matron, and such other officers as may be necessary to carry on the work of the association, and, further, they shall have power to remove such officers by a majority vote. (Adopted January 10, 1893.)

## REPORT OF GERMAN ORPHAN ASYLUM.

WASHINGTON, D. C., *August 14, 1895.*

DEAR SIR: In compliance with your request, we beg to submit the following report of the transactions of the above institution for the fiscal year ended June 30, 1895.

The average daily number of orphans and half orphans in the asylum during the year was 39.

The largest number was 43 and the smallest 35. The number at the close of the year was 43.

On July 1, 1894, there were present 12 inmates who were admitted by order of the court through the agent of the Humane Society.

Thirteen children were admitted during the year, including 2 sent by the board of children's guardians.

Ten children were discharged during the year, 9 of whom were returned to surviving parents and 1 boy bound out to learn a trade.

Thirty-five of the children attended the public schools at Uniontown and Anacostia, and the progress they made during the year was very satisfactory.

Not a single case of serious illness occurred during the year; this is undoubtedly due to the healthy location of the institution.

A new brick barn and stable was built, at a cost of \$2,300.75, to take the place of the stable destroyed by fire on July 14, 1894.

Upon the recommendation of Chief Parris, of the local fire department, the board of directors decided to have a fire-alarm box placed at the asylum, and it is expected shortly.

The greater share of the meats and provisions used for the maintenance of the inmates was derived from voluntary contributions, the groceries and household goods used were furnished by the ladies' aid society, the wearing apparel was furnished by the ladies' sewing society, and the vegetables were largely raised on the farm attached to the institution. The value of these various items is not included in the financial statement attached.

In conclusion, the board of directors respectfully solicit your recommendation of an appropriation of \$2,000 for the maintenance of the inmates of the German Orphan Asylum for the fiscal year ending June 30, 1897.

## FINANCIAL STATEMENT.

OFFICERS OF GERMAN ORPHAN ASYLUM.

President, Charles Graff; vice-president, Jacob J. Appich; secretary, Edward W. Koch; treasurer, M. Hebner.

*Board of directors.*—George J. Bessler, George Emmert, J. Jose, Werner Koch, E. F. Treiber, George Breitbarth, Chris. Heurich, Louis Kettler, Charles Mades, John Walter, M. D., C. A. Didden, F. Imhof, William Kettler, George J. Seufferle, Simon Wolf.

*Delegates.*—Mrs. Rosa Botsch, Charles G. Rogier, Mrs. De Grain, John Waldmann Charles Schroth.

*Superintendent.*—Henry Ermold.

*Matron.*—Mrs. Elizabeth Ermold.

Very respectfully,

CHAS. GRAFF, *President.*

EDWARD W. KOCH, *Secretary.*

## REPORT OF CHURCH ORPHANAGE OF ST. JOHN'S PARISH.

ST. JOHNS ORPHANAGE,  
525 TWENTIETH STREET,  
Washington, D. C., September 9, 1895.

DEAR SIR: I herewith send a copy of our last printed annual report for 1894-95. I might briefly add that we have a daily average of about 90 children—girls and small boys—whom we receive regardless of creed, on condition of being orphans, half orphans, or otherwise destitute and unprotected. Our children are taught in the branches of a common school education, and those of special aptness receive further advantages. The girls are also taught housework, cooking, laundry and needle work. The boys learn something of gardening and other light work. We hope in time to provide more extended facilities for the training of boys.

The printed report furnishes all statistics of our financial condition which I am able to lay before you. Our treasurer is away, but I venture to say that with our large household and small receipts our needs are self-evident, and am sure you will not fail to set forward their claims.

Very respectfully, yours,

SISTER SARAH,  
*Sister in Charge.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

---

 REPORT OF SISTER SARAH.

The return of Quinquagesima Sunday reminds us that it is again our duty and privilege to lay before our friends some account of the work of the past year, and to ask their cooperation in plans for its future usefulness. It is a work which from its nature can not stand still. While we may profitably look backward from time to time to perceive wherein we have failed or fallen short of our opportunities, and also encourage ourselves with any evidences of good accomplished, our wisdom lies only in ever reaching forth to those things which are before.

We have again enjoyed a year of uninterrupted good health, an unspeakable blessing in our large family of children. Their physical well-being is largely enhanced by our possession of the country home, which affords opportunity for outdoor life several months of the year. We are greatly indebted to a member of the board of trustees, through whose liberality important repairs upon the house were made early last summer. We must here state that our much loved country place, although furnishing ample outdoor room for all our flock, can by no possible ingenuity begin to house them, so they take their summer outing in turn by detachments, those left in the city being compensated by the increased space and freedom which the departure of a large number allows.

It is at these periods that our "old children" can best visit us, whose coming is always welcome. We like to hear of their present surroundings; to know of their wants, their plans, and ambitions. At such times we quite forget that we ever found perplexities in our work or met with difficulties.

We should like to speak of some of these visitors, one of whom came bringing her own little girl. As she talked of her present home and the farm her husband was buying, and which they had saved nearly enough money to pay for, we could but contrast this happy young matron with her first appearance at the orphanage years ago, a ragged little waif brought by the police, who begged us to keep her because

the mother was in the workhouse, and the child, young and bright, might be saved if moved from evil surroundings. Who can estimate the meaning of saved in such a case? Not one poor child only, rescued from suffering, degradation, and the death of sin; for as we look at the mother and the little girl so like the one of years ago, and yet so different, being virtuously brought up to lead a godly and Christian life, one could but think of the difference between an influence for good, ever increasing, and an influence for evil, continually extending itself. From another, too distant in her country home to visit us, we received a letter asking for counsel. As she described her good husband and comfortable home, we thought of her as she first came to us, a wretched little creature, escorted by the police, the mother in jail, and no one to care for the child.

Not to dwell on reminiscences, we must hasten to make grateful acknowledgments to the many friends who seem never weary in well-doing for these our Lord's little ones. During the past summer an addition was made to the orphanage of several bright, sunny rooms (the generous gift of a friend), which increases greatly our facilities and contributes much to our comfort. We are glad to say that the grading of the yard on F street has been accomplished through the gifts of the ladies' aid, and that the lot on Twentieth street has been inclosed by a suitable iron fence. We are deeply grateful for the special donations which are supporting our kindergarten—an untold blessing to the smaller children.

We hardly venture to suggest the want of more room, yet it is sadly needed. We are constantly refusing appealing cases because already too crowded.

At the request of the committee on public charities we have lately prepared an extended report, giving the name of every beneficiary in the house, the circumstances under which each was admitted, with other matters of detail; and the superintendent of charities calls upon us quarterly for a report of all work done at the orphanage. We are pleased to furnish such reports. We gladly welcome all those who are interested in this work of charity, trusting that in their alms and their prayers they will remember its needs.

SISTER SARAH.

---

#### REPORT OF HOUSE PHYSICIAN.

I have the honor herewith to submit the annual report of the sanitary condition of St. John's Church Orphanage, for the year ending Quinquagesima, 1895.

For many years the orphanage has seemed to enjoy an immunity from the ordinary amount of sickness and mortality which usually prevails in such institutions. During the winter of 1893-94, however, an epidemic of malignant diphtheria broke out among the children of the Church Orphanage. There were 35 cases, and 5 deaths caused by the disease.

Energetic means of disinfection were employed in and around the orphanage buildings, and the disease disappeared in the spring months of 1894. No cases of this malady have occurred during the past year. The addition made to the buildings of the orphanage during the past year, through the liberality of friends, has been of inestimable service, as it has rendered it possible to isolate and prevent infection to the children from contagious diseases.

Three cases of scarlatina occurred among the inmates of the orphanage during the past year. They were promptly quarantined, by removing them to the addition to the orphanage above mentioned, and the disease did not infect any of the other children. These cases all recovered, and there has been no death from any cause among the children of the orphanage during the past year.

Again I wish to commend in the highest terms the loving care and devotion bestowed by Sister Sarah and the other ladies connected with the orphanage upon the children who are the inmates of the institution.

Very respectfully,

ROBERT REYBURN, M. D.,  
*Attending Physician, Church Orphanage.*

---

#### MEMORANDA.

The reorganization of the orphanage dates from 1882. In February of that year the Rev. Mr. Leonard called a meeting of gentlemen of the parish, which resulted in the incorporation of the institution in April following, under the laws of the District of Columbia.

The following persons signed the certificate of incorporation as the original board of trustees:

The Right Rev. William Pinkney, died 1883; Rev. William A. Leonard, resigned 1889; Montgomery Blair, died 1883; Wm. H. Emory, U. S. A., resigned 1887; Robert Reyburn, M. D., Frank W. Hackett; Thomas Hyde, resigned 1890; Chauncey McKeever, U. S. A., resigned 1885; F. M. Gunnell, U. S. N.; George D. Ruggles, U. S. A., resigned 1885; Alexander Bliss; A. Ross Ray, died 1887; Charles H. Crane, U. S. N., died 1887; Gustavus V. Fox, died 1883.

In 1887 the number of trustees was reduced from twelve to eight. Other gentlemen who have served as trustees have been: Woodbury Blair, 1885, resigned 1887; Donald McN. Fairfax, U. S. N., 1883, resigned 1885; G. J. Lydecker, U. S. A., 1883, resigned 1887; Alexander B. Hagner, 1885; Titian J. Coffey, 1885; Charles H. Stockton, U. S. N., 1885, resigned 1889; Benjamin H. Warder, 1889, died 1894; James M. Johnston, 1890; William J. Boardman, 1894.

*Warden.*—Rev. George William Douglas became warden in 1889, and resigned in 1893; Rev. Alexander Mackay-Smith became warden in 1893.

*Secretary.*—Frank W. Hackett has served as secretary from April 29, 1882.

*Treasurer.*—Under the by-laws, the treasurer may be elected from without the board of trustees. Thomas Hyde served as treasurer from May 16, 1882, till February 22, 1890, when he was succeeded by Benjamin H. Warder, who died in office, January 13, 1894. Edward McCauley was chosen treasurer March 1, 1894.

#### ANNUAL SERVICE.

The annual service on behalf of the orphanage was held in the parish church on the afternoon of Quinquagesima Sunday, February 24, 1895. In accordance with custom, Sister Sarah was present, with others who have charge of the children. The children occupied pews on the south side of the church.

#### ADDRESS BY THE RECTOR.

Some years ago, when in the city of Rome, I was speaking to an old gentleman in regard to a well-known literary man, whom both he and I had known in early life. After analyzing his character, he ended by saying: "He was when very young quite intolerable in his manners and in his selfishness. But he improved as he grew older, although no one anticipated he would become famous. It only shows," he added, "the truth of the old German proverb, 'Never kill a child; you can't tell how he may change for the better.'" He spoke of course in jest, and alluded, I suppose, to the fact that there are times when children behave so badly that grown-up people think hardly any remedy too desperate. You will recall the anecdote of Charles Lamb, the great humorist, who on a certain occasion, when greatly annoyed by the behavior of some children at dinner, asked the guests to drink a toast to the immortal memory of the much-abused King Herod.

It is certainly true that hardly any animal in the world takes so long a time to grow up and mature as man does. But this, while a cause of great anxiety and apparent waste, is also a striking proof of his superiority to other animals. The young bird grows strong, and feels his wings and flies away in a few weeks after birth; yet observe that the bird develops into something hardly better than a tiny machine. When you see the little ball of down in the nest you can foretell its development almost as accurately as you can that of the piece of metal which is stamped into the form of a nail or a button by a hammer, which will make a thousand in as many seconds.

Around the cradle of the babe, on the other hand, hangs a veil of mystery. There is all the uncertainty which attended Columbus shaking out his sails from Palos. The result may be something glorious or something sad, for the child is full of possibilities. There is an immortal soul there, to be educated for heaven; a mind to be cultivated, so that it may understand and deal with life here on earth in an intelligent way; a mortal nature, which may become so in love with purity and goodness, that it shall fulfill the ambition put before it by Christ, "that ye may be the children of your Father which is in heaven." But whatever the result is to be, we may be quite sure of one thing, that to educate a child rightly is a most difficult affair. It can not be effected by slipshod or careless methods. Children do not develop firm characters by accident. The best of them are full of childish faults. The process of education and correction is an hourly one, demanding infinite patience and infinite interest. To mold a young human mind and soul is almost as difficult as to polish granite with the naked hand. Yet even that can be done. And the reward is that just in proportion to the hardness of the task is the durability of the result. A boy or a girl developing harmoniously on every side of life—moral, spiritual, intellectual—is worth ten thousand of the best-trained lower animals, and will exert an influence proportionately great.

St. John's Orphanage, the anniversary service of which we hold to-day, was founded by Christian people, who believe in these principles I have just named. Perhaps we might put them briefly thus: First, that the value of any child is very great because

of its possibilities; secondly, that good results never come by mere accident, but always at great cost; thirdly, that only Christ and His methods can truly and rightly guide human development. I do not say that we have turned out very remarkable characters in the children we care for. That can only be done, as experience shows, in institutions that carry education further along and with higher tools and greater skill than we can afford to apply. Our aim is a humbler one. We try to rescue young lives from the bad influences of careless or corrupt handling during the tender formative period, and after some discipline and teaching to send them out with a fair chance of working upward along the lines that have directed them thus far. Our claim is that we have prevented evil, arrested corruption, strengthened good, been kind and just to little souls that, but for our orphanage, would never have "had a chance." We suffer from the fact that because such work has a negative as well as a positive side to it and consists so largely in snatching young lives from all kinds of vicious or rabid jaws yawning to devour them, we can hardly estimate its value in any definite way. We can only believe, as we do, that the very worst child who should resist all our efforts to improve it and go forth at last more or less evil might have been still more hopeless had we not taken it in, while our best children, we feel sure, will have abundant reason to be grateful to the orphanage to their lives' end.

But to-day, my dear friends, we have no reason to think or speak of bad children. We are proud of our satisfactory average, glad of your support, hopeful for the future. We sincerely believe that our orphanage is a sunny, helpful, cheerful place, worthy of confidence in its management, blessed by Providence, and deserving your generous aid. It is named after a disciple who is sometimes called "the beloved" and sometimes "the divine." Our best ambition and prayer will be that, however simple and elementary our work may be, there shall still be in it something which in its results upon our children may suggest both these phrases, by binding their hearts to us below and their characters to God above.

#### REPORT OF THE LADIES' AID.

It is with hearts full of gratitude to the Giver of all good that the Ladies' Aid of the Church Orphanage recognize His kind and fostering care for the institution during the past year. Thanks to His merciful providence, we have no deaths to report this year, and no epidemic has invaded our midst.

This immunity from serious sickness has enabled our devoted Sister Sarah to give all her time to the education and Christian development of the children committed to her charge, and her faithful efforts have been crowned with the most gratifying success.

The number of inmates of the orphanage now amounts to 95. This is the full capacity of the house, and we have been compelled from want of room to turn away many applicants whom we would otherwise have been glad to admit.

For the funds necessary for the support of the inmates we have to look—with the exception of the small annual appropriation from Congress—to the friends and patrons of the orphanage, and we appeal with confidence to them for the continuance of the generous support they have hitherto given us. In no way can Christian people contribute more effectually to deserving charity than in the maintenance and education of the helpless orphan.

The orphanage is still in debt to the amount of \$1,700 on the lot adjoining the building on the south. Will not some of those whom God has blessed with fortune contribute a portion of what He has given them to free this home of the orphan from incumbrance?

There has been no increase this year of the endowment fund. We would suggest that this fund affords an opportunity to those who desire to assist in the permanent success of this institution.

As another means of assisting the orphanage, we would recommend the increase of the number of memorial beds. Several of these have been contributed by friends who wished to perpetuate the memory of loved ones gone before and at the same time to help those who can not help themselves.

We desire here to acknowledge the efficient aid rendered by the ladies' sewing classes, whose special province it has been to furnish clothing and bed linen for the institution. We wish also to return our sincere thanks to the givers for the bountiful donations made to the orphanage at Christmas and Thanksgiving.

We can not close without recalling the faithful services of the kind physician who so promptly responded at all times to the calls of the institution.

By order of the board.

E. C. WARRINGTON CHUBB,  
Secretary.

## TREASURER'S REPORT.

*Annual report of Edward McCauley, treasurer of Church Orphanage Association of St. John's Parish, from April 11, 1894, to March 5, 1895, inclusive.*

|   |               |
|---|---------------|

B. Johnston, bundle worn clothing; Mrs. Babcock, 6 pairs of boys' trousers; Mrs. Penn, bundle of old linen; Dr. Reyburn, ice cream and cake for children on his birthday; Mrs. Brooks, bundle worn clothing; Mr. Burchell, keg mackerel; unknown, 2 baskets grapes; Mrs. Burchell, box crackers; from Mr. and Mrs. Fisk, a new Standard sewing machine; Mrs. Tittman, bundle worn clothing; Mrs. General Augur, bundle worn clothing; Miss Hazeltine, bundle worn clothing; Mrs. Charles Bispham, bundle worn clothing; Mrs. J. M. Johnston, 10 outing skirts, new; Mrs. Leiter, bundle worn clothing; Willie Hackett, boy's coat; Miss Bliss, bundle clothing; Mrs. Dr. Reyburn, turkey, piece canton flannel; Mrs. Dr. Mackay-Smith, bundle clothing; Mrs. McCulloch, butter, vegetables, honey, and apples; Mrs. Judge Hagner, barrel flour; Mrs. Gherardi Davis, Thanksgiving dinner for all the children; Mrs. Semken, barrel flour; Mrs. Ashford, basket of groceries; Mrs. Teel, bundle of clothing; Mrs. McCauley, hams, oranges, and apples; Judge Cox, turkey, apples, and nuts; Miss M. B. Johnston, bag sugar; Mrs. Chubb, large basket of groceries; Colonel Bliss, turkey; Mrs. Payne, 2 bags of flour; Miss Sedgwick, turkey; Mrs. Niles, turkey; Mr. Burchell, box of tomatoes; Mrs. Leiter, barrel of apples; Mrs. General Benét, turkey; Mrs. William Galt, barrel of flour; Mrs. Thomas Hyde, box of oranges, large bunch of bananas, 2 hams, and basket of groceries; Mrs. J. Johnston, 9 new garments; Mrs. Fell, turkey; Mrs. Charles Bispham, ham; Miss McKean, 5 dozen pies; Mrs. Dr. Hagner, ham; Mrs. W. T. Carroll, ham, turkey; St. Paul's choir boys, large bag of candy; Miss Leipp, barrel of flour; Mrs. Babcock, bundle of boys' clothes; through Miss Biddle, 15 new garments; Mr. Shubrick Clymer, 1 year's subscription to St. Nicholas; Mrs. Dr. Gunnell, bundle of worn clothes; through Mrs. R. C. Johnson, tablecloth, 1 dozen napkins, 30 new garments; through Miss Biddle, 80 new garments; through Miss Atwater (boys' Chapter of Guild), outfit for boy; Mrs. James Johnston, large bundle of new garments; Mrs. Luquer, bundle of clothing; S. Agnes Chapter, bundle of clothing; Mrs. Dr. Hagner, 30 new gingham aprons; Mrs. Cameron, bundle of toys; Mrs. Hazeltine, bundle of worn clothing; Mr. Burchell, box of oranges; Mrs. Carroll, turkey; Mrs. James M. Johnston, large bucket of candy; Mrs. Goodwin, 6 dozen oranges; Mrs. Frank Howe, bag of apples and oranges; Miss K. McKean, 3 pieces of dress goods; Guild of Holy Child, 2 bundles of clothing for Mary Agnes; Mrs. Fleming, barrel of apples; Miss Biddle, box of oranges; Mrs. Admiral Crosby, large turkey; Mrs. Galt, barrel of flour; Mrs. Whitman, turkey and cranberries; Mrs. General Benet, turkey; Major Elliott, ham, 2 new comforts, and piece of cotton, 50 yards; Mrs. Dr. Keyburn, turkey and pumpkin; Mrs. Admiral Worden, turkey; Mrs. Ferguson, piece of muslin; Colonel Bliss, turkey; Mrs. Sperry, turkey and celery; Miss Seipp, barrel of apples.

Our grateful thanks are also due to Mr. Beresford for kindly printing our Christmas bags without charge. Also to Great Falls and Independent Ice companies for ice; to Mount Vernon Steamboat Association for free trip down the river, and to Washington and Georgetown Railroad for car tickets to steamboat wharf.

Christmas bags filled by Mrs. Hazeltine, Mrs. Jackson, Mrs. Fendall, Mrs. Fox, Guy, Curran & Co., Mrs. Dr. Magruder, Miss Corson, Mrs. Haxall, Mrs. Hanna, Mrs. Julian James, Mrs. James Hopkins, Hon. W. E. Curtis, Mrs. Myers, Mrs. Arthur Brice, Colonel Alden, Mrs. James Blair, Mrs. Janin, Mrs. Addison, Hon. John Kasson, Mrs. F. Moore, Mrs. Stetson, Mrs. Whitman, Mrs. Shepherd, Mrs. Stone, Mrs. Com. Chadwick, Mrs. Tittman, Mrs. Webb, Mrs. Moody, Mrs. Ordway, Mrs. Mann, Mrs. R. H. Webb, Mrs. Goddard, Mrs. Rochester, Mrs. Herbert Willson, Mrs. Norton, Mrs. Boardman, Mrs. Dr. Hagner, Mrs. Smith, Mrs. Phenix, Mrs. Ashford, Mrs. Mercer, Mrs. Rodgers, Mrs. Wightman, Miss Pendleton, Mrs. Dr. Bates, Mrs. Pitkin, Mrs. Fuller, Mrs. Williamson, Mrs. Horatio King, Miss Wilcox, Mrs. Niles, Mrs. Calvert, Mrs. Bigelow, Mrs. John Blair, Mr. Bryan, Mrs. D. B. Morgan, Mrs. Gen. Stockbridge, Mrs. Pellet, Mrs. Archibald Campbell, Mrs. Hopkins, Mrs. Cornwell, Mrs. Judge Aldis, Mrs. Qualtrough, Mrs. Mason, Admiral Russell, Mrs. Miller, Mrs. McCauley, Mrs. Judge Hagner, Mrs. D. E. Crafft, Mrs. Quigley, Mrs. Hahn, box candy.

#### AID FROM CONGRESS.

Congress has been liberal in providing for the original purchase of the orphanage building and later for an addition thereto. It has also appropriated an annual sum for maintenance, beginning in 1883 with \$1,500, and increasing that amount in 1891 to \$2,000, when the enlarged building and an increasing number of inmates had rendered that greater sum absolutely needful.

In 1893, however, Congress was induced to enter upon a plan of appropriating a part only of what had in previous years been awarded to public charitable institutions of the District, and remitting those institutions for the remainder to the board of children's guardians.

For that year the orphanage was given only \$1,181.

The trustees under the terms of the law were unable to resort to the board of children's guardians for aid. The scheme has not been insisted upon for the past year, and our appropriation has been now restored to the extent of \$1,800.

It is to be hoped that Congress may yet appropriate for the benefit of the orphanage the amount that has been withheld.

That the relations of the orphanage with the public authorities may be the better understood, it has been thought advisable to append the following extract from the last annual report (November, 1894) of the superintendent of charities in the District of Columbia:

*"The Church Orphanage of St. John's Parish.*—For this institution the appropriation recommended is the same as that for the current fiscal year, \$1,800, or 90 per cent of the amount allowed before the appropriations for child-caring institutions were reduced for the benefit of the board of children's guardians. In charge of a sisterhood of the Protestant Episcopal Church, this orphanage is chiefly maintained, as it was founded, by private benevolence. It is admirably and economically managed, and Sister Sarah, its superintendent, ranks high among the devoted and pious humanitarians eminently successful in child training. The average number of inmates in the institution is 95, so that its per capita cost to the public is now \$18.53 per year, or 5 $\frac{1}{3}$  cents per day, while before the readjustment of appropriations by Congress it was less than 4 cents per day. The relations of this and similar institutions to the public were exhaustively considered by the Appropriations Committees of both branches of Congress in hearings and discussions lasting from the beginning of January until the end of July.

"The adjustment that was reached with very general assent has been observed as to the aided children's institutions of the District in the estimates for the coming year. The following letter upon this subject was received too late for insertion among the institutional statements appended to this report:

"WASHINGTON, D. C., November 7, 1894.

"SIR: For the past year the Church Orphanage has been seriously crippled in its work from lack of funds for maintenance. Our private subscriptions have fallen off. We counted upon an annual appropriation of \$2,000 (none too large a sum for our necessities), but a portion of this amount has been withheld. Sickness among the children has increased the call for expenditures. We trust that the plain facts will show how unjust it has been to deprive us of the sum that in former years was given us, and we hope that the amount so withheld will yet be appropriated for our benefit in a deficiency bill. Otherwise we are left in debt for maintenance.

"We contribute of our means to sustain this charity which is relieving the public of a burden, and giving to it well-trained boys and girls in lieu of those who might otherwise prove a detriment to society. There is a limit to what we can accomplish as private citizens in raising money to support the orphanage. Still, we hope before long to build up such an endowment fund as to render us independent of aid from Congress. Meanwhile, however, we state in moderate terms the extent of our needs. We spend every dollar judiciously and economically, and we believe that Congress needs but to know the exact truth of the situation to vote such sum as you, sir, have heartily recommended.

"Let me avail myself of this opportunity to thank you, in behalf of the orphanage, for your generous sympathy and your kind advocacy of our cause, which is, in truth, the cause of all the good people of this community.

"Yours, truly,

"FRANK W. HACKETT,

"Secretary of Church Orphanage.

"Col. JOHN TRACEY,

"Superintendent of Charities."

"Property owned by this orphanage in this city and at its country home in Virginia, valued at about \$50,000, was secured from private sources, with the exception of \$10,000 public money invested in improvements."

#### OFFICERS.

The Right Rev. William Paret, D. D., president, ex officio, bishop of the diocese; Rev. Alexander Mackay-Smith, D. D., S. T. D., warden, ex officio, rector of St. John's Parish; Frank W. Hackett, secretary; Edward McCauley, treasurer, 1719 Rhode Island avenue.

*Board of trustees.*—Rev. Alexander Mackay-Smith, D. D., ex officio, 1325 Sixteenth street; Robert Reyburn, M. D., 2129 F street; Frank W. Hackett, 1418 M street; Francis M. Gunnell, U. S. N., 600 Twentieth street; Alexander Bliss, 820 Connecticut avenue; Alexander B. Hagner, 1818 H street; Titian J. Coffey, 1713 K street; James M. Johnston, 1628 K street; William J. Boardman, 1801 P street, Dupont circle.

## HONORARY MEMBERS.

[Extract from the by-laws, XVIII. honorary members: "Every contributor of a sum of not less than \$1,000 at one time shall be an honorary member of the institution."]

The following persons are honorary members of the Church Orphanage: Thomas J. Abbott, ~ 1885; William C. Whitney, 1887; Mrs. William C. Whitney, \* 1887; Mrs. Gustavus V. Fox, 1888; Benjamin H. Warder, \* 1888; Mrs. Benjamin H. Warder, 1888; Mrs. Elizabeth H. Price, 1888; Mrs. Mary Willing Clymer Bayard, 1888; Mrs. Leland Stanford, 1888; Mrs. David P. Morgan, 1889; William W. Corcoran, \* 1889; Mrs. Ralph Cross Johnson, 1890; Miss Jane Frances Pendleton, 1891; Mrs. John A. King, ~ 1891; Mrs. Howard Ganson White, 1891; Mrs. George R. Hearst, 1891; Mrs. Ellen Warder Thoron, 1891; Mrs. Margaret Irvine Biddle, 1892; Mrs. Titian J. Coffey, 1894.

## THE LADIES' AID.

Mrs. W. H. Emory, president; Mrs. E. C. Warrington Chubb, secretary; Miss Johnston, purser; Mrs. Thomas Biddle, 1735 N street; Mrs. Frank H. Bigelow, 1625 Massachusetts avenue; Mrs. William J. Boardman, 1801 P street; Mrs. Arthur T. Brice, 1711 M street; Mrs. E. C. Warrington Chubb, 2307 Pennsylvania avenue; Mrs. Titian J. Coffey, 1713 K street; Mrs. W. H. Emory, 1718 H street; Mrs. Francis M. Gunnell, 600 Twentieth street; Mrs. Frank W. Hackett, 1418 M street; Mrs. D. R. Hagner, 1812 H street; Mrs. Ralph Cross Johnson, 1735 I street; Mrs. Harriet Lane Johnston, 1737 I street; Mrs. James M. Johnston, 1628 K street; Miss Mary Belle Johnston, 1704 Rhode Island avenue; Miss Mary R. King, New York City; Mrs. Edward McCauley, 1719 Rhode Island avenue; Mrs. Hugh McCulloch, 912 Fifteenth street; Miss Katharine McKean, 528 Seventeenth street; Mrs. J. N. Macomb, 1314 N street; Mrs. D. P. Morgan, Scott circle; Mrs. S. V. Niles, 1733 I street; Mrs. E. Francis Riggs, 1311 Massachusetts avenue; Mrs. B. H. Warder, 1515 K street; Mrs. Alexander Mackay-Smith, 1325 Sixteenth street.

## PHYSICIANS TO THE HOUSE.

Robert Reyburn, M. D.; Stephen O. Richey, M. D., for the eye, ear, and throat.

\* Deceased.

## REPORT OF ST. JOSEPH'S MALE ORPHAN ASYLUM.

ST. JOSEPH'S ASYLUM,  
Washington, D. C., September 10, 1895.

DEAR SIR: In compliance with the request made in your communication dated September 5, 1895, I submit the following report of St. Joseph's Orphan Asylum of this city for the fiscal year ended June 30, 1895:

For forty years this institution has been under the charge of the Sisters of the Holy Cross, and though, until three years ago, it was entirely dependent upon the Sister's solicitation for aid, more than a hundred homeless boys have constantly been housed, clothed, fed, and instructed beneath St. Joseph's sheltering roof.

The inmates of the asylum are orphan boys of the city and District, and are received irrespective of creed. The only condition required is that the child be really an object of charity—an orphan, destitute, without suitable home or protector. The average number of orphan inmates during the year was 109, the highest number was 120, and the lowest on any day was 88 boys.

Until they are 13 or 14 years of age the little boys are kept at the asylum, where they are at all times under the immediate care of the Sisters. They have regular classes from 8 a. m. to 3 p. m., with frequent but short intermissions for play, then recreation until 5 o'clock, followed by an hour of study. They are instructed in all the rudiments of a common-school education—reading, writing, spelling, geography, arithmetic, elements of bookkeeping, grammar, United States history, and letter writing. Their teachers remark that they learn more rapidly than other children of their age. Doubtless this is partly due to the fact that they have less to distract them than children in their own homes; but it is chiefly ascribed to regular hours and good, wholesome diet.

July 14, 1892, Congress, recognizing the merits of the institution and the uncertainty of support, which had to rely altogether upon charity, granted the asylum the small appropriation of \$2,000; this was reduced in 1893 to \$1,181, and since then increased to \$1,800.

That such a sum is by far inadequate to maintain the asylum is evident from the following statement:

## RECEIPTS.

|  |            |
|--|------------|
| Cash on hand July 1, 1894.....   | \$7. 50    |
| Cash from Government.....  | 1, 800. 00 |
| Cash from donation party, bequests, subscriptions, and private charity.... | 2, 571. 00 |
| Cash from half orphans.....  | 478. 00    |
| Cash from day school.....  | 405. 95    |
| Total cash received.....   | 5, 262. 45 |
| Donations of provisions and clothing solicited.....                        | 1, 284. 00 |
| Total cash and provisions.....   | 6, 546. 45 |

## EXPENSES.

|   |            |            |
|---|------------|------------|
| Cash expended for food, clothing, bedding, fuel, hire, repairs,<br>and sundry small expenses..... | \$5,258.51 |            |
| Provisions and clothing solicited.....  | 1,284.00   |            |
|   |            | <hr/>      |
| Total expenses.....   |            | \$6,542.51 |
|   |            | <hr/>      |
| Cash balance on hand July 1, 1895.....  |            | 3.94       |

By begging and by appeals to personal friends the Sisters have with great difficulty managed to balance their accounts; but the orphans should be the Sisters' only charge. Surely to sew, wash, and cook for 114 helpless little boys, the number now in our charge, besides teaching them six hours a day, is sufficient to keep ten Sisters busy, without having to beg for them. We therefore earnestly solicit from Congress an addition to our appropriation of \$3,200, making it in all \$5,000 a year.

SISTER EUPHRASIA, *Superior.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

## REPORT OF NEWSBOYS AND CHILDREN'S AID SOCIETY.

WASHINGTON, D. C., *July 8, 1895.*

SIR: In response to your request for the annual report of the operations of our home, it is with pleasure that I give you a summary of our work.

Our home is open day and night to poor children, and wanderers on the street at night come to our door or are brought to our door continually for a night's lodging. There are no hearts so hard that they could allow a child to lie on a doorstep or creep into some box, when they know, as we believe the public does know, that we receive with pleasure any lonely or destitute child. Of course his case is investigated; if he has friends who can support him, it is expected that they will do so; but there are many children who live with strangers who oppress them with work, and neither feed nor clothe them properly. In such cases we look after their interests, and either keep them in our own home or have them admitted to others.

It would be impossible for us to keep all whom we receive. We admit (if we have reason to believe they need a home) all who come, even though we must look round at once for some other home for them, and during the past winter we have been obliged many a time to make up beds on the floor to accommodate transients. However, we are glad to be able to say we hope soon to move to our new home at the corner of Third and C streets NW., where there will be special rooms for transients.

During the past year we have had quite a number of permanent children: they have been sent to the public school and have made good progress in their studies; they have also been instructed in housework.

We find our boys and girls take quite an interest in doing their work nicely, and that boys can do housework quite as well as girls.

We also make a pleasant home for our working boys, who are engaged in different ways; some sell papers, and others work in stores, and pay what they can toward their own board and lodging. This is a safe, pleasant home for young boys who would otherwise be obliged to stay at the cheapest lodging houses where their associates would often be more than undesirable.

Our newsboys' meetings have been quite successful. Evening after evening they would gather for recreation, amusement, and some instruction. In our new home we shall be able to give them a new attraction, for our society is already planning to build a gymnasium for their use.

During the year ended June 30, 1895, the society has furnished to its beneficiaries 4,853 lodgings, 15,995 meals, and clothing was given to those who needed it. We endeavor to be as economical in our home, consistent with good management, as possible. During the past year it was found unnecessary to have an agent to look for lost children, as the board of children's guardians attends to that branch of the work.

In place of the agent we have a superintendent who looks after the training of the children, the management of the house, the housekeeping, and the evening meetings; a housemaid, a cook, who has some little extra help on washing day, and in the future we shall add a seamstress to our staff. We find our children a great help, as they do a hundred and one things to lighten our work, as children surely do lighten everyone's burdens if they are loved as they should be.

Respectfully submitted.

Miss B. MORDAUNT WILSON,  
*Superintendent.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

---

*Treasurer's report.*

## REPORT OF WOMAN'S UNION CHRISTIAN ASSOCIATION.

WASHINGTON, D. C., *August 29, 1895.*

DEAR SIR: Although we were unsuccessful in securing aid from the District government last year, we again appeal to the Commissioners through you for assistance. The home has been sustained during the year through the efforts of the members, which were responded to by many friends. Among those to whom we are thus indebted, I may mention the President of the United States and Mrs. Cleveland, who sent a bountiful supply of provisions. With like contributions of food, clothing, money, and fuel we have been able to care for 22 children; homes have been found for 6, and at present there are 16 inmates.

An appropriation of at least \$10,000 is desirable and necessary to build the home. The ground (part of lot 2, block 6, Howard University subdivision, known as Effingham Place) has been donated by Miss Maria T. Stoddard, on which it is proposed to erect the home.

A committee of ladies has volunteered to raise a building fund, with Mrs. Sykes as treasurer, to build a home on the lot donated.

In behalf of this enterprise we would request your assistance in securing an amount to assist in the erection of the home, as you know somewhat of this charitable effort, and we would be glad for you to learn more of the workings of the association.

This home for the training of friendless girls in all branches of domestic industry and morality as well, has been supported by individual subscriptions of the members and friends, the proceeds of entertainments, etc., while being able to do considerable good, as shown by the records of the association, and the testimony before your predecessor and yourself, yet the matter of rent has always hampered us in accomplishing much that could have been done. And, now that the necessary ground has been given, the association would request your valuable assistance in securing an appropriation of \$10,000 from Congress to erect the necessary building thereon.

Yours, respectfully,

CAROLINE TAYLOR,  
*President Woman's Union Christian Association.*

M. L. WATSON,  
*Secretary.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

## REPORT OF INDUSTRIAL HOME SCHOOL.

GENTLEMEN: I have the honor to present the following report of the operations of the Industrial Home School of the District of Columbia for the fiscal year ended June 30, 1895.

The object of the school is to maintain and educate destitute children of both sexes, prepare them for usefulness, and obtain for them situations where they can earn a living, or to place them, as can sometimes be done, in good homes, where they will be treated and cared for as members of the family. We have accommodations and means for the support of about 100 inmates.

The land and buildings which we occupy are public property, and our revenue consists almost exclusively of money appropriated by Congress from the District funds. Our association is a private corporation and superintends this public work without remuneration.

The most of our wards are sent to us by the Humane Society, an association chartered by Congress originally for the protection of dumb animals from cruelty and abuse, but subsequently authorized by law to rescue children from misery and destitution, for which purpose they were given the aid of the police and of the police court. But some children are brought to us by relatives, friends, or benevolent persons. If, after proper examination, the children so offered are found to be of proper age—over 5 and under 12—and free from disease, and destitute of other support, they are received, provided our number is not already full. We have also for a few years received and cared for such of their wards as the board of children's guardians desired to place with us temporarily, paying us for their maintenance at the rate of the average cost of our own. But these the guardians can remove at discretion, and then our responsibility for them is at an end.

Our own wards at the beginning of the fiscal year numbered 62, and we had 14 wards of the board of guardians, making 76. We received during the year 1894-95 71 others, viz, of our own 53, and of the guardians 18. And we discharged in the same year 48, viz, of our own 27, and of the guardians 21. And we had at the close of the year 99 inmates, viz, of our own wards 88, and of the guardians 11.

Of the 27 wards whom we discharged, 5 were placed in situations to earn monthly wages. One of these had been with us six years, and each of the others three years. Six were placed in homes where they will be properly cared for and prepared to earn a living; 4 of these had been with us several years, and 2 for only a few months. Eleven were returned to parents or relatives. These had been with us only a few months. They had mostly been found deserted and suffering, but after brief search their parents came forward, or were found. Three after admission were found in a state of health unfitting them to be retained, and were placed elsewhere, and 2 absconded.

It thus appears that ordinarily only after a considerable residence and preparation have we been able to find situations or homes for

destitute and neglected children, and that we must expect to retain for a considerable period all that we once receive.

In the health of our inmates we have been particularly fortunate. During the entire term of our present superintendent—say, six years—among 100 inmates, which has been our average number, not a single death has been due to disease, and the only one that did occur was due to accident by drowning. There have been many cases of the ordinary diseases to which children are subject, but since our ground has been all underdrained there have been none of the more serious complaints, such as diphtheria.

The school is a branch of the public-school system of the District, and is taught by a male and a female teacher of that corps. The pupils are taught the same branches that other public-school pupils learn. In addition the girls are taught to cut out and make garments, and in fact make much of the clothing for all the children. They are also taught to cook and to do such housework as every woman should be competent to perform.

The boys, beside their lessons in school, are taught to do all the work required on the place, of which a summary will now be given:

#### CARPENTERING.

Classes in carpentering have been systematically taught as usual. Boys from 8 to 14 years of age have received instruction, working three hours each day in two classes, one in the morning and one in the afternoon, each class going to school alternately half a day. The classes number from seven to ten pupils each.

Mr. J. V. Rees is the instructor, having been employed in place of Mr. Teague in January, at the same compensation, viz, \$40 per month and board. He is a licensed engineer, as we are obliged to have such a man for the engine. He is employed eight hours a day, and while not engaged in teaching has his time fully occupied in the preparation of tools, manufacturing articles of sale, and making necessary repairs.

The principal articles made for sale are tables; about 400 of these have been made, and sold for \$1 each. The progress made by the boys has been very satisfactory. The superintendent, in one of his reports in regard to making the tables, says: "This work has been a great help to the boys. They have improved beyond my expectations, and under the direction of the carpenter can do all the work on the tables." The boys are allowed 5 per cent of the gross receipts from articles made and sold.

Eight boys have also received instruction in the care and management of the engine and boilers. A small outside job of steam fitting was taken at a time when they were not busy. A great deal of miscellaneous work is done by the carpenter and his classes about the place; building fences, painting, glazing, and keeping the buildings in repair. The wear and tear on a place with 100 children makes a great deal of work. An excellent piece of work was done for the steam laundry, at a cost of about \$25, for which the price at the manufacturers was \$150.

The expenses connected with the carpenter's shop, including the salary of the carpenter, were \$805.17, and the receipts \$468.15, making the net cost of this branch of industrial tuition \$337.02.

An opportunity to purchase for the sum of \$25 a second-hand power mortising machine was improved. Tools have also been purchased as needed.

## THE GREENHOUSE.

Instruction in the propagation and care of flowers and ornamental plants under Mr. Brunger, a competent florist, has continued to be a prominent feature of industrial training.

The greenhouses are in as good condition as could be expected. Our crop of violets was short, owing to a disease which the florist had fought for two years and could not control. It was necessary to obtain a new stock, which promises well. The Cosmos, which has usually yielded a good sum, was a failure last fall on account of drought. The outlook is good for the coming crop.

Owing to the intense cold of last winter the plants were saved from freezing only by great vigilance. Sometimes the men were up all night watching and attending to the fires.

Twenty-seven pupils in all have received instruction in this branch during the year. Eleven who had received more or less instruction were discharged from the home. A situation for one was obtained with a florist who had already two of our boys in his employ and was paying them good wages. The boys in the advanced class go to market with plants and flowers. They have stands at the Riggs, K street, and Georgetown markets. The expense of stands and breakfasts for the boys has been \$30. The sum of \$48.50 has been paid as commission to the boys for sales made by them at market, being 10 per cent of the receipts, according to a rule adopted some time since. The boys (four) receiving this money have been encouraged to deposit it in the bank and have creditable bank accounts.

This industry will continue to expand and is worthy of being encouraged. It is of benefit to the boys in teaching them how to make a living, and working among flowers has an elevating and refining influence on the children engaged in it, as our superintendent has observed.

At present we have three greenhouses, a rose house, a propagating house requiring a high temperature, and a cool house for such plants as violets and carnations. Another greenhouse is needed for chrysanthemums. Such a one as desired could be built for \$600.

|   |            |
|---|------------|
| The expenses of this branch, including commissions paid to the boys during the year, were ..... | \$596. 81  |
| Salary of florist .....   | 480. 00    |
| Total .....   | 1, 076. 81 |
| The receipts were .....   | 893. 62    |
| Excess of expense .....   | 183. 19    |

The expense of heating is not included in the above, which would perhaps amount to \$500 more.

Expensive repairs have been made on the greenhouses during the year. The stock of bulbs has been largely increased, while the price received for flowers was less than usual. It should be borne in mind that the greenhouse produces the plants for the early vegetables, such as tomatoes, cabbages, celery, egg plant, lettuce, etc., and plants for decorating the ground, and much time and labor of the florist and his classes are employed in the vegetable garden, for which no account is made separately in the returns of revenue derived therefrom.

## THE FARM AND GARDEN.

The farm and garden furnish occupation during the summer for the boys when not employed in the shop and greenhouse.

Sufficient small fruits and berries were raised for home use, and a surplus of vegetables, except potatoes, the crop of which was short on account of the drought. The surplus vegetable crop was exchanged for fruit and fertilizers. Sufficient field corn was raised to fatten seven very fine hogs.

The stock at present consists of 2 horses, 3 hogs, and 7 pigs. There are about 200 chickens on the place, which supply all the eggs which are needed. The number of eggs supplied for the last quarter of the year was 137 dozen. The superintendent keeps a record of all the farm products raised on the place and makes report to the board. The land has all been reclaimed and is in a high state of cultivation.

We trust that those having the subject in charge will consider that the beneficiaries of the charity—destitute children—have the strongest possible claims upon the benevolence of the community, and that they will almost certainly repay by their good offices as citizens whatever may be expended in preparing them for that position; and finally, that the work is conducted on the most economical basis, since all the supervision required is given without remuneration, as a work of charity, and that the only persons connected with the institution who receive pay are those employed in the work, and whose whole time is given up to it. Such institutions seem to be approved by the experience of our best governed States, and to be increasing in number throughout the Union.

From the report of the treasurer of the institution herewith submitted, it will be seen that the revenue of the school during the last fiscal year amounted to \$12,999.65, derived almost entirely from three sources; the appropriation by Congress, \$9,900; the sales of products of the workshop, gardens, and greenhouses, \$1,151.47; and \$1,724.66 paid by the board of children's guardians for the support of certain of their wards placed in our charge. The expenditures during the same year amounted to \$11,883.18, which absorbed the Congressional appropriation and left a deficiency, which, however, was more than covered from the other sources stated.

Appended is a list of donations made to the children, which indicate in some measure the estimation in which the school is held by the community; also, a list of the officers and of the board of managers and committees; also, a list of the employees, with their salaries, and copies of the articles of incorporation and of the by-laws and regulations.

Respectfully submitted.

JNO. D. MCPHERSON,  
*Vice-President, Acting President of the Industrial Home School.*  
 The COMMISSIONERS, DISTRICT OF COLUMBIA.

## TREASURER'S REPORT.

WASHINGTON, D. C., July 10, 1895.

DEAR SIR: Herein please find my report as treasurer of the Industrial Home School for the year ended June 30, 1895.

The amount appropriated by Congress for maintenance of the home for the year 1894-95 was \$9,900. This fund has been disbursed, as follows:

|                  |          |                     |          |
|------------------|----------|---------------------|----------|
| Bread .....      | \$595.70 | Milk .....          | \$462.20 |
| Crockery .....   | 71.23    | Meat .....          | 287.94   |
| Clothing .....   | 98.77    | Miscellaneous ..... | 263.00   |
| Drugs .....      | 60.51    | Plants .....        | 138.60   |
| Dry goods .....  | 452.72   | Paints, etc .....   | 36.00    |
| Fuel .....       | 458.38   | Printing .....      | 71.19    |
| Fish .....       | 24.16    | Plumbing .....      | 200.00   |
| Feed .....       | 223.54   | Salaries .....      | 4,213.84 |
| Flowerpots ..... | 34.85    | Shoes .....         | 340.01   |
| Furniture .....  | 89.70    | Smithing .....      | 33.16    |
| Gas .....        | 168.30   | Steam fitting ..... | 171.20   |
| Groceries .....  | 898.73   | Incidentals .....   | 44.00    |
| Hardware .....   | 93.64    |                     |          |
| Lumber .....     | 324.54   | Total .....         | 9,900.00 |
| Labor .....      | 17.00    |                     |          |

This amount has fallen quite short of the purpose for which it was appropriated, and but for a small bank fund maintained by the sale of products of the industries taught in the institution, donations, etc., the home would have been seriously cramped in its scope of usefulness. The amount received of the board of guardians has been of much benefit.

|  |          |
|--|----------|
| Of this fund there was a balance from the year ending June 30, 1894..... | \$3.52   |
| From the greenhouse .....  | 833.42   |
| From the carpenter shop .....  | 318.05   |
| Board from two parents .....   | 129.00   |
| Membership fees .....  | 11.00    |
| Donation, Mrs. Foster .....  | 5.00     |
| Sale of old material .....   | 75.00    |
| From board of guardians .....  | 1,724.66 |
| Total .....  | 3,099.65 |

From this fund disbursements have been made as follows:

|                   |          |                             |          |
|-------------------|----------|-----------------------------|----------|
| Bread .....       | \$140.64 | Labor .....                 | 18.00    |
| Crockery .....    | 2.93     | Milk .....                  | 176.00   |
| Drugs .....       | 2.80     | Meat .....                  | 79.64    |
| Dry goods .....   | 116.70   | Miscellaneous .....         | 186.95   |
| Fuel .....        | 365.35   | Plants, seeds, etc .....    | 57.31    |
| Feed .....        | 39.57    | Painting, paints, etc ..... | 83.20    |
| Fish .....        | 8.10     | Physician .....             | 28.00    |
| Flowerpots .....  | 28.40    | Salaries .....              | 45.00    |
| Gas .....         | 17.85    | Shoes .....                 | 118.02   |
| Groceries .....   | 219.54   | Smithing .....              | 16.42    |
| Hardware .....    | 13.64    | Steam fitting .....         | 73.54    |
| Incidentals ..... | 4.20     |                             |          |
| Lumber .....      | 141.38   | Total .....                 | 1,983.18 |

Leaving a balance in bank of \$1,116.47.

The entire income from all sources for the year has been \$12,999.65.

The average number of children at the home for the year was 92 $\frac{1}{6}$ .

It will be seen, therefore, that the per capita expense has been \$10.74+.

Respectfully submitted.

B. T. JANNEY, *Treasurer.*

Mr. HENRY F. BLOUNT,  
*President Board of Managers.*

## DONATIONS AND OTHER AID.

The heirs of the late Mrs. Virginia Hollingsworth presented, through Dr. Kurtze, a piano for the use of the school. It is in constant use and very highly appreciated. Mrs. Shaffer, of 1322 Vermont avenue, presented a sewing machine. Miss Nettie Bradley presented a fine walnut bedroom set for the home. Mr. Charles E. Foster presented a large number of books for the library.

The superintendent reports that at Thanksgiving Mrs. J. B. Edmonston and Mrs. Charles E. Foster presented each a barrel of apples, and repeated the gift at Christmas. Mr. C. E. Foster sent a box of oranges. Mr. Stohlman sent 2 handsome large cakes and 200 small ones, and this gift he duplicated at Christmas. From Mrs. W. S. Clymer, Messrs. Lansburgh & Bro., G. W. Offuts, Hugh Reilly, B. Nordtlinger, W. Nordlinger, Thomas J. Adler, W. E. Mitchell, W. D. Bran, H. E. Lee, and D. T. B. Hood we received turkeys at Thanksgiving.

She also acknowledges the kindness of the Swiss Steam Laundry Company, who, when our machinery broke down last summer, not only did our large washing for two weeks, but gave us certain parts of a machine in place of those that had proved defective.

Nor must we omit to mention that Capt. Harry Randall, commanding one of the river steamers, gave our children an excursion to River View, which proved very delightful and enjoyable.

To Mr. Tracey, the superintendent of charities, we have been indebted, not only for his official aid in making arrangements necessary in consequence of building, but also for kind offices in superintending details thereof.

## LIST OF EMPLOYEES; ARTICLES OF INCORPORATION; RULES, REGULATIONS, AND BY-LAWS; LIST OF OFFICERS; BOARD OF MANAGERS, AND COMMITTEES.

*Names and salaries of employees.*

| Name.                                   | Salary per month. | Name.  | Salary per month. |
|---|-------------------|--|-------------------|
| Mrs. K. B. Barlow, superintendent.....  | \$100             | Mr. N. L. Townsend, carpenter.....   | \$40              |
| Miss M. J. Gardner, cottage matron..... | 25                | Mr. Paul Battle, farmer.....   | 25                |

| Mr. C. A. Brunger, florist.....         | 40                |  |                   |

## AMENDED ARTICLES OF INCORPORATION.

*To all persons whom it may concern, know ye:*

That A. M. Gangwer, A. B. Atkins, John Hitz, J. S. Blackford, A. N. Zevely, M. H. Doolittle, Thomas Taylor, W. W. Dungan, M. V. Bucky, and Walter S. Cox, on the 12th day of March, A. D. 1872, under and by virtue of authority granted by an act of Congress entitled "An act to provide for the creation of corporations in the District of Columbia by general law," approved May 5, 1870, have agreed to amend their union as a body corporate, recorded in liber deeds of incorporation, District of Columbia, folio 185, as follows, to wit:

To be known and designated under the name and style of the Industrial Home School of the District of Columbia, to consist of ten managers for the coming year, under which name and style they and their successors will devote themselves, and for the performance of all the duties and enjoyment of all rights and privileges usually performed and enjoyed by legally incorporated companies.

Also to sue and be sued, implead and be impleaded, to receive and enjoy property, real, personal, and mixed, and the same to receive and convey by gift, grant, bargain, or otherwise, and enjoy all the rights, privileges, and protections granted and guaranteed by and under the provisions of the above-recited act of Congress; and

They further agree and bind themselves and their successors forever to respect and be governed by the rules and regulations prescribed by said act of Congress.

In testimony whereof we have hereunto set our hands and seals the day and year first above written.

A. M. GANGWER.  
JOHN HITZ.  
M. H. DOOLITTLE.  
THOMAS TAYLOR.  
M. V. BUCKEY.

A. B. ATKINS.  
A. N. ZEVELY.  
J. S. BLACKFORD.  
W. W. DUNGAN.  
WALTER S. COX.

DISTRICT OF COLUMBIA, *County of Washington*, ss:

I, Thomas J. Myers, a notary public in and for the county and District aforesaid, do hereby certify that A. M. Gangwer, A. B. Atkins, John Hitz, J. S. Blackford, A. N. Zevely, M. H. Doolittle, Thomas Taylor, W. W. Dungan, M. V. Buckey, and Walter S. Cox personally appeared before me in the District and county aforesaid, they being the parties to a certain instrument of writing dated on the 12th day of March, A. D. 1872, and hereto annexed, the said A. M. Gangwer, A. B. Atkins, John Hitz, J. S. Blackford, A. N. Zevely, M. H. Doolittle, Thomas Taylor, W. W. Dungan, M. V. Buckey, and Walter S. Cox being personally well known to me as the persons who executed the said instrument of writing and acknowledged the signing and sealing as their act and deed.

Given under my hand and notarial seal this 12th day of March, 1872.

THOMAS J. MYERS, *Notary Public*.

Received for record March 13, 1872, and recorded in liber deeds of incorporation, District of Columbia, folio 193. Examined by Wolfe, recorder.

BY-LAWS ADOPTED BY THE ASSOCIATION NOVEMBER 5, 1888.

*Name of the association.*

ARTICLE 1. This association shall be known as the Industrial Home School of the District of Columbia.

*Object of the association.*

ART. 2. The object of the association is to provide a home for friendless and neglected children of both sexes, and furnish them instruction in some branches of industry in connection with ordinary school duties, with a view of making them self-sustaining upon arriving at years of maturity.

*Membership.*

ART. 3. Any person may become a member of this association by vote of a majority of the members present at any regular meeting of the association or of the board of managers on payment of an annual fee of \$1, upon payment of which they shall be furnished with a certificate of membership.

*Arrears.*

ART. 4. Any person failing to pay the annual dues shall lose his right to vote until his dues are paid.

*Officers.*

ART. 5. The officers of the association shall consist of a president, one or more vice-presidents, a secretary, and a treasurer, who shall be officers and ex officio members of the board of managers, and who shall hold their offices, respectively, until their successors are elected.

*Board of managers.*

ART. 6. A board of managers shall have general supervision of all matters connected with the institution and consist of fifteen members elected by the association, besides the officers. The board may elect additional members, not exceeding five, if in its discretion it is deemed advisable. The two civilian Commissioners of the District of Columbia shall be ex officio members of the board.

*President.*

ART. 7. The president shall preside at all meetings of the association and the board of managers, and perform such other duties as belong to his office.

*Vice-president.*

ART. 8. In the absence of the president his duties shall be performed by a vice-president.

*Secretary.*

ART. 9. The secretary shall keep the records of the proceedings of the meetings of the association and of the board of managers, and perform such other duties as the board or association may direct.

*Treasurer.*

ART. 10. The treasurer shall keep the accounts and have custody of the funds of the association. He shall disburse the money of the association on bills and vouchers attested by the superintendent when approved by a member of the finance committee and the president, and shall make an annual report to the association and monthly reports to the board of managers. All receipts for membership fees and all moneys contributed for the general purposes of the institution shall be turned over to the treasurer, to be accounted for by him.

*Annual meeting.*

ART. 11. The annual meeting of the association shall be held on the last Tuesday in October, at which the officers and other members of the board of managers shall be elected.

*Annual reports.*

ART. 12. The board of managers, the treasurer, and superintendent shall present annual reports at the annual meeting of the association.

*Meetings of the board.*

ART. 13. The board of managers shall hold regular monthly meetings for the transaction of the business of the association.

*Meetings—employees.*

ART. 14. No employee of the association shall be a member of the board or attend its meetings, except upon invitation of the board.

*Special meetings.*

ART. 15. The president shall call special meetings of the board of managers or association when he deems it necessary, or such meetings may be called by written request of five members of the board.

*Notice of meetings.*

ART. 16. Notice of meetings shall be served on members personally or mailed to them at least two days previous to the time of meeting by the secretary, or a meeting of the board of managers may be held immediately after any meeting of the association without previous notice being given.

*Vacancies.*

ART. 17. Vacancies may be filled at any regular meeting of the board or association or at any special meeting called for the purpose.

*Quorum.*

ART. 18. A quorum of the board of managers for the transaction of business shall consist of at least seven members, and of the association at least ten of its members.

*Proxy voting.*

ART. 19. Voting by proxy shall not be allowed at the meetings of the association or the board of managers.

*Contracts and supplies.*

ART. 20. No member of the board shall be interested in any contract with the association to supply material of any kind.

*Alteration of the by-laws.*

ART. 21. The by-laws may be amended at any regular or duly called meeting of the association by a vote of the majority of the whole number of members or of two-thirds of the members present.

RULES AND REGULATIONS ADOPTED BY THE BOARD OF MANAGERS NOVEMBER 19, 1888.

*Meetings.*—The regular meetings of the board of managers shall be held on the second Tuesday of each month.

*Order of proceedings.*—At all the meetings of the board for the transaction of ordinary business the order of proceedings shall be as follows: (1) Reading of the minutes; (2) superintendent's report; (3) matron's report; (4) treasurer's report; (5) physician's report; (6) monthly requisition; (7) reports from committees; (8) unfinished business; (9) communications; (10) new business.

*Appointment of committees.*—The president shall appoint all standing committees, unless otherwise ordered by the board.

*Committees.*—The following-named committees shall be appointed by the board of managers in addition to any others authorized by the board: (1) Admission and placement; (2) buildings, grounds, and employees; (3) finance; (4) greenhouse and garden; (5) housekeeping; (6) industries and education; (7) legislation.

*Admission and placement.*—It is the duty of the committee on admission and placement to exercise control of the admission of children and placing them in homes under regulations approved by the board of managers. The committee shall require a semiannual report of the condition and progress of children placed in homes until they have become of adult age and are able to look out for their own interest, and shall prescribe a form of book to be kept at the home by the superintendent containing a full history of each inmate.

*Buildings, grounds, and employees.*—It is the duty of the committee on buildings, grounds, and employees to have supervision over the buildings and grounds, the purchase of stock, farm utensils, and machinery required, to provide the requisite help, and to supervise all necessary repairs and the erection of new buildings.

*Finance.*—It is the duty of the committee on finance to have supervision of the finances, make estimates for the expenses of the institution, and provide means for its support, to audit all expenditures, to prescribe the manner in which the treasurer and superintendent shall keep their accounts, and at least twice a year examine the books and accounts of the treasurer and superintendent, and report to the board.

*Greenhouse and garden.*—It is the duty of the committee on greenhouse and garden to exercise supervision over the greenhouse and garden.

*Housekeeping.*—It is the duty of the housekeeping committee to supervise the purchase of supplies for maintenance required by the home; to present requisitions for supplies for the action of the board, after approving the same; approve the bill of fare, and have general oversight over the domestic branch of the institution.

*Industries and education.*—It is the duty of the committee on industries and education to attend to all matters connected with the intellectual training of the children, in cooperation with the board of trustees of public schools; to supervise the various industrial vocations deemed advisable by the board of managers, and to promote the mental improvement of the pupils and the efficiency and usefulness of the industrial department in every practicable manner.

*Secretary's book of by-laws and rules.*—The secretary shall keep a book containing the constitution and by-laws of the institution, in which shall be entered all the amendments and rules, resolutions, and orders adopted by the board, which shall be produced for reference at the board meetings.

*Membership and dues.*—The secretary shall keep a book containing the names of the members of the association, the date of their election and payment of dues, and the period for which the dues are paid.

*Treasurer.*—The treasurer will submit a detailed statement showing the condition of the treasury at each monthly meeting of the board. The funds of the institution shall be deposited in such bank as the board of managers shall direct. The treasurer is authorized to employ a bookkeeper at a salary of \$100 per annum.

*Requisitions for maintenance.*—All requisitions for maintenance shall be submitted by the superintendent to the housekeeping committee for approval each month. When approved by the housekeeping committee the requisitions shall be submitted to the board for approval, and no purchases shall be made until such requisitions are approved by the board.

*Superintendent.*—The superintendent and matron shall make monthly reports to the board.

*Bills incurred.*—The superintendent shall report to the board at each monthly meeting the aggregate amount of bills incurred during the preceding month, and furnish a statement of all the outstanding liabilities incurred since the commencement of the fiscal year.

*Employees.*—The employees of the home shall be under the direct control of the superintendent, who is charged with the duty of seeing that each performs the duty of his or her respective station. He shall keep an accurate account of all work performed of every character, together with a time book, and make monthly reports of work done, and the hours of attendance of each person under salary at the institution.

*Insubordination.*—In case of insubordination of employees, the superintendent shall have power to suspend the person offending, and will report his action at the next meeting of the board.

*Admission.*—No child under 5 years or over 12 years of age shall be admitted to the home without a special order of the board.

*Circumstances of admission.*—Only destitute children, or those depending upon charity for care or support, shall be admitted.

*Discharge.*—When a satisfactory home can be found for any ward of the institution, the committee on admission and placement may select a suitable child to be placed in such home.

*Industrial work.*—The children in the home of suitable age shall, in addition to their school work, engage regularly in some occupation suited to their capacity, with the object of acquiring habits of industry, of stimulating mental activity as an educational process, and of learning various manual processes for the purpose of securing suitable employment when discharged.

*Religious instruction.*—No sect distinction shall be recognized among inmates of the home in either the teachers or scholars, and the same religious subjects or Scripture shall be taught to the whole school and be confined to points of doctrine and practice about which there is no dispute among Christian sects.

*Scholars graded in classes.*—The scholars in both week-day and Sunday schools shall be graded or be classified according to their ages and attainments and not according to any supposed religious opinions.

*Inmates absconding.*—Whenever a ward of the home leaves the institution without consent immediate written notice thereof shall be sent by the superintendent to the person who recommended the child for admission and to the chairman of the committee on admission and placement.

*Physician.*—A physician shall be employed to visit the home, who shall make a monthly report to the board of the health of the children and the sanitary condition of the home.

It was moved and seconded that the secretary forward the report with the by-laws and amendments and the names of the members of the board of managers, with the committees for the ensuing year, to the Commissioners, with the request that 500 copies of the report be printed for the use of the board of managers.

Adopted.

#### OFFICERS.

President, Henry F. Blount, 3100 U street; first vice-president, Dr. T. B. Hood, 1009 O street NW.; second vice-president, J. D. McPherson, 1623 Twenty-eighth street; secretary, Mrs. H. W. Blackford, Georgetown, D. C.; treasurer, B. T. Janney, 3514 Prospect avenue.

#### MANAGERS.

W. B. Gurley, 1335 F street; J. B. T. Tupper, 1316 Sixteenth street; Mrs. J. B. T. Tupper, 1316 Sixteenth street; Mrs. J. B. Edmunds, 1625 K street; Mrs. C. E. Foster, 1017 Sixteenth street; Lewis Abraham, 1211 F street; Dr. M. D. Peck, 934 F street; James B. Nourse, Highlands, Georgetown; Mrs. Emily Nourse, 2823 Q street; Rev. Nelson Falls, Mount Albans, Georgetown; Archdeacon G. F. Williams, 607 G street, SE.; J. Ormond Wilson, 1439 Massachusetts avenue; James Somerville, Sixteenth street and Howard avenue; Mrs. B. T. Janney, 3514 Prospect avenue; Miss A. Wilson, 1218 Connecticut avenue; Mrs. Dr. Flint, The Richmond.

#### COMMITTEES.

*Admission and placement.*—Lewis Abraham, Dr. Hood, Mrs. Tupper, Mrs. Janney, Miss A. Wilson, Archdeacon G. F. Williams.

*Buildings and grounds.*—B. T. Janney, Mrs. Flint, James W. Somerville, James B. Nourse.

*Finance.*—Mrs. H. W. Blackford, J. O. Wilson, Dr. M. D. Peck.

*Industrial education.*—J. B. T. Tupper, J. O. Wilson, John D. McPherson, C. M. Matthews.

*Subcommittee on industries, girls' department.*—Mrs. E. L. Nourse, Mrs. J. B. T. Tupper, Mrs. C. E. Foster, Rev. Neilson Falls.

*Legislation.*—J. O. Wilson, Rev. Neilson Falls, John D. McPherson, Dr. T. B. Hood, C. M. Matthews, Miss A. Wilson.

*Greenhouse and garden.*—J. B. T. Tupper, Mrs. J. B. T. Tupper, Mrs. C. E. Foster, Mrs. J. B. Edmunds.

*Housekeeping.*—Miss A. Wilson, Mrs. C. E. Foster, Mrs. J. B. Edmunds, Mrs. H. W. Blackford, Mrs. E. L. Nourse, Mrs. Flint.

## REPORT OF ST. ROSE'S INDUSTRIAL SCHOOL.

ST. ROSE'S INDUSTRIAL SCHOOL,  
Washington, D. C., July 20, 1895.

DEAR SIR: In answer to your letter of the 25th ultimo, requesting our report for fiscal year ended June 30, 1895, I take pleasure in respectfully submitting to you the following:

The greater number of children in this institution have been transferred from St. Vincent's Orphan Asylum, this city, where the elementary branches of a good, plain English education have been taught them, and where they were kindly cared for and instructed according to each child's age and capabilities until date of transfer, which is generally made after having attained her fourteenth year. We have likewise received children committed to our care from the District of Columbia, and who will remain in the institution until having attained their twenty-first year unless otherwise provided with suitable homes, etc. St. Rose's Industrial School was commenced in 1872, and since that period until the present has always been conducted by the Sisters of Charity.

During the year six Sisters and myself, in the position of superioress, have been on duty in the industrial school without having made any charge whatever (never have made any charge) upon the appropriation given by Congress toward providing for the institution.

While here the children are taught plain sewing, with use of the best approved machines, dressmaking in all its variations and present-day requirements, domestic economy, practical housekeeping, cooking, washing, ironing, vocal music, and, for the few who show special talent lessons in instrumental music are also given.

Some hours of each week are devoted to a résumé of previous studies, correspondence with relatives, etc. A good library of useful and entertaining literature is open for the children, and from which each one can make her own selection for the recreation hour.

Our Sisters give their utmost attention to the training and educating of these children in order to make them skillful, industrious, upright, and capable of filling most useful and honorable positions in the world whenever called upon to take their place in it—self-supporting—and in almost every case have, during this year, as in every previous year, fully corresponded to the hopes entertained for them.

The people of Washington are aware of this and (as I gratefully acknowledge) usually render a generous testimony to our work.

All the work connected with this institution, viz, house cleaning, laundry, sewing, repairing, etc., is done by the Sisters and children, the only additional help having been as follows:

|   | Per year.  |
|---|------------|
| One male servant, \$25 per month .....      | \$300. 00  |
| One male servant, \$11 per month .....      | 132. 00    |
| One private watchman, \$1 per month .....   | 12. 00     |
| One dressmaker, \$25 per month .....        | 300. 00    |
| One cutter and fitter, \$25 per month ..... | 300. 00    |
| Total expenditure for labor .....           | 1, 044. 00 |

*Statistics.*

|   |    |
|---|----|
| Average number of inmates during the year in the institution..... | 65 |
| Number of inmates on last day of fiscal year.....                 | 72 |
| Admitted during fiscal year.....                                  | 34 |
| Left institution.....   | 33 |
| Situations found.....   | 12 |
| Returned to relatives.....  | 19 |
| Transferred to other institutions.....                            | 2  |
| No deaths.  |    |

I have no suggestions to make in regard to future administrative improvements. The annual records of the St. Rose's Industrial School show that success has attended its operations, and this, I trust, speaks for itself.

The following statement shows receipts during fiscal year:

|                           |            |
|---------------------------|------------|
| From public funds.....    | \$4,500.00 |
| From work of inmates..... | 3,676.00   |
| From other sources.....   | 386.18     |
| Total receipts.....       | 8,562.18   |

Our expenditures each year far exceed our receipts. Herewith is appended a recapitulation of our expenses during the year.

In this statement a reasonable estimate has been made for board, washing, shoes, clothing, and medicinal provision for inmates, viz:

|   |            |
|---|------------|
| For labor as herein stated.....   | \$1,044.00 |
| For fuel.....   | 794.83     |
| For gas and oil.....  | 86.46      |
| Board, washing, and rooms furnished two male servants at \$10 per month each.....   | 240.00     |
| Board, etc., for two dressmakers at \$10 per month each.....  | 240.00     |
| Feed and care of horse, repairs on wagon, carriage, harness, repairing stable, etc.....   | 540.25     |
| Repairs on building, painting, plumbing, furniture, repairing and cleaning same, and other incidental expenses for care and maintenance of institution..... | 1,000.00   |
| Board, clothing, shoes, washing, mending, etc., for 65 inmates (average number), estimated at \$10 per month.....   | 7,800.00   |
| Medicines and dentistry during the year.....  | 124.58     |
| Total.....  | 11,870.12  |
| Receipts.....   | 8,562.18   |
| Difference.....   | 3,307.94   |

We therefore most earnestly solicit that the appropriation by Congress for the next fiscal year shall be \$5,000, in order that we may be enabled, under great difficulties, to meet the requirements for maintenance of St. Rose's Industrial School and for the proper support and care of the orphan and otherwise destitute children of this institution.

Very respectfully,

Col. JOHN TRACEY,  
Superintendent of Charities.

SISTER CLARA, *President.*

## REPORT OF THE HOUSE OF THE GOOD SHEPHERD.

WASHINGTON, D. C., August 2, 1895.

DEAR SIR: In accordance with your request I respectfully submit the financial statement of the House of the Good Shepherd for the fiscal year ended June 30, 1895:

*Receipts.*

|                                   |            |
|-----------------------------------|------------|
| Balance brought over .....        | \$3. 55    |
| Appropriation from Congress ..... | 2, 700. 00 |
| From work and children .....      | 2, 366. 15 |
| All other sources .....           | 1, 184. 51 |
| Total .....                       | 6, 254. 21 |

*Expenditures.*

|   |             |
|---|-------------|
| For all items of maintenance, including repairs ..... | \$6,461. 51 |
| Workman's wages .....                                 | 199. 94     |
| Total .....   | 6, 661. 45  |
| Difference .....                                      | 407. 24     |

*Statistics.*

|  |    |
|--|----|
| Average number of inmates during the year in the institution ..... | 91 |
| Number of inmates on last day of the year .....                    | 94 |
| Admitted during the year .....                                     | 50 |
| Left the institution .....   | 6  |
| Provided with a home .....   | 2  |
| Dismissed .....  | 1  |
| Returned to relatives .....  | 27 |
| Died .....   | 2  |

We have no paid officials.

All the work connected with the institution is done by the Sisters of the Good Shepherd and the inmates, with the exception of that done by one man, whom we employ to work on the place as carpenter, gardener, etc.

Owing to scarcity of work in the department for shop work our expenses have exceeded our income, and we earnestly solicit from Congress an annual appropriation of \$3,000 to enable us to continue our good work.

Very respectfully,

MOTHER MARY,  
Superior.

Col. JOHN TRACEY,  
Superintendent of Charities.

D C 95—21

## REPORT OF THE ASSOCIATION FOR WORKS OF MERCY.

WASHINGTON, D. C., *July 26, 1895.*

DEAR SIR: During the fiscal year ended June 30, 1895, the number who have been admitted into this institution is 14; left, 8. Number in the house June 30, 1895, 24.

The care of the inmates and all other internal control of the house is under the direction of the Sister in charge of the House of Mercy. The financial affairs are in the hands of the board of trustees and the board of managers. The officers of the former board are: President, Harry C. Whiting, esq.; treasurer, James Z. Dare, esq.; secretary, John F. Paret, esq.; and of the latter, president, Mrs. Anton Heger; secretary, Mrs. E. C. W. Chubb; purser, Mrs. Frank H. Bigelow.

The chaplain of the house is the Rev. Alfred Harding; the physician, Dr. Anton Heger; the assistant physician, Dr. J. Thomas Kelley; the legal adviser, J. Holdsworth Gordon, esq.

The plan of the work is to receive inmates for a period of not less than one year, and when the penitents are very young for a longer time when it can be so arranged. No one is received who does not declare herself willing to come, as it is our endeavor to make the atmosphere of the house that of a home and not a prison. At present we have accommodation for 26 inmates only, and at this writing (July 26) there is no vacancy, 2 having been received since the close of the fiscal year.

The great need of the work is a suitable building, one in which a classification of inmates—a matter of very great importance in rescue work—may be carried on. At present, although classification is attempted, and in a measure carried out, it is by no means perfectly done, owing to the utterly inadequate arrangements of the house. Then, too, we are obliged to use dormitories—whereas the work could be more effectually done if each inmate had her own room, however small.

The present house was at one time a private residence, and although within the last few years improvements and additions have been made which render it less inconvenient than at first, still the arrangements are by no means such as they should be if this work is to have its place as an institution of the very first grade. It is impossible for one, however interested, who only knows the work from the outside to appreciate its needs. We, whose daily life is in this lazar house of souls, appeal most earnestly for the means to build a house of mercy suited to the work; one which will meet the peculiar needs of the class we would help. Already a building fund has been started, and three of our board of managers, Mrs. Albert Brackett, Mrs. Clarence Almy, and Mrs. De Peyster constitute the building committee, but the fund does not yet amount to \$100, and we want \$50,000. As a portion of this sum could be realized from the sale of our present property, which we hold free of debt, we appeal to you as superintendent of charities

to support and further our requisition for a grant of not less than \$35,000. This, in addition to offerings from private individuals which we have reasonable hope of receiving, will enable us to build a house which will accommodate at least three times our present number, and for such a house it is unnecessary to tell you there is need. This work is open to your official inspection at all times, and will be so long as it remains under its present management.

Respectfully submitted.

SISTER DOROTHEA,  
*Sister in Charge.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

## REPORT OF THE GIRLS' REFORM SCHOOL.

WASHINGTON, D. C., *October 2, 1895.*

SIR: In accordance with the acts of March 3, 1881, and March 2, 1889, I have the honor to submit on behalf of the Girls' Reform School of the District of Columbia the following reports in regard to the school:

Exhibit A, a list of the girls committed to the Girls' Reform School from November 4, 1893, to June 30, 1895, as well as a list of the girls placed in homes or returned to their parents or guardians, from November 4, 1893, to June 30, 1895; Exhibit B, inventory of furniture, tools, wagons, farm and stable supplies, stock and poultry at the Girls' Reform School on June 30, 1895; Exhibit C, appropriation made for the year ended June 30, 1895; Exhibit D, items of expenditure furnished by the Commissioners of the District of Columbia for the fiscal year ended June 30, 1895; Exhibit E, statement in regard to the building and land upon which the reform school is situated; Exhibit F, estimates for the salaries of employees, for the maintenance and for the improvement of the Girls' Reform School for the fiscal year ending June 30, 1897.

On August 31, 1895, I had the honor to submit to you estimates for the salaries of employees, for the maintenance and for the improvement of the Girls' Reform School for the fiscal year ending June 30, 1897, and at the same time I explained in detail the needs of the school.

Trusting that this information is what you desire, I am,

Yours, very respectfully,

WILLIAM C. ENDICOTT, Jr.,  
*President Board of Trustees.*

Hon. JOHN W. ROSS,  
*President Board of Commissioners.*

## EXHIBIT B.

*Inventory of furniture, tools, wagons, farm and stable supplies, stock and poultry, at the Girls' Reform School, on June 30, 1895.*

*Office.*—One carpet, 1 desk, 1 revolving chair, 1 copying press and stand, 1 book-case, 1 waste basket, 1 rocking chair, 3 oak chairs, 6 window shades, 3 wire window screens, 1 lamp.

*Reception room.*—One carpet, 1 lounge, 2 tables, 3 rattan chairs, 1 cane rocker, 2 cane chairs, 3 wire screens, 6 window shades, 3 pairs lace curtains, 1 lamp, 1 telephone.

*Officers' dining room.*—One extension table, 1 sideboard, 2 small tables, 6 chairs, 1½ dozen plated forks, 1 dozen steel knives, one-half dozen plated knives, 1 dozen teaspoons, one-half dozen dessert spoons, one-half dozen tablespoons, 1 carving knife, fork, and steel, 4 saltcellars, 4 window shades, 2 wire screens, 4 pepper casters, 1 glass fruit set, 1 dinner service, 10 tumblers, 1 glass fruit dish, 1 sugar bowl, 1 spoon holder, 1 celery glass.

*Girls' dining room.*—Three tables, 42 plates, 36 cups, 56 saucers, 10 pitchers, 3 dozen knives and forks, 3 dozen teaspoons, 2½ dozen large spoons, 1 dozen chairs, 3 benches, 2½ dozen soup bowls, 1 dozen saltcellars, 1 dozen pepper bottles.

*Kitchen.*—One range, 2 teakettles, 5 cooking kettles, 2 meat boilers, 5 frying pans, 20 bread pans, 1 griddle, 1 preserving kettle, 6 coffeepots, 1 teapot, 6 iron spoons, 1 meat chopper, 1 bread toaster, 1 coffee mill, 1 spice mill, 6 dish pans, 2 candlesticks, 1 wire basket, 12 muffin pans, 15 milk pans, 6 pie plates, 1 double boiler, 6 saucepans, 1 meat saw, 1 cleaver, 1 bread cutter, 1 tea strainer, 1 colander, 3 dippers, 1 can opener, 1 large grater, 1 nutmeg grater, 1 egg-beater, 3 cake turners, 6 dustpans, 6 dust brushes, 3 hair brooms, 12 brooms.

*Pantry.*—One refrigerator, 1 ice pick, 4 sugar boxes, 1 sugar scoop, 1 bread box, 3 bread boards, 1 rolling-pin, 3 milk pails, 1 churn, 2 ladles, 1 skimmer, 3 yellow bowls, 4 meat dishes, 6 vegetable dishes, 1 dinner bell, 1 chopping bowl, 1 platform scale.

*Laundry.*—One ironing stove, 1 hot-water heater, 5 ironing boards, 3 clotheshorses, 9 clothes baskets, 2 wash boilers, 1 dozen flatirons, 4 coal hods, 6 washboards, 2 wringers, 2 cedar washtubs, 1 table, 2 wicker baskets for soiled clothes.

*Lamps, baskets, etc.*—Twenty lamps, 12 buckets, 1 dozen scrub brushes, one-half dozen metal soap dishes, 12 porcelain soap dishes.

*Halls.*—First floor: Three rugs, 1 hatrack, 1 clock, 1 gong, 150 feet fire hose. Second floor: One hundred and fifty feet fire hose. Third floor: One hundred and fifty feet fire hose.

*Superintendent's bedroom.*—One carpet, 1 iron bedstead, 1 wire spring, 1 hair mattress, 1 pair pillows, 1 pair blankets, 1 comfort, 1 oak bureau, 1 washstand, 1 toilet set, 1 small table, 4 bent-wood chairs, 1 wardrobe, 1 wicker basket, 6 window shades, 3 wire screens.

*Matron's room.*—One carpet, 1 wardrobe, 1 bureau, 1 washstand, 1 small table, 1 rocking chair, 2 oak chairs, 1 wicker basket, 6 window shades, 2 pairs white blankets, 1 iron bedstead, 1 bedspring, 1 hair mattress, 1 toilet set, 2 pillows.

*Overseer's room.*—One iron bedstead, 1 spring, 1 bureau, 1 wardrobe, 1 washstand, 1 toilet set, 1 rug, 4 window shades, 1 hair mattress, 1 pillow, 1 bent-wood chair, 1 pair white blankets.

*Teacher's room.*—One carpet, 1 iron bedstead, 1 spring, 1 hair mattress, 2 pillows, 1 bureau, 1 washstand, 1 toilet set, 1 rocking chair, 2 bent-wood chairs, 4 window shades.

*Sewing teacher's room.*—One carpet, 1 iron bedstead, 1 spring, 1 hair mattress, 1 bureau, 1 washstand, 1 toilet set, 1 wicker basket, 1 rocking chair, 2 oak chairs, 1 pair white blankets, 1 comfort, 1 pair pillows.

*Girls' bedrooms.*—Forty-two iron bedsteads, 42 springs, 34 straw beds, 28 tables, 28 chairs, 28 chambers.

*Men's room.*—One bureau, 1 washstand, 1 toilet set, 3 mattresses, 1 table, 1 stove.

*Bedding and table linen.*—One hundred and twenty single sheets, 16 double sheets, 35 Turkish towels, 139 huckaback towels, 106 pillowcases, 84 single bedspreads, 7 double spreads, 6 dozen colored blankets, 6 tablecloths, 48 dinner napkins.

*Schoolroom.*—One teacher's desk, 20 secondhand desks, 1 oak chair, 1 dozen geographies, 1 dozen first readers, 19 second readers, one-half dozen third readers, one-half dozen fourth readers, 12 spelling books, 12 arithmetics, 2 dozen slates, 1 box chalks, 2 boxesslate pencils, 9 lead pencils, 1 box penstiffs, one-half dozen blackboard erasers, 36 Bibles, 36 hymn books, 8 Testaments, 4 story books, 13 catechisms.

*Tools.*—One crosscut saw, 1 rip saw, 1 backsaw, 1 compass saw, 1 fore plane, 2 jack planes, 1 rabbit plane, 1 smoothing plane, 1 24-inch iron square, 1 12-inch steel square, 1 6-inch square, 1 drawing knife, 1 spokeshave, 1 eagle bevel, 1 spirit level, 1 saw-set, 1 pair dividers, 1 claw hammer, 1 hatchet, 1 mallet, 2 screw-drivers, 1 saw vise, 1 tool handle, 1 oilstone, 1 plumb bob, 1 set chisels (12), 1 extension bit, 1 ratchet brace, 1 key vise, 1 tool chest, 2 Worthington pumps, and engine.

*Wagons, farm and stable supplies.*—One farm wagon, one covered wagon, 1 phaeton, 2 double sets harness, 1 single set harness for wagon and phaeton, 2 ploughs, 1 cultivator, 1 harrow, 1 Planet, jr., hoe, 2 scythes, 2 picks, 1 mattock, 1 spade, 1 post hole bar, 4 rakes, 11 hoes, 1 shovel, 3 forks, 4 stable brooms, 1 Buer scythe, 2 wheelbarrows, 12 hotbed frames, 1 block and tackle, 3 horse blankets, 2 lap robes, 3 halters, 4 cow straps, 150 feet hose, 6 axes, 3 currycombs, 3 brushes, 1 cart and harness, 1 double shovel, 1 corn cover, 2 singletrees, 2 muzzles.

*Stock and poultry.*—Three horses, 3 cows, 31 pigs, 2 calves, 30 fowls.

## EXHIBIT C.

*Appropriation for year ended June 30, 1895.*

| Appropriation .....                            | 5, 000. 00 |

## EXHIBIT E.

*Statement in regard to the building and land upon which the Reform School is situated.*

The building of the Girls' Reform School of the District of Columbia was constructed upon an old farm of 19 acres (selected by the Attorney-General, the Secretary of War, and the Engineer Commissioner of the District of Columbia), which is situated at the junction of the Conduit and Loughborough roads, and was handed over to the board of trustees of the Girls' Reform School of the District of Columbia on or about November 1, 1893. The farm is at present in excellent condition. During the past year the girls have worked in the fields and raised sufficient vegetables to supply the wants of the school. Potatoes last year had to be sold, as there was no storehouse for them, and it is feared that the same thing will happen during the coming year.

EXHIBIT F.

Summary of the expenses of employees, for the maintenance, and for the improvement of the Girls' Reform School for the fiscal year ending June 30, 1897.

SALARIES.

|                     |         |
|---------------------|---------|
| Superintendent      | \$1,000 |
| Trustee             | 720     |
| Medical             | 600     |
| Inspector of school | 960     |
| Inspector of house  | 240     |
| Laundry             | 600     |
| Reception           | 365     |
| Labourer            | 300     |
| Treasurer           | 600     |
| Total               | 5,385   |

MAINTENANCE.

|   |       |
|---|-------|
| Expenses for coal, fuel, soap, oil, lamps, candles, clothing, shoes, forage, transportation, medical attendance, transportation, labor, freight, furniture, bedding, sewing machines, fixtures, books, stationery, repairs, and other necessary items | 6,000 |
|---|-------|

IMPROVEMENT.

|  |        |
|--|--------|
| Expenses for main building, 90 or more cells                 | 50,000 |
| Expenses for   | 2,500  |
| Expenses for outside woodwork of building and interior walls | 1,200  |
| Total  | 53,700 |

WASHINGTON, D. C., August 31, 1897.

The Commission is asked to appropriate \$240, in order to enable the trustees to employ a competent teacher in cooking who can devote her entire time to instructing the girls and enable them to learn to be competent cooks. The manifold duties of the trustees make it almost impossible for her to give as much attention to this branch of teaching as is deemed advisable.

If you will examine the law establishing the Girls' Reform School of the District of Columbia, you will find Supplement to the Revised Statutes of the United States, Vol. 1, p. 74, that the board of trustees have authority to appoint such officers, agents, teachers, and other employees as may be necessary, and to fix the rate of compensation of the same, subject to the approval of the Commissioners of the District of Columbia. It is also stated in this act incorporating the Reform School (act of May 3, 1876), "That all the sections of the act of May 3, 1876, entitled 'An act revising and amending the various acts establishing and relating to the Reform School of the District of Columbia,' not consistent with the provisions of this act, are hereby made applicable to the Reform School for Girls of the District of Columbia, except the word 'girls' shall be understood wherever the word 'boys' occurs in said act, and the words '18 years' wherever the words '16 years' occur."

Section 1 of the act of May 3, 1876, declares that the board of trustees shall appoint a treasurer, who shall before entering upon the duties of his office give a bond to the United States, with two or more sureties to be approved by the First Comptroller of the Treasury, in the sum of \$20,000 or a larger sum at the option of the said Comptroller, conditioned that he shall faithfully account for all the money received by him as treasurer. Up to this time the funds appropriated for the Girls' Reform School of the District of Columbia in the District appropriation bill have been disbursed through the Commissioners of the District of Columbia. I am quite sure that it would be for the welfare of the school to appoint a treasurer. For this reason an appropriation of \$600 is asked to pay the treasurer.

I desire further to emphasize the necessity of obtaining from Congress an additional appropriation in order to increase the efficiency of the school and enable the trustees to run the institution upon a more economical basis. If Congress will appropriate \$50,000, ninety or more cells could be added to the school.

The farm is at present in excellent condition and furnishes all the necessary vegetables for the school. An appropriation of \$2,500 is asked to build a storage house where vegetables and crops can be stored. This year some 375 bushels of potatoes

will be raised, and I am very much afraid that this year, as in previous years, the potatoes will have to be sold because there is no place where they can be stored during the winter.

An appropriation of \$1,200 is asked in order that the gutters, cornices, window frames, and doors of the exterior of the building, which are greatly in need of paint, may be painted, and also that the interior walls of the building may be painted, which, owing to the change of the heating system, have been much disfigured. These walls have never been painted.

In the District appropriation bills the Girls' Reform School of the District of Columbia has been placed, since the founding of the school, under the head of charities and corrections, while the Boys' Reform School has been placed under the head of reformatories and prisons. As the two schools are practically upon the same footing, and are established by practically the same law (Supp. Rev. Stats., vol. 1, pp. 101 and 596), it is desirable that the Girls' Reform School should be placed under the head of reformatories and prisons.

If it is the intention of the Commissioners to make any change in the estimates which I submit, I should be much indebted if they will inform me of the fact, and enable me to explain further why I deem it essential to the welfare of the school that Congress should make the appropriations asked for.

Yours, respectfully,

WILLIAM C. ENDICOTT, Jr.,  
President Board of Trustees.

Hon. JOHN W. ROSS,  
President Board of Commissioners.

## REPORT OF THE REFORM SCHOOL OF THE DISTRICT OF COLUMBIA.

WASHINGTON, D. C., *September 24, 1895.*

GENTLEMEN: In accordance with the acts of Congress of March 3, 1881, and March 2, 1889, I submit herewith, on behalf of the Reform School, reports embracing a full and complete inventory of all the personal property of the school in detail, the number of employees on duty during the fiscal year ended June 30, 1895, with the salary paid to each; the amount of garden, field, and other products produced; a full and detailed account of the receipts and expenditures and of the operations of the various shops during the same period, together with the disposition made of the said personal property, products, etc.

Very respectfully,

CECIL CLAY,

*President of the Board of Trustees, Reform School.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

---

*Inventory, 1895—Reform School.*

MAIN BUILDING.

*Office, room No. 1.*—One large covered desk, 1 iron safe (old), 1 folding desk, 1 cloth-covered table, 9 cane-seated chairs, 5 trustees' portraits, 1 copy press and table, 1 floor matting, 4 rugs, 2 inkstands, 2 wastebaskets, 1 dictionary (very old), 1 bookcase, 2 cuspidors, 1 fender, 2 letter boxes, 1 watchman's clock (electric), 1 droplight, 4 window shades, 4 window screens, 1 lantern, 1 screen door, 1 brussels carpet (new).

*Belfry.*—One large bell, 1 rope, 1 United States flag.

*Reception room, No. 2.*—Two cane divans, 2 cane-seated rockers (arms), 2 cane-seated rockers (small), 2 cane-seated chairs (high backs), 1 cane-seated chair, 1 oak center table (small), 1 floor matting, 2 bookcases, 1 small desk (very old), 2 trustees' portraits, 1 rug, 500 books in library, 4 window shades.

*Molasses room.*—One barrel vinegar, one-fourth barrel sanitas (disinfectant), 2 tubs (3-hoop), 3 empty barrels.

*Superintendent's dining room, No. 4.*—One sideboard, 1 refrigerator, 10 cane-seated chairs, 1 extension table, 1 set blue china, 1 floor matting, 3 rugs, 2 window shades, 12 glasses, 1 dozen knives and forks, 1 dozen teaspoons (silver plated), 1 dozen tablespoons (silver plated), 2 armchairs (cane seats), 1 carving set, 1 brussels carpet.

*Front hall, first floor.*—Two walnut hatracks, 2 walnut hall chairs, 1 water cooler, 1 iron fire extinguisher, 2 door mats, 1 sideboard, 1 thermometer, 1 linoleum, 1 clock, 1 door mat (front door), 2 high-back wooden chairs, 2 high-back cane chairs, 1 window shade.

*Officers' dining room.*—Two sideboards, 2 extension tables, 17 chairs, 2 window shades, 2 sets white stone china, 18 knives and forks, 24 tablespoons, 24 teaspoons, 18 tumblers, 1 dozen peppers and salts, 3 dozen napkins, 1 screen door, 2 window screens, 8 vegetable dishes, 4 table covers, 6 tray covers, 1 piece oilcloth, 1 rug, 4 pitchers, 2 carving sets, 2 molasses pitchers, 2 vinegar jugs, 1 brussels carpet, 4 celery glasses, 1 dozen glass stands, 2 fruit dishes, 2 dozen soup plates, 4 soup ladles, 2 soup tureens.

| From appropriations to supply deficiencies, act approved March 2, 1895.....   | 553.00      |
| Total.....  | 14,805.00   |
| Disbursed.....  | 14,647.67   |
| Leaving unexpended.....   | 157.33      |

# 340 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

For support:

|  |                  |
|--|------------------|
| From appropriations for District of Columbia, act approved August 7, 1894 .....                                | 25,500.00        |
| From appropriation to supply deficiencies, act approved March 2, 1895. ....                                    | 500.00           |
| From Department of Justice, from appropriation for support of prisoners committed by United States courts..... | 5,288.31         |
| <b>Total</b> .....   | <b>31,288.31</b> |
| <b>Disbursed</b> .....   | <b>30,787.49</b> |
| <b>Leaving unexpended</b> .....  | <b>500.82</b>    |

I have also received from the superintendent of the school during the year, being revenue derived from the labor of inmates, the sum of \$3,519.38. In accordance with the act of Congress approved February 25, 1885, I have paid the same into the Treasury of the United States to the credit of the United States and the District of Columbia in equal parts.

Very respectfully and truly,

SAMUEL W. CURRIDEN,  
Treasurer.

The BOARD OF TRUSTEES.

\$917.34

Cash on hand (National Metropolitan Bank)..... 311.56  
\$1,228.90

Stock on hand, as per inventory June 30, 1895:

|   |          |
|---|----------|
| Finished work of all kinds, one-fourth off of regular prices..... | 950.18   |
| Straw and pulp board.....   | 275.32   |
| Glazed, plain, and fancy covering papers.....                     | 260.12   |
|   | 1,485.62 |

Cash paid to S. W. Curriden, treasurer, covered into United States Treasury..... 2,600.00

Total resources for the fiscal year..... 5,314.52

## LIABILITIES.

Stock on hand beginning of the year, July 1, 1894..... \$1,125.23  
Ledger balances, rated good, July 1, 1894..... 1,128.75  
Cash on hand (National Metropolitan Bank), July 1, 1894..... 418.62  
2,672.60

Net gain in cash, book accounts, and stock..... 2,641.92

Purchased from box-factory fund during the year:

|  |        |
|--|--------|
| One new gumming machine.....             | 276.50 |
| One horse for use in delivery wagon..... | 165.00 |
|  | 441.50 |

Actual gain in money and moneyed values during the year..... 3,083.42

Whole number of boxes made and sold during the year..... 402,100

Present valuation of box industry, exclusive of machinery:

|  |          |
|--|----------|
| Cash on hand and good ledger balances due..... | 1,228.90 |
| Stock and goods on hand July 1, 1895.....      | 1,555.54 |
| Two horses, one at \$100, one at \$175.....    | 275.00   |
|  | 3,059.44 |

Adding machinery purchased by the box industry and paid for from gains since starting, less 25 per cent for wear..... 960.38

Total valuation July 1, 1895..... 4,019.82

Old machinery on hand bought by the United States—cost \$690 (value nominal).

## TOTAL RECEIPTS AND EXPENDITURES.

Cash on hand July 1, 1894..... \$418.62  
Cash received during year..... 7,657.09

Total..... 8,075.71

By cash paid for stock of all kinds..... 3,340.65  
By cash paid for one new machine..... 276.50  
By cash paid for one horse..... 165.00  
By cash paid wages of employees..... 1,382.00  
By cash covered into United States Treasury..... 2,600.00  
By cash remaining on hand July 1, 1894..... 311.56

Total..... 8,075.71

## ADDITIONAL REPORT OF THE REFORM SCHOOL.

WASHINGTON, D. C., *October 1, 1895.*

DEAR SIR: In reply to your note of the 29th ultimo, I have the honor to send you inclosed a report of the superintendent of the Reform School, giving complete details and particulars as to the inmates of the school during the fiscal year ended June 30, 1895, together with a short statement of the amount of money received by the superintendent from various sources and turned over to the treasurer of the school for deposit in the United States Treasury during the same year.

With regard to the estimates of appropriations for the use of the school for the fiscal year ending June 30, 1897, I beg to say that in my letter of August 29 last, submitting these estimates, I stated very briefly the reasons for inserting such items as differed from the estimates for former years, intending to consult with you in person before either the Commissioners or the board of trustees should make any argument before the Congressional committee, so that we might agree in our course of action.

The change in the gross amount required for salaries is sufficiently explained, I think, by my letter referred to, certainly so far as the amount of \$1,350 transferred from the box factory expenses to the salary roll, decreasing the former and increasing the latter without causing any additional expense, is concerned. I call attention, however, to the fact that while the amount appropriated for "support of inmates," etc., for the current year is the same as that appropriated annually for a number of years past—\$26,000—the number of boys in the school has continued to increase, the average number during the year 1895 being 214, as against 193 for 1894, while there are to-day in the school 224 boys. That no additional appropriation is suggested for the "support of inmates," etc., is due to the constant efforts of the board of trustees to economize—properly economize—in every direction consistent with a proper attention to the prime object of the school, namely, the care and reformation of the boys intrusted to it. No new items of appropriation have been suggested except one for a chapel building; that for the bake oven having been heretofore submitted, with the approval of your Board, as being necessary, to Congress at several of its sessions. The reasons for the propriety of erecting a chapel building at the school, other than those suggested in my letter of August 29, are obvious ones, such as would naturally occur to anyone, and need not be stated here. I think this covers all that the Commissioners desire, outside of such information as I expect to give your Board orally at an early moment.

Very respectfully,

CECIL CLAY,

*President Board of Trustees, Reform School.*

Hon. JOHN W. ROSS,

*President Board of Commissioners.*

## FINANCIAL STATEMENT.

The superintendent has received from various sources and turned the same over monthly, during the year, in lawful money, to Samuel W. Curriden, treasurer of the school, who has covered the same into the United States Treasury, for the credit of the United States and the District of Columbia jointly, as follows, viz:

|   |            |
|---|------------|
| From gains in paper-box industry .....      | \$2,600.00 |
| From sales from greenhouses .....           | 562.80     |
| From sales from surplus farm products ..... | 111.56     |
| From miscellaneous sources .....            | 245.02     |
| Total receipts.....                         | 3,519.38   |

## ESTIMATES FOR THE REFORM SCHOOL.

WASHINGTON, D. C., August 29, 1895.

SIR: I submit inclosed estimates of appropriations required for the use of the Reform School in the District of Columbia for the fiscal year ending June 30, 1897.

The increase in the gross amount required for teachers, matrons of families, and watchmen is due to the increase in the number made necessary by the erection and occupancy of a new family building, the additional force for which was appropriated for separately at the last session and partly to a readjustment of the salaries of the teachers, which, with that of the baker and teacher of horticulture, have been, as provided by law, fixed by the board of trustees, with the approval of the Attorney-General. The estimate for the erection of a new bake oven submitted last year is resubmitted, the same necessity for its erection existing now as then.

The items for manager of the box factory, driver, and clerk, aggregating \$1,350, while apparently an increase in the appropriation, do not in fact increase it, as their compensation, paid heretofore as an expense of the box factory, will now be turned in with the other proceeds of that establishment, the only effect of this appropriation being to place these employees on the roll instead of paying them from the proceeds of the shop. The increased number of boys at the school and the large number of people who attend Sunday service there make it very desirable that the chapel building, for which an estimate is made, should be provided.

*Estimates of appropriations for Reform School, fiscal year ending June 30, 1897.*

|   |         |
|---|---------|
| One superintendent .....  | \$1,500 |
| One assistant superintendent.....   | 900     |
| Teachers and assistant teachers.....                                      | 5,040   |
| Matron of school.....   | 600     |
| Four matrons of families, at \$180 each.....                              | 720     |
| Three foremen of workshops, at \$660 each.....                            | 1,980   |
| One farmer .....  | 480     |
| One engineer .....  | 396     |
| One assistant engineer .....  | 300     |
| One baker .....   | 420     |
| One tailor, 1 cook, 1 shoemaker, at \$300 each .....                      | 900     |
| One laundress .....   | 180     |
| Two dining-room servants, 1 seamstress, 1 chambermaid, at \$144 each..... | 576     |
| One teacher of horticulture .....   | 540     |
| Watchmen, not exceeding 6 in number .....                                 | 1,620   |
| Secretary and treasurer to board of trustees.....                         | 600     |
| Manager of box factory .....  | 780     |
| Driver of box-factory wagon .....   | 270     |
| Clerk .....   | 300     |
| Total .....   | 18,102  |

# 354 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

|   |           |
|---|-----------|
| Support of inmates, including groceries, flour, feed, meats, dry goods, leather, shoes, gas, fuel, hardware, tableware, furniture, farm implements, seeds, harness and repairs to same, fertilizers, books, stationery, plumbing, painting, glazing, medicines, and medical attendance, stock, fencing, and repairs to buildings, and other necessary items, including compensation, not exceeding \$1,000, for additional labor or services, and for transportation and other necessary expenses incident to securing suitable homes for discharged boys, not exceeding \$500, all under the control of the Commissioners..... | \$26, 000 |
| New bake oven, including brick building for same.....   | 2, 600    |
| One chapel building, complete, including heating apparatus, gas fixtures, organ, and architect's fees.....  | 12, 000   |

Very respectfully,

CECIL CLAY,  
*President of the Board of Trustees, Reform School.*

Hon. JOHN W. ROSS,  
*President Board of Commissioners.*

## REPORT OF THE BOARD OF CHILDREN'S GUARDIANS.

WASHINGTON, D. C., *October 22, 1895.*

DEAR SIR: At the beginning of the fiscal year for which this report is rendered the members of the board of children's guardians were B. Pickman Mann, Simon Wolf, and Mrs. Lucy S. Doolittle, appointed for the term ended September 16, 1894; Crosby S. Noyes, Miss Harriet B. Loring, and Orrin B. Hallam, appointed for the term ended September 16, 1895, and Mrs. Mary L. D. Macfarland, William J. Miller, and John F. Cook, appointed for the term ending September 16, 1896.

September 21, 1894, Messrs. Mann and Wolf and Mrs. Doolittle were reappointed for a term ending September 20, 1897.

October 6, 1894, Miss Loring notified the board of her resignation of membership, and April 6, 1895, Miss Katharine Trescott took her seat as Miss Loring's successor.

At the beginning of the year Miss Harriet B. Loring was president, John F. Cook, vice-president, and B. Pickman Mann, secretary and disbursing officer. At the annual election October 6, 1894, Simon Wolf was elected president, Mrs. Mary L. D. Macfarland, vice-president, and B. Pickman Mann, secretary and disbursing officer.

Herbert W. Lewis was employed as agent of the board throughout the year.

The appropriation for administrative uses of the board for the year ended June 30, 1895, was \$4,000, of which \$3,706.66 has been expended to date as follows:

|   |            |
|---|------------|
| Salary of agent.....                            | \$1,500.00 |
| Office expenses.....                            | 939.32     |
| Office rent.....                                | 313.33     |
| Office furniture.....                           | 87.13      |
| Sundries.....                                   | 148.01     |
| Stationery and printing.....                    | 122.12     |
| Travel and transportation.....                  | 596.75     |
|   | <hr/>      |
|   | 3,706.66   |
| Balance available for accounts not settled..... | 293.34     |
|   | <hr/>      |
| Total.....                                      | 4,000.00   |

The regular appropriation for care of children was \$13,000, to which was added a deficiency appropriation of \$3,000, from which the expenditures to date have been \$15,999.89, as follows:

|  |            |
|--|------------|
| For feeble-minded children:              |            |
| In the Pennsylvania Training School..... | \$3,149.86 |
| In the Virginia Training School.....     | 250.00     |
|  | <hr/>      |
|  | 3,399.86   |
| For children not feeble minded:          |            |
| Maintenance—                             |            |
| In District institutions.....            | \$5,545.86 |
| In other institutions.....               | 627.73     |
| In private homes.....                    | 5,168.52   |
|  | <hr/>      |
|  | 11,342.11  |
| Clothing.....                            | 628.12     |
| Medical care.....                        | 629.80     |
|  | <hr/>      |
|  | 12,600.03  |
|  | <hr/>      |
| Total.....                               | 15,999.89  |

One thousand six hundred and ninety-nine dollars and twenty-eight cents remain due to the Pennsylvania Training School for Feeble-Minded Children for the third and fourth quarters of the fiscal year, and some other less definitely known liabilities are outstanding, which will be settled, so far as funds are available, as promptly as practicable. A further deficiency appropriation is needed. The balance on hand at present is 11 cents.

The board began the year with 185 ordinary (i. e., not feeble-minded) wards in charge. It closed the year having 255 ordinary wards. The aggregate number of days that children other than feeble-minded were in charge of the board was 80,726, or an average of 221.4 children for every day in the year. The aggregate cost of board and care, clothing, and medical attendance of these children, administration and supervision, was \$16,306.69. This is at the rate of 20.2 cents per day, or \$73.65 per year.

If from the administrative expenses be deducted \$50 as an estimate of the value of furniture and record books on hand over and above that of those on hand at the beginning of the fiscal year, the current administrative expenditures, on a basis of 80,726 days' care of children, was 4.5 cents a day, or \$16.75 a year for each child.

The following table exhibits the financial operations of the board and the pro rata cost of its work from every point of view:

## PER CAPITA COST—MAINTENANCE.

|  | 1894.      | 1895.       |
|--|------------|-------------|
| Average number of wards in boarding homes.....         | 20.64      | 47.74       |
| Expense of maintenance in boarding homes.....          | \$3,203.30 | \$6,426.44  |
| Per capita cost.....                                   | 155.20     | 134.40      |
| Average number of wards in institutions.....           | 43.35      | 59.23       |
| Expense of maintenance in institutions.....            | \$4,738.00 | \$6,173.59  |
| Per capita cost.....                                   | 109.06     | 104.23      |
| Average number in boarding homes and institutions..... | 63.99      | 107.02      |
| Whole expense of maintenance.....                      | \$7,941.30 | \$12,600.03 |
| Per capita cost, based on whole number on expense..... | 124.10     | 104.23      |

## PER CAPITA COST—ADMINISTRATION AND SUPERVISION.

|  |             |             |
|--|-------------|-------------|
| Average number in free homes.....                                      | 46.24       | 114.38      |
| Average number in boarding homes.....                                  | 20.64       | 47.74       |
| Total subject to supervision.....                                      | 66.88       | 162.12      |
| Expenses of administration and supervision.....                        | \$3,933.72  | \$3,706.66  |
| Administrative per capita, based on number subject to supervision..... | 58.80       | 22.87       |
| Whole number of wards.....   | 110.23      | 221.40      |
| Total net expense.....   | \$11,875.02 | \$16,306.69 |
| Per capita, based on total number of wards and total expense.....      | 107.72      | 73.65       |

Feeble-minded children were maintained 8,102 days, at a cost, including bills not paid, of \$5,099.14, or a per capita of 62.94 cents per day, or \$229.73 per year.

At the beginning of the fiscal year the rates paid to the institutions generally for the maintenance of the wards of the board were \$10 per month, but in consequence of the inadequacy of the appropriation made to the board these rates were reduced in most cases to \$8 per month from October 1, 1894. It was not found practicable to reduce the rates, however, at the Industrial Home School, as this institution claimed that its special character made the cost of caring for the children too great to allow for any reduction.

The Association for Works of Mercy agreed to accept \$8 a month from November 1, 1894, for the one ward of the board at that institution, but not to take others at that rate.

The following payments were made to institutions in the District of Columbia for the care of wards of the board:

| Institution.   | Amount.    | Number of days' board. | Rate.         |           |
|--|------------|------------------------|---------------|-----------|
|  |            |                        | Per day.      | Per year. |
|  |            |                        | <i>Cents.</i> |           |
| Association for the Relief of Destitute Colored Women and Children ..... | \$2,403.79 | 8,242                  | 29.17         | \$106.47  |
| Industrial Home School .....   | 1,903.52   | 5,992                  | 31.77         | 105.96    |
| Newsboys and Children's Aid Society .....                                | 808.15     | 2,922                  | 27.50         | 100.37    |
| House of the Good Shepherd .....   | 159.07     | 581                    | 27.38         | 99.94     |
| House of Mercy .....   | 104.00     | 365                    | 28.50         | 104.00    |
| German Orphan Asylum .....   | 80.52      | 302                    | 26.66         | 97.32     |
| St. Ann's Infant Asylum .....  | 45.09      | 153                    | 29.47         | 107.57    |
| Young Woman's Christian Home .....                                       | 41.72      | 146                    | 28.58         | 104.32    |

The following estimates are made of expenses of the board for administrative purposes for the year ending June, 1897:

|   |            |
|---|------------|
| (1) Salary of one agent .....                       | \$1,800.00 |
| (2) Salary of one clerk .....                       | 960.00     |
| (3) Salary of one clerk .....                       | 420.00     |
| (4) Rent of office rooms .....                      | 360.00     |
| (5) Stationery and printing .....                   | 250.00     |
| (6) Office and sundry expenses .....                | 200.00     |
| (7) Expenses of placing and visiting children ..... | 800.00     |
| Total administrative .....                          | 4,790.00   |

The following explanatory notes are offered:

(1) *Salary of agent.*—The present agent of the board was engaged at a salary of \$1,800 per annum. For the fiscal years 1895 and 1896 the board has been forced into violation of an implied agreement to continue this salary by limitations placed upon it by the appropriation acts for those years. The duties to be performed can not be safely placed in the hands of an inexperienced person. It is of the highest importance to the children that their interests be looked after by a thoroughly competent person. The value of a man in the position of supervising agent increases greatly as he continues such work from year to year. The board has heretofore, and does now, unanimously urge the restoration of the salary of its agent to the original amount.

(2, 3) *Clerks.*—Under the present conditions of the law creating the board the maximum amount allowed to be paid to two agents is \$2,400 per annum. This is not sufficient for the employment of two persons competent to fill the position of agent, and a considerable amount of highly important work is therefore to be done by the principal clerk of the board. The full amount asked for under this title is needed.

(4) *Rent.*—Same amount as now paid.

(5) About the same as was expended for the year 1895.

(6) Less than expended for 1895.

(7) Somewhat more than was expended for 1895. More will be needed.

As the number of children in free homes increases, the expense of looking after them must, of course, also increase. The average number of children in homes, subject to the supervision of the agent of the board, was, for the year 1895, 162, an increase of 96 over 1894. Should a like rate of increase be maintained, the average number to be supervised during 1897 would be above 300. The per capita expenses of the board for administrative purposes, based on the average number of children

subject to supervision (that is, those in free homes and in families where board is paid), fell from \$58.80 for 1894 to \$22.87 for 1895.

The total amount asked for administrative expenses for 1897, when apportioned to the estimated number subject to supervision for that year, shows a per capita of \$15.96.

The expenses for placing and visiting children during the past year were not so great as was expected, partly because the amount of office work which had to be done, and which could have been done in large part by a clerk, prevented the agent from having time needed for outside work. The economy in expenditure for maintenance of children which would be secured by making it possible for the agent or agents to find more free homes, as well as the betterment in the quality of the homes, which might be secured by enabling the agent to seek homes for the children rather than wait to have applications for children made at the office, both argue in favor of an adequate appropriation for administrative purposes.

The following estimates are made of expenses for board and care of children for the year 1897:

|  |             |
|--|-------------|
| (1) For board and care of an average of 160 children, at \$100.....  | \$16,000.00 |
| (2) For medical care of 100 children in boarding homes, at \$6 each.....                                     | 600.00      |
| (3) For clothing for 100 children departing for free homes, at \$10.....                                     | 1,000.00    |
| (4) For temporary care of children pending investigation or while being transferred from place to place..... | 750.00      |
| Total .....  | 18,350.00   |

Upon this estimate the following notes are offered:

(1) *Board and care of children.*—The average number of wards for whose maintenance the board paid during 1894 was 64; for 1895 it was 107, an increase of 43, and for the first quarter of 1896 it has been 111. The estimate of an average of 160 for 1897 is based on experience. The cost of maintaining the wards of the board in boarding homes and institutions was \$124.10 and \$104.23 for 1894 and 1895, respectively. The estimate of \$100 per child for 1897 is considered the lowest amount which can be made to serve.

(2) *Medical care.*—This estimate includes both medical attendance and medicines, and is less than the actual expenditures of the board for such purposes for either 1894 or 1895.

(3) *Clothing.*—Children are passing through the hands of the board into free homes at the rate of practically 100 per year. It is necessary to give such children a sufficient outfit of clothing upon their reception by persons who are henceforth to provide for them without expense to the District of Columbia. The average age at which children have been sent to free homes heretofore is 10 years, which is evidently too early an age for them to make adequate return for their maintenance.

(4) *Temporary care of children.*—The care of children by the board for not to exceed one week prior to the presentation of their cases in court, or while being transferred from place to place, would call for but a small part of the amount here estimated. It frequently happens, however, that cases are presented in which the suitability of homes and the fitness of parents are involved, and in which it is impossible to determine at the time whether full legal guardianship should be conferred upon the board. In such cases the common practice of the court is to continue the case for a longer or shorter period, ordering at the same time that until it is finally disposed of the children shall remain in the custody of and be maintained by the board of children's guardians. The expense of such maintenance is often considerable. The amount expended for temporary care during 1895 was \$726.

For the care of feeble-minded children the following estimate is made for the year ending June, 1897:

For the care of 35 children at an average of \$225 each..... \$7, 875. 00

The board of children's guardians, upon taking up the care of the feeble-minded children of the District, found 23 children already in charge, calling for an expenditure of \$5,200 for the year 1894. For the year 1895 the expenditures of the board for this purpose were \$5,099.14, of which \$1,699.28 remain unpaid by reason of the inadequacy of the appropriation at the disposal of the board. There are feeble-minded children now at the almshouse for whom different provisions should be made. There are a number of cases under consideration by the board in which there is urgent need of asylum care of the children. If all new cases are hereafter refused up to the end of the fiscal year 1896 the expenditures of the board for this purpose for this year will be \$5,800. Heretofore the appropriation for this purpose has been made in connection with that for the maintenance of the wards of the board not feeble-minded.

The superintendent of charities and the Commissioners of the District are now respectfully urged to request that a separate appropriation be made for this work. The board wishes to be relieved of the necessity of choosing between leaving the community exposed to the dangers arising from irresponsible persons being at large, and leaving helpless little children to suffer from the neglect and abuse of unworthy parents. The present appropriation is not sufficient to provide for both classes for the present year.

The work accomplished by this board during the year includes the following items, which have been made matters of record:

|  |     |
|--|-----|
| Number of applications received on behalf of children to be taken in charge...   | 307 |
| Number on behalf of whom proceedings were begun in court.....  | 89  |
| Number of children committed by courts and provided for by this board: Permanent, 110; temporary (not finally committed), 19; total..... | 129 |
| Number of children provided for temporarily, without authority of the courts, exclusive of those subsequently committed.....             | 22  |
| Number of applications received for children to be taken by families.....  | 268 |
| Number of new applications for children investigated and acted upon.....   | 146 |
| Whole number of homes provided, including transfers and replacements.....  | 127 |
| Number of official visits by agent to placed-out wards of the board.....   | 194 |
| Number of absconders from homes and institutions apprehended and returned..  | 30  |

The tables included in this report are similar to those published last year, so that comparison of the operations of the board for different years will be easily practicable, and such comparisons will be made in this and subsequent reports wherever they serve to make the whole subject more accessible and easily understood.

TABLE A.

| Months.         | Children on whose behalf applications have been made. | Pending from last month. | Total number dealt with. | Recommended for commitment. | Commitments.                 |                       |                                   |            |          |        |
|-----------------|---|--------------------------|--------------------------|-----------------------------|------------------------------|-----------------------|-----------------------------------|------------|----------|--------|
|                 |   |                          |                          |                             | Destitute; no suitable home. | Abandoned by parents. | Vicious and immoral associations. | Temporary. | Refused. | Total. |
| 1894.           |   |                          |                          |                             |                              |                       |                                   |            |          |        |
| July .....      | 34  | 7                        | 41                       | 4                           | 3                            | 1                     |                                   |            |          | 4      |
| August .....    | 27  | 2                        | 29                       | 9                           | 3                            | 2                     |                                   | 2          | 2        | 9      |

This table exhibits, from every point of view, the work done upon the cases reported to the board for investigation and action. Three hundred and seven children were reported as being in some such condition as made it necessary that they should be provided for at public expense or placed under the protection of public authority. Seven were pending at the beginning of the year and 9 at its close, leaving 305 investigated during the year. Of these, 89 were taken into court and their commitment to the board recommended. These recommendations resulted in the final commitment of 58, and the giving of authority for the temporary care of 17; while in the cases of 14, the court was not convinced that the commitment of the children was necessary.

Most of those whose commitments were refused by the court were cases in which it was sought to take children from parents alleged to be drunken and unfit. In this class of cases peculiar difficulties present themselves. A man may be a notorious drunkard, and a whole community perfectly certain that it is positively dangerous to allow him to retain control of his children, but once you bring him into court, having given him over night in which to become sober, the very persons who complained of his inhuman treatment of his family the day before will sometimes join in pleading with the court to let him off and give him another trial. It should be said, however, that the judgments rendered in the police court in cases involving the custody of children have always been considered most carefully, and if it has appeared sometimes that the welfare of the children has been risked for the sake of giving a parent another trial, it must, at the same time, be remembered that a law permitting the authoritative separation of children from parents must be used with the greatest care.

The 17 temporary commitments will be again included in the table specially prepared to exhibit that branch of the work.

It will be noticed that nearly all of the commitments promoted by our agent appear to have been for simple destitution, the number shown as having been rescued from immoral surroundings and taken from drunken and unfit parents having almost disappeared. This difference is more apparent than real. It has been found that it is much easier to prove that a child is "destitute of suitable home and adequate means of earning an honest living" than that he is the child of "drunken and unfit parents," or "kept in vicious and immoral associations," notwithstanding the fact that his destitution and lack of means of earning an honest living were the direct results of the "unfit" character of his parents, or the "vicious and immoral" nature of his home associations.

No incorrigible children have been presented for commitment by our agent. It has been known throughout the year that the funds at the disposal of the board would not be sufficient to meet the demands upon it, and this class of children are always most expensive and troublesome to deal with. There are several reasons why the board could not give them terms of institution training, and to place them in free, private homes without such training would simply be to turn them loose upon unsuspecting persons entitled to better treatment.

Applications were investigated on behalf of 142 children who clearly had no equitable claim upon the people of the District of Columbia for support; 25 of them were known to be recent arrivals sent here for the purpose of participation in the benefits here provided, and in many other cases enough was learned to raise a strong presumption of similar motives. Most of this latter class are included in the number reported as withdrawn.

It has been a standing rule of the office that whenever it seemed necessary to refuse to recommend the commitment of children on behalf of whom an application had been made, the person making the application should be notified of the action taken, the reasons therefor, and that it was the privilege of any citizen of the District to petition the court to commit children.

# 362 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

TABLE B.—Number of children committed to the board, by months, and the prevailing cause of commitment.

| Causes of commitment. |                                    |                          |                                  |  |                                   |                                       |     |

Table B shows the whole number of commitments to the board during the year, by months, and their prevailing causes. In this exhibit, as in Table A, it will be noticed that the majority of the children were found simply "destitute of suitable homes and adequate means of earning an honest living." Thirteen had been abandoned by their parents, 2 taken from unfit parents, 3 rescued from vicious and immoral associations, 12 were convicted of vagrancy or petty offenses, and 8 were taken from the Reform School for Girls upon recommendation of the officers of the institution, formal commitments being made by the board of trustees, as provided for by the statute creating this board.

Comparison of Tables A and B, made part of this report, with the corresponding tables published last year, will show that the number of cases considered by the board is slightly greater this year than last; that the number of commitments recommended by the agent of the board is slightly less; that the number of temporary commitments is three times as great, and that the number of final commitments is 110, as against 203 last year. In this connection it should be said that it is not probable that the smaller number of commitments this year indicates that any less children have been taken up as public dependents by all the agencies dealing with children than heretofore, but is accounted for by the fact that the other institutions have received, through committees of their boards of managers or through officers in charge of institutions, many whose cases would otherwise have been adjudicated by the courts of the District.

The number of children committed for vagrancy, incorrigibility, and petty offenses this year was less than half as great as last year. The operations of the board having been limited by lack of funds and by restrictions as to number of employees, it seemed proper and necessary to avoid, so far as the matter could be controlled by the board, the class of cases which would soonest and most urgently demand increased appropriations and the services of additional employees.

TABLE C.—Showing agencies by which children have been recommended for commitment by the courts, by months.

| Months.        | Agent of the board. | Metropolitan police. | Washington Humane Society. | United States district attorney's office. | Girls' Reform School. | Jail or workhouse. | Hope and Help Mission. | National Colored Home. | Children's Hospital. | Freedmen's Hospital. | Alms-house Hospital. | Total. |

| Total.....     | 55                  | 22                   | 3                          | 1   | 8                     | 3                  | 3                      | 10                     | 2                    | 1                    | 2                    | 110    |

Table C shows the various agencies which have recommended the commitment of children to the board, and the number, by months, in each case. It will be seen from the table that practically one-half of the commitments to the board were recommended by the employees of the board, about one-fourth by the officers of the Metropolitan police, and the rest by a number of institutions and other responsible agencies. The commitments secured through the officer of the Humane Society fell from 32 last year to 3 this year.

#### DISTRIBUTION OF CHILDREN.

In regard to the distribution of the children placed under the guardianship of the board during the year, there has been but little opportunity for discrimination in choice of institutions, the particular one to which any child should be sent being usually determined beforehand by the age, sex, color, or moral condition of the child, or by the religious preferences of its parents.

There have been some restrictions insisted upon by some of the institutions in the matter of the reception of wards of the board, which have greatly reduced the number of children placed in them. For instance, the National Association for the Relief of Destitute Colored Women and Children declined early in the year to receive children over 10 years of age. Similarly, the Industrial Home School will receive no child who is known to have been guilty of larceny. Whatever may be thought of the classification of human beings in this manner rather than by ascertained character, disposition, and capacity, we are not sure but it will prove in the end to have been a good thing for the board, for it has forced us to find boarding homes for a number of apparently bad boys in which the results have been most delightful.

The Newsboys and Children's Aid Society has done its utmost to be accommodating, and has deserved our thanks.

No children have been sent to foundling asylums during the year with the expectation of leaving them for any considerable periods, all of the age usually admissible to such institutions having been boarded

out. Children suffering with chronic diseases, and all others needing steady and prolonged treatment, have been sent to the Children's Hospital, from which they have been discharged cured or benefited in every case.

Table D shows the average number of children maintained in the institutions dealt with during the year:

TABLE D.—Showing the average number of wards of the board residing in different institutions during each month.

The 110 children received during the year and the 175 on hand at the beginning of the year, 285 in all, are now accounted for as follows:

|  |     |
|--|-----|
| At Industrial Home School .....  | 12  |
| With National Association for the Relief of Destitute Colored Women and Children (home Eighth street extended) ..... | 18  |
| With Newsboys and Children's Aid Society (home 927 E street) .....   | 6   |
| In the House of Mercy .....  | 1   |
| In the House of the Good Shepherd .....  | 2   |
| In St. Mary's Industrial School, Baltimore, Md. ....   | 2   |
| In Tuskegee Normal and Industrial Institute, Tuskegee, Ala. ....   | 1   |
| In Manassas Industrial School, Manassas, Va. ....  | 1   |
| In German Orphan Asylum .....  | 2   |
| Total in institutions where board is paid .....  | 45  |
| In family homes where board is paid .....  | 58  |
| Total for whom board is paid .....   | 103 |
| In free family homes:  |     |
| On indenture .....   | 88  |
| Apprenticed or earning wages .....   | 8   |
| On trial or probation .....  | 47  |
| Total self-supporting .....  | 143 |
| In institution where no payment is made .....  | 1   |
| Unsettled .....  | 8   |
| Total present wards of the board .....   | 255 |

|   |     |
|---|-----|
| Died.....   | 14  |
| Absconded and not returned (dropped from roll).....                       | 7   |
| Returned to courts and orders of commitment set aside.....                | 9   |
| <hr/>   |     |
| Total who passed from under the control of the board during the year..... | 30  |
| <hr/>   |     |
| Whole number to be accounted for.....                                     | 285 |

There are two items in the above accounting to which we call attention for the purpose of offering an explanation. One is the 8 reported as unsettled but included among those still considered wards of the board, and the other, the 7 reported as having absconded and having not been recovered. There is included in the two numbers but one white child, and that one was induced away from an institution by his stepfather, and is supposed to have been sent to the city of New Orleans to his mother. No trace of him has been found in the District of Columbia.

Of the remaining 14, 2 are girls and 12 boys, committed to our care by the courts of the District, simply because there was nothing else to do with them, and there was a possibility that they could be induced to profit by the opportunities for self-support offered by the board. Six of them ran away from homes provided for them, and 8 left institutions in which they had been placed. They are from 11 to 17 years of age, and when received came about as near being wild animals as any human beings can. The life of the street is the only life they know. They are familiar with every alley and hiding-place in the city. They have been known by from two to six names each. It is doubtful if 2 of the 14 know their own mothers, but they all believe that we get large sums of money for catching and deporting them. They could only have been restrained by bolts and bars, and the board has no bars behind which to place them.

It must never be supposed that the children of the slums are waiting and anxious to be benefited. Nothing could be farther from the truth. If moral possession of them is to be obtained physical possession must be kept secure. It is believed that had it been possible for the board to keep these children for periods of time determined by their conduct and their ascertained character and previous history, very much might have been accomplished with them; but that could not be done. The board had no place to send them where their vagrant impulses could be restrained until they could be brought to believe in the sincerity of their real friends and into harmony with the efforts made in their behalf. Of course, these 15 wards of the board, about whom we know so little, do not by any means represent the total number of vagrant and disorderly children dealt with. To have at once pronounced them all criminals, because they had broken the laws, would have been to condemn them without trial; because real guilt has in it elements both of knowledge of law and disregard of its requirements, and about such things these poor children know nothing. If it be considered that no institution in the District is prepared to deal adequately with these children; that the reform schools are the only ones which attempt to do any part of the great preparatory work necessary to be done with them, and that when passed on immediately to family homes, with their minds full of false notions, they feel themselves sold as slaves, the surprising circumstance will not be that 15 have disappeared, but that the number is not four times as great.

The whole showing is as follows:

|  |    |
|--|----|
| Convicted of offenses (as per Table B).....  | 12 |
| Taken from Girls' Reform School(as per Table B) .....                                | 8  |
| Committed on information charging destitution, but having decidedly bad record. .... | 18 |
| On hand, in this class, from last year.....  | 19 |
| Total.....   | 57 |
| Now in homes doing well.....   | 29 |
| Now in homes, with bad report.....   | 7  |
| In institutions.....   | 6  |
| Absconded and not returned .....   | 11 |
| Returned to Girls' Reform School .....   | 2  |
| Sent to Reform School for Boys .....   | 1  |
| Sent to penitentiary .....   | 1  |
| Total .....  | 57 |

#### THE SELECTION OF HOMES.

The persons who seek to secure children are not always the ones best calculated to be of service to them. To be restricted in the selection of homes to those voluntarily offered is to fail of the best work. There are multitudes of people whose homes would be thrown open to dependent children, and in whose homes such children would receive excellent care and training, if a personal appeal were made to them. They would be glad to make life happier, safer, and easier for some unfortunate little child, but do not know where to begin or how to proceed. A distinct effort should be made in order to extend the work of placing children into such homes. The time of our agent has been so fully occupied by the work to be done here in Washington that he has been unable to give this matter the attention that the work deserves.

While but few of the applications heretofore approved have come to the board as a result of the work of our agent in seeking those of the best sort, no carelessness or loose methods have been allowed to affect the investigation of the homes offered.

#### SUPERVISION OF THE PLACED-OUT CHILDREN.

The law requiring that the placed-out wards of the board shall be visited at least once each year has been obeyed. At the close of the fiscal year no ward of the board had resided in any family home for longer than ten months without having been visited. An effort was made to visit, before the close of the year, all who had not been seen during the last six months, and if the work be included which was done during the first ten days after the close of the year there would remain but five children not visited during the last half of the year. The facts as to the condition of the children, their conduct or moral condition, attendance at school, whether satisfied and contented in their homes, whether satisfactory to their foster parents, and as to their clothing, sleeping apartments, and the service required of them, have been made matters of permanent record in every case. The lady members of the board have visited the children placed in the city of Washington and District of Columbia, particularly boarded-out infants.

We have summarized the results of this branch of the work of the board, and present it below. "Doing well," as here used, means that there was no complaint on the part of the child regarding his home, no failure on the part of the foster parents to fulfill all the requirements of the board, and no fault found by the visitor with the condition, treat-

ment, or surroundings of the child. The only exception would be in case of a child which had been in bad health when placed, and had not improved. In such a case, if the continued bad physical condition of the child was not the fault of the home, it would be reported as "doing well."

"Doing fairly well" means that there was found some condition of affairs not entirely satisfactory, but which, if pertaining to the home, it is expected will be speedily remedied, and if to the child, it is hoped will be overcome. "Bad report" means that some serious trouble existed which, when pertaining to the child, indicated that he or she would be benefited by a return to an institution for special training. When the trouble was with the home, a radical and immediate improvement or the peremptory removal of the child became necessary.

|   | Child. | Home. |
|---|--------|-------|
| Doing well.....                               | 133    | 133   |
| Doing fairly well.....                        | 36     | 7     |
| Bad report.....                               | 12     | 4     |
| Not visited (in home less than one year)..... | 20     | ..... |
| Whole number in family homes.....             | 201    | ..... |

The average number subject to visitation each month during the year has been as follows:

| 1894.          |     | 1895.         |     |
|----------------|-----|---------------|-----|
| July.....      | 128 | January.....  | 168 |
| August.....    | 136 | February..... | 172 |
| September..... | 140 | March.....    | 181 |
| October.....   | 148 | April.....    | 186 |
| November.....  | 158 | May.....      | 191 |
| December.....  | 163 | June.....     | 198 |

#### THE CARE OF INFANTS.

The wards of the board 2 years old and under have been dealt with in private families almost exclusively during the past year. The rate paid for their maintenance has been, uniformly, \$10 per month where only one child was placed with a nurse, and \$18 where two were placed. Not more than two have been placed under the care of any one person. The rules for the government of nurses, published by the board during last summer, have been enforced with the greatest care, and the results are sufficiently successful to warrant the employment of the present methods to the exclusion of all others until better shall be done under some new plan yet to be devised.

The infants received by the board have come with the sort of history of congenital disease, malnutrition, abuse, and exposure, which is usually the sole inheritance of the abandoned infant. For the details of their condition at reception, and the results of the work of the board with them, reference is had to the following tabulated history of cases:

|     |         |    |      |       |    |    |    |    |            |         |              |     |
|-----|---------|----|------|-------|----|----|----|----|------------|---------|--------------|-----|

| 113   | do .....              | 1                 | Bad.....                       | Death .....    |                   |                          |  |

We have again taken up the cases of the individual children received under 2 years of age during the fiscal year 1894, and have modified the form of tabulation so as to more fully show their condition at reception, the number and causes of deaths during the fiscal year 1894, and their condition at the close of the year; also, by extending the table to the right, the number and causes of deaths during the fiscal year 1895, and the condition of the children at the close of that year. The table takes up the cases of 41 infants received during 1894, of whom 9 died during that year and 8 during 1895. The 4 deaths occurring during the month of September, 1893, were of children placed in a foundling asylum. Up to the time when the board had received 9 infants, 4 of them had died of gastro-intestinal troubles. After that time none were placed in the foundling institutions, except as a temporary expedient. The result was that from September 28, 1893, to June 30, 1894 (the end of the fiscal year), there were 2 deaths from gastro-intestinal troubles and 3 from other causes, while the number of children dealt with rose to 41. During the second fiscal year (ended June 30, 1895) 8 of the original 41 children, received under 2 years of age during 1894, died. Of these 8 deaths, 1 was of croup\*, 3 of diphtheria, 1 of pneumonia, 1 of exhaustion from premature birth, 1 of laryngismus-stridulus, and 1 of inherited tuberculosis.

At the close of 1895, 17 of the 41 are dead, 2 are in bad health, and 22 are doing well. In 6 of the cases which have so far progressed to a fatal termination the prognosis at reception was death, and in 2 it was doubtful.

There were 20 children received under 2 years of age during the fiscal year ended June 30, 1895. Of that number, 5 have died: 1 of hydrocephalus, 1 of diphtheria, 1 of fever and convulsions, 1 of rickets and

\* This child died in a farmer's home, and might have been saved could a physician have reached her in time.

heat stroke, and 1 of cholera infantum. In five cases the prognosis at reception was death; in 6 cases, doubtful, and in 9 no reasons were discovered why the children might not survive.

The percentages of deaths to numbers dealt with during the two years are as follows: 1894. Number received, 41; died, 9; percentage, 21.95. 1895. On hand from 1894, 32; received, 20; total, 52; died, 13; percentage, 25.

We are unable to find anything in the published vital statistics of the District of Columbia which will serve as a guide in determining how much greater is the death rate among the infant wards of the board than among children of like age residing with their own parents. The significant things to be considered, when regarding these percentages, are that five-sixths of the children here reported upon are colored; that in the District of Columbia there is a difference of 11 years between the average duration of the life of white and colored people, in favor of the white, and that 45 per cent of the deaths under 1 year of age are of children of the colored one-third of the population.

Among the causes of death, as shown by the tables, there is a remarkable absence of the sorts of disorders which so often prevail among infants with fatal results, but which can be successfully combated by the skillful physician when called in time, and when assisted by thoroughly favorable surroundings.

#### TEMPORARY WORK OF THE BOARD.

What is known as temporary work under the board is constantly increasing. It is done under the clause of the organic law which permits the agents of the board to take charge of children for not longer than one week, without authority of the courts, and under a construction of the law to the effect that if temporary care may not continue for longer than one week, without authority of the courts, by such authority it may continue for any length of time.

The following table exhibits this part of the affairs of the board:

TABLE F.—*Temporary work of the board.*

| When received. | From whom received.          | For what cause.                  | How provided for temporarily. | How disposed of as temporary case.                        |

## THE CARE OF THE FEEBLE-MINDED.

We know of no instance wherein any other body, public or private, has been charged with the variety of duties and responsibilities which has been laid upon this board. The care of infants; the care of dependent and neglected children; a share in the care of wayward and criminal children; the care of feeble-minded persons, who are always children, no matter what their age, and with all these classes the duty of investigation prior to reception, as well as of guardianship during minority, makes up a series of opportunities and responsibilities certainly not equaled in the District of Columbia, and not to our knowledge anywhere. The care, education, and improvement of the feeble-minded is a matter of such importance to the community that it might well be committed to a body of experts, and all others debarred from participation in the management of it. This is practically what is accomplished under the present arrangement, the children being under the control and management of the institutions in which they are placed.

The Forty-fourth Congress, when considering the sundry civil bill, and upon the particular item of an appropriation for the support of the Columbia Institution for the Deaf and Dumb, approved and passed Senate amendment No. 120, as follows:

Current expenses Columbia Institution for Deaf and Dumb, for support of the institution: *Provided*, That when any indigent applicant for admission to the institution belonging to the District of Columbia and being of teachable age is found, upon examination by the president of the institution, to be of feeble mind, and hence incapable of receiving instruction among children of sound mind, the Secretary of the Interior may cause such person to be instructed in some institution for the education of feeble-minded children in Pennsylvania or some other State, at a cost not greater for each pupil than is or may be for the time being paid by such State for similar instruction, and the sum necessary therefor is appropriated out of the sum above provided for current expenses of the institution.

Under this authority certain feeble-minded children were taken in charge from time to time by the Secretary of the Interior, upon recommendation of the president of the Columbia Institution for the Deaf and Dumb, and provided for at the great training school at Elwyn, Pa., at a maximum rate of \$250 per annum.

The Fifty-second Congress, considering the District appropriation bill, and upon the particular item of an appropriation for the support of the work of the board of children's guardians, approved a proviso as follows:

*Provided*, That the authority for placing feeble-minded children of the District of Columbia, heretofore given to the Secretary of the Interior, is hereby transferred to the board of children's guardians. (See public document, No. 115, p. 17.)

It would seem, therefore, from the language of these provisions, that the duty and responsibility of certifying to the propriety of taking up any feeble-minded child, as a public dependent, still rests where it was placed by the act of the Forty-fourth Congress, and that this board was simply substituted for the Department of the Interior in permission to place such children in appropriate institutions, and pay for their maintenance. The president of the Columbia Institution for the Deaf and Dumb, however, contends that it was the intention of the committee of the Fifty-second Congress, which secured the transfer of the authority to place such children from the Secretary of the Interior to this board, to relieve him of every duty and responsibility in the matter, and he has therefore been very reluctant to act in cases which he considers have been taken by law entirely out of his hands. Under these circumstances the placement of several children was prevented during the year 1894.

There is the utmost need for more attention to the feeble-minded children of this District. Let the following illustrate:

On P street NW., between North Capitol and First streets, stands an old frame tenement of four rooms, in which lived, last winter, eighteen persons. One half of the house is occupied by a woman whom, for convenience' sake, we will call J. P. She was never married, and is now 47 years of age. She is the mother of R. R., aged 23; S. C., aged 18; W. C., aged 16; H. P., aged 10, and an unknown number who have gone to the potter's field. R. R. is an idiot, and has had five children, of whom two are living, one being probably feeble-minded and the other a moral imbecile, now 10 years old. S. C., aged 18, is the mother of two children, aged 1½ years and 3 months, respectively. The other children of J. P. are males.

At 2107 N street NW. lived, a few months ago, a woman claiming to be a widow, who has had seven children. One fell into the fire and died, one died from the administration of paregoric, one of convulsions after a bath in camphor, one of inflammation of the spinal cord (produced by an unattended abscess), and one of cholera infantum: one she can not account for, and the seventh, now 20 years of age, is an idiot, his condition being due, according to the statements of his mother, to a violent fall and striking his head. This boy is living in a dreary round, which includes the streets about the Arlington Hotel, where he usually falls in convulsions of the most violent and terrible character, the police court, where he is an object of horrible loathing, and the almshouse hospital, where, happily, he usually stays for several weeks at a time.

There are now in our files applications on behalf of eleven feeble-minded children whose cases have not been considered, for the reason that there was no money at the disposal of the board with which to pay for their care, and on account of the confusion as to who should receive and pass upon such applications.

Respectfully submitted.

Col. JOHN TRACEY,  
Superintendent of Charities.

S. WOLF, *President*.  
B. PICKMAN MANN, *Secretary*.

## REPORT OF CHILDREN'S BRANCH OF THE WASHINGTON HUMANE SOCIETY.

WASHINGTON, D. C., *August 29, 1895.*

DEAR SIR: I have the honor of transmitting herewith the report of Samuel Wilson, agent for this society, in the prosecution of the children's branch of our work for the fiscal year ended June 30, 1895.

The executive committee are greatly pleased with the manner in which this branch of the society's work is conducted, and in consideration of the fact that we have but one man to prosecute it, think we accomplish a great deal, and believe the work to be of a character not touched by any other organization in the city.

Very respectfully,

W. F. STOWELL,  
*Recording Secretary.*Col. JOHN TRACEY,  
*Superintendent of Charities.*

## CRUELTY TO CHILDREN.

SAMUEL WILSON, *Agent.*A. S. PRATT, Esq., *President.*

## REPORT OF AGENT TO SUPERINTENDENT OF POLICE.

HEADQUARTERS METROPOLITAN POLICE, *July 14, 1895.*

SIR: I respectfully submit herewith a tabulated statement of work done by me during the fiscal year ended June 30, 1895, as agent of the Humane Society for enforcement of the laws for the protection of children, under authority of the act of February 13, 1885.

There were 312 cases investigated by me during the year, and 158 children were placed in the care of charitable or reformatory institutions or agencies, all except one within the District of Columbia. Of these dependent children 127 are white and 31 colored, while 101 are males and 57 females.

Comparison of these statistics with those for the next preceding fiscal year, ended June 30, 1894, shows an increase of 10 in the number of cases investigated. The commitments to the board of children's guardians of children brought to the police court by the Humane Society fell off from 59 to 8, as the subordinates of that board extended their own preparatory work; but, on the other hand, there was an increase of 46 in the number of children cared for through me and committed to institutions without the intervention of any other agency.

These figures give evidence of a natural and normal enlargement of the field of usefulness of the Washington Humane Society as a child-saving organization.

Referring to the recommendations in my reports of 1893 and 1894, the experience of another year causes me again to respectfully ask attention to the great importance of effective legislation for compelling the support of bastards and of legitimate children neglected by parents. The laws of the State of New York, as recently amended, seem to furnish the best models as to simplicity, directness, and the saving of public outlay for expenses that should be paid by delinquent persons. The adaptation of such laws to the District would, according to my observation as agent, promote morality, diminish destitution and crime, and lessen public burdens.

It is also respectfully submitted that commitments to the reformatories, the House of Mercy, and the House of the Good Shepherd, and likewise to other child-caring corporations, by the police court, should be authorized for definite terms, not less than one year, as well as in the manner provided by the law of 1885.

Cases referred to me during the year induce me to report upon the lack of institutional accommodations in the District for wayward colored girls, whose tendencies and associations call for their being placed in a "preservation class," free from contact with fallen women. The Reform School for Girls has not adequate accommodations for this purpose, and the Baltimore House of the Good Shepherd for Colored Girls, in which wayward negro females from Washington have been received, is now so crowded that further admission of District dependents can not be relied on.

Permit me to express appreciation of your always considerate direction of my duties, the performance of which has been much aided by the efficient action of the officers of the Washington Humane Society and the hearty cooperation of the managers of the institutions for dependent and delinquent children.

SAMUEL WILSON,  
*Agent Washington Humane Society*

Maj. WILLIAM G. MOORE,  
*Superintendent of Metropolitan Police.*

## REPORT OF WOMAN'S CHRISTIAN ASSOCIATION.

WASHINGTON, D. C., *August 9, 1895.*

SIRS: As acting secretary of the Woman's Christian Association, I present the following report of the work of the Association for the year ended June 30, 1895. A statement of receipts and expenditures for the year ended June 30, 1895, you will find inclosed with this report.

By the report of the reception committee we find 366 adults and 21 babies were admitted to the home during the year, coming from all parts of the United States and some from foreign countries. Largest number in the home any one night, 61, 23 being pay inmates. The regulations of the home provide that six old ladies be admitted for life by paying \$100—their places to be filled when a vacancy occurs. The others consist of old, young, and middle-aged working women who can pay a small amount for board, women with pensions, and women who have friends or church to help pay in part for their board, while more women who have no home or friends and who can pay nothing are taken in and cared for than any other class. No poor woman is sent from the door without something being done for her.

Number of employees, 6; while 9 work for their board.

Number for whom situations were found during the year, 72.

Price for board, \$1 to \$3.50 per week.

Number of free meals given during this year, 14,431; worked for, 10,725.

The board of managers have by careful economy saved from time to time a fund amounting to \$3,515, known as the building fund, this to be used for the enlargement of our present building, which is hardly adequate to meet the demands upon it. A special effort is being made this year to increase this fund, a committee of ladies being appointed to solicit contributions for a new front to our home, as originally contemplated. We would ask the Commissioners to aid us by appealing to Congress to make an appropriation for the same.

The amount needed for the conduct and support of the Woman's Christian Association for the year ending June 30, 1897, is \$4,000.

Officers for the year 1895: Mrs. Justice Harlan, president; Mrs. M. S. Pomeroy, vice-president; Mrs. A. B. Clift, register and acting secretary; Mrs. D. A. Freeman, treasurer; Mrs. A. P. Whittlesey, chairman home committee; Mrs. J. A. Robbins, chairman reception committee; Miss C. R. Bent, matron.

Respectfully submitted.

Mrs. W. L. CLIFT,  
*Acting Secretary.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

# 378 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

*Report of the treasurer of the Woman's Christian Association of the District of Columbia for the year ended June 30, 1895.*

## RECEIPTS.

|---|-------------------|
| Balance of private funds.....   | \$1, 559. 63      |
| Amount of Government appropriation received during year ended June 30, 1895 .....   | 4, 000. 00        |
| Amount received from pay inmates.....   | 2, 891. 25        |
| Amount received from all other sources (not including legacy mentioned below) ..... | 254. 42           |
| <b>Total receipts .....</b>   | <b>8, 705. 30</b> |

## EXPENDITURES.

|  |                   |
|--|-------------------|
| For salaries.....                                      | \$1, 296. 95      |
| All other items of maintenance, including repairs..... | 5, 880. 89        |
| Carried to building fund.....                          | 1, 015. 00        |
| <b>Total.....</b>                                      | <b>8, 192. 84</b> |
| <b>Balance remaining on hand July 1, 1895.....</b>     | <b>512. 46</b>    |

Exclusive of building fund of \$3,515 and exclusive of the legacy of \$1,000 from Mrs. Mary Ingle Campbell, which has been invested in 5 per cent debenture bonds of the American Security and Trust Company in order that it may yield the amount of her former annual contribution to the Woman's Christian Association.

DELIA A. FREEMAN, *Treasurer.*

## REPORT OF THE YOUNG WOMAN'S CHRISTIAN HOME.

DEAR SIR: That "our good works live after us" is again exemplified in the continued usefulness and benevolence of the Young Woman's Christian Home, although its founder, Mary G. Wilkinson, passed from this life since the last annual report was written. Animated by feeling of respect for her noble efforts in this work, and to perpetually associate her name with the home for which she did so much, the trustees furnished a room to be known as the "Wilkinson Memorial Room." During the year last past death also deprived us of one of our associate trustees, Mrs. Adolph Cluss, and also one of our good friends, Mr. Benjamin F. Charlton, of Havenner & Co., to whom the home was indebted for its daily supply of bread, which Mr. Charlton furnished without charge from the time of its opening, a kindness which, it should be stated, has been continued since his death by his successors in business, Messrs. Benjamin and Edward Graves.

The name of George E. Lemon was added to the list of life members during the year ending with this report, and the names of George Seufferle and H. J. Matthewson were added to the list of honorary members, these gentlemen each having paid the sums prescribed by article 3 of the constitution.

During the last calendar year there were two chambers in the home furnished as memorials, one by Mr. W. B. Jackson and one by Mr. J. Henry Gulick.

Another chamber was furnished by the Mount Vernon Seminary and Alumni Association. Twelve young ladies of the Metropolitan Methodist Episcopal Church also furnished a chamber.

The annual donation party and reception was held at the home, November 22, 1894, and was largely attended. The results, both socially and beneficially, were very gratifying; the gifts included money, groceries, fuel, and a great many useful articles, and, in behalf of the home, the secretary extends heartfelt thanks to all the kind friends, and indeed to the public generally, for their support upon that occasion and throughout the year. One of the most helpful donations was in the form of a check for \$77.25 from Dr. Mackey-Smith designed to be used in the liquidation of an outstanding coal bill for that amount.

It is again due to the young ladies' auxiliary association that their work should be specially mentioned. Their efforts to supply the wants of the home during the past year have been untiring. During the winter they gave a most novel and unique entertainment, "Living whist," for the benefit of the home, the proceeds having been applied as a partial payment upon a note made by the trustees of the home in its behalf. The substantial aid so cheerfully rendered by this association is highly appreciated by the board of trustees.

Dr. Ida Heiberger has faithfully and skillfully ministered throughout the year, day and night, to the sick of the home. The manner in which she has discharged her duties as physician to the home reflects great credit upon her, both professionally and personally.

ELIZABETH HOEKE, *Secretary.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

## 380 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

## REPORT OF TREASURER.

## REPORT OF THE YOUNG LADIES' AUXILIARY ASSOCIATION.

*Officers.*—Miss Charlotte Campbell, 1712 N street, president; Miss N. R. Heth, 1911 I street, vice-president; Miss Charlotte Lovett, 2203 Massachusetts avenue, secretary; Miss Helen Rodgers, 1733 N street, treasurer.

Since the last report was issued the young ladies' auxiliary has given two entertainments for the benefit of the home. A garden party given in May, 1894, realized \$217, which was used (at the earnest solicitation of the board of trustees) in paying the interest on the loan. In January of this year the entertainment of "Living whist" was given, from which nearly \$500 was realized. Too much can hardly be said in praise of those who successfully carried through this entertainment, making it both an artistic and financial success. And the thanks of the association are due to all who helped to make the game of living whist such an enjoyable one. The committees have been kept busy supplying the demands made upon them from time to time for household articles, magazines, and clothing, with medicines, fruit, and other necessities for the sick. In closing this report we thank each one who has given us time, money, or encouragement in our work, and hope that it will still continue to interest every generous heart.

*Treasurer's report.*

| 3. Home committee.         | 9. Committee on printing and publication. |
| 4. Devotional committee.   | 10. Committee on entertainments.          |
| 5. Purchasing committee.   |   |
| 6. Committee on admission. |   |

III.—*Superintendent.*

SECTION 1. The superintendent shall keep a record book of all purchases and expenditures, and enter therein all receipts by donations or otherwise, with names of donors, in order that proper acknowledgments may be made.

SEC. 2. The superintendent shall notify the chairman of the committee on admissions immediately upon the admission of a new inmate to the home.

SEC. 3. All books, records, and papers connected with the home shall be opened and subject to the inspection of the board of trustees.

SEC. 4. All moneys received by the superintendent shall be transferred weekly to the treasurer, who shall receipt for the same.

## RULES OF ORDER.

1. Trustees desiring to speak shall rise when addressing the chair.  
2. The members of the board are expected to be promptly in their places at 11 a. m., at all meetings.

3. The sessions of the board will close promptly at 12.30 p. m., and all unfinished business will pass over to the next meeting.

4. Any motion made and seconded shall be distinctly stated by the chair prior to debate.

5. When two or more members rise to speak at the same time the chair shall decide between them.

6. A motion to adjourn shall always be in order, and decided without debate.

7. No motion for reconsideration shall be entertained unless made at the meeting during which the decision took place, or at the next succeeding meeting, and by a member who voted with the majority.

8. All motions shall be submitted in writing.

*Seal.*—The seal of this institution shall contain in the center a cut representing a young girl standing in a sunbeam; on her right a spinning wheel; on her left an altar with burning fire, surrounded by the words, "Young Woman's Christian Home Washington, D. C."

*Auditing committee.*—It shall be the duty of the auditing committee to audit the treasurer's accounts twice every year.

*Executive committee.*—The executive committee shall consider all the interests of the home, and propose measures for action and debate by the board of trustees. The chairman can call the members together whenever home interests render it necessary. In all important matters its powers are limited to advisory action, but minor business may be decided upon and ordered.

*Committee on devotional exercises.*—The committee on devotional exercises shall arrange for and superintend the weekly prayer meetings. The chairman shall determine the character of the exercises.

*Committee on purchases.*—The committee on purchases is authorized to honor all requisitions made by the superintendent and home committee to the amount of \$10. Any amount above this sum must be submitted to the board of trustees for approval.

*Committee on admission.*—The committee on admission of inmates to the home shall investigate and decide on all applications and rates of board to be charged. All questions in regard to the occupants and change of rooms must be settled by the chairman in consultation with the superintendent. Should any question arise in regard to the continuance of inmates, an appeal to the board must be made.

*Committee on legislation.*—The committee on legislation shall devise all plans for the well being of the home by legislative action, consulting with the advisory board whenever deemed necessary.

*Committee on entertainment.*—The committee on entertainment shall plan all entertainments, and with the help of the president appoint all committees necessary to carry out their plans. No bills shall be contracted without being approved by the chairman of the committee.

*Home committee.*—The home committee, appointed monthly by the president, shall audit the superintendent's accounts for board, table, and house expenses on Tuesday of each week, signing same when approved; draw all orders on treasurer for superintendent to settle weekly bills; inspect the home and premises, and recommend all repairs and expenditures needed for the comfort of the family.

*Printing committee.*—The printing committee shall order all printing necessary and contract for the publishing of the annual report, when ordered by the board.

*Publication committee.*—The committee on publications shall attend to keeping the home and its interests before the community by seasonable notices in the city papers of its work, entertainments, and whatever of interest transpires in its history.

All committees must present written reports of their work at each monthly meeting of the board of trustees.

## BOARD OF TRUSTEES OF YOUNG WOMAN'S CHRISTIAN HOME FOR 1894 and 1895.

Mrs. James A. Bates, president; Hon. Thomas P. Morgan, Miss S. A. Lipscomb, and Mrs. D. W. Brown, vice-presidents; Mrs. W. H. Hoeke, secretary; Mrs. W. W. ## CONSTITUTION OF THE YOUNG WOMAN'S CHRISTIAN HOME.

ARTICLE 1.—*Name and object.*

SECTION 1. The name of the institution shall be "The Young Woman's Christian Home."

SEC. 2. The object of the institution shall be, first, to provide a temporary home for young women under 35 years of age, who are in need of shelter and help; and, second, the maintenance of a suitable building for the purpose specified.

ARTICLE 2.—*Trustees*

SECTION 1. The board of trustees shall consist of 30 members, or more, 5 of whom shall constitute an advisory board, all of whom shall be annually elected.

SEC. 2. When vacancies occur on the board, names for new membership may be presented only in writing to the executive committee, who at a subsequent committee meeting will act upon them. The names decided upon will then be presented at the next meeting of the board for election.

SEC. 3. Each trustee must pay an annual subscription of \$5 into the treasury (due January 1), and a fine of 50 cents for each absence from the regular board meetings. In case of protracted absence, and failure to pay subscriptions and fines, the delinquent will be considered as having resigned from the board.

ARTICLE 3.—*Membership.*

The membership of this organization shall consist of four classes: Life, honorary, sustaining, and annual. Any person may become a life member upon payment of \$100 at any one time; an honorary member upon payment of \$25 at any one time; a sustaining member upon payment of \$5 per year, and an annual member upon payment of \$1 per year.

ARTICLE 4.—*Officers.*

The officers shall be a president, three vice-presidents, secretary, treasurer, and building fund treasurer, who shall be annually elected by the board of trustees. There shall also be a superintendent elected in the same way and for the same time, who shall receive a fixed compensation.

ARTICLE 5.—*Duties of officers.*

SECTION 1. The president shall preside at all the meetings of the board and appoint all committees. In case of her absence it shall be the president's duty to notify the vice-president. The president shall have a general supervision of all the interests of the home, and be, *ex officio*, a member of every committee.

SEC. 2. In the absence of the president, the vice-presidents, in their order, shall attend to the duty of the president.

SEC. 3. The secretary shall take minutes of the proceedings of all the meetings of the board, and transcribe them into a record book. She shall send to each member of the board a notice of each meeting, notify all committees of their appointments, conduct the correspondence of the home under the direction of the president, and issue, in connection with the treasurer, the annual report of the home.

SEC. 4. The treasurer, before entering upon her duties, shall give bond in a sum not less than \$1,000. She shall receive the funds of the home, deposit them in a national bank to the credit of the Young Woman's Christian Home, and disburse the same only upon requisition signed by two of the home committee or the president. She shall render a report of receipts and disbursements monthly or oftener, if required, to the board, and an annual report thereof at the annual meeting.

SEC. 5. The treasurer of the building fund shall deposit in a national bank all moneys paid to the credit of the Young Woman's Christian Home and pay out the same as provided. He shall give bond to the required amount. All checks on the building fund shall be signed by the president and countersigned by the secretary.

SEC. 6. It shall be the duty of the superintendent of the home to be regularly in attendance, to direct household affairs, to admit worthy applicants not over 35 years of age, and immediately notify the committee on admissions. She shall admit for a night's lodgings any woman who may apply, so far as the accommodations of the home will permit.

ARTICLE 6.—*Meetings.*

SECTION 1. There shall be a meeting of the board of trustees on the second Thursday of each month at 11 a. m., at which the secretary, treasurer, superintendent, home and special committees shall make their reports.

SEC. 2. The annual election of officers shall take place on the second Thursday in November. One or more candidates shall be nominated in open board meeting for each office, and the election proceed by ballot. The candidate receiving the highest number of votes for any office shall be declared by the chairman of the meeting elected to that office.

SEC. 3. At the annual meeting the secretary, treasurer, and home committee shall make their annual reports of the condition of the home, and the moneys received and disbursed.

SEC. 4. Special meetings of the board may be called by the president, or, in the absence or sickness of either of the highest officers, by the next in order. Special meetings may be called by the president upon the written request of six members of the board of trustees at any time or place they may specify.

SEC. 5. At special meetings no business shall be transacted except that specified in the call.

SEC. 6. A quorum for the transaction of business shall consist of six members.

ARTICLE 7.—*Amendments.*

The constitution and by-laws of this organization may be amended at any regular meeting of the board of trustees by a two-thirds vote of the members present, provided notification in writing shall have been served upon or mailed to the trustees previous to the meeting at which the proposed amendments are to be acted upon.

## ACT OF INCORPORATION.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That Mary G. Wilkinson, Benjamin H. Warder, Octavius Knight, Thomas P. Morgan, Eliza N. Blair, Emma E. Dorsey, Nathaniel Wilson, Francis H. Smith, A. J. Falls, R. D. Mussey, E. D. Powell, Caroline M. Lawrence, Francis E. Childs, H. A. Hall, Elphonzo Youngs, Addison M. Smith, and their associates and successors, be, and they are hereby, constituted a body politic and corporate in law by the name and style of the "Trustees of Young Woman's Christian Home;" and by that name may sue and be sued, plead and be impleaded, have perpetual succession, and shall and may take, hold, mortgage, and dispose of, at all times, real and personal estate, and shall and may do and perform all other acts and

things necessary or appropriate for the execution of the purposes, charities, and trusts for which the said corporation is created, and which are set forth in the second section of this act; and said corporation shall have power to adopt and make such constitution, by-laws, and regulations as may be appropriate and necessary for carrying out the purposes of the said incorporation, including provisions for the election of trustees and other officers and agents of the corporation, the filling of vacancies occurring in such offices and agencies, the taking, holding, and management of the property of the corporation, and the sale and conveyance thereof, when necessary for the purposes of such corporation, and the transaction of all other business appropriate and necessary to the purposes of such incorporation, with power to adopt and use a common seal for such corporation, and the same to alter at pleasure.

SEC. 2. That the object, purposes, and powers of said corporation shall be, and the same are hereby, limited to providing temporary home for young women coming to and being in the District of Columbia, who shall, from any cause, be in want of and willing to accept temporary home, care, and assistance in the said District; and for the purpose aforesaid the said corporation shall have power to take, hold, use, and enjoy all such real and personal property, endowments, and contributions, whether by devise, gift, or otherwise, as may be appropriate for the establishment, maintenance, and success of the said institution; and also to acquire, take, hold, use, occupy, manage, and own, either in fee simple, or by lease, or otherwise, such real estate in the said District, not exceeding in its appraised value the sum of two hundred thousand dollars, to be used, held, occupied, and enjoyed for the purposes of such home, and for the residence and the use of the proper and necessary officers, employés, and agents of such corporation: *Provided*, That the property, whether real or personal, owned by the said corporation, and used exclusively for the charitable purposes of the said organization, shall be exempt from taxation.

Approved February 23, 1886.

## REPORT OF HOPE AND HELP MISSION.

DEAR SIRs: We beg to submit to you the following condensed statement of the work of the Hope and Help Mission for the fiscal year ended June 30, 1895:

*Receipts from all sources.*

|  |          |
|--|----------|
| Government funds .....                         | \$500.00 |
| Donations and work of inmates, cash .....      | 500.75   |
| Donations of clothing, cash value .....        | 100.00   |
| Donations of provisions, cash value .....      | 300.00   |
| Donations of work of inmates, cash value ..... | 300.00   |
|  | <hr/>    |
|  | 1,700.75 |

*Expenditures.*

|                                     |          |
|-------------------------------------|----------|
| Rent .....                          | \$440.00 |
| Matron's salary .....               | 180.00   |
| Tith and other expenses, cash ..... | 447.25   |
| Cooking provisions, and work .....  | 700.00   |
|                                     | <hr/>    |
|                                     | 1,767.20 |

|                     |       |
|---------------------|-------|
| Due treasurer ..... | 66.45 |
|---------------------|-------|

*Summary of work done.*

|                               |        |
|-------------------------------|--------|
| Meals and lunches given ..... | 19,849 |
| Beds occupied .....           | 6,785  |
| Food service places .....     | 125    |
| Average family .....          | 18+    |

Our beneficiaries are largely women who are broken in health and unable to earn their own living by any employment which could be secured for them under the circumstances. Many of them have been betrayed, and going from us in due time to the city hospitals have become mothers. We have again cared for them after confinement, with their children, until we could secure homes for them or send them back to friends in the city or adjacent States. Others have been led to abandon vicious lives, and have been converted to new and better ways of living through the motherly advice and counsel of the ladies of the board through faith and prayer.

All have willingly taken part in the general work of the home, and it is the veriest exception where one has not been deeply grateful for the help she has received.

Many worthy but destitute women have been sheltered at the home for days or months, and the usefulness of the home has been thus largely increased, while the demand upon it is greater.

We ask for a larger appropriation next year, feeling that we should secure a larger building, as the drain upon our charity is far greater than ever before. We ask the Commissioners to aid us in securing such an appropriation.

We, the board of managers of the mission, appeal for a direct appropriation from Congress of \$1,000 in lieu of the \$500 now received from the poor fund of the District, the latter being entirely inadequate for the needs of the work. We feel fully justified in making this appeal

by the practical benefits which are being derived by the city from this work.

As to statistics, in addition to the large number of meals and lodgings already enumerated and of a temporal nature, we can testify that at least 14 women and girls have been clearly converted and fully redeemed from sinful lives during the past six months, and the aggregate for the year is at least 25. Our board, which is nonsectarian, is composed of Mr. James T. Petty and Mr. Thomas Jarvis, of the Southern Methodist Church; Mrs. Mary E. Catlin, of the First Congregational Church; Mrs. L. D. Luckett, of the Metropolitan Presbyterian Church; Mrs. E. K. Knowles, of Vermont Avenue Christian Church; Mrs. M. M. Mitchell, of Waugh Methodist Episcopal Church, and Miss Mary Rector and Mrs. S. D. La Fétra of the Metropolitan Methodist Episcopal Church. All of these are actively engaged in systematic work in their own churches, and all testify to the statement that this work pays as good a percentage in practical results as any other work they do for humanity.

The rule of the mission is to enable the mothers to be true to their children, for it is believed this is a strong factor in the redemption of the woman. It gives them a strong motive to try to redeem the past, that the innocent victims of their fall may not also be the sufferers for their guilt. We plead for this appropriation because we desire to open a nursery, well heated, lighted, and well ventilated, where we can have competent nurses and proper food, and where these mothers may leave their children when they go out to service to earn an honest living. We want to "make it easy to do right and hard to do wrong," if possible.

Respectfully submitted.

SARAH D. LA FÉTRA,  
*President Board of Managers.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## REPORT OF TEMPORARY HOME FOR EX-UNION SOLDIERS AND SAILORS.

WASHINGTON, D. C., *June 30, 1895.*

DEAR SIR: The board of managers of the Temporary Home desire to present a statement of the work that has been accomplished since the inception of the home, September 1, 1888, and the reasons for its organization and continuance.

Those of you who are familiar with the relief work of this department know that the question of relief has been and is now one of great anxiety and responsibility, and as the years roll round the work increases in magnitude. The object of our Temporary Home is to care for our comrades who come here temporarily and have no place to stop and nothing financially to keep them during the few days they may desire to remain. Some come here to see about their pension claims, bounty, or back pay. Many come to try to gain admittance to the different national or State homes. Washington is their Mecca. From the year 1885 to July, 1889, the following statement shows the amount expended per year for meals and lodgings by the department in aiding such comrades:

|            |          |                       |          |
|------------|----------|-----------------------|----------|
| 1885 ..... | \$122.20 | 1888 .....            | \$445.05 |
| 1886 ..... | 154.20   | 1889 (to July 1)..... | 215.80   |
| 1887 ..... | 109.80   |                       |          |

From this statement, taken from the department reports, it will be seen that the work of aiding our comrades, who had really no claim on the relief fund of the department, was growing to be quite a tax on its members, and deprived the relief committee of quite an amount of money which ought justly to have been paid out to our own needy and resident dependent families.

The subject was frequently discussed in different forms by the relief committee at its meetings. Our good old comrade, Chaplain Kramer, who at that time had a Seamen's Bethel near the navy-yard, twice presented the idea of sending all applicants to his Bethel, but the plan was not deemed feasible by the committee, as it was too far away. In August, 1888, he proposed to close the Bethel, and suggested to some comrades and to the post of which he was a member (Lincoln, No. 3) that a meeting be called of comrades who were interested in this kind of work, the result of which was that a call was issued for a meeting at his house, August 26, 1888, at which the following comrades were present: Samuel A. Kramer, James M. Pipes, Thomas R. Turnbull, David P. Craig, W. W. Hibbard, Theodore E. Clifton, James E. McCabe, and J. R. Brown. After a thorough discussion of the question it was resolved to open a temporary home, and an organization was effected and officers chosen to initiate and carry out the project, and September 1, 1888, the Temporary Home for ex-Union Soldiers and Sailors was opened at 1410 D street NW. Each comrade present pledged himself to raise \$10 within a week's time to start it, and from September 1, 1888, to June 30,

1889, the home was supported by contributions from the different posts of the department, by gifts from various members, and by the relief committee paying to the board of managers the same amounts for meals and lodgings that had been paid to outside parties. The whole amount contributed and expended to June 30, 1889, was \$732.32.

In October, 1888, the managers resolved to incorporate themselves under the laws of the District, in order to be in shape to appeal to Congress for aid, the result of which action and appeal was that Congress granted the board \$2,500 for the fiscal year commencing July 1, 1889.

The premises occupied on D street were not desirable for our purpose and the home was removed to 317 Missouri avenue NW. A complete outfit of furniture was purchased and the home was opened there July 1, 1889. Finding that necessary improvements for the comfort of our comrades would not be made, the premises now occupied, No. 305 Missouri avenue, were leased. This spring the house has been painted inside, ceilings and walls calcimined, and parlor, halls, and dining room papered, and the whole house thoroughly renovated, making it in all respects a comfortable and pleasant temporary home. We have now 29 iron bedsteads with woven-wire springs, good mattresses and pillows; also 15 woven-wire cots with the mattress and pillows, besides some extra mattresses and pillows to lay on the floor in case of a larger demand for sleeping accommodations. We can comfortably care for 40 inmates. The greatest number at any one time accommodated was 65 and the smallest number 5. We have a good bathroom and separate washroom, also a room for smoking and relating war experiences. We have a good reading room, for which we desire a more liberal supply of reading matter.

Our dining room seats comfortably 30 at a time. Breakfast is served at 8.30 in the morning and consists of some kind of meat, which is different each day—liver and bacon, or sausage, or hash—codfish, with potatoes, bread, and butter, and coffee. Dinner at 4.30 p. m., with a change of meat each day—roast beef, corned beef, corned shoulder, beef or mutton stews—baked beans, potatoes, onions, rice, bread and butter, and tea. The food is plain, but wholesome, substantial, and well cooked.

The annexed table shows what has been accomplished from the time the home was opened at 317 Missouri avenue, July 1, 1889, to June 30, 1895:

| Fiscal year.                         | Admissions. | Meals served. | Lodgings furnished. | Expenditures. |
|--------------------------------------|-------------|---------------|---------------------|---------------|
| July 1, 1889, to June 30, 1890 ..... | 936         | 15,924        | 7,303               | \$2,778.44    |
| July 1, 1890, to June 30, 1891 ..... | 951         | 17,710        | 8,169               | 2,719.91      |
| July 1, 1891, to June 30, 1892 ..... | 1,412       | 24,212        | 10,915              | 3,179.91      |
| July 1, 1892, to June 30, 1893 ..... | 1,258       | 21,323        | 9,381               | 2,979.43      |
| July 1, 1893, to June 30, 1894 ..... | 1,036       | 18,804        | 8,364               | 2,516.76      |
| July 1, 1894, to June 30, 1895 ..... | 975         | 18,414        | 10,385              | 2,686.00      |
| Total .....                          | 6,568       | 116,387       | 54,517              | 16,860.45     |

The number of meals served shows that each inmate was furnished on an average 18 meals, which would make the length of stay at the home nine days, at a cost of \$2.57, or 28.2 cents per day, each. This covers every expenditure of the home during the six years, furniture, bedding, food, fuel, lights, rent, salaries, repairs, ice, medicine, clothing, and sundry minor expenses. Government appropriations during that period amount to \$15,000, showing that \$1,860.45 was received from outside sources in the same length of time.

Our furniture is kept insured for \$750, and Comrade G. W. Balloch, of Post 1, for the past three years has kindly kept the policy good as his contribution to the home.

The department commander, in his annual address to the encampment of 1892, speaking of the Temporary Home, says:

But for it the bulk of this work would have fallen upon this department and bankrupted our relief fund before the year had fairly commenced.

The magnitude of this work has far exceeded the conceptions of the original board of managers, but their earnest and persistent efforts have enabled them to meet all its demands. Every applicant for the hospitalities of the home is obliged to furnish some evidence of his service in the late war—either original discharge, copy of certificate of service, pension certificate, State certificate of enlistment and discharge, or Grand Army card. Occasionally men apply who are not able to furnish any of these, but by giving name, company, regiment, and State, or, if a seaman, giving the name of the vessel on which he served, our superintendent is enabled, by application to the War or Navy Department, to have the statement verified.

Major Moore, superintendent of police, through his very efficient aid, Comrade J. A. Frank, sanitary officer, has rendered us valuable service by sending sick comrades to the hospitals, and kindly aided our penniless comrades in many cases by furnishing transportation.

Comrades J. H. Bradford and W. H. Gotwald, as chaplains, have generously given their time and services to the religious exercises which are held at the home at 3 o'clock p. m. every Sabbath afternoon, and report exceedingly attentive audiences and interesting services. They are aided by volunteer talent from their churches and by comrades in the singing and playing the organ.

As long as our comrades continue to come to Washington on what they deem to be very important business to them, just so long will the maintenance of this home be a necessity as a resting place for a few days. None of us will be here many years more, but so long as we are able to relieve the necessities of those who are not so fortunate as ourselves let us do all we can to make their burdens as light as possible, especially as the General Government so kindly aids us by bearing the financial part of the work, leaving to us the labor of love in dispensing this aid and blessing to our comrades. As many of them still come to us destitute of proper clothing, we appeal to the benevolent to supply this need, which we are unable to do.

To all of our comrades, to the Women's Relief Corps, to the Legion of Loyal Women, and all of our friends who have kindly aided us by donations of money, clothing, books, etc., we tender our warmest thanks, and extend to each and all a cordial invitation to visit and inspect the home, where they will find and receive a cordial welcome from our superintendent.

Respectfully submitted.

T. FITZGERALD,  
*Superintendent.*

---

BOARD OF MANAGEMENT, 1895.

D. P. Craig and James E. McCabe, Lincoln Post No. 3; T. R. Turnbull and J. R. Brown, Kit Carson Post No. 2, incorporators. Newton Ferree, Post 1; A. J. Gunning, Post 2; J. A. Stidham, Post 3; Calvin Farnsworth, Post 5; W. H. Gotwald, Post 6; J. H. Bradford, Post 7; J. O'Meara, Post 11; Theodore Houseman, Post 14; Israel W. Stone, Post 15; Joseph W. Kirkley, Post 19; H. E. McMullin, Post 20.

*Officers.*—Calvin Farnsworth, president; Newton Ferree, vice-president; J. H. Bradford, treasurer; T. R. Turnbull, secretary; W. H. Gotwald, chaplain; T. Fitzgerald, superintendent.

## REPORT OF THE MUNICIPAL LODGING HOUSE AND WOOD YARD.

WASHINGTON, D. C., *July —, 1895.*

SIR: In reviewing the operations of the Municipal Lodging House in this city for the past fiscal year, it is a source of great satisfaction as well as gratification to be able to state that in so far as providing clean and comfortable accommodations for the homeless wayfarers who find their way to its doors and become entitled to its benefits under certain restrictions, so devised as to offer no inducements whatever to the undesirable element which might otherwise be attracted to our already overcrowded city of unfortunate and suffering poor, the expectations of the projectors and friends of this humane institution have been fully realized.

The work of the institution has been carried on in a quiet, unobtrusive, but efficient manner, and without any effort at ostentatious parade or public notoriety, its chief aim being to endeavor to rid the streets of our city of that class of humanity who habitually and persistently impose upon the charitably inclined.

It may be proper in this connection to state that impostors, as a class, have a wonderfully keen faculty for scenting an overflow of sympathetic love or pity from the gushing fountain of benevolence on the part of the good people of a city, and while they are quick to take advantage of public generosity, they are equally quick to abuse the privilege, so that in a majority of cases evil instead of good results invariably follow in what was no doubt honestly and sincerely intended as a truly charitable, Christian benefaction. From the fact that the mere advertisement of such generous treatment, without the exaction of anything in return therefor, serves to induce an influx of tramps and undesirable people, by tempting them to prey upon the substance provided for the deserving poor of such city, such advertisements should be discouraged. Fortunately, however, none of these harmful results are chargeable to the Municipal Lodging House system, which requires that a certain amount of work shall be done for the accommodations furnished. Yet, in the carrying out of these rules care has been exercised to see that no harsh measures are resorted to, or severe exactions demanded beyond that believed to be for the good government and proper discipline of the institution.

## RELIEF ORGANIZATIONS ELSEWHERE.

The relief districts organized by the Bethel Associated Charities of Cleveland, Ohio, are formulated largely upon the system adopted by our institution here in Washington.

The society requires an able-bodied man to do an hour's work for a meal ticket, and in promulgating the order to the public states "that the society is willing to help any deserving man, but a man that is too mean and lazy to work will receive no recognition."

The Charity Organization Society of Grand Rapids, Mich., in commenting on the management of relief work generally, divides the distressed poor into two classes, viz, the worthy and the unworthy, the worthy being the deservedly poor, the unworthy, the paupers, and states that advertised relief, afforded gratuitously, multiplies unworthy applicants and makes paupers.

It is not our purpose to discuss at length the various modes of relief administration in vogue in the District of Columbia and elsewhere further than will aid, by way of suggestion or illustration, in discovering the best method of dealing with a malady or great social fact that confronts us with tremendous force on the one hand, and to guard against ill-directed benevolence on the other.

There is no doubt whatever but what unchecked and unregulated giving tempts thousands from the hard path of duty, or, in other words, that misdirected almsgiving to tramps and door-to-door beggars works mischief and should be discontinued.

#### STATION HOUSES.

Out of the kind-heartedness and sympathy of our police officers a large number of tramps were permitted to lodge in the station houses during the past winter. Doubtless this indulgence was prompted by that spirit of sympathy for distressed humanity so characteristic of the American people, yet experience has taught that it is a matter of doubtful propriety, the tendency of which is to encourage an evil that has become a very heavy burden upon society.

In this connection I beg to call your attention to that portion of my last annual report which relates to the closing of the station houses in the city of Baltimore against the tramp class of lodgers.

By reference to that report it will be seen that the effect of the order to close the station houses against the class of lodgers referred to resulted in forcing them to either go to the wood yard or leave the city, the latter alternative being adopted in almost every case.

Bearing directly upon this subject, I beg to call your attention to the following extract, as found under the heading "Editor's notes," in the May number of *The Charities Review*:

The last annual report of the overseer of the poor of Boston, speaking of the Wayfarers' Lodge, which was established sixteen years ago with the intention of doing away with the tramp evil in Boston so far as possible, says that it was hoped that all tramps coming to Boston would be cared for by the lodge, but that gradually the police got into the habit again of receiving tramp lodgers at the station houses. A large number were taken in each year, until in the winter of 1893-94 the police actually harbored a larger number of tramps than the Wayfarers' Lodge. This was felt to be encouraging the tramp in his evil ways, and in December, 1894, the police discontinued the lodging of tramps save in a few exceptional cases. The results were remarkable. A large increase in the number of tramps put up by the Wayfarers' Lodge might have been expected. Nevertheless, the number of lodgers accommodated not only showed no increase immediately upon the adoption of the new rule, but has never shown any increase, and the lodge is actually receiving a smaller number of men than a year ago. The meaning of this is that tramps would rather avoid Boston and the lodge, where they are compelled to do a few hours' work, and spend the night in an adjoining town.

#### A MORE SUITABLE YARD.

It having become a settled fact, after a thorough trial, that all other methods, such as free-soup houses, free lodgings, alms, attempted reformation, Sunday breakfasts, etc., have not only proven to have been failures, but in the end have actually had a harmful effect on the tramp element, and it is now conceded by those who have made a study of the problem that the wood yard, having passed its experimental

test, now furnishes the only correct solution to the evil in question. A celebrated writer on this subject states that "no surer way has been discovered for sifting the unworthy from the worthy than a labor test. An investigation will show whether a man is out of work, but it will not show whether he desires work."

Dr. S. H. Dana, president of the Associated Charities of Quincy, Ill., in his recent annual report, says:

There is nothing that requires more wisdom than charity. Unintelligent charity is pernicious. The best of alms may be and often is promotive of injury and conducive to degradation and crime. The soft-hearted and soft-headed and unwise givers deserve to be numbered among the foes of society. It is to them we owe the tramps, and to them that we owe the professional beggar, and to them we owe the degradation of poverty into pauperism. They take away from many the incentive of work and place a premium on idleness. They are the breeders of tramps and the promoters of pauperism. They weaken the self-respect of the worthy poor and encourage beggary and thriftlessness. It is beyond our comprehension why, when there is a society organized for the very purpose of intelligent administration of charity, persons will still go on aiding the undeserving, making no inquiry as to the worthiness of the applicant.

Such being the case, I would once more respectfully call your attention to the imperative necessity for securing a more suitable building and yard for carrying on this work. This being the capital of the nation, it would seem eminently proper that it should be provided with a model plant, embodying in its construction all the advanced ideas of the age and times, so that our national legislators, as well as our best citizens of the District, would look upon it with just pride.

I feel a deep earnestness in this matter, and would most respectfully urge that Congress be asked to make an appropriation of \$35,000 with which to carry out this much-needed improvement.

With a yard containing a storage capacity of, say, 50 cords of wood, I could supply the District government with its sawed and split wood, thereby saving to the said government the amount of money annually appropriated for that purpose. In addition to this, a business of selling wood could be established whereby another source of revenue could be obtained.

In conjunction with this idea, the idea now in vogue of providing fuel for free distribution among a certain improvident class of people, through money placed in the hands of the police department for its purchase, should be discontinued, for the reason that this fuel could be handled at the wood yard, where rules could be established requiring these people to do work enough to at least pay half the regular price for such fuel. This last proposition would, in my opinion, be beneficial in at least two directions. First, it would have a tendency to lessen the number of beggars, a point that should never be lost sight of; second, it would add one-half to the amount at present expended. For example, in an expenditure of, say, \$1,000 under the present system, no profit whatever is realized; the \$1,000 is simply swallowed up, while under the new plan proposed the \$1,000 expended will yield \$500 additional, or \$1,500 total. So that with \$1,000 we have distributed \$1,500 in fuel. This same proposition would hold equally true in establishing a sale yard. Whatever profits that might accrue therefrom would to the same extent lessen the amount of appropriation required to maintain the house. But, as I have before stated, with the present building and yard neither of these propositions could be carried out. Hence I most earnestly recommend that a suitable plant be secured.

I would also ask for \$4,000 for the running expenses of the house for the fiscal year ending June 30, 1897, that being the amount annually appropriated for that purpose.

## STATEMENT OF MEALS AND LODGINGS FURNISHED.

The total number of persons cared for during the year ended June 30, 1895, was 5,733, being a slight increase over that of the preceding year, which was 5,531.

The total number cared for since the house opened to June 30 last, being two and a half years, was 12,462. During the past year 28,417 meals were served and 15,140 lodgings furnished, making a total of 56,205 meals and 32,672 lodgings since the house first opened.

## EXPENSES.

The total expenses for the fiscal year are as follows, viz:

|                                   |                   |
|-----------------------------------|-------------------|
| Provisions .....                  | \$826. 00         |
| Supplies .....                    | 732. 27           |
| Improvements .....                | 418. 57           |
| Salaries .....                    | 1, 570. 05        |
| <b>Total .....</b>                | <b>3, 546. 89</b> |
| Leaving a balance of .....        | 453. 11           |
| Different persons cared for ..... | 5, 733            |
| Residents .....                   | 137               |
| Nonresidents .....                | 5, 596            |
| Married .....                     | 194               |
| Single .....                      | 5, 539            |
| Secured work .....                | 130               |
| Refused to work .....             | 61                |
| Average time per man (days) ..... | 2. 6405           |
| Average cost per man .....        | \$0. 61868        |
| Cost per day per man .....        | \$0. 2343         |
| Cost per meal and lodging .....   | \$0. 08143        |

The table following will show the nationality and cause of distress of the people cared for during the fiscal year.

I am, sir, very respectfully, your most obedient servant,

W. H. DUNN.

Col. JOHN TRACEY,  
*Superintendent of Charities.*

## Nationality and cause of distress.

| Nationality.       | Out of work. | Tramps.      | Dissipation. | Sickness. | Immigrants. | Other causes. | Total.        |

| <b>Total .....</b> | <b>3 292</b> | <b>1 435</b> | <b>800</b>   | <b>44</b> | <b>44</b>   | <b>58</b>     | <b>5, 733</b> |

RULES OF THE MUNICIPAL LODGING HOUSE.

- (1) The house will be open for the reception of lodgers from 6 a. m. to 10 p. m., except for those who have registered, who are required to return previous to 9.30 p. m.
- (2) Breakfast served from 6 a. m. to 7 a. m.; dinner from 5 p. m. to 6 p. m.
- (3) No person under the influence of liquor will be admitted at any time.
- (4) No drinking, smoking, or swearing will be allowed.
- (5) All applicants admitted will be required to saw one-sixteenth cord of wood, or to do equivalent work for each meal or lodging.
- (6) All persons having stayed one night and wishing further accommodations are required to report not later than 2 p. m.
- (7) No person may remain longer than three days.
- (8) All meals for Sunday must be worked for on a week day.
- (9) At the sound of gong, at 10 p. m., all talking in rooms and halls will cease.
- (10) All valuables must be left in the office.
- (11) Any violation of these rules will debar a person from the house.

## REPORT OF THE CENTRAL UNION MISSION.

WASHINGTON, D. C., *July 6, 1895.*

SIR: In response to your request I have the honor to forward herewith a statement of the charitable work of the Central Union Mission for the fiscal year ended June 30, 1895. If it is not precisely what you desire I will take pleasure in modifying the form or adding to it any additional statements which you may desire. I thank you for giving us the opportunity to present a statement of the work done.

The Central Union Mission was organized to do religious work among the criminal classes and the poor people of the city, but incidentally it has become an important agent in the care of the poor. This feature of its work has constantly grown, until during the past winter it perhaps did as much or more in caring for the poor than any other organization. It has not, however, received any assistance from public funds in any way whatever, but has simply distributed what has been given to it for that purpose by the charitable public. Its charitable work is divided into two branches. It maintains an extensive industrial department, through which it is able to aid many men and women by giving them work, but in addition to its industrial department it has distributed food, clothing, and fuel to the poor families after due investigation of their needs. In the industrial department it has had wood sawing and broom making as particular features, to which may be added some mechanical work, with which it has furnished employment for a large number of men. It has facilities for feeding and lodging about 300 men and about 50 women a day. During the fiscal year ended June 30, 1895, 27,847 meals were furnished, and 18,458 lodgings, nearly all of which were paid for in work. During the winter an average of 125 men were lodged and fed. Meals, ample in quantity and wholesome in quality, are furnished in the dining room for 10 cents.

The women are furnished with sewing, laundry work, and household work, with which they pay for their lodging and meals. The entire industrial department is self-supporting, although it has been found necessary to give away lodgings and meals to such an extent as to sometimes cripple the resources of this branch. A steady improvement has been made during the past year in completing the equipment of the industrial branch. Bath tubs, fumigating apparatus, iron bedsteads put in for the lodgers, and some other elements have been either added or improved to such an extent that the equipment is now fairly completed and the system for handling so large a number of guests is complete and satisfactory. The receipts and expenditures in the industrial department during the past year have aggregated \$7,126.47. During the past fiscal year the mission received and expended in its relief branch \$7,299.83. Of this amount, \$3,033 came from the Central Relief Committee. To this sum should be added quite a large amount of food, fuel, and clothing distributed, the value of which has not been carefully estimated. The mission has had special facilities for the care

and the distribution of the necessaries of life by reason of the fact that it has not only its central station at its principal building on Louisiana avenue, but it has also ten branches in different parts of the city, in each of which it has a committee of workers who come in personal contact with the poor people of their section and are able to speak with personal knowledge of their needs and their character.
